One advantage claimed for pruning trees in June is that the wounds heal quickly. But while this is the case it should also be remembered that a healthy, perfect healing is of more importance than rapid healing. Later pruning heals more slowly and usually more perfectly. All things considered, the best plan in pruning is to prune annually and to do most of it during the summer, when it can be done with the thumb and finger. Of course, it is necessary to remove large limbs should they die from any cause or become diseased. August and September are good months in which to remove large limbs, but so far as can be the removal of large limbs should be avoided by annual praning.

James Wilson, Secretary of Agriculture, is making a general western tour of observation to learn in what respects the work of his department might be extended with profit to the agricultural districts. He completed a trip through Washington and Oregon, and after seeing the northern and central parts of this State has gone East through Nevada. Two problems of particular interest to California are being studied by Secretary Wilson. One is the finding of some good fodder grass that may be regularly grown on unirrigated and now neglected areas and at intervals of years planted on grain lands to give the soil a rest. The other is to experiment with the culture of the tea plant in California.

Where several co-owners abandon a mining claim and one of them desires to relocate, he must proceed to "advertise out" his former partners. The Supreme Court of Utah has rendered a decision in point in which it holds that such relocations inure to the benefit of all original joint locators and that the relocator holds the title thus acquired in trust for them. The court points out that the proper course of procedure is for the one relocating to "advertise out" the others in the manner prescribed by the Federal statutes, in case he desires to become the sole owner.

The capital stock of the Southern Pacific has been increased from $150 000,000 to $200,000,000, for the purpose of absorbing the Central Pacific. That is, Central Pacific stock is bought share for share by Southern Pacific stock, the arrangements with the Central Pacific stockholders entitling them also to $250 of Southern Pacific 4 per cent gold bonds with each ten shares of stock. Huntington is all right, so long as he can get enough bonds and stock certificates printed.

United States Senator Teller of Colorado was in Seattle the other day. Discussing National politics, he said that McKinley and Bryan would be the opposing candidates in 1900 and the the money question would be the paramount issue. As to the Philippine question he thought that the United States should maintain control over the islands.

There is little doubt that in all countries where water power is abundant electric power will come into general use on farms. It will be used to pump water, saw wood, churn milk, run the sewing machine and generally to do whatever can be done by machinery, as well as to supply light and possibly heat.

A short time ago an enormous meteor knocked off part of the Comancha peaks in the State of Sonora, Mexico. The enormous mass from the clouds has been visited and found to be composed of various metals, among which is iron fused, and in apparently a pure state, and a large proportion of gold.

The Chinese government is to be held responsible for any further shipment of arms through its ports to the Filipinos.

The Dryfus retrial is progressing in France, but the world will wonder if he escapes assassination.

The Panama canal is about one-fifth completed; the engineers call for a further expenditure of $100,000,000 before vessels may go from sea to sea. The workmen are negroes from Jamaica and other British colonies in the West Indies, who have been found to endure the climate better than any others, although they would be far from satisfactory as laborers to an American contractor. They are paid $1 a day in Colombian silver, which is worth about 40 cents in U. S. gold.

The smelter strike in Colorado has not yet been settled. The Board of Arbitration officially suggested a wage scale which was declared to be acceptible to the workmen, but the American Smelting Company says it cannot pay the scale without an increase of expense, and as they have already reduced the charge of ore treatment to the minimum figure the new scale can only be adopted by adding the additional cost to charges, which would affect the miner directly.

Liquid air is to be employed in the refrigerating car service, the Armours having purchased the right to use it, and will immediately construct cars for the purpose. If liquid air can be mechanically made and transported there can be little doubt that it will rapidly come into use for all kinds of refrigeration.

There is talk of enlisting 10,000 Apache Indian braves to fight the Filipinos—an idea projected by the "brotherhood of man" people. In that event no one would care which licked, were it not a sure thing that the victors, or combined remainder, would still have to be conciliated with powder.

Copper for immediate delivery in large lots seems to be obtainable in the Lake Superior region. The Calumet & Hecla Co. recently sold 5,000,000 pounds of metal at 18½ cents per pound for immediate delivery. It is the established policy of the company not to sell for future delivery.

Light requires eight minutes and eighteen seconds to pass from the sun to the earth. When one looks at the sun vertically it is not seen where it actually is, but where it was eight minutes and eighteen seconds prior, its true place being in advance of its apparent place.

At the Winsor, London, flower show sweet pea vines are exhibited which were grown from seed taken from the tomb of an Egyptian mummy buried 2900 years ago. The blossom is a delicate pink and white and is of less than ordinary size.

The new Secretary of War, Root, is said to be a close friend of Gen. Miles. If this proves to be the case there will probably be a shaking up of matters in the war department, and a new policy adopted.

The most prominent mining engineers and experts pronounced the whole Cripple Creek districts as worthless, stating that gold could not exist in such a formation. Over $8,000,000 has been paid in dividends by Cripple Creek companies.

Montana codes are compiled from California law and have been adopted by Gen. Otis of and for the Philippines.

NEW ADVERTISEMENTS.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

IN the Matter of the Estate of CARMEN C. G. CARRASCO Deceased.

Notice for publication of Time Appointed for Probate of Will.

NOTICE is hereby given, that SATURDAY, the Twenty-sixth day of August, 1899, at 10 o'clock a. m. of said day, and the Court Room—Probate—of said Court, at the town of Independence, in the County of Inyo, State of California, have been appointed as the time and place for proving the will of said Carmen C. G. Carrasco, deceased, and for hearing the application of Reliez S. Carrasco for the issuance to him of Letters Testamentary thereon.

D. J. HESSION, Clerk.

P. H. MACK, Attorney for Petitioner.

Dated August 8th, 1899

OFFICIAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this Fourth day of May, A. D. 1899.

D. J. HESSION, Clerk.

[SEAL]

P. H. Mack Independence Cal. Attorney for plaintiff.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

A Long Dog.

A lady living on Park avenue, Walnut hills, was recently presented with a full blooded imported dachshund, a living exemplification of the saying, "Man wants but little here below, but he wants that little long." This dog in particular has all the fine points of a true dachshund. Its length is at least four times its height, and its legs are stumpy and have the conventional crook of a golf stick at the foot. The lady has several other dogs and is quite a fancier of canines. The other evening a gentleman called who had heard a great deal of the celebrated animal. As he entered the darkened parlor a small yellow dog of no particular breed arose from a rug in front of the grate and, unnoticed by the gentleman, slowly walked toward the door. The dog crossed half way over the threshold and stood in such a position that a person in the parlor could just see its hind legs and tail. At that moment the maid lighted the gas, and the dachshund poked its head inquiringly through another open door. The gentleman gazed in amazement at the head of the dachshund peering at him from one doorway and the hindquarters of another dog visible in the other doorway, and then in the hearing of the servant ejaculated

"Lord a-mighty! I heard that this dachshund of hers was a long one, but this animal certainly beats my time!" —Cincinnati Enquirer.

Drawn at Night.

The architect and his friend the builder were driving back to the former's office. They had been out to the edge of the city to look at some work on which they were engaged. As they drove by a certain house the builder looked up at it proudly, saying: "There is a house that I built myself. I not only built it, but I drew all the plans. Every bit of work in it is mine." The architect looked at the house and smiled in a provoking way.

The builder noticed the smile and looked at the house in a new light. "How hard I worked on that!" he said. "In the daytime I had to do something else, but every night I would sit up late drawing on those plans I drew on 'em every night for a month."

The architect looked at the house again and smiled once more, and the builder saw him.

Again he turned his eyes toward the product of his brain, twisted his neck to squint at it after the carriage had passed it. Then he looked at the architect with humility. "It looks as if those plans were drawn at night, doesn't it?" he said, and there was pathos in his voice.—Worcester Gazette.

Pools on Murder Cases.

Bookmaking in murder cases is one of the forms of gambling here, which has opened a new field to the men who are willing to lay odds. The suggestion smacks of the ridiculous, but a gaudily dressed young man, with a few "notes" in his left hand and $40 in money in his right, appeared in the criminal branch of the supreme court here a few days ago. "Who's on trial?" he asked an officer. Being told, he consulted his notes and said:

"Let's see. Lawyer Blank; defense, insanity; charge, murder." And then, turning to the doorman again, "I'll bet you 1 to 10 he's acquitted."

The court officer looked puzzled, but was astounded when the gaudily dressed informed him he was making "book." The court officer saw that he made tracks, but not before over $900 in bets had been placed on the outcome of the case. An investigation showed that there are a large number of these bookmakers doing business around the New York courts, and their profits are said to be very large.—New York Letter in Pittsburg Dispatch.

Landor's Cravat.

At a friendly dinner at Gore House, when it was the most delightful of houses, his dress—say, his cravat or shirt collar—had become slightly disarranged on a hot evening, and Count d'Orsay laughingly called his attention to the circumstance as we rose from table. Landor became flushed and greatly agitated. "My dear Count d'Orsay, I thank you! My dear Count d'Orsay, I thank you from my soul for pointing out to me the abominable condition to which I am reduced! If I had entered the drawing room and presented myself before Lady Blessington in so absurd a light, I would instantly have gone home, put a pistol to my head and blown my brains out."—"Landor's Letters."

Joke on the Major.

The major, just returned from Boston, tells in strict confidence this story:

"I had engaged my berth and was standing on the rear platform five minutes before the train pulled out of the Park square depot, when a middle aged woman and a handsome girl, both ladies, passed me and entered the car, accompanied by a gentlemanly looking chap who carried their baggage. A moment later this fellow rushed up to me and said he was in a most embarrassing position, had his sister and mother aboard and had lost his mileage book. He would introduce me to them and give me any security for $25. I said I needed neither introduction nor security, but would give him $10—all I had to spare. He insisted on giving me his diamond scarfpin, and then rushed into the station to see if he could get more cash. As the train pulled out without him he came running wildly after it, but had to give it up.

"Then the porter approached me tentatively. 'Was that man annoying you?' he said. I told him no. 'He insisted on carrying the baggage of two ladies inside, sah, an—an—did he get any money out of you?'

"'Of course he didn't,' said I, but I took the first opportunity of examining that pin. It was worth about five cents."—Buffalo News.

Put Out as a Feeler.

Mr. Willingham—What would you do, Mr. Rockington, if I were to ask you for your daughter in marriage?

Mr. Rockington—Well, that is something that I hardly want to answer offhand.

Mr. Willingham—I'm glad of that. Now, if I could be sure that you would not answer with your foot I would feel free to go ahead.—Chicago News.

In the year 1306 a party of crusaders brought a number of rose bushes home to England with them from Damascus, and these flourished so well that in a short time the beautiful flowers were to be found everywhere throughout the country.

THE TWELFTH

ANNUAL FAIR

EIGHTEENTH AGRICULTURAL DISTRICT

Comprising ALPINE, INYO and MONO COUNTIES, California

AGRICULTURAL DISTRICT No 18 · STATE OF CALIFORNIA ·

WILL BE HELD AT

Big Pine, September 19th, 20th, 21st and 22d, '99, Calif.

The following racing events will occur, under the management of the Board of Directors:

TUESDAY, SEPT. 19th.

RUNNING—Indian Pony Race, 1 mile, 2 in 3 ..... $15

RUNNING—Untried Horses, one-half mile, 2 in 3 50

RUNNING—One-fourth mile, free for all, 2 in 3 50

WEDNESDAY, SEPT. 20th.

CARSON & COLORADO RAILROAD

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

JOHN J. MCLEAN,
Observer.

*Record beginning March 6th 1898

Real Estate Transfers.

The following deeds have been recorded since August 3, 1899:

P. J. Dunn to Hillside Water Co.; July —, 1899—320 acres land near Bishop, $10.

C. W. Clark to R. L. Rossi; July 22—40 acres ner Big Pine, $5.

F. G. Powers to Esther and Ethel Powers, May 23, 1993—Gift; 160 acres near Bishop.

A. Abbott to J. C. Stewart, July 20—Group of mines and spring, Ubehebe District, $1.

D. Eggleston to J. C. Stewart, July 20—Group in Ubehebe, $1.

Inyo Academical Association to Mabel E. Geiger; Dec. 3, 1897—Lot in Academy Addition, Bishop, $100.

Irene Geiger to Mabel E. Geiger; July 5—120 acres near Bishop, $10.

Sam Meredith to August Lazier; Aug. 2—5 acres near Big Pine, $100

Louis Schalten et al to Big Pine Water Storage Co.; Aug. 4—Water locations, $1.

F. W. Bedford to Wm. McDonald; May 17, 1898—80 acres near Bishop $500.

Bessie J. Hart to J. M. Lewis; July 7—Acre of land at Bishop, $50.

Bessie J. Hart to J. M. Lewis; July 6—320 acres land near Bishop, $3000.

Robt. Pollard to Geo. M. Boyder—Group of mines in Mountain Spring canyon, $10.

John Hunt to Robt. Pollard—Josie mine, $1.

Methodist Church.

During the absence of the Pastor at Conference there will be no preaching services at either of the Independence circuit appointments. Independence Sunday-school will meet at the usual hour on Sunday afternoons.

Due notice will be given of the resumption of services.

JOHN J. PARDEE, Pastor.

DIED.

SCOVIL—At the Inyo County Hospital, August 6, 1899, Thomas B. Scovil, a native of Ohio, aged 55 years.

Gustave and W. A. Sanger were down from Big Pine Wednesday last.

Mr. and Mrs. Irv. H. Mulholland returned from Onion Valley last evening.

H. M. Barton of Saline Valley was in town examining borax records the other day.

Consult weather report and find out that summer heat is moderating somewhatly.

Miss Maud Cook, with Rita, Marvel and Jimmy Church, went to Hawthorne Monday last.

Wm. L. Hunter has gone up into the mountains on this side, for a much-needed change and rest.

In nearly all cases the price of fruit and vegetables in a package is fixed by the poorest specimens, not by the best.

County Treasurer Bunney and party have returned from an attempted trip over the summit of the Sierras via Shepherd's canyon, having failed to try hard enough to make it.

Messrs. Fleming and James, mining men from Arizona, were up on Kearsarge Peak yesterday, examining the Cleveland or old Silver Sprout mine. They have gone over to the Reward to-day.

Rev. John J. Pardee left on yesterday morning's train on his way to the meeting of the Nevada Mission at Susanville. He expects to spend a few days with Carson friends camping at Lake Valley, above Tallac, in the Lake Tahoe region.

The premiums offered for educational work at the coming Fair should incite teachers and pupils to make their best efforts. Consult the list, and should any further information be desired address County Superintendent Hampton, at Bishop.

A correspondent writes from Lone Pine that there will be a ball game there on the 16th of September between a local nine and a nine from Bishop. There is sure to be good sport and all baseball sharps are invited to be present. There will be the usual exercises and a grand ball in the evening.

More mining failures have resulted from crosscut tunnels intended to tap the vein than by all other plans combined. Until a mine's development is sufficient to show that a sufficient ore body is in sight to justify the cost of driving a tunnel it is a most unsafe proposition. The best rule for beginners is the oft-repeated one, "follow the ore." A prospecting tunnel is a delusion and a snare.

Some Fair Regulations.

The premium list of the Twelfth Annual Fair is out, showing a liberal list of money awards for an extended and comprehensive number of local products.

The followingg regulations are given:

1. Exhibits can be made free of charge by any person in the District.

2. No premium will be awarded unless the exhibit is meritorious, in the discretion of the Board of Directors.

3. Special premiums will be awarded to worthy exhibits not named in the premium list.

4. Exhibitors for premiums must see to the delivery of their exhibits at the Park or Pavilion to the Superintendent of the proper department, and all animals or articles must be entered with the Entry Clerk by 12 noon on the first day of the Fair.

5. Parade of horses and cattle will take place on the third day; other animals and poultry to be shown in pens on the third day.

Every exhibitor receiving special premium will also be awarded diploma in addition.

Admission—Family Season Tickets, $5; Single Season Ticket, $2.50; to the Track, 25c.; to Pavilion, 25c.; to Entertainment, 25c. Children under 10, free; Lecture, free.

Mono Lake.

It was deemed of sufficient importance to telegraph all over the country that a lake had been discovered somewhere in Idaho, in the middle of which is a spring at a temperature of 170 degrees. That's nothing at all. In Mono Lake there are many springs at boiling heat, one of them covering at least an acre. Bottom cannot be touched with 300 feet of line. A short distance off there gushes up, higher than the surface of the lake, ice-cold water, pure and sweet, the surrounding water being harshly mineralized. These phenomena occur at intervals all over the lake. From a tufa column on the larger island 500 inches of boiling water gushes. Fifty feet away another mound of tufa ejects steam with great force from several vents, hot enough to run Reese's saw mill, if he could pipe the steam across the lake. But perhaps the most interesting natural freak is "fountain rock," a bunch of tufa rising a few feet above the surface of the lake, from which pours delicious water in a 40-inch stream. And there are scores of strange—even startling—features in and around this Dead Sea of America. The Idaho discovery is not worth considering.—*Bodie Miner.*

The Ubehebe Outlook.

Messrs. Scheu, Stewart and Mackay, the Eastern mining operators and capitalists, have returned from the Ubehebe copper-gold district, and in furtherance of their great enterprise sped on eastward by last Tuesday's train. Scheu and Stewart go to Salt Lake while Mackay goes on to New York.

They found it necessary to send to Salt Lake for miners; twenty-five local men are at work. The sum of $5000 has been paid on the purchase of the Sanger property, and all the rest will doubtless follow in due time. They found enough ore "in sight" to justify the construction of a railroad. If, after consultation with the Randsburg Railway people, that corporation does not see fit to push its road up through Panamint Valley, that the new Ubehebe organization will build one of its own.

Black Eagle Bullion.

During the past week Messrs. Barnes & Anderson sent in a bar of gold bullion weighing 65 ounces worth about $1000, the result of a run at the Reward mill of 21 tons of ore from their new mine, with the concentrates and tailings to hear from. It is a property to produce its own capital from the grass roots down.

The Randsburg *Miner* remarks that "There is much virtue in Coso mineral water and Bevan is doing a good thing for Randsburg in introducing it. It is a pleasant drink and very beneficial. It is especially good for rheumatism." Although the spring is in this county and owned by residents here, there is none of the water bottled to supply people with it. What the *Miner* says about the water is eminently correct.

The Ontario, Calif., *Record* fixes the value to Ontario of the late earthquakes at $50,000. The value to it the increased water supply the earthquakes were the means of unearthing.

AUDITOR'S REPORT

QUARTERLY REPORT OF COUNTY AUDITOR FOR QUARTER ENDING JUNE 30, 1899.

WM. D. DEHY, District Attorney of Inyo County.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, state of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899. D. J. HESSION,
Clerk.
(SEAL) By C. N. ROSE, Deputy Clerk.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st. 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the subscriber, under Sec. 2324. P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,
BISHOP, INYO COUNTY, CALIF.
JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

I believe Piso's Cure is the only medicine that will cure consumption.—Anna M. Ross, Williamsport, Pa., Nov. 12, '95.

Parson and Pheasant.

There was a sort of Jack Russell parson who was called in from his shooting one day to a christening, and with him came his factotum, who was both parish clerk and keeper. He put gun and bag down in the porch and commenced the service, but it was interrupted by a wild fluttering outside the open door, and one of the pheasants, which was not as dead as it ought to have been, rose up and flew hither and thither through the church with the noise and commotion of which only pheasants, and frightened pheasants, are capable. "Mark that cock, John," said the parson in his usual sonorous voice, and then resumed the service. And here again I do not think one of the little party around the font saw the humor of the thing, and certainly John, who replied "Yes, sir," with as much propriety and dignity as he had just been responding "Amen," saw nothing incongruous or unbefitting in the scene.—Longman's.

Couldn't Be Divided.

In Felix Moscheles' "Fragments of an Autobiography" occurs the following: Mme. Schumann was wanted to play at a little musical reunion, but she did not respond. Mr. Moscheles was deputed to approach her. "Was she inclined to play?"

"Particularly disinclined," was the discouraging response.

The envoy mentioned her husband's "Carnaval." "One part I particularly love, the 'March of the Davidsbundler.' If I could only hear you play just that page or two!"

This roused her. "Page or two indeed!" she cried. "Wenn man de 'Carnaval' spielt, spielt man ihn ganz." (When one plays the "Carnaval," one must play it all.) And she played the whole.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

THE QUEEN OF ENGLAND'S NEW FLOATING PALACE.

The Victoria and Albert, Queen Victoria's new yacht, launched at Pembroke, is unique among yachts, being, as it is, the largest of its kind of craft in the world. This new royal pleasure boat is as large as the United States cruiser Baltimore, and beside it William K. Vanderbilt's great yacht Valiant is only a moderately sized ship. The imperial German yacht Hohenzollern is by no means as spacious and bulky as the fine vessel of the Emperor's royal grandmother. The Victoria and Albert was built at the Government dockyard in Pembroke. Her keel was laid down Dec. 23, 1897, and Parliament appropriated nearly $1,500,000 for the work. The total cost will be fully that sum. The dimensions of the new yacht are: Length, 380 feet; beam, 50 feet; draft, 18 feet, and her displacement is 4,000 tons. The hull is steel, wood-sheathed and covered with copper. There are double bottoms, three funnels and two masts. Two sets of triple-expansion four-cylinder engines drive twin screws with a horse power of 11,000, derived from eighteen Belleville boilers. This locomotive apparatus will develop a speed of twenty knots an hour. The royal cabins are placed amidships on the main deck. In the upper deck aft is a roomy pavilion and over this is the promenade deck. This floating palace will be handled by a crew of 278 men and officers, the pick among the best sailors in Great Britain.

TO AVOID COLLISIONS AT SEA.

Hungarian Inventor Perfects a Device Which Works Very Well.

The cut shows a break which it is claimed will do for navigation what the automatic Westinghouse brake has done for railroads. The inventor thinks this appliance will go a long way towards preventing collisions at sea. It has been tried and found to be efficient.

The steamship Clotilde, a boat of 1,000 tons, owned by the Austrian Lloyd Steam Navigation Company, was equipped with the brake. The ship was driven ahead until a registered speed of ten knots was obtained. At a given signal the brake was applied. The engines were still run at full speed ahead. Thirty seconds from the time the whistle signal sounded the Clotilde was at an absolute standstill. Measurement showed that from the time the brake was let fall the vessel had travelled only twenty feet.

PATENT BRAKE FOR STEAMSHIPS.

The idea of the thing is simplicity itself. The brake, which is the invention of a noted Hungarian engineer named Svetkovich, consists of large curved plates of steel attached to the stern of the steamer. The shape can be varied, but it is preferably that of a parachute. It can be lowered at will, and instantaneously, into the water. The screw of a steamship, it should be explained, when working ahead, causes a stream of water of terrific force to flow back in the direction from which the ship has come. By lowering the plate of steel into this stream the power is obtained necessary to check the ship's way and bring it to a standstill independent of the engines.

Since the stream caused by the screw is of greater force when the ship is steaming fast, the brake would work equally well whether the speed were twenty knots or ten knots.

A FRENCH SAILOR-YARN.

Troubled Waves of Ocean Calmed by a Cargo of Varnish.

Clark Russell of England is the best-known teller of sea tales at the present day, and he certainly relates some marvelous adventures. But he will have to look to his laurels. Alphonse Allais of Paris, in a recent issue of Le Journal, gives the remarkable experience of a French sea captain, whom he allows to relate his own story. Since he set forth on his voyage from our own New England capital, which incontestably exists, and can be proved to be still in its place, perhaps we may accept his words as truth.

"Captain of the three master Lucien Guitry," he begins, "I set sail from Boston Jan. 28, with an exclusive cargo of varnish. What use people could possibly find for six thousand barrels of varnish I do not know—and besides, that has nothing to do with this story.

"The second of February, in the early morning, we were assailed by a frightful tempest. Waves as high as houses beat against my poor vessel, which strained and groaned threateningly. We could not endure much more; yet the sky showed no promise of change. We were in imminent danger; every shock increased our peril; it was impossible to survive such violence if it continued. What should we do?

"Pour oil upon the sea! Certainly, we thought of it; but, unfortunately, we had aboard only a litre of olive oil, destined for the mayonnaise dressing of an occasional salad.

"Suddenly my second officer was struck with an inspiration of genius.

"'Suppose,' cried he, 'we should pour on varnish! Varnish is much like oil.'

"At that moment the hurricane redoubled its fury; truly we appeared to be lost.

"'Pour on the varnish!' I commanded.

"The result was stupefying. At the first barrel emptied over to starboard the waves were visibly calmed upon that side; the second, poured to larboard, achieved a like success.

"Thereupon a sort of frenzy took possession of the entire crew, myself the foremost. Every one has heard of such a thing as a collective hallucination; this was a collective frenzy, a delirium of wild exertion! We poured; we continued to pour. When evening fell, we had poured overboard all our cargo of varnish—all! And the effect! Around us, at a distance, the storm raged more and more madly; but about the ship, in a circumference of at least a quarter of a mile, reigned the most tranquil of calms. That, however, was nothing.

"The morning of the next day I leave you to guess our stupefaction when we saw—what? The varnish, having hardened during the night, covered the sea with a thickish crust that glistened with an irreproachable polish! The French three-master Lucien Guitry seemed the center of an immense mirror of amber, upon which, with fairy-like effect, sparkled the beams of the rising sun!"

Folk Lore.

The research into popular beliefs is an absorbing and not a profitless study. Scarcely a day passes that we do not run across some piece of superstition that dates, in one form or another, from a far antiquity. Salt is spilled at table, and with jest with our neighbor over the prospect of a quarrel, half believing in the sign, though we may not know that the Romans did the same. A dog howls at night, and we recall the widespread belief that the howling of a dog foretells death, but forget that our early Aryan ancestors assigned to the dog the office of messenger from the world of spirits.

The every day custom is as old as humanity; the nursery jingle may be traced back to an origin in the world's babyhood; the familiar fairy tale which delights nineteenth century children is found in varying forms in all countries, pointing to a common origin in a remote age, embodying old Aryan myths, and giving us interesting information of the conceptions of our ancestors regarding nature and human life.—Lippincott's.

The Right Kind of Gloves.

A good story comes from an up-country mission station at the Cape. The occasion was a native wedding, and, as usual, the bride was attired in white hat, white dress and white shoes, but great surprise was occasioned by the fact that she wore black gloves. The native women on such occasions try to be quite a la mode, and there was a good deal of inquiry about the girl's departure from the usual custom of dressing entirely in white. The mystery was explained when she told the clergyman's wife that she had studied an English fashion paper, and had there read that the custom now was to wear flesh-colored gloves.—London Tit-Bits.

On Account of the Color.

There are of course some persons who know about books, says a bookseller, and insist on having the book they want without reference to the color of the binding, but the great mass of our customers judge by appearances. Drab books and gray books and brown books they won't have anything to do with; green books will pass; blue books sell a shade better; but red books always find a market. You can have no idea, unless you are in the trade, what a difference it makes to a book to be bound in red.

Largest Diamond in the World.

The largest diamond in the world is in the possession of the King of Potrugal, and is known as the Braganza. It weighs 1,680 carats, or fourteen ounces. It was brought from Brazil during the last century, and was then valued at some millions sterling by an expert, but its real value now is estimated at £400,000. It is uncut, and not a brilliant of the first water.

Largest Swannery in the British Isles

The largest swannery in the British Isles is that at Abbotsbury, in Dorsetshire, at the western end of the Fleet estuary. The swannery belongs to Lord Ischester, and contains over 1,000 swans. At one time the swannery held as many as 6,000 or 7,000.

Archaic Hair Tonic.

The oldest medical recipe is said by a French medical journal to be that of a hair tonic for an Egyptian queen. It is dated 400 B. C., and directs that dogs' paws and asses' hoofs be boiled with dates in oil.

Really Empty.

"What's an empty title, pa?"

"An empty title is your mother's way of calling me the head of the house."

Cycling in Turkey.

It is considered a heinous offense to ride a bicycle anywhere near the city of Constantinople.

STORIES OF RELIEF.

Two Letters to Mrs. Pinkham.

Mrs. JOHN WILLIAMS, Englishtown, N. J., writes:

"DEAR MRS. PINKHAM:—I cannot begin to tell you how I suffered before taking your remedies. I was so weak that I could hardly walk across the floor without falling. I had womb trouble and such a bearing-down feeling; also suffered with my back and limbs, pain in womb, inflammation of the bladder, piles and indigestion. Before I had taken one bottle of Lydia E. Pinkham's Vegetable Compound I felt a great deal better, and after taking two and one-half bottles and half a box of your Liver Pills I was cured. If more would take your medicine they would not have to suffer so much."

Mrs. JOSEPH PETERSON, 513 East St., Warren, Pa., writes:

"DEAR MRS. PINKHAM:—I have suffered with womb trouble over fifteen years. I had inflammation, enlargement and displacement of the womb. I had the backache constantly, also headache, and was so dizzy. I had heart trouble, it seemed as though my heart was in my throat at times choking me. I could not walk around and I could not lie down, for then my heart would beat so fast I would feel as though I was smothering. I had to sit up in bed nights in order to breathe. I was so weak I could not do anything.

"I have now taken several bottles of Lydia E. Pinkham's Vegetable Compound, and used three packages of Sanative Wash, and can say I am perfectly cured. I do not think I could have lived long if Mrs. Pinkham's medicine had not helped me."

The Doctor's Servant.

Calino, the French "Mrs. Partington," does not amuse so much by the confusion of his words as by the quaintness and unintended plainness of his remarks. He entered the service of a well known doctor, who, after Calino had been buying hay for his horses for awhile, made up his mind that the hay was worthless.

"That is very poor hay that you've been buying," the doctor complained.

"But the horses eat it, sir," said Calino.

"No matter. It's bad hay."

"Yes, sir," said Calino respectfully. "I'll change it. I know you are a much better judge of hay than the horses are!"

One day the bell rang, and Calino came in.

"A patient has arrived, sir," he reported.

"An old patient or a new one?" asked the doctor.

"New one, of course, sir," said Calino. "The old ones never come back!"

Calino admired very much the beautiful teeth of a lady among his master's patients.

"Ah!" he exclaimed. "Her teeth are as fresh and sound and white as a new born baby's!"

A Mean Subterfuge.

Sharp Dame—I must frankly tell you, Mr. Ginx, that my consent to your marrying my daughter has been wrung from me under protest.

Mr. Ginx—Eh? Protest?

Sharp Dame—Yes, sir. I knew that if I did not consent she would disgrace the family by an elopement. When she wants anything, we all have to give in to her or take the consequences, and long experience has taught me that I might as well try to fan off a cyclone as reason with her when she gets angry, especially if there is a flatiron or a rolling pin handy, and so I just give up at once. Has the wedding day been fixed on yet, Mr. Ginx?

Mr. Ginx—Um—er—not yet, and, in fact, madam, I'm—I'm a little afraid I can't afford to marry. Goo-good day.—Exchange.

Dangerous Fluids.

Benzine and gasoline should never be allowed to stand in a bottle or in anything else where the hot sun shines on it. Not long ago a house was set on fire in that manner. Never use either of these inflammable fluids in a room where there is ever so little fire. A match will ignite the volatile fumes exactly as quick as a base burner in full blast. We make no apology for this caution, for hardly a week passes that some one, somewhere, is not seriously burned by careless use of one or the other.

Why He Waited.

A hungry traveler, a stranger in Red Bank, N. J., entered a restaurant in that town and ordered ham and eggs, as that seemed to be the only available dish. After he had waited half an hour, staring impatiently at the bottles in the caster, he summoned the proprietor, whom he questioned regarding the delay. "The ham is all cooked," was the reply, "but my little girl is still out in the yard waiting for the hen to lay another egg."

Remember that you can buy Jesse Moore A. A. Whiskey for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

In ancient times and among inland peoples the possession of a salt spring was regarded as a special gift of the gods. The Chaonians in Epirus had one which flowed into a stream where there were no fish, and the legend was that Heracles had allowed their forefathers to have salt instead of fish.

INSOMNIA

"I have been using CASCARETS for Insomnia, with which I have been afflicted for over twenty years, and I can say that Cascarets have given me more relief than any other remedy I have ever tried. I shall certainly recommend them to my friends as being all they are represented." THOS. GILLARD, Elgin, Ill.

CHARLIE'S INFAMY.

The Brute's Appalling Cruelty to His Thoughtless Bride.

There is a certain Chicago bride who recently decided that her husband was an unfeeling brute and went home to mother for a peculiar and unusual reason. The mother was awakened just before dawn one morning last week by a sound of sobbing and weeping outside her own sleeping room door. Her horror and astonishment at discovering her only daughter in the depths of apparent desolation and despair can well be imagined.

"Charlie was cru-u-u-el to me," wailed the bride of a month or thereabouts mournfully, "and so I came home."

"But what did Charlie do—the wretch!" inquired the mother, ready to blame the husband on general principles. To this question, however, the bride returned no answer save bitter weeping. Then the mother, feeling that the case was beyond her, administered a nerve restorative and awoke the bride's father.

"Now, my child," began this individual, speaking with the authority of one who had settled all her difficulties from the time she could walk, "tell me immediately what that wretch of a husband of yours has done and he shall suffer for it whatever it is."

The bride's ardor cooled perceptibly. Her voice was almost steady as she began her story.

"Well," she commenced bitterly, her eyes flashing at the remembrance of her wrongs. "Charlie was out very late last night, and I thought I'd get up and—and—say something to him—when he came home. I had thought that so long as Charlie was going to be so late home I'd—I'd fix up my complexion a little. So, when Charlie got into bed in the spare room, I just forgot everything but him and went in there. And—and"—bitter sobbing again—"I forgot all about the beauty mask I had on and went right in with it upon me. And"—a perfect paroxysm of tears half drowned her words at this point—"Charlie must have thought I was a ghost, and he threw a pillow at me."—Chicago Inter Ocean.

FIGURES WITH FINGERS.

Origin of the Roman Numeral Method of Counting.

Hold your hands up before you, palms outward, thumbs at an acute angle. Begin on the left. Little finger I; little finger and ring finger II; little finger, ring finger and middle finger III; all the fingers of the left hand IIII; and the hand and thumb at an acute angle form V. In place of the IIII you may use the fourth finger from the left, still holding the thumb at an acute angle, and you have IV.

Now pass to the right hand. Holding the thumb and the hand at the same angle as before we have VI; by using the index and the middle finger we get VII, while the thumb and the three large fingers make VIII.

Now join the two V's made by the thumbs, inverting one, and we have X, or 10. Then use the X with the last little finger before it and it will give IX. The combinations following X are obvious. The forefinger of the left hand, with the thumb at right angles, make a perfect L; the little finger of the left hand curved toward the thumb makes C, the initial of centum (100), and so on with the hundreds. Now join the two thumbs with the forefingers, or two V's inverted, and you have the hieroglyphics complete.—Philadelphia Times.

A Historic Old College.

The first Greek letter society—Phi Beta Kappa—was organized at William and Mary in 1776, and among the charter members were John Marshall, chief justice, and Bushrod Washington, associate justice, of the supreme court; Spencer Roane, who was considered the ablest jurist ever produced in Virginia; John Brown and Stephen T. Mason, senators from Virginia; William Short, minister to Spain and Holland, and Elisha Parmalee, a native of Massachusetts, who established chapters at Yale and Harvard when he returned home. William and Mary was the first college to adopt the elective system of study and the honor system in the government of its students. The old building has been restored to almost its original condition, although in the days of its prosperity was double its present size.—Chicago Record.

"Waste Not, Want Not."

Little leaks bring to want, and little impurities of the blood, if not attended to, bring a "Want" of health. Hood's Sarsaparilla is the one and only specific that will remove all blood humors and impurities, thereby putting you into a condition of perfect health and strength.

Hood's Sarsaparilla Never Disappoints

A Millionaire Jockey.

Ancient Rome had its racing and its popular and well paid jockeys. Betting ran high, and the excitement of the people over the races and their favorite color frequently led to bloodshed. Caligula—he who made a consul of his horse—passed most of his time rioting with the charioteers.

The circus was the place for the racing. The largest of them, the Circus Maximus, about 21,000 feet long, could accommodate 480,000 spectators. Seven times was it necessary to race round the spina, a low stone wall running down the center of the circus. The jockeys drove in a light chariot—usually four in each race—and wore close fitting tunics and leather caps of distinguishing colors.

That the profession was a paying one we learn from ancient writers, money prizes and wages being paid. The jockey Crescens, at the age of 22, had amassed a fortune, and Diocles, king of jockeys, left to his son more than $1,000,000.—San Francisco Argonaut.

The Meanest Man.

A mean man on the south side agreed early in the week to meet a girl at luncheon down town last Saturday, and after luncheon they were going to the matinee. The girl kept her part of the contract. She wore a new silk waist and a new bonnet, and was in the lunchroom as the clock struck 1. After she had waited about five minutes there came a note from the mean man. It said:

"The inclosed cards will show you why I can't keep my engagement."

The "inclosed cards" announced that he had been married to a chum of hers that morning.—Chicago Inter Ocean.

CRITICAL PERIODS

In Woman's Life Are Made Dangerous by Pelvic Catarrh.

Mrs. Mathilde Richter.

Mrs. Mathilde Richter, Doniphan, Neb., says:

"I suffered from catarrh for many years, but since I have been taking Pe-ru-na I feel strong and well. I would advise all people to try Pe-ru-na. As I used Pe-ru-na and Man-a-lin while I was passing through the change of life, I am positively convinced your beneficial remedies have relieved me from all my ills."

Pe-ru-na has raised more women from beds of sickness and set them to work again than any other remedy. Pelvic catarrh is the bane of womankind. Pe-ru-na is the bane of catarrh in all forms and stages. Mrs. Col. Hamilton, Columbus, O., says: "I recommend Pe-ru-na to women, believing it to be especially beneficial to them."

Send for a free book written by Dr. Hartman, entitled "Health and Beauty." Address Dr. Hartman, Columbus, O.

Remember that cholera morbus, cholera infantum, summer complaint, bilious colic, diarrhœa and dysentery are each and all catarrh of the bowels. Catarrh is the only correct name for these affections. Pe-ru-na is an absolute specific for these ailments, which are so common in summer. Dr. Hartman, in a practice of over forty years, never lost a single case of cholera infantum, dysentery, diarrhœa, or cholera morbus, and his only remedy was Pe-ru-na. Those desiring further particulars should send for a free copy of "Summer Catarrh." Address Dr. Hartman, Columbus, O.

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form. . . . Sold by every druggist in the malarial sections of the United States. . . . . No cure, no pay. . . . Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

ST. LOUIS, MO., Feb. 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2660 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.

Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.

KEDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 15, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,
JAMES D. ROBERTS.

A LOVE SONG.

When Love comes to my garden
He walks with dainty tread,
The lilies blaze before him,
The moss-rose lifts its head;
The trim-kept lawns grow greener,
The borders blush with pride,
The buds burst into blossom
When Love walks by my side.

When Love leaves my sad garden
The roses' petals fall,
The jasmine's scented clusters
Fade, dying on the wall;
The lawns grow dock and thistle,
The paths are rank with weeds,
And all the dainty borders
Are strewn with fallen seeds.

Sweet Love, stay in my garden,
Rest in its rosy shades,
Bask in its scented sunshine,
Dream in its leafy glades;
Sing to the strings of pleasure,
Through all life's pentane;
Make every season summer,
Let every month be June.
—Pall Mall Gazette.

Fate's Caprice.

JOHN VAN STYVER pushed the swinging door of the postoffice, went in and dropped his letter in the box marked "Pacific coast."

"The little woman will be glad to get it, and if a big duffer like me can't earn his dinner somehow, why he don't deserve to have any," he mused.

The letter he had just dispatched was addressed to Mrs. John Van Styver, 204 Front Bay street, San Francisco, Cal.

It contained, besides an extensive collection of terms of endearment, which proved that Van Styver's collegiate education had been good, and that he possessed a considerable amount of enthusiasm and warmth of feeling, a check for every available cent he had in the world, sent to a violet-eyed young woman and a baby girl, living at the other extremity of the continent.

Of recent years all things had conspired against John Van Styver.

First a savings bank failure, then the protracted litigation over a mine, which John persisted was rightfully theirs, and could be worked at a profit, had swallowed up their remaining small capital, and now required more funds if the fight was to be kept up.

So when an offer came from a publishing house in New York to Van Styver to illustrate a new and promising periodical, he telegraphed his acceptance, packed his valise and took the night train east.

That was one year ago.

Of course, it would have been absurd to bring the two away from their cottage home to so trying a climate as that of New York, where the child would have sickened, possibly died.

Van Styver had not made a very profound art study, but there was a dash and spirit about his etchings and pen pictures, and his campfire scenes on the prairies and American Indians were so strong and original and full of life that his reputation had reached the big cities, resulting in the offer which brought him east.

After a six months' struggle the magazine collapsed, went down in failure, as did the salaries of those connected with it.

Determined and naturally buoyant, he threw himself heart and soul in the work, got a position of sketch artist on a big daily, dashed off an occasional reminiscence of California days, obtained occasional work from art dealers and had obtained an order to fresco the ball room and hallways of a millionaire's palatial residence, just completed, when persistent and nagging fate felled him in the shape of a protracted and desperate attack of typhoid fever.

Van Styver thought he had his foot in the stirrups and would mount and rise to success when obtaining the contract to decorate the ball room panels and arched gallery of the white marble house on Fifth avenue. He had completed his preliminary work, had received his first payment, had eagerly dispatched it home, when stricken down.

Two months of constant fever in a hospital, however skillful the nursing, leaves him a pretty sad wreck of his former self. Add to the shabbiness inevitable to garments worn unremittingly summer and winter, the broken and patched shoes, and weather-beaten hat, and the disguise is quite complete between a man in easy circumstances and a poor devil on whom the world looks askance and shows neither mercy nor favor.

Going to ascertain, Van Styver found his place taken on the newspaper and the mural decorations of the white marble house all completed.

A dogged determination seized hold of him to recuperate quickly and get an inning in the game, and his anger at the kicks and cuffs of fate gave him a revivified pugnacity of infinite value to him just then.

A windfall in the way of some illustrating to be done hurriedly gave him the check he inserted in the letter he dropped in the postoffice box before going to see if there was nothing to be had in the way of extra work at the office of the Herald.

There was nothing that day, and he went slowly back to the shabby dark hall room in a shabby and poor boarding house.

A letter had been brought by the postman during his absence, and was thrust under the door. Tearing it open, Van Styver read an agitated entreaty that he come back as fast as steam could take him. Their rosebud and joy lay ill—ill unto death, and her one cry was for him.

The manager of one of the departments of an enormous trunk line, a road having ramifications all over the Union, sat in his office in a dissatisfied brown study. Palmer Davidson had great responsibilities resting on him, which his big salary could not cover.

On the wide desk before which he sat lay a confusion of sketches, showing in more or less elaborate form and hackneyed style the route of the main line, from east to west, to be used as advertising cards by the road.

"Here, Dick, chuck these things in the fire, will you? They are not worth the pasteboard they are drawn on. Not one of 'em will do," said Davidson, turning to a young clerk who was checking up some books across the room.

"It seems d—d queer that there's not a single artist in this town who can catch my idea. Why, I explained what I wanted fully to at least fifty of them, and not one seems to have caught the faintest glimmer of what I want. If I could draw I'd do the thing myself."

"And yet, hang it all," said Davidson, rising and walking up and down his office, his hands in his pockets, "the road must have the cards out in a month's time for the spring traffic. There are those prairie lands out in Texas. It's got to be shown in a clever and novel way, what are the sections the road covers."

John Van Styver, gaunt, poorly clad, with bloodshot eyes and tumbled hair, a look of haggard wretchedness on his worn face, his hand trembling from weakness and anxiety, was not a prepossessing figure. Nor could Davidson distinguish between the ravages of typhoid fever on his once splendid physique or those which long habits of inebriety would have produced.

"What do you want, my man?" he asked, scanning the wan appearance of the figure before him with growing disfavor.

"To work my passage from New York to San Francisco on your road," said Van Styver.

"Ever been connected with a railroad?" asked Davidson.

"Never."

"This road doesn't take tramps. It has all the men it needs, and only employs honest, sober fellows," said Davidson, turning and taking up a letter to end the interview.

John staggered a little and sat down on a stool.

"Besides," continued Davidson, moved somewhat by the man's deep and intense disappointment, "I'm not the one to see about it. I have nothing to do with that department. But I may as well tell you at once you need not apply. We are turning off, not taking on hands."

John sat still and drew a long breath between his set teeth. The vision of a wan little face tossing on a pillow, of dark curls falling around two sweet, brown eyes, of a little voice calling incessantly for one who could not come, while the shadow of death was stealing steadily in, brought the dew out on his forehead.

"Hello! This one looks all right, sir. This one's good," said Dick, pausing before consigning one of the condemned sketches to the flames. "Why, it's fine."

"Let's see," said Davidson, interestedly leaning over to look at it. Dick spread it out on the desk before him with one other his youthful experience thought good.

"Bosh!" was Davidson's contemptuous criticism. "Why, it's old as the hills. I want a design which will show the line stretching from the dawning east to the setting sun in the west, without all this rubbish, with the light so arranged as to produce a novel and striking effect, a chariot driven by Progress, Development and Wealth, and ——"

The drawing was the best of those submitted. Davidson turned it from side to side to see if anything could be done with it.

During the pause which ensued John Van Styver, taking a blank sheet from his pocket and a pencil, dashed off a design, weird and bold and beautiful.

A vast, fair country, over a continent, the stars and moon glimmering in the west, and a resplendent burst of the rising sun in the dawning east; a chariot driven by three figures, horses whose mad rush was the embodiment of his own wild desire to reach that land where the waves of the great Pacific laved the seashore, stood out in splendid lines, and a great rush of prosperity was pictured as following the straight line of the great road as far as it ran from one ocean brink to the other.

Slipping the drawing over Davidson's shoulder, John placed it silently before him on the desk.

"Phew!" exclaimed Dick, with a violent start, looking on in astonishment at Van Styver.

Davidson said nothing, but looked long and hard at the splendid drawing before him. Getting up, he held out his hand to John.

"I don't know your name, but you are a great artist," he said with energy. "And what's more, you are the only one who could come near interpreting my idea, and you have executed it far finer than I had thought it out myself. I'll be glad to give you a pass to San Francisco, and I'll buy your sketch for $500."

A mist came before John's eyes, and without one word he wrung the hand hard which extended him a check and went out. "Be hopeful. Leave on train in hour's time, bringing money," he telegraphed.

Rushing to his forlorn room, John began to gather his few belongings and his loved photographs to catch the train. A telegraph messenger knocked at his door. With trembling terror he tore open the envelope.

"Our darling better. Come at once. Good news of mine. M. Van Styver."
—New Orleans Times-Democrat.

If a man tries to help his wife by weeding her garden, she accuses him of having pulled up the flowers instead of the weeds.

JUST seventy years ago something in the nature of a "boom" struck Chicago, gave it a start towards the great metropolis it has become. Before that, its history was practically that of a frontier village, a trading point. In 1830 a canal connecting the Illinois River with Lake Michigan was under consideration. Congress set

CHICAGO IN 1830 FROM THE LAKE.

apart land to aid the project. A portion of the allotment fell within the limits of Chicago. An auction sale was made, the lots bringing an average of $34. Deals in the same became brisk. A "boom" was started, settlers came in, Chicago began to make metropolitan history, and the years since then have been simply forward strides of majestic progress.

It is pleasant and interesting to note what occurred to bring all this about

FIRST COURTHOUSE, 1832.

prior to 1830. The first permanent settlement was made in 1803, when a sturdy Scotch-American named Kinzie followed in the tracks of French missionaries and explorers, and took possession of a rude squared hut, erected by a San Domingan negro named Jean Baptiste, who had drifted into the northwest twenty-six years previous. Kinzie established an Indian trading post, and as the pioneer merchant and business man laid the foundations of the greatest commercial city in the West. The government at once built Fort Dearborn, and here arriving visitors and settlers sought

NEW GOVERNMENT BUILDING.

protection, and the Indians exchanged skins and pelts for trinkets, general merchandise and whisky. In 1812 the savages practically destroyed the fort, and massacred fifty-two persons. In 1816 it was rebuilt. Within the next ten years churches, ferries, stores, hotels of a primitive character appeared on the scene, and the settlement became a town. Nearly all the new arrivals came to start in business. Competition became an immediate element, and as early as 1825 there was evident that keenness and foresight which made commerce the keynote of one of the greatest manufacturing and distributing cities in the world. In 1820 the government rewarded a resident for services rendered in negotiating peaceful relations with the Pottawattomies by building for him free the first frame house erected in the district. Chicago's most lordly cloud-grazer does not to-day attract such universal attention as did the owner of this princely structure. Up to that time everything was imported, and some idea of the progress attained during the past seventy years may be gleaned from the circumstance that the clapboards, sash, nails and brick used in constructing this modest little house were all brought from Cleveland, then a much larger city than Chicago. Four years later the first bridges across the river were constructed—one of these was made of floating logs tied together, and the Indians in its vicinity voluntarily contributed one-half of its cost, which was in the neighborhood of $400.

The Sauganash was the grand hotel in those early days. Here a half-breed kept a tavern, now within the memory of many a living patriarch of the West. He was the town's great musician, and just as Nero fiddled while Rome burned, he played for his guests while Chicago grew up. It is related that in those days such things as white sheets and table linen were a rare commodity, and that after a guest was asleep the specious landlord would invade his room with a hideous yell, suggesting "Indians!" whip away the sheet from the frightened stranger—who would prudently burrow in the blankets—while the trophy was smoothed out to do service as a table-cloth.

Began to "Feel Its Oats."

By 1836 the "Garden City" began "to feel its oats!" The first vessel built in Chicago was successfully launched, and ground was broken for the long talked-of Illinois and Michigan Canal. The Galena railroad was chartered. Speculation became rife, and real estate reached figures that discounted the wildest previous speculations. Chicago was now the largest town in the State, the question of incorporation was constantly agitated, and in the following year a charter was secured from the Legislature. The population had risen to 4,180 souls, there were 4 warehouses, 398 dwellings, 29 dry goods stores, 5 hardware stores, 19 groceries, 17 lawyers' offices, and 5 churches.

The young city, organized and ready for business, prepared for an immediate influx of population and wealth, but was doomed to suffer serious disappointment. A great panic presented itself, and waves of disaster and collapse swept over the entire land, from which Chicago suffered in common with other cities. A passion for investment had carried the people away, and a lack of money now led to no end of business failures. "Hard Times" held the city in its grasp. Retrenchment was necessitated, and 1838 followed gloomy as a continuous funeral. A severe drouth and a most serious epidemic visited the city. Amid this gloom the first theater was built. Strange to say, it was a success and was patronized by many who were unable to pay their debts.

For fully ten years the effects of the panic acted as a caution upon citizens. Legitimate trade was nurtured, and the marine interests of the city slowly built up. Newspapers were started, municipal buildings erected. In 1848 the Pioneer, a locomotive, arrived on a brig from the East, and pulled the first train out of Chicago over the Galena road. On Nov. 20 of that year the first wheat ever transported by rail arrived, and the locomotive began to make regular trips over the ten miles of the road then completed. From this insignificant beginning the most magnificent railway system in the world has been built up in half a century. It was the railroads that made Chicago the metropolis of the West, and it is the railroads that will ever keep the city in front, each new tributary line adding to its greatness. In the same year the canal was completed, and a board of trade was organized, with a total membership of eighty-two.

Some City Improvements.

Gas came to Chicago in 1850, and the Illinois Central Railroad began to plan out its line. In the following year the drinking water system of the city was put on a progressive basis, obviating the buying of small quantities from two-wheeled carts, which dispensed the same at the rate of from 5 to 10 cents a barrel. The rule now seemed to be the organization of a new railroad company about every two years. The Fort Wayne, the Michigan Southern, the Burlington and Quincy, the Alton, and numerous other lines sprang into being, but only at the behest of careful capital and hard, energetic labor. Some idea of the way these roads were built up may be gained from the fact that the Chicago and Northwestern Railroad of the present day consists of a consolidation of no less than forty-five separate and distinct lines. By 1855 eleven trunk lines centered at Chicago. In 1857 panic again struck Chicago, and a great many banks failed. During this year Chicago's first great fire occurred, thirteen persons losing their lives in the conflagration.

Two years later the first street railway made its appearance—a single-track affair, quite primeval. A strong disposition was now evinced "to lift Chicago out of the mud," and paving was the order of the day. Now the city began to be the center of important political events. It was in the Chicago Wigwam that Lincoln and Hamlin were nominated, and at the same structure many momentous war meetings were held. The city became the recognized center of the West. Its progress was now all along the line of rapid advancement, balked only by the great fire of 1871, a conflagration overshadowing any in the history of the world. Then came the years of reorganization and rebuilding. With 1890 the prospering metropolis had reached the 1,000,000 mark. The most imposing structures in the world were designed and constructed. The year 1893 saw the World's Fair open and close, after scoring a brilliant success. Great

SECOND COURTHOUSE.

crowds came to view the city for the first time from all quarters of the world, enormously swelling the already great population of the city. Electricity was advanced in its highest form in all the industries. Mechanics of every class here found the ideal field for progress. The social, literary and commercial interests had reached the highest typical plane. The city entered 1899 with a marvelous history behind it. The wonderful metropolis not only astonished the world, but surprised its own people.

Is To-day a Wonder.

To-day Chicago is a wonder to survey. Its vast area, immense population, magnificent buildings and enormous industries are known to and appreciated by all. The city comprises in its limits about 190 square miles of territory. It is twenty-five and one-half miles from its extreme north to its extreme south limit.

From absolutely nothing to a city of 2,000,000 people within the narrow limits of a single century, it has come to lead the world in many things—as a railway center, port, lumber market, grain market. In live stock of all kinds Chicago takes the preference. All this is not the result of chance or fortune. Good luck seldom has a run of sixty-one years. Chicago's present and prospective greatness rests upon her location at the gateway of a fertile country as large in extent as Europe. All outside territory has been tributary and helpful to Chicago, and the Iowa farmer, the Michigan miner, the Indiana merchant, the Wisconsin lumberman, have all helped to build up the metropolis in a way. A century ago the advantages Chicago utilized were counted trivial, but close application and shrewd enterprise have annihilated distance, bridged rivers, and tumbled mountains, until, for all practical purposes, Salt Lake City is nearer to Chicago than Boston was to Philadelphia the year Fort Dearborn was built.

VIEW ON CLARK STREET, 1857.

STATE STREET—1899.

AN OBSTINATE ARTIST.

He Painted a Red Ear on the Baron de Rothschild.

"A portrait painter can't afford to be entirely independent unless he has a tremendous vogue," remarked an artist who has spent a number of years in study abroad to a correspondent of the New Orleans Times-Democrat. "I remember when I first went to Paris, Sergeant, who is probably the greatest master in his special field that America has ever produced, was just beginning to attract attention. He had painted a portrait of his preceptor, Durow, that was generally applauded, and the still it created led to his getting a commission from the Baron Rothschild. It was his first big job, but he went about it with exactly the same nonchalance that characterizes him at present. During the last sitting, when the picture was receiving its finishing touches, it chanced that one of the Baron's ears became unusually red, a circumstance probably due to the heat of the room. Sergeant seized on it at once as a good bit of color and made the painted ear redder, if anything, than the original. When Rothschild inspected the portrait he was greatly pleased. 'But of course,' he said, 'you will tone down that left ear.' 'Oh, no!' replied the painter promptly. 'I think I shall leave it just as it is. I rather like that red.' The banker was astonished and very angry, and while he paid for the canvas he never hung it. Of course, the incident raised a laugh and the artist's obstinacy was admired in Bohemia, but it really did Sergeant a great deal of harm, and was one of the things that eventually determined him to move to London."

Mosquito Bite Pain.

The pain of a mosquito bite is caused by a fluid poison injected by the insect into the wound in order to make the blood thin enough to float through the mosquito's throat.

HOMESPUN PHILOSOPHY.

Observations of Commonplace Things by the Atchison Globe Man.

Believe very little others say, and watch yourself closely.

The great trouble is, fools are encouraged by everybody.

"Nobody has trouble equal to mine."—(You can all sign this.)

The greatest fraud in this world is the fraud we practice on ourselves.

Some people carry folly so far that they are willing to fool themselves.

A woman likes her friends to call her a "ridiculous child" until she is forty.

Anything in the way of bread that is particularly dry and crusty, is hygenic.

There are people with whom you always feel privileged to lose your temper.

There never was a cough medicine equal to wearing your flannels until late in the spring.

A man who is on a church committee feels as important as the commanding officer in an army.

Every man has some old thing to sell, and grumbles because he can't get anything for it.

If a woman doesn't worry about her husband, she can't convince other women that she cares for him.

There is one truth in palmistry: When a man's hand is doubled up into a fist, it means trouble for some one.

Old school medicine advocates regard homeopathy as living on the same lot with Christian Science, and no fence between.

When a married woman does not tell of troubles she is compelled to endure, the other women believe she is suffering in secret.

There is no greater credit belonging to anybody than to the man who knows a bad story on some one else, and has never told it.

Every woman imagines that she looks younger in a new hat, and that the more she pays for it the younger she will look.

The man who tells you a secret, and asks you not to tell, doesn't treat y right; he enjoys telling it, and for you having a good time.

A congressman captures some of constituents by shaking hands w them; others he is compelled to writ to, and a few demand more.

A fried egg ages more rapidly looks than anything else we know of An egg fried in the morning, looks thousand years old by night.

INEBRIETY AMONG ANIMALS.

Birds and Even Insects Show a Love for Intoxicants.

It is a curious fact that there are topers innumerable in the animal kingdom. Bipeds and quadrupeds alike are fond of alcoholic drinks, and, although some display aversion when first tasting liquor, they soon acquire a craving for it.

Chickens and ducks, after having once tasted brandy, become absolute slaves to the drink. They refuse to eat, grow thin and exhibit symptoms of dejection when unable to obtain their favorite tipple.

Monkeys and apes are passionately fond of spirituous liquors. Of these, Buffon's wine-bibbling chimpanzee was a shining example, and Brehm, the German zoologist, owned several mandrills that drank wine regularly and did not disdain brandy.

Herbivorous animals frequently become intoxicated, innocently enough, through eating decaying fruit. In orchards oxen and cows, after eating overripe apples, have been seen to display all the symptoms of drunkenness. They stagger, their eyes lose expression, and they grow sleepy.

It seems that animals are susceptible to alcoholism in proportion to the development of their intelligence. Elephants are fond of wine and rum, and rats gnaw the staves of wine casks to get at the contents. Cats, however, rarely exhibit a fondness for intoxicants.

Among birds the parrot takes first place as an habitual toper. Insects have many opportunities to become intoxicated, and it is the most active that most frequently avail themselves of the chance. There is an aromatic, intoxicating fluid in linden blossoms for which bees show an especial fondness.

Instances have been observed where swarms of bees regaled themselves with the poisonous linden nectar until they exhibited all the signs of intoxication. Hundreds fell helplessly to the roadside, to be trampled under foot.—New York Herald.

Giants of Patagonia.

The tribes to the east of the Cordilleras, in southern Patagonia, belong to Araucanian stock, and are a superior race. The Tehuelches—as they call themselves—of southern and eastern Patagonia are the people whose unusual stature gave rise to the fables of the early days to the effect that the natives of this region were giants averaging nine to ten feet in height. It is a fact that they are the tallest human beings in the world, the men averaging but slightly less than six feet, while individuals of four to six inches above that mark are not uncommon. They are in reality by no means savages, but somewhat civilized barbarians. They are almost unacquainted with the use of firearms, notwithstanding some contact with the whites, but they have plenty of horses and dogs.

Unsurpassed hunters, they capture the guanaco and the rhea, or South American ostrich, and from the skins of these and other animals they make clothes and coverings for their tents. They make beautiful "capes," or mantles, of furs and feathers which are highly prized by Europeans, and find a ready market, most of the proceeds being spent for bad whisky, which is brought into the country in quantities.—Boston Evening Transcript.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, AUGUST 18 1899

THE VALUE OF ALFALFA.

The chemical department of the Kansas Experiment station has completed the analyses upon one of a series of digestive experiments with alfalfa. In this experiment hay was used which was cut when in full bloom and was fed to a three-year-old grade Hereford steer. The result of the analyses show that the air dried hay contained digestible nutrients as follows: Crude protean, 10.43 per cent (consisting of albuminoids, 7.86 per per cent; amids, 2.57 per cent); fat, 0.69 per cent; crude fiber, 15.99 per cent; carbohydrates, 28.18 per cent; total digestible nutriments, 55.29 per cent. Let us compare these last figures with those representing the total digestible nutriments contained in some of our most common feeds used for dry roughage. Millet contains 57.6 per cent; oat hay, 52.2 per cent; orchard grass hay, 48.2 per cent; timothy hay, 48; prairie hay, 46.7 per cent; sorghum hay, 44.2 per cent; red clover hay, 43.9 per cent; oat straw, 43.9 per cent; wheat straw, 39.2 per cent, and corn fodder, 35.8 per cent. We find that only one of the ten feeds named is equal to or exceeds alfalfa in its total content of digestible nutrients, while the larger part of them are far below it. This is not a fair measure of its feeding value, however, unless we take into count the composition of these nutrients. As a rule it costs much more to produce feeds rich in protean than it does those rich in carbohydrates, and consequently of two feeds containing an equal amount of digestible nutrients, the one containing the most protean is the most valuable. Comparing alfalfa in this respect with the above named feeds we find that it ranks far ahead of the richest of them. One hundred pounds of alfalfa hay contains 11.3 pounds more digestible matter than the same amount of red clover hay and 1½ times as much protean. It contains only 2.3 pounds less of total digestible nutrients that the same amount of millet hay and almost 2½ times as much digestible protean. It contains 2½ times as much digestible protean as oat hay, 3 times as much as prairie hay, more than 4 times as much as sorghum hay, 5 times as much as corn fodder, 6½ times as much as oat straw and 13 times as much as wheat straw. In feeding value alfalfa hay not only ranks high, above all other feeds used for roughage, but it is well up among the more concentrated feeds. One hundred pounds of it contains 3.3 pounds more of digestible nutrients than wheat bran and almost as much protean. It is richer in digestible protean than wheat, corn, oats, rye, barley, Kaffir corn or sorghum seed. Its digestible nutrients have a nutritive ratio of 1 to 4.4. There are only a few feeds, such as wheat bran, linseed meal, cotton seed meal and soy beans that furnish as narrow a nutritive ratio as this. Alfalfa hay, therefore, is an ideal hay to use in balanced rations and is especially valuable to combine with corn as a ration for fattening steers, since it furnishes all the roughage necessary and is also a cheap source of protean. It is an ideal dairy feed, furnishing almost the exact nutritive ratio required for the highest yield of milk. Its value as a feed for hogs has been shown in results previously published by the Kansas station.

The great 16-inch 126-ton gun now building for the United States at the Watervleit arsenal will have a range power of 20.978 miles. This statement is based on a calculation made by Major James M. Ingalls, the greatest recognized authority on ballistics in the United States army and the present head of the Artillery School for Officers at Fortress Monroe. Major Ingalls has prepared a firing table for the 16-inch gun, which shows that a range of 20.978 miles is attainable on a muzzle velocity of 2600 foot seconds. The angle of the elevation necessary for the piece he estimates at 40 degrees. The trajectory, or path described by the projectile, which Major Ingalls has plotted shows that in ranging to 20.978 miles the shell will reach a maximum elevation of 30.516 feet. The weight of the projectile he assumes to be 2,370 pounds.

The latest and most novel scheme for getting to the north pole has been suggested by A. C. Jackson, President of the Alaska Geographical Society. His idea is to start from some point on the north coast of Alaska with three ships, loaded and provisioned for a five years' cruise, sail as far north as possible and then tie the vessels fast to the floating ice and drift as near the pole as possible. Then he proposes to unload a herd of reindeer that is aboard the ships and start overland for the Arctic Mecca, unreeling behind a spool of copper wire for the purpose of keeping a constant telephonic communication with the men aboard the vessels and to serve as guide to return after the pole is reached.

The five or six million silver dollars in the Carson mint are being shipped to San Francisco. They are put up in sacks and loaded in box cars, something like $1,000,000 being made at a shipment. In the closing of the mint the Silver State is being crucified for politically pleading its own interest, which is the gist of the whole contemptible business.

Dewey is having a fine time at an expense of about $3,500 a day. The majestic Olympia is his private yacht, and she goes wherever he heads her. We withhold all comment about British taxpayers giving the Queen £300,000 for a pleasure boat.

A BLUNDER.

The last Legislature loaded a hole intended to blow out the State law relating the manner of locating and recording mining claims, prescribing $50 immediate development work, etc., but the shot didn't go. The would-be repealing act reads:

SECTION 1. An Act *to repeal* "An Act prescribing the manner of locating mining claims upon the public domain of the United States, recording notices of location thereof, amending defective locations, and providing for the deposit of district records with county recorders, and prescribing the effect to be given to recordation of notices of location and affidavits," approved March twenty-seventh, eighteen hundred and ninety-seven, *is hereby repealed.*"

That's clear enough. While it was the evident intent of the Act to do away with the Act of '97, it does nothing at all. It says that an "Act to repeal an Act * * is hereby repealed." It virtually repeals an Act that was never passed; but, by reason of its wording, lets alone the Act that it was intended to repeal. Had the word "entitled" appeared to the exclusion of the words "to repeal" as the first three words of Sec. 1, no flaw could be found.

Many mine-owners and locators paid no attention to the State law at any time. It has been upheld by some Superior Judges and delared void by others, but it has not been passed upon by the Supreme Court. We think it would hold as merely supplementary to the United States law, if the whole State be regarded as a mining district and the Act considered "local regulations." Similar laws certainly obtain in other States and Territories.

The *Mining and Scientific Press* says: "It is our advice that all requirements under the law of March 27th 1897, be followed, for when the matter is brought into the courts the inevitable decision will be that the law is unrepealed, for, whatever the intent of the legislators, the meaning of the words used and their plain import can alone be given judicial cognizance." Also: "It would be well for those who have located claims under the Federal law since March 20 to relocate under the State law and comply with its requirements, thus avoiding possible litigation later."

Here are some Randsburg items from the *Miner* of last Saturday:

The California Borax Works is putting in a 10 ton mill, roller process, and will crush for $5 per ton. This will be of immense benefit to the fellows who are near and who have only yet gotten out a little ore. This is about 40 miles from Randsburg in the Slate range.

Godsmark & Harrison in the Panamint country are adding ten more stamps to the ten already in operation in their mill in Pleasant canyon, about five miles above Ballarat. They have incorporated and the firm is now the Radcliffe Gold Mining & Milling Co., limited.

There is quite a lot of building being done; among them are several brick store buildings. This speaks well for the advancement of Randsburg.

Messrs. Hunt, Rayder and Pollard, of the Argus range country, say that the assays made of their ore averages $40 a ton and is practically free milling, and their best ore of a nine-inch streak shows considerable more. [Their properties are in Inyo county, at Spring canyon, about 40 miles from Darwin: plenty of water and a good wagon road to the mines.]

The mustang, bronco or cayuse, in their wildest state, are susceptible of appreciating kind treatment as soon as lassoed. Take ten bad horses, that are unmanageable from any cause, and get down to the bottom facts, and you will find that not more than one out of ten has inherited its bad disposition, but has on the other hand been spoiled in handling. This simply means that nine out of ten spoiled horses have been ruined by handlers who knew far less than the spoiled animals. Everyone who has seen anything of the method of breaking range horses can attest the truth of this. A case is known in which the mounts of some half dozen men had to be taken out of a herd and broken, each man taking his mount at the third saddling. Two of the men who valued a reputation for "rough riding" had their mounts so that they were always hard to handle. The others, most of them equally good riders, soon had their horses so quiet and gentle that it was no trouble to catch, saddle and ride them at any time. Every horse handled could have been made equally good in disposition by kind treatment. The devil was in the riders, not in the horses.

Secretary of Agriculture Wilson, the other day at Reno, said: "Gentlemen, don't run away with the idea that the Government is going to give you the arid land, for it will not. Congress is too much afraid of your syndicates getting hold of it for speculative purposes, but I would favor some arrangements whereby the Government could give the State control of these lands, for say five, ten or twenty years and give the arid States the rental from them. The rental to go into the State treasury, thereby creating a fund for storage purposes." Complimentary to the States, implying that they can control monopoly of lands. It is in evidence that the United States, as such, can only foster monopolies.

"Lively fighting within ten miles of Manila;" "Twenty-five Filipinos killed" and "The Insurgents have taken the aggressive in the neighborhood of the railroad" are sentences referring to late little events in Luzon. If we are tired of it here, how must the Americans there feel? Better send a hundred thousand fighters, retire Otis and wind it up sometime.

One thousand persons killed and 100,000 rendered homeless and destitute is the sum of a recent storm in Porto Rico. Uncle Sam can hardly do too much in the way of relief.

Some Fair Regulations.

The premium list of the Twelfth Annual Fair is out, showing a liberal list of money awards for an extended and comprehensive number of local products.

The followingg regulations are given:

1. Exhibits can be made free of charge by any person in the District.

2. No premium will be awarded unless the exhibit is meritorious, in the discretion of the Board of Directors.

3. Special premiums will be awarded to worthy exhibits not named in the premium list.

4. Exhibitors for premiums must see to the delivery of their exhibits at the Park or Pavilion to the Superintendent of the proper department, and all animals or articles must be entered with the Entry Clerk by 12 noon on the first day of the Fair.

5. Parade of horses and cattle will take place on the third day; other animals and poultry to be shown in pens on the third day.

Every exhibitor receiving special premium will also be awarded diploma in addition.

Admission—Family Season Tickets, $5; Single Season Ticket, $2.50; to the Track, 25c.; to Pavilion, 25c.; to Entertainment, 25c. Children under 10, free; Lecture, free.

In Cripple Creek a miner can go to work on an electric car, down the mine in an electric hoist, work by an electric light, drill by electricity and fire his shots by electricity and also get fired quicker than electricity.

It implied that the President of the Republic of France has jugged a lot of royalists and military conspirators and now holds the top hand, although a member of Dreyfus' counsel was assassinated. They are a queer lot, over there.

NEW ADVERTISEMENTS.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schen, Plaintiffs, vs. Gilbert J. Roofe, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roofe, W. C. Fitz-simmons and William H. Patterson, Defendants.

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, (Seal) State of California, this 12th day of August, A. D. 1899.

D. J. HESSION, Clerk.

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als. Plaintiffs, vs. Gilbert J. Roofe et als. Defendants. Summons. P. W. Forbes and P. H. Mack, Independence, California, Attorneys for Plaintiffs.

AN HONEST INDIAN.

A Singular Experience With Arapooish, a Chief of the Crows.

Arapooish, chief of the Crow Indians, was a man of wonderful influence. In "Bonneville's Adventures" an incident is related showing his method of restraining the evil propensities of his braves. Mr. Robert Campbell, while a guest in the lodge of Arapooish, had collected a large quantity of furs and, fearful of being plundered, had deposited but a part in the lodge. The rest he buried.

One night Arapooish entered the lodge with a cloudy brow and, turning to Campbell, said:

"You have more furs with you than you have brought to my lodge?"

"I have," replied Campbell.

"Where are they?"

Campbell described the place.

"'Tis well," said Arapooish. "You speak straight. But your cache has been robbed. Go and see how many skins have been taken."

Campbell examined the cache and estimated his loss to be about 150 beaver skins.

Arapooish summoned his people, reproached them for robbing a guest and commanded that the skins should be brought back. For himself, he would not eat or drink till all had been restored.

Soon the skins began to come in. They were laid down in the lodge, and those who brought them departed without a word. Arapooish sat in one corner silent. Above a hundred pelts were brought in, and Campbell expressed himself satisfied. Not so the Crow chieftain. He fasted all night. In the morning more skins were brought in, and one and two at a time they continued to come through the day.

"Is all right now?" demanded Arapooish.

"All is right," replied Campbell.

"Good! Now bring me meat and drink," said the old chief.

WORRY.

What This Foolish, Enervating Habit Does For Mankind.

Worry is forethought gone to seed. Worry is discounting possible future sorrows so that the individual may have present misery. Worry is the father of insomnia. Worry is the traitor in our camp that dampens our powder, weakens our aim. Under the guise of helping us to bear the present and to be ready for the future worry multiplies enemies within our mind to sap our strength.

Worry is the dominance of the mind by a single, vague, restless, unsatisfied, fearing and fearful idea. The mental energy and force that should be concentrated on the successive duties of the day is constantly and surreptitiously abstracted and absorbed by this one fixed idea. The full, rich strength of the unconscious working of the mind, that which produces our best success, that represents our finest activity, is tapped, led away and wasted on worry.

Worry must not be confused with anxiety, though both words agree in meaning originally, a "choking," or a "strangling," referring, of course, to the throttling effect upon individual activity. Anxiety faces large issues of life seriously, calmly, with dignity. Anxiety always suggests hopeful possibility; it is active in being ready and devising measures to meet the outcome. Worry is not one large individual sorrow; it is a colony of petty, vague, insignificant, restless, imps of fear, that become important only from their combination, their constancy, their iteration.—William George Jordan in The Saturday Evening Post.

Death of Heroes In Fiction.

It is astonishing what a human interest the reading public takes in an author's heroes and heroines. Mr. Snowden Ward declares that when Dickens was writing "The Old Curiosity Shop" he was overwhelmed with letters from the most distinguished men and women begging him not to kill Little Nell. They declared it would be too cruel and waited on his verdict as an anxious family on that of the physician.

Dickens did not care to do away with her himself, but it was necessary that he should do so. Little Nell was a character with too little of the earth earthy about her to assimilate with those around her, no matter how well meaning they might have been. Her finer feelings would have made her unhappy, and the little country churchyard was the best place for her.

And Thackeray. How he was implored not to kill Colonel Newcome. How he was rated for reducing so noble a man to poverty in his old age, while the meaner mortals around him lived and throve. Kipling had to give a second version of his "The Light That Failed" in order to please the public, and who knows but Shakespeare was chided for the unhappy taking off of Lear and Cordelia? But the public, though soft hearted in the concrete, is a flint in the abstract. It soaks its handkerchief with tears over the consumptive cough of that shady Parisian Camille and turns a nice homemade understudy out on the cold world to eat snowballs or cold potatoes."—Louisville Times.

On the Wrong Man.

Bret Harte is so frequently complimented as the author of "Little Breeches" that he is almost as sorry it was ever written as is Colonel John Hay, who would prefer his fame to rest on mere ambitious work. A gushing young lady, who prided herself upon her literary tastes, said to him once:

"My dear Mr. Harte, I am so delighted to meet you. I have read everything you ever wrote, but of all your dialect verse there is none that compares to your 'Little Breeches.'"

"I quite agree with you, madam," said Mr. Harte, "but you have put the little breeches on the wrong man."—San Francisco Argonaut.

Getting Papa Into Deep Water.

Tommy—Pa, what's a ringlet?

His Father—A little ring, my son.

Tommy—And a locket is a little lock and a bracelet a little brace and a chaplet a little chap, papa?—Jewelers' Weekly.

It is the advice of a connoisseur in teas to buy the leaves in considerable quantity. Tea preserved in a chest keeps and increases its flavor.

At the Strozzi palace, in Rome, there is a book made of marble, the leaves being of marvelous thinness.

THE TWELFTH

ANNUAL FAIR

EIGHTEENTH AGRICULTURAL DISTRICT

Comprising ALPINE, INYO and MONO COUNTIES, California

AGRICULTURAL DISTRICT No. 18 · STATE OF CALIFORNIA ·

WILL BE HELD AT

Big Pine, September 19th, 20th, 21st and 22d, '99, Calif.

The following racing events will occur, under the management of the Board of Directors:

TUESDAY, SEPT. 19th.

RUNNING—Indian Pony Race, 1 mile, 2 in 3	$15
RUNNING—Untried Horses, one-half mile, 2 in 3	50
RUNNING—One-fourth mile, free for all, 2 in 3	50

WEDNESDAY, SEPT. 20th.

TROTTING—One mile, 2:40 Class, 2 in 3	$75
RUNNING—One mile dash, free for all	75
Gentlemen's Bicycle Race, 1 mile, 2 in 3	15

THURSDAY, SEPT. 24th.

TROTTING—One mile and repeat, free for all, 2 in 3	$100
TROTTING—One mile, 2 year olds, 2 in 3	50
Ladies' Bicycle Race, one-half mile dash	15

FRIDAY, SEPT. 22d.

BASEBALL GAME, free for all	$75

FREE for Inyo, Mono and Alpine Counties.

Entrance, 10 per cent of purse.

Not less than three to enter and two to start.

Entrances close at 6 p. m. on the day preceding the race.

National trotting rules to govern trotting races and California State Agricultural rules to govern running races.

For any further information as to above racing, address

A. P. SMITH,
Big Pine, Cal.

PREMIUM LISTS to be distributed. For information concerning Exhibits of Live Stock, Agriculture and Horticulture address L. M. NEWMAN or J. R. ELDRED; on Art, Fancy Work and Cooking, W. G. DIXON; Minerals, W. H. UHLMEYER, Big Pine.

SPECIAL RAILROAD RATES—To Alvord and return: From Benton, $2.50; Bishop, $1; Independence, $1.50; Lone Pine, $2; Keeler, $3. Freight free, upon exhibitors paying charges one way, and on presentation of certificate of exhibition at end of Fair exhibitors will be refunded and shipment billed free to destination.

R. W. THOMAS, President Board of Directors.

J. R. ELDRED, Secretary.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train on Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned as Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

JOHN J. MCLEAN,
Observer.

*Record beginning March 6th 1898

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

MONDAY, August 14, 1899.

Estate of Luther Clark—Administrator's sale of real estate confirmed.

TUESDAY, August 15, 1899.

J. S. Stotler vs. P. J. Ginser—Hearing of motions continued to Monday, August 21st.

Methodist Church.

During the absence of the Pastor at Conference there will be no preaching services at either of the Independence circuit appointments. Independence Sunday-school will meet at the usual hour on Sunday afternoons.

Due notice will be given of the resumption of services.

JOHN J. PARDEE, Pastor.

Real Estate Transfers.

The following deeds have been recorded since August 10, 1899:

J. C. Irwin, Administrator, to Bert L. Smith, Aug. 16, 1899—One-third interest in Tip Top and Three Formation mines, near Round Valley; $95.

United States to Edward Trudo—Patent to 1040 acres borate lands in Saline Valley.

Independence school begins Sept. 4th.

O. I. Mairs is on the sick list. Arlie is taking a late cold outing in the mountains.

Silas and Misses Nellie and Irene Reynolds have returned from a trip to Whitney.

George Thorpe was over from the Keys mine, after some new gearing for the arrastra machinery.

Sheriff Given, with John and Charley Kispert, is off to the Mt. Whitney country, "loaded for bear."

Milk baths are recommended for the complexions of returned campers. Butter-makers take warning.

Julian Eibeshutz and Leon Marks got home last Saturday from a month's outing at Yo Semite, Mono Lake and Mammoth.

Wells Barnes, Geo. S. Wood and H. P. Cartier are back from an excursion to Casa Diablo and the headwaters of Owens River. The woods were full of 'em.

There is a strong probability of another year of imported potatoes in this valley. Farmers don't have to raise spuds if they don't want to, but there ought to less kicking about "no market."

Jack Davies has contracted to deliver daily 50 tons of Reward mill tailings to the cyanide works. The mill has run through about 16,000 tons of ore, leaving a job of no small magnitude to handle the tailings.

Messrs Tyler, Sutherland, Kitchline and Bunney were out after deer during the week, and Treasurer Bunney brought down a two-pronged buck which he shot on Shepherd's creek. Sutherland and Doty are reported to have killed two deer yesterday, on Pinyon creek.

A three-times-a-week mail is now well established between Keeler and Mojave, connecting with the C. & C. trains both ways. It is stated that a letter mailed here in time for the down train in the evening will reach San Francisco twenty-four hours sooner than if sent north by the train of the following morning.

Kohler & Chase, of San Francisco, writes us that one of their salesmen will call on the people of Independence next week. Theirs is the largest and most reliable piano and organ firm on the Pacific Coast. Those desiring to purchase instruments can get the same terms and prices from any of the firm's representatives as can be obtained in San Francisco. Mr. Oscar Rodeck, expert piano maker, tuner and repairer, is traveling with him. They will remain two or three days.

In May last Gustav and W. A. Sanger gave a bond on their copper mines in Saline Valley to W. H. Patterson of Reno, who afterwards assigned it to San Francisco parties. One of the conditions of the bond was that Patterson should commence development work before July 1st, which he failed to do. About July 20th the Sangers gave a new bond on the same property to Chas. H. Scheu of Salt Lake City. Attorney Dodge of Reno, claiming to represent the parties to whom Patterson assigned his bond, spent about two weeks in Independence and Big Pine and asserted that his clients had not forfeited the bond. Messrs. Sanger and Scheu commenced an action in the Superior Court last Saturday to cancel the Patterson bond.

SUPREME COURT DECISION.

Little Pine Creek Litigation Ended—Decided on Direct Lines.

A decision of the Supreme Court of California was rendered last Saturday which settles the local water case, the *finale* coming close after the death of A. D. Gilbert, who is understood to have been the promoter of the costly trouble.

About six years ago John Baxter and E. Robinson, as plaintiffs, commenced an action in the Superior Court against A. D. Gilbert, O. I. and A. F. Mairs, J. A. Lank, Thos. Kehoe, Independence Water Company and the Hannah Estate, to quiet their title to the waters of Little Pine and Pinyon Creeks. The plaintiffs recognized and admitted the rights and titles of defendants Lank, Kehoe, Independence Water Co. and Hannah Estate, but the latter were made defendants because they refused to join as plaintiffs.

Judge Gill, now deceased, gave judgment in favor of the plaintiffs. Defendants A. D. Gilbert and A. F. Mairs appealed to the Supreme Court, and on the 12th inst. that Court affirmed Judge Gill's decision.

There was a long and expensive trial in our Superior Court, many attorneys being employed. The various defendants were represented by Attorneys Boardman of Reno, Gen. Clarke of Carson, R. S. Miner of Bridgeport, and Lamar, Forbes, Bennett and Lewis. The plaintiffs were represented by P. Reddy and P. H. Mack.

The Supreme Court holds that the lakes largely form the reservoirs from which Little Pine creek is fed, and that the appellants' point of appropriation is above the point of plaintiffs' appropriation, and that there is no overflow of the waters of Little Pine creek above the point where the appellants tapped the creek with their ditch. That evidently the appellants sought to appropriate water in the lakes, and not the surplus or overflow of the creek. The Court further say:

"If such appropriation of water does not interfere with the usual and ordinary quantity of water that flows down the creek the right of appellants to appropriate is undoubted: but otherwise if there be interference with the quantity of water flowing down the stream. If the tapping of these lakes by the appellants reduced the amount of water to which plaintiffs are entitled or shortens the period of time in which they might otherwise secure water from the creek then the acts of appellants clearly are a trespass upon plaintiffs' rights—exactly the same kind of a trespass as though the creek was tapped and that amount of water directly taken therefrom without molestation of the lakes. Upon this point the trial court made the following findings: 'The defendants A. D. Gilbert, O. I. Mairs and A. F. Mairs, by making the ditch and openings into East lake, as herein in these findings described, have lowered and drained said lakes to such an extent as to prevent the water from flowing into the natural channel in said Little Pine creek, and by doing the work as in these findings described on East lake, have allowed the waters thereof to escape therefrom, and to divert it from the natural channel in said Little Pine creek.' There is an abundance of evidence to support this finding of facts. Indeed, it is substantially conceded that appellants have tapped East lake some feet below the natural channel of Little Pine creek, and under those conditions it is self evident that such an act would materially affect the amount of water flowing down the natural channel of the creek.

"Upon a careful examination of the record we are satisfied the evidence is amply sufficient to support the findings of fact made by the trial court, and we are also satisfied that the conclusions of law based thereon find full support in the evidence."

The Coming Market

If Independence, and in fact the whole southern half of Owens Valley, has any desire to benefit by the opening up, development and working of the borax, copper and gold zone of Saline and Ubehebe it is about time this aforesaid town gets a move on in the matter of constructing a road across the Inyo mountains. With what the woodmen have already done, its accomplishment is not half so hard as it might be. It is evident that the County of Inyo, as such, will not build one. It possesses mining roads that cost at least $300,000, but the county didn't make them. It once paid $1000 for a road built by the citizens, and then the teamsters found a natural grade paralleling it and used that. In the present case competent surveyors should be sent out at once, equipped with plenty of time and grub, so that the outfit may not necessarily adopt any haphazzard route. They should reach the lowest elevation over the summit, most direct, and arrange for building a road that will stay built. If a toll road company were organized doubtless many would subscribe for the stock and pay for most of it in labor, teams and supplies. The main group of mines is about 65 miles distant (by the Lead canyon trail) and deducting roads built and the stretch across Saline Valley, there will be something like 15 miles of road to make, while the copper operators will have 12 miles of road to build probably down Cottonwood canyon, leading off the other way to the head of Panamint Valley. Likely the cost of the 15 miles would not exceed $2500, which figures about correspond with the number of men who will be in that district in a year. There will never be any railroad connection, unless the C. & C. reaches out to Panamint Valley, and the Eastern companies will not break their necks to get to this supply point in the absence of any effort here. Some one or two or three should lead off with a subscription list.

San Diego is to have a 100-ton smelter. We would rather hear of a great ore reduction plant at or near Los Angeles, but long experience teaches that it is hopeless to expect anything from that quarter.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

The Line is stocked with fast stock and a comfortable covered wagon, and good service is guaranteed at fair prices. Public patronage Solicited. A. C. HARVEY

FAMOUS RAILROAD MAN.

Frank Thomson, the Late President o the Pennsylvania System.

The death of Frank Thompson, President of the Pennsylvania Railroad Company, which occurred at his home, Merion, near Philadelphia, a short while ago, removed the foremost railroad man in this country. For forty-one years he was in the employ of the Pennsylvania road and by his own ability rose through all the grades to the highest position in that big corporation.

Frank Thomson was born in Chambersburg, Pa., of good Scotch family, 58 years ago. His father was a well-known jurist and had represented his district in Congress. Young Thomson received an academic education and at 17 he entered the Altoona shops of the Pennsylvania Railroad, where he acquired a perfect knowledge of railroad-

FRANK THOMSON.

ing in its different branches, even to the building of an engine and running the same after it was finished. Colonel Thomas Scott, then General Superintendent of the road, perceived in the young man evidences of rare ability. Colonel Scott was about this time appointed by President Lincoln Assistant Secretary of War, with charge of all matter relating to the transportation of troops and supplies. He called Frank Thomson to his aid as chief assistant, although the latter was not yet 20. Young Thomson took the field immediately, the scene of his operations being the South and the upper Southwest, where he constructed railroads and bridges, repaired those which had been wrecked by the exigencies of war and forced the transportation of troops. Achieved many notable feats in getting wrecked roads and dismantled rolling stock into working order and was in many ways responsible for the great success of Colonel Scott's department.

After the war, when not yet 25, he was appointed Superintendent of the Western division of the Philadelphia and Erie road, of the Pennsylvania system, which position he filled for nine years. Step by step he advanced, until in 1882 he became Second Vice President, First Vice President in 1888 and President in February, 1897, on the death of George B. Roberts.

Mr. Thomson was in close touch with all the railway interests of the country. He made of the Pennsylvania road a model system. Marvelous executive ability and power to judge the capacity of men about him were his chief characteristics. In temperament and manner he was exceedingly calm and amiable. He had the qualities which make the successful diplomat to an abundant degree. No one ever saw him ruffled or excited. In private life he was a singularly attractive man. He was a patron of art, literature and music and a lover of outdoor sports. The social side of his nature was well developed and some of the most eminent personages in this country and abroad have enjoyed his warm hospitality. Up to a short time before his death he enjoyed excellent health, due to his outdoor exercise.

A REMARKABLE HORSE.

Has a Sixteen-Foot Tail and a Mane Eleven Feet Long.

This picture represents a remarkable growth of mane and tail on a horse. His name is Linus II. and he is the son of Linus, a celebrated horse in his day. No picture can do adequate justice to

A REMARKABLE HORSE.

his great beauty, for he has a double mane which sweeps the ground on both sides, and a tail which trails far in the rear. The mane is very thick and measures 11 feet in length. The tail is even more remarkable than the mane, measuring 16 feet from tip to tip. It is, of course, impossible to account for this remarkable freak of nature, and while there are undoubtedly other cases of similar abnormal growth on record we do not know of any horse which has been so bountifully blessed with such a beautiful growth of hair.

Curious Ads. of London.

Curiously worded advertisements that are funny without intent are common in the London papers. Here are a few examples:

"Furnished apartments suitable for a gentleman with folding doors."

"Wanted, a room by two gentlemen about thirty feet long and twenty feet broad."

"Lost, a collie dog by a man on Saturday answering to Jim with a brass collar round his neck and muzzle."

"Boy wanted who can open oysters with references."

"Bulldog for sale; will eat anything; very fond of children."

"Wanted, an organist and a boy to blow the same."

"Wanted, a boy to be partly outside and partly behind the counter."

Two of a Kind.

"I wonder," said the horse editor, "why some of those Wall street chromos are called securities?"

"It is on the same principle," replied the snake editor, "that plays which won't draw are called attractions."—Pittsburg Chronicle-Telegraph.

Delicious Hot Biscuit

are made with Royal Baking Powder, and are the most appetizing, healthful and nutritious of foods.

Hot biscuit made with impure and adulterated baking powder are neither appetizing nor wholesome.

It all depends upon the baking powder.

Take every care to have your biscuit made with Royal, which is a pure cream of tartar baking powder, if you would avoid indigestion.

ROYAL BAKING POWDER CO., NEW YORK.

FRESH GOLD CROPS.

Localities Where the Precious Metal Deposits Itself Annually.

There are several localities where gold may be said to grow every year or, in other words, where fresh deposits of the precious metal are to be found annually.

One such district is in the Edmonton country, in the Canadian northwest, where, after the spring floods, from the same banks and "benches" of the Saskatchewan river there are taken every year considerable quantities of gold by a few diggers, who make their living out of the business.

But the most conspicuous and interesting case of this sort is to be seen near Ichang, in the province of Hupeh, in China. For many centuries past each year gold has been washed from the banks of coarse gravel on both sides of the river Han, and in the midst of the auriferous district there is an ancient town called Li-kiu-tien, which means "gold diggers' inn." Its inhabitants subdivide the gold bearing ground among themselves annually, staking out their claims with partitions. They pay no royalty and appear to earn no more than a bare subsistence. But this may be doubted, as John Chinaman is an adept at "layin low and sayin nuffin."

The annual river floods bring down millions of tons of mud and sand from the mountains, and this mud and sand, which is charged with gold, both "fine" and in flakes, is deposited to a depth of six inches or more on the banks of gravel. It is in the winter that the gold is washed, and it is said that seven men work about 20 tons of "pay dirt" in a day.—Cincinnati Enquirer.

When to Stop Eggs and Milk.

"People over 50 would do well to give up milk and eggs as a diet," said Dr. Henry M. Dearborne. "These are the structure forming foods of animals which mature in a short time, and when taken in quantities by human beings whose structures have already formed they tend only to the hardening and aging of the tissues."

Dr. Dearborne said that he had seen people who were beginning to find stair climbing difficult and who were losing their elasticity much benefited by eliminating these articles from their diet. "There has been a great increase in the duration of life below the age of 50, statistics prove," he said, "but beyond that period there has been no improvement." In his opinion, the person over 50 should have as good a chance to preserve life as the young child just beginning its struggle with existence.—New York Times.

Pig Bone Bracelets.

The natives of the New Hebrides islands, in the Pacific ocean, raise pigs for bracelets. The upper canine teeth of the pigs are removed, and that gives the lower tusks a chance to grow as much as they wish. The lower teeth grow, and finding no resistance, attain a good length. The teeth grow in a spiral, and the tip often lies beside the root of the tooth. Very rarely the point grows into the root of the tooth and makes a complete circle. A complete pig tooth bracelet is a very valuable jewel, which is worn around the wrist or attached to a string around the throat.—San Francisco Call.

His Lack of Tact.

"It's no use!" exclaimed Willie Wishington. "I can never learn to say the right thing at the right time. I told Miss Slimmins that her eyes shone on me like the stars above."

"That's old, but pretty," answered Miss Cayenne.

"Yes. But she is one of those remarkably tall girls who resent any reference to their height."—Washington Star.

Why Women Don't Stammer.

"Persons who stammer," said the pseudo scientific boarder, "do so because they think faster than they can talk."

"Is that the reason," asked the savage bachelor, "that we so seldom meet a woman who stammers?"—Indianapolis Journal.

A Case of Confused Telepathy.

A very remarkable occurrence has been brought to my notice. Early last week a well known lady, who shall be called Jones, dreamed a ridiculous dream, as inconsequential as most dreams are.

Mrs. Jones dreamed that a dog of hers had died and that she received an official communication ordering her either to cremate the remains or to herself skin the animal and throw the body into the river. Mrs. Jones chose the latter alternative, but having half skinned the body and becoming tired threw it as it was into the water. The dog disappeared for an instant and then reappeared on the surface alive, and swimming across to the opposite bank trotted off, evidently in great suffering. There ends the dream.

The next morning the postman brought several letters. The first one was addressed to Lewis Jones, Esq., —there being no such person—and ran as follows: "Sir, your dog crossed the river last night on to my property, but being very severely injured it was found necessary to kill it. Should you wish to have the collar, which bears your name and address, I shall be happy to send it to you."

No dog belonging to Mrs. Jones had died nor had she lost one.—London Truth.

Famous Old Gamblers.

In the latest history of gambling in England, just published, there are some astonishing revelations as to the amount of money won and lost by men and women whose names are as familiar as household words early in the present century. There are records of £200,000 having been lost at a sitting, and the loss of £50,000 appears to have been a very common occurrence.

A gambling story is told of Charles James Fox that rather reflects on his honor. He was one of the ardent admirers of Mrs. Crewe, a noted beauty of her day, and it is related that a gentleman lost a considerable sum to this lady at play, and, being obliged to leave town suddenly, gave Mr. Fox the money to pay her, begging him to apologize to her for his not having paid the debt of honor in person. Fox lost every shilling of it before morning. Mrs. Crewe often met the supposed debtor afterward, and, surprised that he never noticed the circumstances, at length delicately hinted the matter to him.

"Bless me!" said he. "I paid the money to Mr. Fox three months ago."

"Oh, did you, sir?" said Mrs. Crewe good naturedly. "Then, probably, he paid me, and I forgot it."—Boston Herald.

Two Students and a Thief.

Some months ago two hungry university students in the south of Russia, coming home to their one bare room after a hard day's work for their living, caught a thief running off with their books. "Are you the fellow that stole other books of ours yesterday?" they asked.

"I am, little fathers, but hunger and want drove me to it. I am starving."

"So are we, brother, or next door to it, and you ought not to have hit upon us as your victims."

"Well, your door is more easily opened; that's how it is," was the answer.

"We want those books for our examinations, brother; so you must get them back for us. But as you are cold and hungry now come in and join us in our supper. It is not much, but such as it is you are welcome. Here are 20 copecks for the beer. Run and fetch it."

And the three ate and drank together, for hospitality is a religion and charity its foundation.—London Telegraph.

Humming birds are domesticated by placing in their cages a number of paper flowers of tubular form containing a small quantity of sugar and water, which must be frequently renewed. Of this liquid the birds partake and quickly become apparently contented with their captivity.

On an average every woman carries 40 to 60 miles of hair upon her head.

FINED FOR WINNING A CASE.

It Was Not Considered Proper to Defend a Horse Thief.

"When I graduated from the law school," said the old lawyer, with a reminiscent smile, "I took Horace Greeley's advice and went west. I located in a little town that then was on the frontier and waited with the confidence of youth for clients.

"Before I had fairly opened my office I was retained to defend a man for stealing a horse. This elated me very much, for I was not aware at the time that the case had been refused by all the other lawyers in town, as defending a horse thief was not a thing to be desired if a man valued his life.

"The case came to trial before an old judge and a jury composed of bewhiskered ranchers. There was no doubt that the man was guilty, but he had a number of friends who were willing to swear to anything, and I thought it was my duty to make the best possible use of them. They were all willing to swear that the defendant was 40 miles away from the spot when the horse was stolen, and the prosecution was unable to break down their testimony. I saw that I was going to free my client, so it was with a satisfied air that I saw the jury leaving the room to prepare their verdict.

"They were back in five minutes, and the old judge asked them if they had succeeded in arriving at a verdict.

"'We hev,' answered the foreman, as he shifted the gun he carried on his hip. 'We find the defendant not guilty an recommend the defendant's lawyer, owin to his youth an innocence, to the mercy of the court.'

"While I was gasping for breath the judge fined me $500 and suspended sentence long enough for me to get out of town. It wasn't law, but I didn't stop to argue the matter."—Chicago Inter Ocean.

An Incredulous Jury.

In a criminal prosecution recently tried in York, Neb., the jury, after a brief deliberation, returned the following remarkable verdict: "We, the jury in the above named case, do not believe one word that the witnesses have sworn to; neither do we believe that any of the attorneys have spoken the truth, nor that either of them could do so even if he should care to take the trouble to try." The humor in remarks casting doubt upon the veracity of the legal profession has lost the freshness of early youth, and a good, stiff penalty for contempt in cases of this kind would probably redound to the benefit of mankind in general.—Law Notes.

Not the Usual Story.

"Say, there was an actress left $5,000 worth of jewels in a street car here the other day."

"Oh, another of those advertising dodges, was it?"

"No. The jewels were worn by a lot of women who were returning from a South Side reception, and when the actress left the car the owners of the diamonds and other precious stones were still aboard."—Chicago News.

Curious Custom.

In China guests at dinners run around between the courses. This is supposed to keep the digestion in good condition, but the hustling American needs something else, and there is nothing better than Hostetter's Stomach Bitters. If a man or woman is suffering with constipation, indigestion or any stomach trouble, it's their fault if they don't get well.

Did you ever see any one light a lamp without every one in the room looking?

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder to be shaken into the shoes. It makes tight or new shoes feel easy; gives instant relief to corns and bunions. JOLLY JOKER.

To remove freckles—send the boy out of the room.—Boston Globe.

Teacher—What is a buttress? Flossy—A buttress is a female butter-maker.—Judge.

The Cuban insurgents have raised Hades long enough; now let them raise cane.—Chicago Times-Herald.

She—"You say you met your friend accidentally?" He—"Yes; I fell in with him while skating."—Yonkers Statesman.

Conundrum by the Cheerful Idiot: Q.—"What is worse than 'raining cats and dogs?'" A.—"Hailing cabs and 'buses."—Punch.

Mother (drilling Teddy for his first party)—And now, darling, what is a greedy boy? Teddy—A boy who wants everything I want.

"What kind of a tree is the hardest to climb?" asked the teacher. "One that hain't got no limbs," little Albert replied.—Chicago News.

"We didn't have time to stop, so we bought a lunch and ate it as we drove along." "Ah, I see—you dined a la cart."—Philadelphia Bulletin.

She—"If capital punishment must be, I certainly favor electricity." He—"Oh! That is to say, you prefer currents to raisin's."—Harlem Life.

Mrs. McBride—"Harry, I was beside myself at the condition you came home in last night." Harry—"Yes; it seems to me I did see two of you."—Judge.

Little Willie—"Pa, why do they call them 'minor poets'?" Pa—"Because they ought to be working with the pick and shovel, my son."—Tit-Bits.

"Here's a benevolent assimilation for you," as the milkman remarked, when he shoved the can under the spout of the pump.—Cleveland Plain Dealer.

Horrified old lady—Oh, kind sir, think of your mother! Think of your mother! Burglar (sternly)—No use, lady; I was brought up in an incubator.—Tit-Bits.

Caller—Excuse me, can I speak to your typewriter a moment? City man—You can't; she's engaged. Caller—That's all right; I'm the fellow.—Illustrated Bits.

His sweetheart—I have always heard that all Spaniards were expert at fencing. Returned volunteer—Yes, indeed they are; especially with barbed wire.—Brooklyn Life.

Tom—Why were you so determined to kiss that homely cousin of yours? Dick—I wanted to establish a precedent. She has two very pretty sisters, you know.—Judge.

Little Mike (in the midst of his reading)—Feyther, how d'yez pronounce I-o-i-i-o? McLubberty—Pronounce ut? Begorra! did yez niver hear a tur-r-r-key gobble?—Puck.

First tourist—That Indian seems to have an awful load on. Second tourist—Yes. He has evidently followed Kipling's advice, and taken up the white man's burden.—Life.

"Have you ever read the article on how to tell a bad egg?" "No, I haven't; but my advice would be, if you have anything important to tell a bad egg, why, break it gently."—Tit-Bits.

Dombey—How did you get that scar on your forehead, Jones? Jones—Oh, my wife and I had an argument, and she obeyed that mean old adage—strike while the iron is hot.—Judge.

Tom—"I don't know whether she sings or not." Jack—"She doesn't. I heard her."

She—"You are a conundrum." He—"But I hope you haven't given me up yet."—Town Topics.

"Hello, Swardie! I haven't met you since you came to the city and set up for a doctor. How are you getting along? Are you making your mark?" "Er—yes, I'm doing considerable vaccinating."—Chicago Tribune.

"How can you scold all the time?" was asked of the woman with five stepchildren and an indolent husband. "I can't just explain it, but I knows that I'm blessed with wonderful powers of endurance."

"A pun," remarked the pedant, "is merely a play on words." "Yes," answered the frivolous person. "They call it a play; but, as a rule, it seems more like arduous and unnecessary work."—Washington Star.

The dear girl had been baiting him again. "Do you believe in love at first sight?" she asked. "Of course," answered the savage bachelor. "Do you suppose, if a man had the gift of second sight, he would fall in love?"

"I heard ye were on shtrike," said Mike to his friend Pat. "I was that," answered Pat. "A shtrike for what, Pat?" "For shorter hours, Mike." "An' did ye get them?" "Sure we did, Mike. It's not workin' at all I am now."

"Look here," said a young lieutenant, "this uniform you have made for me is entirely too large!" "That's all right," explained the tailor, "when you get it on you'll feel so big that it will be a perfect fit."—Philadelphia North American.

Farmer (with wife and two children)—How much fer tickets fer the young uns? Railway ticket-seller—Between five and twelve, half-fare. Farmer—Gosh darn it! Mandy, we'll hev tew wait till termorrer; it's half past twelve now!—Brooklyn Life.

A seedy-looking fellow entered a mercantile establishment the other day and succeeded in immediately making his presence obnoxious. "Get out, sir," said the proprietor, "or I'll throw you out." The other retorted sullenly: "You're scared to come outside and try it."

Knew the Cards.

A little girl who attends a Maine public school has quite an idea of nobility, as was evidenced by her reply to her teacher. The class had been reading about the king's family. The teacher, wishing to inculcate the correct idea of royal descent, said: "Now, children, if the king and queen had a son, what would he be?" "The jack," was the quick response.

When a man offends a daughter, her mother and all her sisters go out on a sympathetic strike.

He Got the Name.

As the manager of a large insurance company sat at his desk the representative of another company walked in. The caller was a man to be cultivated, but Mr. H. could not for the life of him think of his name, although he had met him before. But the Chicago man was one of many resources. "I beg your pardon," he said to his caller, after the first hasty greeting, "but if you will excuse me for an instant I will send a message I have just started. It is on a matter of much importance."

"Certainly," said the caller.

"It'll take just an instant," said Mr. H. as he turned to his desk and wrote hastily on a sheet of paper. "What is the name of the man I'm talking to? If you don't know name, find out and answer at once by boy. H." The business man addressed the message to his chief clerk in the outer office and handed it to his office boy, saying: "Hurry and deliver this note, Archie; it is most important."

Mr. H. busied himself with his papers, and in a few moments the boy returned with an answer. Hastily tearing open the envelope, Mr. H. read, "Jenkins, of the —— Insurance company." Throwing aside the note, the Chicago man turned blandly to his caller. "Ah, that bit of business is off my mind now! In what way can I be of service to you, Mr. Jenkins? It is a long time since we have been honored with a call from the —— Insurance company."—Chicago Journal.

How He Worked the Artist.

This account of how an intimate friend of the great artist Kyosai obtained one of the painter's drawings is from Mrs. Hugh Frazer's "Letters from Japan:"

Kyosai always refused if asked outright for a sketch. So his friend began the negotiation by offering the artist an excellent dinner. When Kyosai had drunk deeply and seemed in a mellow humor, his host would call for drawing materials, saying that he felt an artistic fancy taking possession of him. No one was surprised, as Japanese gentlemen often amuse themselves in this way after a feast. The servant then brought an enormous sheet of white paper and spread it on the floor with the brushes and Indian ink beside it.

The crafty host, without looking at his guest, sank on his knees and began to draw, apparently absorbed in his occupation, but intentionally producing few weak and incoherent lines. Kyosai watched the feeble effort in silence and growing irritation, and at last jumped up, dashed the tyro aside and tore the brush out of his hand, exclaiming: "Out of the way, you wretched bungler! I will teach you how to draw!" And the result was a priceless sketch, which remained in the possession of the wily entertainer.

Hint to Beginners.

"Don't you think I write with a great deal of dash?" inquired the new woman reporter. "Yes," responded the city editor, "and I'd much prefer to have you use commas and semicolons."—Cleveland Plain Dealer.

CONSULTING A WOMAN.

Mrs. Pinkham's Advice Inspires Confidence and Hope.

Examination by a male physician is a hard trial to a delicately organized woman.

She puts it off as long as she dare, and is only driven to it by fear of cancer, polypus, or some dreadful ill.

Most frequently such a woman leaves a physician's office where she has undergone a critical examination with an impression, more or less, of discouragement.

This condition of the mind destroys the effect of advice; and she grows worse rather than better. In consulting Mrs. Pinkham no hesitation need be felt, the story is told to a woman and is wholly confidential. Mrs. Pinkham's address is Lynn, Mass., she offers sick women her advice without charge.

Her intimate knowledge of women's troubles makes her letter of advice a wellspring of hope, and her wide experience and skill point the way to health.

"I suffered with ovarian trouble for seven years, and no doctor knew what was the matter with me. I had spells which would last for two days or more. I thought I would try Lydia E. Pinkham's Vegetable Compound. I have taken seven bottles of it; and am entirely cured."—MRS JOHN FOREMAN, 26 N. Woodberry Ave., Baltimore, Md.

The above letter from Mrs. Foreman is only one of thousands.

A Pretty Little Story.

The prettiest child story that I have seen lately is in French.

A mother tells her little girl that because she has been naughty she will not kiss her for a week. Before two days have gone by the child's lips hunger so for her mother's kiss that she begs her not to punish her any more.

The mother says: "No, my dear. I told you that I should not kiss you, and I must keep my word."

"But, mamma, mamma," says the little girl, "would it be breaking your word if you should kiss me just once tonight when I'm asleep?"—Boston Transcript.

AUF WIEDERSEHEN!

The little gate was reached at last,
Half hid in lilacs down the lane;
She pushed it wide, and, as she passed,
A wistful look she backward cast,
And said, "Auf wiedersehen!"

With hand on latch, a vision white
Lingered reluctant, and again
Half doubting if she did aright,
Soft as the dews that fell that night
She said, "Auf wiedersehen!"

The lamp's clear gleam flits up the stair;
I linger in delicious pain;
Ah, in that chamber, whose rich air
To breathe in thought I scarcely dare,
Thinks she, "Auf wiedersehen!"

'Tis thirteen years; once more I press
The turf that silences the lane;
I hear the rustle of her dress,
I smell the lilacs, and—ah, yes,
I hear, "Auf wiedersehen!"

Sweet piece of bashful maiden art!
The English words had seemed too fain,
But these—they drew us heart to heart,
Yet held us tenderly apart;
She said, "Auf wiedersehen!"
—James Russell Lowell.

Wilhelmina.

"WANTED—In a publishing house, a well-educated woman; must be over 30 years of age.'

"Isn't it mean. I don't seem to fit in anywhere. Young girls and old women are in demand, but a girl of 23 is neither young nor old; a drug in the market!" Wilhelmina Thurston looked disgusted.

"You would just fit in there, Will," said her sister, reflectively.

Wilhelmina went to the mirror and took the pins from her luxuriant hair, which was rolled back loosely from her face and coiled on the crown of her head. She parted the hair down the middle and drew it back plain, braiding it and dressing it low. It was unbecoming, for her rather severe type of beauty was rendered stern by the change.

"I have made up my mind," said Wilhelmina, going to the closet and taking therefrom her darkest gown, a dull gray, "to apply for that position, With a stiff collar and no color to brighten me up, I shall look antiquated enough to escape detection. It will injure no one but myself, and I want work badly enough to add eight years to my age. I shall claim to be 31."

Alice Thurston laughed. "You are desperate, Will, and no wonder; but I fear one lie will not suffice; you are not an adept in deceiving."

"You wait," was the answer.

Sidney Spencer sat in his private office, with a bored look on his face and a pile of manuscript at his elbow. Outside in the main office the clerks nudged each other and tittered, as young men will when the proprietor is out of sight.

"Another antiquated female!" whispered John Stanwood to his neighbor, as a light step on the stair was heard. A moment later Wilhelmina was ushered into Spencer's office.

"How old are you?" was the first query.

"Thirty-one," she said, bravely.

"What experience?"

"Ten years in a newspaper office." This was true, for while a mere child she had assisted her father on the Daily Bulletin, now among the missing journals. Spencer looked intently at the applicant. She seemed more promising than the rest. "Are you sure you are 31? You look young, very young."

Wilhelmina rose to the occasion. Her assumption of offended dignity would have deceived a keener man than Spencer.

"I'm sorry, sir, to have troubled you; perhaps you require a certificate of birth. Unfortunately I have none. Good afternoon."

"Wait a moment! Pardon me. You do not understand why I am so particular in regard to age. There are a dozen young idiots in my employ who waste their time in attentions to a younger woman. Harmless enough, I'll admit, but this is not a courting school, and the work requires undivided attention."

"I understand. I was young once myself." She sighed. There was an awkward silence.

"Thirty-one is not old," said Spencer encouragingly. "It only seems old to fellows in the twenties."

"Thirty-one is a respectable age and needs no apology," was the tart reply. Her gray eyes snapped and she looked fierce.

"She'll do," said Spencer to himself; "there will be no flirting." Aloud he said: "Can you stay this morning and help me out with this?" indicating the pile of manuscript.

"I shall be glad to begin at once," was her reply. A half-dozen times during the morning Wilhelmina caught her employer looking curiously at her; she wondered if he suspected her deceit. At night he said pleasantly: "I am well satisfied with what you have done." So she was engaged.

Much as she longed to appear her own pretty self, Wilhelmina dared not put aside her dark, unornamented gown and tightly drawn back hair. With these she assumed a dignified, old-fashioned manner of speech and action that kept her youthful coworkers at a distance.

Her desk being in Spencer's office, and the fact that much of their work was done jointly, placed them on a familiar footing. It was agreeable work, and had she not been acting a part Wilhelmina would have thoroughly enjoyed it. A date in an article one day led Spencer to tell his age, 28. After this she felt still more uncomfortable, saying to Alice: "I wonder how he likes working with his grandmother?"

One morning when Spencer came in Wilhelmina knew something had happened. In the months they had worked together she had learned to note every change in his expressive countenance. She had also learned to care deeply for his good opinion; the lie she had told him weighed heavily. She found herself wishing that he knew she was only 23; five years younger than himself. Would it make a difference?

This morning he looked at her so intently that she blushed. Then he said abruptly: "What makes women so secretive in regard to their age? Are added years a crime? You are the first one I have met who confesses to 31; you are really younger looking, and are brave not to lie about it."

Poor Wilhelmina. Without thinking of the consequences, she said hurriedly: "I did lie. I am only 23. I expected to be caught some time, and I'm foolish enough to step into the trap. Shall I leave this morning?"

Spencer rose and closed the door into the outer office. By this time Wilhelmina was gathering up her belongings and crowding them helter-skelter into her bag.

"What's your hurry?" Spencer asked, putting a detaining hand on her arm. Wilhelmina looked up into a face so full of sympathy and tenderness that the tears of vexation on her lashes mirrored the wonderment in her eyes.

"I want you to stay, little girl, because—well, because, I can't live without you."

Wilhelmina concluded to stay.—Boston Post.

War Weapons from a Surgical View

The medical journals abroad publish the results of some recent experiments with the new automatic revolver, which is being adopted by nearly all European Governments. The experiments in question were made on pine wood, on plates of iron, on a living horse, and on portions of human corpses, at distances varying from 11 to 330 yards, there being, however, little difference between the effects on living and on dead material. The hole is from five to seven millimetres in size, and decreases with the increase in distance, the aperture of exit being, however, slightly larger than that of the entrance. It seems that the effect of this weapon on the long, hollow bones was exactly similar to that of the German infantry rifle at 3,000 to 6,000 feet—the bone was splintered in every case, and in no instance did the projectile remain in the bone, the track of the bullet invariably forming a smooth channel, without shattering before the bone, and without bony debris, while in the event of a bullet striking the skull it invariably shattered the latter. As to penetrative power, the projectile at thirty to sixty feet passed through two human trunks and only stuck in the third, went through pine wood sixteen inches thick, and three iron plates each two millimetres thick.

John Was Ready.

In these days of proposed international alliances it is interesting to read of the little difficulty in which a Chicago newsboy found himself involved, and how he extricated himself therefrom.

He had wandered over into one of the "foreign quarters," on the West Side, where one can hear almost every language except our vernacular, and he was set upon by two or three boys.

He defended himself bravely and was holding his own fairly well, until the two or three were joined by as many more, and then the battle began to go against him.

"Say!" he yelled to a group of boys watching the fight from the sidewalk, "is there an English boy in the crowd?"

"Yes," shouted a stockily built urchin of about his own size.

"Come yere, then!" panted the young American, laying about him with all his might, "an' we'll clean out the hull gang!"

And they did.

Good Reason.

Storekeepers at times resort to ingenious methods to attract trade. The following is said to be an exact copy of a placard displayed in front of a store in a Southern town:

"Step inside and get the greatest bargains you'll ever get again."

Here is an announcement posted by a Russian shopkeeper in front of his place of business:

"The reason why I have hitherto been able to sell my goods so much cheaper than anybody else is that I am a bachelor, and do not need to make a profit for the maintenance of wife and children. It is now my duty to inform the public that this advantage will shortly be withdrawn from them, as I am about to be married. They will, therefore, do well to make their purchases at once at the old rate."

Simply Calculated.

For finding the average number of years which persons of any age may expect to live there is a very simple rule. If the present age be deducted from eighty, two-thirds of the remainder is the answer required. This result is not absolutely accurate, but it is near enough. For instance, a man aged 20 might, by this rule, expect to live forty years longer, which is just what the latest actuarial tables give. At 40 the expectation of life works out at nearly 27 years, while the tables give it as more than twenty-five years. At 60 the above rule allows just over thirteen years, and the table shows a little less.

Postoffices Named Dewey.

Twenty-eight postoffices in as many States have been named Dewey after the hero of Manila. This number is only four less than the number of those named after Washington.

STRAWBERRIES CHICAGO EATS

CHICAGO eats strawberries. A monster shortcake four miles wide and a fraction over seven miles in length, in weight 504 tons and containing 168 tons of strawberries, would be her daily consumption if all of the berries shipped to the windy city were made up in shortcake. But they are not, although most of them no doubt find their way between crusts which are served with sugar and cream. It would take a freight train of twenty-five cars to move the cake. The shortcake estimate is made on most liberal basis—allowing many more berries than are generally found in Chicago cakes. The weight of the berries is figured at one-third. The cost of the berries alone—at wholesale prices—is $23,000, and it costs on an average $2,000 per day to ship these berries to Chicago.

Chicago eats more strawberries to the person than any other city in the world. She consumes almost as many berries as does New York, because she is nearer to the greatest strawberry market and is able to get them fresher and better. She also has the advantage of getting the best berries grown in all the world. Chicago is the greatest market, not only for the Indiana, Illinois and Michigan shippers, but also Arkansas and Tennessee. She practically takes all of these three greatest crops. She pays prices ranging from $1 to $3 per crate, owing to the season. She never becomes glutted. This can only be said of one other city in the United States—New York. The Chicago strawberry season, starting with Florida berries and closing with northern Michigan, is about seven weeks. There is nothing in the vegetable world that so demonstrates the phenomena of the zones as do strawberries. Their march north is just as regular as clockwork and can be figured on almost to the hour by the strawberry brokers. The most remarkable feature of the strawberry production is the small acreage. Strawberries can be raised almost anywhere, but the acreage of land that produces the berries that are marketable and profitable is surprisingly low. Ten acres will furnish employment for fifty-five men and women during the season and each acre produces a net revenue on three weeks' picking of something over $300, or $3,000 for the patch. Each acre each morning gives about thirty-five to forty crates. The farmer picks, sorts, boxes and crates and hauls the berries to the special express stations, where the special express trains are waiting. He pays 10 per cent to his Chicago "strawberry broker," pays 14 cents for his crate, 36 cents for the picking, 33 cents for the shipping into Chicago—a total of about $1. He will average about 50 to 60 cents on each crate. The pickers are "professionals," many of whom start with the season in Florida and work through to the last crops in Michigan. They live in tents and cook their own meals. By scientific culture the American strawberry is constantly becoming larger and larger.

THE BEAT TWO NATIONS.

Skipper Marks Defied America and Great Britain.

Captain George Marks, of the American schooner Helvetia, is a man who successfully defied the authorities of two nations, says the Chicago Inter Ocean. When he collected his little bill for $650 from the owners of his boat, Canadians of Valley Field rejoiced with Americans. Fireworks, which had been bought for the Queen's birthday anniversary, were set off in honor of the doughty captain's victory. The little Canadian village had never heard such cheers as rent the air when Captain Marks, his wife and his soldier son walked down the gang plank in possession of a good roll of Dominion bank bills. Captain Marks' picturesque defiance of two nations aboard his stanch Helvetia sufficiently refutes the theory that "steam spoils romance at sea."

Captain Marks is a plain American citizen. He reached Valley Field, Canada, early last winter with a fleet of eighty vessels, which were passing through Canadian waters on their way to the great lakes. The whole fleet was caught in the ice, and there it had to remain throughout the winter. While the vessels were locked up in the ice the company which owned them went into liquidation, and a receiver was appointed, who finally sold the entire fleet, the Helvetia going to a Cleveland syndicate. Crews and captains of all the ships were paid off, with the exception of Captain Marks, who says that he was told his account was not in shape and would be got ready as soon as possible, and that then he would receive the money.

Captain Marks' crew left for their homes. His wife, who had been cook, remained with her husband, and weeks went by without the agent returning to pay the captain his money. He went to see the United States vice consul, who said he did not see that he could do anything under the circumstances. Captain Marks then engaged a local crew, his son having arrived, kept on living on the vessel and awaited developments. The syndicate paid for provisions for Marks and his wife, but declared that they were not responsible for any salaries.

Until his salary was paid Captain Marks was determined not to leave. The owners sent Captain Packer and a crew of five men to take charge of the Helvetia. Packer explained his mission. Very emphatically Marks declared that he would stay where he was until he got his money.

Captain Packer telegraphed to Cleveland for orders. He was told to lay the matter before the United States vice consul, Mr. Gorman. Mr. Gorman put the matter to the Washington authorities. He was directed to instruct the opposing parties to proceed in accordance with the law.

The Helvetia's new owners then engaged counsel in Montreal and swore out a warrant for "the arrest of George Marks, Sr.; George Marks, Jr., and Jennie Mitchell, wife of George Marks, Sr." A band of detectives from Montreal was sent to take the captain. They found the Helvetia securely barricaded. Young Marks had fought at San Juan, and he knew a thing or two about the usefulness of barbed wire. He surrounded the schooner's deck with a high fence, and posted pickets day and night.

Captain Marks met the detectives with the assurance that he was "darned glad" to see them, but would never give up the ship until he had a bullet in his heart or $650 of wages in his pocket. This sentiment was echoed by his wife, his son, and the twenty men of his crew. Citizens on shore encouraged the plucky skipper. When the detectives brought fire ladders and attempted to scale the ship's barricade, friendly Canadians seized the ladders and came near throwing the detectives into the water.

CAPTAIN MARKS AND HIS SCHOONER HELVETIA.

Captain Marks explained that "my own consul has gone back on me and some one named Cridler, connected with the State Department in Washington, ordered me off the boat without a dollar, and me 500 miles from home."

Detectives who were sent to investigate the enemy's intrenchment reported that a small army would be required to dislodge the captain. Mr. Archambault, Attorney General to the province of Quebec, was asked to issue warrants, and to allow troops to assist in the arrest of the captain, but he replied that such an action could not be friendly toward a United States citizen or to the government itself, and he therefore did not propose to take any hand whatever in the matter.

Completely discouraged, the lawyers for the vessel owners went to Valley Field with the amount Captain Marks had demanded, in Dominion bank bills. It was counted out to the captain and a receipt taken for the claim in full. Friendly relations are again established between the Marks family and the governments of Great Britain and the United States of America.

American Postal Statistics.

Many people will be surprised to learn that the postal establishment of the United States is the greatest business concern in the world. Charles Emory Smith, the postmaster general, writing in the Cosmopolitan, tells us that it handles more pieces, employs more men, spends more money, brings more revenue, uses more agencies, reaches more homes, involves more details and touches more interests than any other human organization, public or private, governmental or corporate. The Postoffice Department directs 73,570 postoffices, musters an army of 200,000 employes, spends this year $105,000,000 and counts receipts of nearly the same amount. It handled last year 6,214,447,000 pieces of mail matter, of which 2,825,767,000 were letters, so that every minute confides 12,000 new messages to its hands. It manufactured and delivered postage stamps to the number of 3,623,821,608, and the value of $71,788,333. It carried 2,069,742,000 newspapers.

HEAD OF THE SUGAR TRUST.

H. O. Havemeyer, Whose References to Trusts Created Interest.

The testimony recently given before the Industrial Commission by Henry O. Havemeyer, the king of the sugar industry in the United States, created much general comment and interest. The last remaining prominent man in the famous sugar refining family, Mr. Havemeyer delights in the honest simplicity and directness that characterize many Americans who have won enormous wealth as entrepreneurs. Mr. Havemeyer in his testimony referred to the very humble start which his family made in 1802. The poor emigrants found out that by boiling sugar (and being honest) they could make a neat profit. The two immigrants were brothers, and they worked hard and spent nothing. Thus when they died, they left a fine business house and factory to the cousins who succeeded them. Henry O. Havemeyer is a son of one of these cousins—F. C. Havemeyer. The latter was a graduate of Columbia and his son Henry O., was educated at home and abroad. Mr. Havemeyer, while interested in art, letters, and music, has devoted his best efforts to the tremendous business of which he is the head and is now the head.

H. O. HAVEMEYER.

Stevenson and the Beggar.

An American who visited the Stevensons at Samoa relates that the Samoans have a practice of begging. They boldly ask for whatever they may covet wherever it may be found. The novelist became tired of this practice, and therefore said one day to a Samoan friend who had acquired from him a necktie, handkerchief, and some other trinket, "Is there anything else you want?"

The Samoan made a hasty survey of the room.

"There is the piano," suggested Mr. Stevenson, ironically.

"Yes," replied the native, "I know, but," he added, apologetically, "I don't know how to play it."—Saturday Evening Post.

Billions in Gold.

American engineers estimate that the ore in sight in the South African gold district called the Rand, contains about $4,000,000,000 worth of the precious metal. But unless more rapid methods of production are employed, it will require fifty years to put this gold into circulation and use.

A Woman Gravedigger.

Not the least interesting among the new occupations for women is that which has been opened at Vienna. There, in the "gayest city in the world," is a woman gravedigger. She is the first professional woman gravedigger in civilized Europe.

Her Way.

Friend—Do you permit your wife to have her own way?

Husband (positively)—No, sir. She has it without my permission.

MALAYAN TRAITS.

Points of Character of the Philippine Islanders.

The Malay race is impassive, reserved, and even bashful, so that, until one knows the race better, one can scarcely credit his blood-thirsty reputation. The Malay is entirely undemonstrative. If he has any feelings of surprise he never shows them. Perhaps he experiences none, no matter how wonderful the sight which meets his gaze. He is slow and deliberate in speech, and circumlocutory in introducing a subject to be discussed. Even the children and women are timid, and scream at the sight of a European, while in the presence of the men they are silent and taciturn. Even when alone, the Malay neither talks nor sings, in this respect differing much from the Papuan, who has all the negro traits of chattering and singing to himself for company. Overpay a Malay for some trifle and his countenance betrays no sign of emotion; a Papuan will be grave for a moment out of perfect astonishment at the mistake made, and then burst into peals of grinning laughter, while he bends in two, and finally rolls on the ground in ecstasies of merriment. The Malays, when in company in a canoe, chant a plaintive, monotonous song; at other times they are silent. The Malay is cautious of giving offense to any one, and accordingly will hesitate to quarrel about money matters, and rather abandon a just debt due to him than run the risk of a feud with his equals. In his ordinary life he is as impassive as the typical Scot, and as fond of the nil admirari line of conduct as the American Indian, though, unlike him, the Malay does not dissemble his feelings or play a part. He has really little, if any, appreciation of humor, and does not understand a practical jest. To all breaches of etiquette he is very sensitive, and equally jealous of any interference with his own or any one else's liberty. To such an extent does he carry this idea that a Malay servant will hesitate to waken another, even his own master, though told to do so. The higher classes are exceedingly polite, possessing all the repose and quiet dignity of the best bred Europeans. There is, however, another side to the character of the Malay. He is reckless, cruel and careless of human life; possesses but a poor intellect; and has neither taste for knowledge nor any indigenous civilization.

Reset by Wolves.

Fortunately for John Bourke, of Mattawa, Ontario, a hungry wolf is not very particular about what he eats. Bourke was making his way on foot through the woods, says the Pembroke Observer, when he was chased by a pack of wolves. The birch-tree in which he took refuge was soon surrounded.

He happened to have matches in his pocket, so he diverted himself, for a few hours, with stripping bark from the tree, lighting it and dropping his little torches down on the ravenous animals. The fire kept them away from the tree, but they did not go far.

Finally as darkness drew on, a man named Tomeny, who had been waiting at the camp where Bourke was expected to pass the night, got uneasy and started out to meet him. Tomeny had his rifle, and long before he approached the tree Bourke's yells advised him that it was needed.

Tomeny shot two or three of the wolves on the outskirts of the pack. The other wolves started to eat them, and Bourke slid down from the tree. When the dead wolves were devoured, the others took up the chase of the men—and then again Tomeny's rifle cracked. The men reached the camp in safety, but only because Tomeny was a good marksman and able to keep the wolves busy eating each other.

Pretty Busy.

The Cleveland Leader tells of a family whose cook has not been in this country all her life. The members of the family have tried to be good to her, but it seems that they have failed to meet her expectations.

Molly wrote to her folks at home, not long ago, that she was not satisfied with her place. She first wrote with a pencil, and then copied her letter with a pen. Her mistress found the pencilled copy in the kitchen, and, very improperly, read it. Here is a part of the epistle:

"They make me work very hard here, they do. It's cookin', baykin' and swaypin' I am all the time, and here I am now at this minit writin' to yez wid me right hand, claynin' the snow from the sidewalk wid me left hand, and shovelin' coal into the furnace wid me other!"

Russia's Emerald Mines.

The emerald mines along the Tokova River, in the Russian province of Ekaterinoslav, are owned by the government. A peasant found the first one in 1839 in the roots of a tree that had been blown down. The government mined on its own account until 1862, then leased the mines to contractors, who have lost money on them, because the best emeralds lie near the surface. Those dug up from a depth are inferior. Good emeralds, in view of their growing scarcity, ought to hold their value well.

A country girl at a fashionable hotel noticed that all the guests used their forks only in eating their pie. Upon her return home, she reported the fact to the old lady, who comforted her by observing: "You shouldn't mind 'em, Jemima; it's all because they're too lazy to use their knives."

Wales' Simple Breakfast.

The Prince of Wales' breakfast never varies. It consists of tea, toast and one egg.

No woman believes she ever entirely loses the girlish charm.

Why Women Are Nervous.

The frequent cases of nervous prostration or utter collapse of the nervous system under which women "go all to pieces," as the saying is, have caused much thought and investigation on the part of physicians.

Certain inorganic substances are well known to cause various forms of nervous diseases which are readily traced to the poisons producing them. Further research leads to the belief that alum is a prevailing cause of so-called nervous prostration, for the symptoms it produces on the nervous system after its absorption into the blood are very remarkable indeed. Experiments physiologically made upon animals by Orfila, Professors Hans Mayer, Paul Seim and others, show that alum frequently produces no visible sypmtoms for many days after its introduction into the body. Then follow loss of appetite and other alimentary disturbances, and finally a serious prostration of the whole nervous system. The most prominent physicians now believe that "nervous prostration" and many affections of the nerves from which both men and women suffer are caused by the continued absorption of alum into the system.

It is probable that many medical men are unaware of the extent to which salts of alumina may be introduced into the body, being under the impression that the use of alum in bread is prohibited. Alum, however, is still used surreptitiously to some extent to whiten bread, and very largely in making cheap kinds of baking powder. In families where baking powder is generally used great care should be exercised to procure only those brands made from cream of tartar. The alum powders may generally be distinguished by the lower price at which they are sold.—British Medical News.

The Purist.

"It looks like rain."
"I beg your pardon."
"I say it looks like rain."
"What does?"
"The—the weather."
"The weather, my dear sir, is a condition. Rain is water in the act of falling from the clouds. It is impossible that they should look alike."
"What I meant was that the sky looked like rain."
"Equally impossible. The sky is the blue vault above us—the seeming arch or dome that we mistakenly call the heavens. It does not resemble falling water in the least."
"Well, then, if you are so thunderingly particular, it looks as if it would rain."
"As if what would rain?"
"The weather, of course."
"The weather, as before stated, being a condition, cannot rain."
"The clouds, then, blame you!"
"Ah! Here it comes! And I have taken so much time in talking to you that I shall get wet to the skin before I can reach yonder street car. Good day."
(Calling after him)—"I may not know as much about it as you do, but I've got sense enough to come in out of it, and you haven't."—Chicago Tribune.

A Canine Detective.

There's a dog in Bucharest who has just distinguished himself by identifying his master's murderer.

The murdered man was the proprietor of a wine shop. His shop boy was sleeping in the taproom on the night of the murder, the dog between his feet, when he heard a shot. The murderer a moment later entered the shop, presumably to rob it, but was driven away by the dog, which followed the fugitive, barking. Afterward he came back alone. Several suspects were arrested. The shop boy had never seen the robber's face and could not identify him. Finally the inspector of police arranged the wine shop as it had been on the night of the murder and compelled the suspected men to enter it one by one. Three passed unchallenged and came out again, vastly relieved.

Then a peasant named Dracu entered. At once the dog flew at him, chased him out of doors, precisely as he had done on the night of the murder. Dracu was handcuffed and held for trial.

Letting It Out.

A lady who had a servant somewhat given to curiosity inquired on returning from a visit one afternoon: "Did the postman leave any letters, Mary?"

"Nothing but a postcard, ma'am."

"Who is it from, Mary?"

"And do you think I'd read it, ma'am?" said the girl with an injured air.

"Perhaps not; but any one who sends me messages on postcards is stupid or impertinent."

"You'll excuse me, ma'am," returned the girl loftily, "but I must say that's a nice way to be talking about your own mother."—Sydney Town and Country Journal.

Happiness Is Work.

Recently Mr. Joseph Choate on being asked by Theodore Dreiser, as he tells us in Ainslee's Magazine, if long years of distinction and comfort brought content and happiness he answered: "Not exactly. There is happiness in constant labor, or at least the substitute for happiness, for any one who has acquired the habit of laboring constantly will not be at peace unless he is working."

A New Sensation.

If you want to enjoy a new sensation, tell a man you have heard something about him. He will think it is something mean, of course, for a man never hears anything else. Then tell him something pleasant. He will glow like a schoolboy, and both of you will feel better all day. Don't tell people the mean things you hear about them. That is inexcusable.—Atchison Globe.

INYO INDEPENDENT.

REV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, AUGUST 25.... 1899

The question whether the British will fight the Boers is now the most important in all the gossip over international relations. It is certainly a grave possibility for the South African Republic, and all who have interests there to be protected or destroyed. War is perhaps even probable, at this writing. Both sides are preparing for it, and it will be sharp and bloody should it come. The British are getting troops ready to leave India for the Cape, and detachments are going into the British possessions in South Africa from other parts of the Empire. The British Government has gone too far in its demands to turn back without a loss of "prestige," and a humbling of the national pride, which things no Ministry can afford to risk. And as for the Boers, they seem stubbornly resolved to govern their country in their own way. They have grudgingly yielded but a fraction of the "concessions" demanded by the English Government for the benefit of the Uitlanders, those "outsiders" who have of late years swarmed into the South African Republic, invested millions of pounds sterling, developed mines and taken out princely sums in gold for the enrichment of British stockholders. It is natural, no doubt, that these Uitlanders, who have become numerous and pay a very large share of the taxation of the country, should seek some share in its government, through extensions of the franchise, and also some relief from Boer legislation which discriminates against them and their interests and in favor of the Dutch citizen. On the other hand it is likewise natural, and morally and politically correct, for the Boers to seek to retain control of the country which they and their fathers wrested from the savages, and they have the right to prefer their own ways, however crude and stationary, to the "reforms" demanded, which would ultimately lead to Outlander control of the country. The Boers are good fighters, as they have proved themselves on several occasions, and their marksmanship is famous for its deadliness. It will be no Filipino "rabbit drive" that the British will have undertaken if they shall turn loose the dogs of war in the Transvaal. And it is not to be deemed an idle threat of the Boers that in case of war they will wreck the mines at Johannesburg, and so bring ruin to thousands of British stockholders. It looks as though the British must win in the long run, but the cost of victory may be greater than its fruits.

The following description is from the pen of John Muir the world-wide authority on glacial action: "Rivers work openly where people dwell, and so do the rain, and the sea thundering on all the shores of the world; and the universal ocean air, though unseen, speaks aloud in a thousand voices, and explains its mode of working and its power. But glaciers, back in their cold solitudes, work apart from men, exerting their tremendous energies in silence and darkness. Coming in vapor from the sea, flying invisible on the wind, descending in snow, changing to ice, white, spirit-like they brood, outspread over the predestined landscapes, working on unwearied through unmeasured ages until in the fullness of time the mountains and valleys are brought forth, channels furrowed for the rivers, basins made for meadows and lakes, and soil beds spread for the forests and fields that man and beast may be fed. Then vanishing like clouds, they melt into streams and go singing back home to the sea."

The Copper City Company is a wealthy incorporation, and at the proper time will begin the erection of a 100-ton smelting plant, the plans for which are now in their possession. Water for all purposes is available, as are also nearly all the fluxes which smelting will require. One of the needs of the country thereabouts is a railroad communication, but this want Mr. Alpaugh states will soon be supplied, as it is an open secret that the road now terminating at Johannesburg will before many months be continued on to Panamint, touching at or near Copper City on the way.—*Los Angeles Mining Review.*

Preacher Jeffries, the father of the pugilist, is lecturing in San Francisco and he proposes to extend his lectures to the northern part of the State. He draws large audiences. A small boy made a noise and the old fellow threatened to clean the hall out, which of course pleased the roughs who made up his audience. He is determined to make hay while the sun shines. When his son gets licked he will not draw half so well; so he must pray the Lord to be on that side of the fight yet awhile.

Marconi's system of wireless telegraphy is to be put in operation in Haiwaii as a means of communication between the different islands of the group. An organization has been formed, capital has been subscribed for the project, and some of the material is already shipped.

The largest part of the editorial space in Republican newspapers nowdays is used to show Democrats the folly of nominating Bryan for President next year. Strange how solicitous the Republicans have become about the welfare of the Democratic party.

An administrator of a deceased entry man is without authority, under the homestead law, to relinquish the entry of the decedent, whether authorized to do so by the local courts or not.

BALLARAT.

In a letter to the Los Angeles *Mining Review* Judge Decker of Ballarat writes as follows:

About sixty-five miles northeast of Johannesburg, the present terminus of the railroad, nestling at the foot of Telescope or Panamint Mountains, lies the little town of Ballarat. The town has been built on gently sloping land in the Panamint Valley, the houses being mostly constructed from the adobe which is abundant on every hand and which, when properly manipulated, forms strong and durable walls, cool in summer and warm in winter.

The mines are situated from two to twenty miles and over away in what is known as the Telescope or Panamint Mountains, whose highest peaks are nearly 11,000 feet above sea level. The mountain range has been cut by torrential and glacial action in numerous places, producing deep canyons and precipices, forming beautiful and enchanting landscapes, which can only be appreciated by being seen.

The town of Ballarat is the distributing point for the different camps where mining operations are being carried on. The principal mines are situated in Tuba, Jail, Surprise, Happy and Pleasant Canyons and at Mineral Hill. At present there are some six mining plants in operation or in course of construction. The general character of the ores being base, only a small percentage of the gold can be saved by free milling. The milling plants are having cyanide additions, which process, from practical demonstration in working several hundred tons of tailings, has been found the most satisfactory method of treatment.

Mostly all the auriferous veins have a northerly and southerly trend, are well defined, strong and large ledges, carrying sufficient percentage of gold to not only pay for working, but yielding large returns where systematic and intelligent work has been performed. A great many properties owned by parties not having sufficient capital to develop them remain idle, which if properly worked could be made to pay handsomely, while many of the properties now being worked could also be made more profitable if the management had more practical knowledge of the business.

The mountain range contains besides gold large and valuable deposits of silver, lead, copper, fire clays, plumbago and many varieties of fine building stones, while the valleys on either side are repositories of salt, soda, borax and other saline deposits, all of which will become very valuable when suitable transportation can be had. There is one lead deposit showing upon the surface 28 feet in width by 110 feet in length, mostly all of it showing a high percentage in lead, carrying about 10 ounces silver and $4 gold, which would furnish a railroad company considerable freight for some time to come. There are also considerable deposits of antimony which could be handled with profit, providing cheap transportation could be had.

At many places in the mountain range sufficient water exists for power, and an abundance of nut pine groves growing on the mountain sides will furnish for some time to come excellent fuel.

The climate will admit of working the mines at all times of the year. The summers are cool and salubrious, and the winters not severe. In both Panamint and Death Valleys during the summer months the heat becomes oppressive, but the balance of the year is not only pleasant but very healthy. During the last three years there has been but three deaths, all of which were practically incurable cases of disease contracted at other places, and of such nature as to be hopeless.

The Los Angeles *Times* publishes an exhaustive official report on water development in Southern California. The figures show the vast reservoirs that exist below the surface of the earth and which only require sinking and pumping to obtain. Five of the counties have during the past twelve months developed 31,242 inches of water by sinking wells, for irrigation and other purposes. From now on the rancher who wants water will not have to wait for rains nor for irrigating dams; he will go ahead and develop on his own premises the water he needs.

According to accounts Gov. Gage is a little particular about some things. After declining to declare a holiday in honor of the return of the soldiers, he desired the citizens' reception committee to rearrange their plans, because he didn't want a backaction trailed to any State waterwagon in which HE rode. By the way, has Southern California ever furnished a Governor who was capable of doing the right thing at the right time?

Frenzied rioting has occurred in Paris, and all over the "affaire Dreyfus"; 380 persons were injured; 360 were taken to the hospitals; 59 police agents were wounded; 150 persons were arrested, of whom only 80 were detained in custody. La Belle France must be a real nice country to live in, on account of society.

A good-sized rumor is floating around to the effect that the reason why the question over the validity of the repeal of the State mining law of 1897 has been raised is to make it an additional argument for the calling of an extra session of the Legislature by Governor Gage. Dan Burns is a mining man himself.

The Yellow Aster Mining Company of Randsburg declared a dividend for July of $20,000. This makes the total amount paid in dividends by this company nearly a quarter of a million dollars. Now that their new mill is crushing more ore an increase in the amount declared in dividends may be looked for.

The value of the average annual production of the earth has been estimated at $10,000,000,000.

Although the law does not distinctly state that annual labor to the amount of $100 must be expended upon placer claims, the Land Department and the Courts have held that the law of the lode claim applied also to placers, and that annual assessment must be performed.

Admiral Dewey's salary amounts to $37.50 per day, regardless of the weather; President McKinley gets $131 per day; Cabinet officers, the Vice President and Speaker of the House get $22.22 per day. Senators and Congressmen, $13.70 and the Chief Justice of the Supreme Court $29 a day.

The California regiment of fighters are doubtless at home in San Francisco today, receiving a royal welcome. When the boys are finally mustered out many interesting details may be had about the lovely army business in the Philippines.

In California there is no such thing as "non-assessable stock" in a corporation. A California corporation is given power by positive statute to levy necessary assessments, and no power exists in a corporation to waive such legal rights.

Eight hundred dollars in United States gold coin weighs 43 ounces Troy. Nine-tenths of this is pure gold, one-tenth alloy. Hence, $800 divided by 38.7 gives $20.6718, the coin value of one ounce of pure gold.

The demand for cattle is increasing. The stock exchanges say that prices will continue on the upward movement for several months to come.

The Reno reduction works are at a standstill for want of water. The owners contemplate moving the plant to a point near Wadsworth.

The Bodie Standard company has paid another dividend, making ninety-four in all.

NEW ADVERTISEMENTS.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court will sell at private sale to the highest bidder, all those certain lots, pieces or parcels of land and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be received at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased.
P. H MACK, Attorney for Administrator.
Dated August 23d, 1899.

OFFICIAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schen, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz-simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roote, W. C. Fitz-simmons and William H. Patterson, Defendants.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 12th day of August, A. D. 1899.

D. J. HESSION, Clerk
[Seal] By C. N. ROSE, Deputy Clerk.

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als. Plaintiffs, vs. Gilbert J. Roote et als. Defendants. Summons. P. W. FORBES and P. H. MACK, Independence, California, Attorneys for Plaintiffs.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899. D. J. HESSION, Clerk.
[SEAL] By C. N. ROSE, Deputy Clerk.
P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

IN the Matter of the Estate of CARMEN C. G. CARRASCO, Deceased.

Notice for publication of Time Appointed for Probate of Will.

NOTICE is hereby given, that SATURDAY, the Twenty-sixth day of August, 1899, at 10 o'clock a. m. of said day, and the Court Room—Probate—of said Court, at the town of Independence, in the County of Inyo, State of California, have been appointed as the time and place for proving the will of said Carmen C. G. Carrasco, deceased, and for hearing the application of Relles S. Carrasco for the issuance to him of Letters Testamentary thereon.

D. J. HESSION, Clerk.
P. H. MACK, Attorney for Petitioner.
Dated August 8th, 1899.

THE TWELFTH

ANNUAL FAIR

EIGHTEENTH AGRICULTURAL DISTRICT

Comprising ALPINE, INYO and MONO COUNTIES, California

AGRICULTURAL DISTRICT No. 18. STATE OF CALIFORNIA.

WILL BE HELD AT

Big Pine, September 19th, 20th, 21st and 22d, '99, Calif.

The following racing events will occur, under the management of the Board of Directors:

TUESDAY, SEPT. 19th.

RUNNING—Indian Pony Race, 1 mile, 2 in 3	$15
RUNNING—Untried Horses, one-half mile, 2 in 3	50
RUNNING—One-fourth mile, free for all, 2 in 3	50

WEDNESDAY, SEPT. 20th.

TROTTING—One mile, 2:40 Class, 2 in 3	$75
RUNNING—One mile dash, free for all	75
Gentlemen's Bicycle Race, 1 mile, 2 in 3	15

THURSDAY, SEPT. 24th.

TROTTING—One mile and repeat, free for all, 2 in 3	$100
TROTTING—One mile, 2 year olds, 2 in 3	50
Ladies' Bicycle Race, one-half mile dash	15

FRIDAY, SEPT. 22d.

BASEBALL GAME, free for all	$75

FREE for Inyo, Mono and Alpine Counties.

Entrance, 10 per cent of purse.

Not less than three to enter and two to start.

Entrances close at 6 p. m. on the day preceding the race.

National trotting rules to govern trotting races and California State Agricultural rules to govern running races.

For any further information as to above racing, address

A. P. SMITH,
Big Pine, Cal.

PREMIUM LISTS to be distributed. For information concerning Exhibits of Live Stock, Agriculture and Horticulture address L. M. NEWMAN or J. R. ELDRED; on Art, Fancy Work and Cooking, W. G. DIXON; Minerals, W. H. UHLMEYER, Big Pine.

SPECIAL RAILROAD RATES—To Alvord and return: From Benton, $2.50; Bishop, $1; Independence, $1.50; Lone Pine, $2; Keeler, $3. Freight free, upon exhibitors paying charges one way, and on presentation of certificate of exhibition at end of Fair exhibitors will be refunded and shipment billed free to destination.

Respectfully submitted,
I. J. WOODIN,
Ex Public Administrator.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

I. J. Woodin, being first duly sworn according to law, deposes and says: That he is the ex-Public Administrator of Inyo County, State of California. That while acting as Public Administrator letters of administration were issued to him in the matter of said estates; and that said letters have not been revoked. That he has read the foregoing return and account, and that the matters therein contained are true in substance and in fact.

I. J. WOODIN.

Subscribed and sworn to before me this 19th day of July, 1899.
(SEAL.) D. J. HESSION, Clerk.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 9:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train on Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time Table above. Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS

Hon. Walter A. Lamar, Judge.

MONDAY, Aug. 21, 1899

J. S. Stotler vs. P. J. Ginser—Motion to fix day of trial continued until Tuesday, Aug. 29, 1899.

Estate of Edouard Chenot, deceased—Hearing return and account of sales of real estate and petition for confirmation.

WEDNESDAY, Aug. 23, 1899.

Anna M. Mates vs. Charles H. Mates; action for divorce—Decree granted.

Real Estate Transfers.

The following deeds have been recorded since August 17, 1899:

Jno. L. Sale to Wm. W. Sale, March 5, 1898; Mill site and water at Stone Corral, South Park District—$1.

Wm. W. Sale to Radcliffe Con. Gold Mines, L'd., same property—$10.

P. P. Keough to Jos. J. Smith, Tract in Keough's Addition to Bishop—$10.

J. J. Smith to Geo. C. Keough, 40 acres near town of Bishop—$10.

Louis Wood to Geo. S., Jeanette Blanche and Johanna Wood, July 29, 1899; Lots in Independence, $100.

Methodist Church.

During the absence of the Pastor at Conference there will be no preaching services at either of the Independence circuit appointments. Independence Sunday-school will meet at the usual hour on Sunday afternoons.

Due notice will be given of the resumption of services.

JOHN J. PARDEE, Pastor.

John Dodge and Mr. Johnson from Lone Pine were here to-day.

Billy Cameron left here Wednesday on a prospecting trip to Saline Valley.

J. G. Dodge and Mrs. A. M. Mates were up from Lone Pine on Wednesday.

Mrs. J. B. Stewart of Big Pine was a visitor in town to-day. Bert Ober brought her down.

Schober's freight team, heavily loaded, passed southward this morning, bound for Mojave.

E. Robinson was quite ill a couple of days this week. He was able to be out yesterday.

The Bishop and Lone Pine teams are practicing for the match game at Lone Pine on the coming 16th.

Joe A. Brown, Treasurer of Mono County, accompanied by Mr. Carey, is spending a few days at Independence.

S. H. Scratt of the Big Pine saw mill was in town during the week on business bent. The mill is buzzing right along.

Sheriff Given and District Attorney Dehy left for Big Pine yesterday morning. There has been a "gun fracas" of some kind up there.

At Big Pine the details of Fair arrangements are being perfected. Don't forget something that you might look after now pending that event.

W. J. Lake got back a couple of days ago from a camping trip to Kings River. W. L. Hunter was with him a part of the time and has greatly improved in health.

Mr. and Mrs. W. T. Bunney and Miss Blanche Bunney left Tuesday morning for a trip through the mountains. Miss Bunney will go to San Jose from Millwood.

A party left here yesterday to study up the feasibility of a wagon road to Saline Valley by way of Mazourka canyon. They expect to be gone several days and will be able to make a thorough report.

The P. D. Q. Cyanide Company started up their 50-ton plant on the Reward tailings last Monday, and the outfit is said to be working to perfection. They have about 15,000 tons of material to handle. Three leaching tanks are used of a capacity of fifty tons each.

Mr. and Mrs. J. R. Pendergast and Travers Townsend arrived here Wednesday evening from Visalia. They are making the "grand circle," having come in by way of Kern river and are going back by way of Kings river. Mrs. Kelso of Visalia accompanied the party as far as Lone Pine, where she became ill and returned home by way of Mojave.

J. D. Lewis, Esq., Miss Wilkins, teacher of the Indian school at Camp Independence, and Mrs. Bowman, of the Los Angeles *Herald*, arrived here last Tuesday from a trip to the N. E. A. Convention at Los Angeles. They went through the mountains by way of Kearsarge Pass to Fresno, taking the train from there, and returned by way of Mineral King and Mount Whitney.

A Rich Strike.

A strike of good ore was reported at the Reward mine at the end of last week, and on Saturday we went over and visited the property. Superintendent Hoskins very kindly took us all through the mine. One thing that strikes the visitor most forcibly is the great amount of stoping done and the small amount of timbering. In several places in the mine, more particularly in the older workings, vast chambers have been stoped out 50 feet or more on the dip and as much on the strike of the vein and 10 to 15 feet wide. Except the timber used in the car tracks there is not 1000 feet of lumber used in the mine. The country rock is blue lime; there is absolutely no moisture, and this makes the ground hold like adamant. The strike referred to was the opening up of a body of rich galena ore on the bottom level. In upraising from the level a natural cave or chamber was broken into, and this showed a five-foot face of ore with a two-foot streak of solid galena with the same metal thickly interspersed through the remaining portion of the ore body. The chamber has since been opened up until about twenty feet of face has been exposed; and as the same ore shows in the next level, a large body of good shipping ore is now in sight. A winze has been sunk about twenty feet on the same ore chute from the level, and while the ore carries less galena it is high grade gold ore. Mr. Hoskins has been sinking the main incline to tap this chute from beneath, and last Saturday was just coming into ore.

The mill was started up on full time last night and there is enough good ore in sight to keep it running for some time. All this is good news; it means employment for a number of men, a good market, and more than all it means that the Hoskins brothers will be rewarded for their pluck and enterprise, which alone kept the property from being abandoned. They risked every dollar they possessed in the concern and richly deserve their good fortune.

Local, and Yet So Far.

The Tecopa mine, which was worked years ago and is situated ninety miles north of Vanderbilt, on the line between San Bernardino county and the State of Nevada, is going to be reopened. The Tecopa Mining and Smelting Company, lately organized, with headquarters in Los Angeles, D. W. Shanks, president, will undertake the work.—*San Bernardino Sun.*

The property is 26 miles west of the Nevada and California (new) line, one fourth mile north of the San Bernardino boundary and is, therefore, situate in this county and State. It is 145 miles distant in an air line from Independence and at least 200 by the nearest roads and trails; no wagon team could get there without going a long ways outside of Inyo. The principal mines are the Gunsight and Extension, the tax title of which was redeemed from the State last April. They show great bodies of ore containing lead, copper and silver. In '73 a Chicago company built a furnace and a very fine 10 stamp mill, which has not turned a wheel since '75. Water for it is piped from the Resting Springs creek which leaves a beautiful oasis and sink on the edge of one of the most infernal deserts on the Amargosa wash.

There is considerable local inquiry for blank forms of mining location notices. The preparation of that same thing just now what is bothering lawyers all over the State. Our belief is that if a prospector makes a new discovery and posts and records the ordinary old notice that his marked boundaries must be respected, and that no court will allow a jumper to take from a bona fide owner any worked claim on account of such technical points as have been dug up by the legal sharps.

A Jointed Snake.

Mr. George D. Pemberton of Spottsylvania, Va., reports the following: "While walking around my farm I came across a copper colored snake about 2½ feet long. I struck the reptile a blow on the head with a stick, and, to my surprise, the sake fell apart in four pieces. Near by was a hole, and into this the head went, and, although I worked for half an hour trying to get it, I failed. I then examied the body, which was as hard as if had been frozen, and, as far as I could discover, it was entirely lifeless. Thinking it was a jointed snake, I left the pieces of the body on the ground and went to the house. Shortly afterward I returned, but the portion of the body that I had left disappeared and no trace of it could be found."—Cincinnati Enquirer.

The Dear Child.

"What are you after, my dear?" said a grandmother to a little boy who was sliding along a room and casting furtive glances at a gentleman who was paying a visit.

"I am trying, grandma, to steal papa's hat out of the room without letting the gentleman see it. He wants him to think he's out."

Marriage Is a Serious Thing.

An Atchison mother's boy married recently, and his wife made him shave off his mustache before she would make him any soup, of which he was very fond. When he lived at home, he got his whiskers in the soup every day, and his mother took it as a compliment to her cooking.—Atchison Globe.

The Method.

"Here's a case of a man who went to law in order to get the girl he loved away from her parents."

"Took out a writ of attachment, I suppose."—Chicago Post.

There are annually killed in Africa a minimum of 65,000 elephants, yielding the production of a quantity of raw ivory, the selling price of which is $4,200,000.

As early as the year 47 B. C. the great Alexandrian library contained over 40,000 valuable books.

She Was Too Mad to Speak.

The Washington woman came across some excellent tea in England—tea the like of which she had never known before. She knew there was none of it to be had in America, so she bought pounds and pounds of it to bring home with her. She didn't mean to pay duty on it, for she felt that no really patriotic American can consistently pay a tea tax after what our ancestors did in Boston harbor, so she made herself a petticoat, and into the lining thereof she quilted the tea. When the steamer drew into port, she put on the garment. To wear it was martyrdom. It seemed to weigh a ton. She could scarcely walk in it, and the hang of her new going ashore gown was utterly ruined by it, but the custom house officials let her pass without suspicion. She went directly to the railway station and started for Washington. The journey will live long in her memory for its discomfort. Her husband met her at the station. He marked her pale, worn look. As they stepped into the carriage she told him the story.

"I wasn't going to let them get ahead of me," she said proudly. "Wasn't it a lovely idea?"

Her husband fell back in the carriage and roared.

"Lovely!" he said. "Lovely! I should say it was. Why, my dear, there isn't any duty on tea."

And let me remark in passing that the child's sob in the silence isn't by any means the only thing that curseth deeper than the strong man in his wrath.—Washington Post.

The President In Public.

It is a point of etiquette, universally observed at the national capital, never to obtrude attentions upon the president when he appears in public. On the street or in any place of amusement in Washington the president has the undisputed privilege of appearing as any private citizen. He is never stared at unless it is by strangers, and his appearance in a theater is not greeted with any sort of demonstration. The president may walk where he pleases in the streets of Washington, meeting with no further notice than the tipping of a hat, unless of his own motion he stops to speak with some one. Office seekers and petitioners never venture to approach him on the street. His surest riddance of the importunities of the throng is to go out among them.

Sir Julian Pauncefote, speaking of the American customs that had impressed him, remarked that, while a foreigner's first impression might be that the seeming indifference of the public toward the president when he appeared on the street or at the theater was the result of an exaggerated idea of democracy, it must become apparent on closer observation that it was the highest possible tribute of respect and consideration.—San Francisco Argonaut.

She Could Bargain.

Mr. Smithers—Martha, I don't know how we can afford to give this dinner you're plannin. Things hain't been comin my way very swift lately. We've got to save money. You better call it off.

Mrs. Smithers—Josiah, you make me weary. If you're gittin pinched, that's only the more reason why we've got to keep up appearances. Let folks git the suspicion that we're hard up and everybody that we owe money to will git after us at once. No; I'm goin to give this blowout, and it's goin to be great. I'll astonish the natives. I've got three poets, an artist and a crack fiddler engaged to—

Mr. Smithers—Goodness gracious! But where are we goin to git the cash for all these things?

Mrs. Smithers—Sh-h-h! I've got a standoff at the grocery for the eatables. The fiddler is to take a suit of your old clothes for his pay, and, of course, the artists and poets'll come free. They even agree not to send their plates back for second helpin's. If you ain't got a wife who can bargain, I'd like to have you tell me why.—Chicago News.

His Burglar.

A Philadelphia real estate man, when going through a vacant house one evening to see that all was well, heard a slight noise behind him. Turning slightly, he saw the form of a man. As the broker was not armed, he did not like the idea of meeting a burglar in combat, and, besides, he is very timid, so he rushed to the door and fumbled with the lock, all the time yelling at the top of his lungs. When he had got the door opened, he looked back, and then saw that the "burglar" was really his own reflection in the large drawing room mirror. He had no sooner made this discovery than he was seized by two policemen, who were attracted by his screams, and it took nearly a half hour for him to explain that he was not a housebreaker himself.

In a Dilemma.

"If I go ter school terday, de teacher'll lick me fer not preparin my lessons, an if I stay home me mudder'll lick me fer not goin ter school. Now, either I got ter go or stay home. But if I go an de teacher licks me an mudder finds it out me mudder'll lick me fer not doin my school work, an if I stay home an me mudder licks me de teacher'll lick me termorrow fer bein a truant! Gee! Guess I'll go ter sleep!"—Nashville American.

An Inference.

"Such are the delusions to which the human senses and understanding are susceptible," remarked the man who doesn't care whether you comprehend him or not, "that, logically speaking, it is absolutely impossible to be absolutely sure of anything."

"Dear me!" exclaimed Miss Cayenne. "I didn't know you were one."

"What?"

"A weather prophet."—Washington Star.

The Difference.

"Pa, what's the difference between talent and genius?"

"A man with talent is able to build for himself the finest monument in the country. The public usually has to provide the monument for a genius."—Boston Journal.

It is the advice of a connoisseur in teas to buy the leaves in considerable quantity. Tea preserved in a chest keeps and increases its flavor.

At the Strozzi palace, in Rome, there is a book made of marble, the leaves being of marvelous thinness.

LEGAL.

List of Delinquent Purchasers of School Land in Inyo County, Showing the Amount Due January 1, 1899.

Respectfully submitted to the Honorable Board of Supervisors.

D. J. HESSION, County Auditor.

Filed July 8, 1899.

D. J. HESSION, Clerk

Approved July 11, 1899.

A. C. FREEMAN, Chairman.

Attest: D. J. HESSION, Clerk.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner, your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

REGISTER OF TREASURY.

Hon. Judson W. Lyons, Register of the United States Treasury, in a letter from Washington, D. C., says:

Hon. Judson W. Lyons, Register of the Treasury.

April 23d, 1899.

Pe-ru-na Drug M'f'g Co., Columbus, O.:

Gentlemen—I find Pe-ru-na to be an excellent remedy for the catarrhal affections of spring and summer, and those who suffer from depression from the heat of the summer will find no remedy the equal of Pe-ru-na.

Judson W. Lyons.

No man is better known in the financial world than Judson W. Lyons. His name on every piece of money of recent date makes his signature one of the most familiar ones in the United States. Hon. Lyons' address is Augusta, Ga. He is a member of the National Republican Committee, and is a prominent and influential politician. He is a particular friend of President McKinley.

Remember that cholera morbus, cholera infantum, summer complaint, bilious colic, diarrhœa and dysentery are each and all catarrh of the bowels. Catarrh is the only correct name for these affections. Pe-ru-na is an absolute specific for these ailments, which are so common in summer. Dr. Hartman, in a practice of over forty years, never lost a single case of cholera infantum, dysentery, diarrhœa, or cholera morbus, and his only remedy was Pe-ru-na. Those desiring further particulars should send for a free copy of "Summer Catarrh." Address Dr. Hartman, Columbus, O.

It Didn't Matter.

A bluff old farmer with a loud voice got in at a little station and walked down the aisle looking for a friendly face or a kindly eye, but not seeing any he asked the most sour looking man on the car to move over and give him a seat. The fellow did so, but with a manner that indicated that the old man was anything but welcome. The old farmer wanted to talk, and tried in every way to engage his seatmate in conversation, but the through passenger would have none of it. He turned his shoulder to the farmer and gazed out of the window with a bored expression on his face. The old farmer was determined to draw him out, and after several ineffectual efforts raised his voice loud enough to be heard all over the car and said:

"I killed a hog yesterday for my winter's meat. How much d'ye think he weighed?"

The through passenger looked worse bored than ever, but finally said, "I don't know anything about hogs."

"Oh, well, you might make a guess."

"Well, say 300."

"No, he didn't weigh that much. Guess again."

"Well, I'll say 200."

"Too high. He wasn't as heavy as that. Make another guess."

"I'm not good at guessing. How much did he weigh, anyhow?"

"Well, you have had two guesses. But you see he wasn't much of a hog, and I didn't weigh him."—Indianapolis Sentinel.

One on the Minister.

A distinguished Massachusetts clergyman tells a story at his own expense. He was on a tramp through the White mountains with another clergyman for a companion. One day they mounted the driver's seat of a stagecoach. As is often the case, the stage driver was an interesting character, whose conversation abounded in good stories. The three speedily became friendly, and it was with reluctance that they parted at the end of the journey. "I'm glad to hev met yer fellers," said the driver on leaving them; "yer see, I haven't seen a man this summer—only ministers."

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

LAST OF AN OLD RACE.

THE RICH PAMUNKEY INDIANS OF VIRGINIA.

Remnant of the Tribe that Powhatan Once Ruled Are the Most Aristocratic of Red Men—Feel Themselves Above the Negroes.

In King William County, Virginia, not more than twenty-five miles from Richmond, there live the only remains of a once large and powerful tribe of Indians. When Pocahontas saved John Smith from the club the Pamunkeys numbered some 20,000, and could raise an effective force of 3,000 warriors. Less than 100 now are left, and although the birth rate has in the last decade slightly exceeded the death rate, there is little probability that they can maintain their individuality another century. Yet they want for nothing, have more land than they know what to do with, and are all in all the richest of red aristocrats. They live on a little peninsula, a bottle-shaped neck of land comprising some 800 acres, of which 250 are under cultivation. They are far more wealthy considered per capita than any nation in the world, and far more happy. Their tract abounds in game, which is one of their chief sources of subsistence. It is secured to them by an act of the old colonial Legislature. They hold it in common, are prohibited from alienating the title, and are exempt from taxes, although, under an ancient law, they are required to supply the Governor of the Virginia colony annually with a certain amount of wild game. This practice still continues, and during the shooting season, spring and fall, they are in the habit, now and then, of sending the Governor, by the conductor of the train, a bunch of wild ducks or a haunch of venison.

The Pamunkeys have no relation with the United States Government. They receive no annuities, and their names are not upon the rolls of the Indian office. The State of Virginia annually appoints five trustees to look after their interests, but the offices are sinecures, as the Indians are perfectly capable of looking after themselves. They elect their chief and a council of four, who exercise executive, legislative and judicial functions. Every member of the tribe is allowed to vote, and on the day appointed they meet at the council house, with usually two candidates to choose from. Those in favor of one indicate their choice by dropping a grain of corn into the ballot box; those who prefer the other indicate it by dropping a bean in the same place. These native officials take care of the tribe, punish all offenses except felonies, over which the State courts have jurisdiction, and conduct a co-operative merchandise store, which is patronized by white people in the neighborhood, as well as the members of the tribe. The Indians are temperate, moral, peaceable and industrious. Very few of them are full-blooded. During the 300 years of contact with the whites and the negroes around them they have been unable to preserve their racial integrity, although the laws of the tribe prohibit co-habitation or marriage with persons of African descent. They are exceedingly proud of their lineage, and, while they would probably acknowledge the white aristocracy of Virginia as their equals, they decline to have anything to do with the blacks, and some years ago raised a miniature rebellion because a mulatto woman was placed in charge of the public school upon their reservation.

Realizing that continual intermarriage has impaired the physical condition of the tribe, they have recently appointed a committee to treat with the remnant of the Cherokee Indian nation of North Carolina on this subject.

The Pamunkeys are not only thoroughly civilized, but are quite inclined to be religious. The best building on their reservation is a Baptist Church, at which nearly every member of the tribe attends service twice on Sunday under the administration of a native preacher.

ANECDOTE AND INCIDENT

Playwright David Belasco was entering the Garrick Theater, in New York one night recently, when a diminutive newsboy rushed up to him, and shouted: "Wuxtry! Terrible accident to President McKinley!" "Dear me!" said Belasco, fumbling in his pocket for change; "what kind of an accident did he meet with?" "Nearly drowned, sir!" replied the urchin, his eyes dancing; "he fell through a mattress into the spring." Belasco gave him a nickel.

The nurse on duty in a certain London hospital was giving the little ones their last meal for the day. All save one were patiently waiting their turn to be served, the one in question being a little rosy-cheeked convalescent, who was calling lustily for her portion. "Aren't you just a little impatient, Dorothy?" inquired the kindly nurse, with just a little tinge of correction in her tone. "No, I'm not!" retorted Dorothy, promptly; "I'm a little she patient!"

At nearly every station on the Chesapeake and Ohio Railroad in Virginia picturesque colored men and women attend the trains with trays of fried chicken, corn bread, boiled eggs, sandwiches, pie and other refreshments, crying: "Hyer's spring chicken, tender and nice!" "Where do you get spring chicken this time of year?" asked a passenger of a venerable "auntie" one bitter March day. "You'ns a Nawth'n lady, ain't you, honey?" responded the lunch vender, with a twinkle in her eye, "an' Nawth'n ladies is good to poh kul'd folks, so you hadn't ought to ask nobody whar dy gits de spring chickens."

At a station on the main line of the East India Railway a train from Delhi had stopped, and one of the travelers—an officer of the Royal Engineers—began to quiz from the carriage window a "tester" who was going his rounds, striking the wheels with his hammer. "Why do you beat the wheels like that?" was the first question. "Sirkarka hookum" ("It is the order of authority"), replied the imperturbable native. "But what is the use of striking the wheels?" "Khodarjani. Hum i-sa thees burssi kurthani. Sirkarka hookum." ("God knows, I have been doing this for thirty years. It is the order of authority.")

In one of the hospitals in the South last summer a busy-looking, duty-loving woman bustled up to one of the wounded soldiers who lay gazing at the ceiling above his cot. "Can't I do something for you, my poor fellow?" said the woman, imploringly. The "poor fellow" looked up languidly. The only things he really wanted just at that time were his discharge and a box of cigars. When he saw the strained and anxious look on the good woman's face however, he felt sorry for her, and with perfect sang froid he replied: "Why, yes; you can wash my face if you want to." "I'd be only too glad to," gasped the visitor, eagerly. "All right," said the cavalier, gallantly, "go ahead. It's been washed twenty-one times already to-day, but I don't mind going through it again if it'll make you any happier."

Just before his recent illness Rudyard Kipling was at the Century Club when a group of men were discussing the exact location of the boundary between sobriety and inebriation. One of them asked the Anglo-Indian when he should say a man was drunk. According to the story, Kipling replied: "I should say that a man is drunk when he sits on the kerb outside his club and cries because he isn't at home."

In the Silver Bow Club, in Helena, they used to play big poker. At the game one day sat Marcus Daly, Senator Hearst and J. B. Haggin, when there burst in a radiant New York drummer, who had a two weeks' card to the institution. He marched up to the players, and politely inquired if he might take a hand. "Why, yes; come right in," said Daly. The drummer pulled out a roll of bills, and threw a hundred-dollar note on the table. "Let me have chips for that," he said, grandly. He went to hang up his coat and hat. When he returned the bill still laid on the table. "What's the matter gentlemen?" the traveling man haughtily inquired; "ain't my money good?" "Why, yes, to be sure," said Daly. "Hearst, give the gentleman a white chip."

Welcome Parishioner.

A charming little story is told of Queen Victoria's first visit to Crathie Church, near Balmoral. On that occasion a fine dog which belonged to the clergyman followed his master up the pulpit steps, and lay against the door during the entire service. Although the dog made not the slightest disturbance, Sir George Grey, who was then in attendance on her majesty, regarded the animal's presence as somewhat disrespectful, and suggested to the clergyman that it had better be dispensed with in the future.

The next Sunday, therefore, the dog was denied his usual privilege of church going, and remained sorrowfully at home.

A day or two later the clergyman was honored by an invitation to dine with the royal family. To his surprise, Queen Victoria presently inquired for his dog, saying she had noticed he was not at church Sunday.

"I kept my dog at home last Sunday, your majesty," replied the clergyman, "as Sir George Grey thought his presence in church would annoy you."

"Oh, no," said the queen, heartily, "let him come as usual. I only wish everybody behaved at church as well as your noble dog!" added her majesty, with a decided spice of mischief in her tone.

Sir George Grey's feelings are not recorded, but it is said that the Crathie clergyman was warmed and comforted by this tribute to the good behavior of his favorite.

Victoria as a Usurper.

The English Legitimists announce that there are now living 1,172 persons who are descendants of Mary Stuart. The list of these is contained in the "Kalendar" published by the Legitimists. Of these 1,172 persons no less than 617 have better claims to the throne than Queen Victoria, for the latter enjoys only a "parliamentary title," and the Legitimists do not recognize "the people." Queen Victoria is a descendant of Mary Stuart, but inasmuch as she represents the female line and traces back her title through James I.'s daughter Elizabeth and holds the throne by virtue of the act of parliament which excluded the exiled male line the Legitimists regard her as a "usurper."

French Loyalty.

During the rejoicing at Paris for the return of Louis XVIII. a Royalist exhibited a transparency with the following words: "J'ai quatre millions au service du Roi!" ("I have four millions at the service of the King.")

An officer of the King's household seeing the transparency went into the man's house, and with much politeness asked if it was really his intention to realize the offer his transparency announced; if it was he could promise him marks of royal favor. "My lord," said the man, "the offer is sincere. My name is Million, and I have four sons all ready to serve his Majesty. They only wait for good appointments."

An Ingenious Device.

The following story comes from Butler County: A glib young man called at several farmhouses during the past week and offered for sale a new patent lightning rod, claiming it was the greatest invention ever brought to light. It consisted simply of a rod 20 feet in length, with two points. The rod was laid along the apex of the barn and both ends pointed straight up in the air. "But where does the lightnin' go after it strikes one of them points?" asked a farmer. "Why," answered the agent, "it just travels along the rod and gets shot up in the air again from the other point."—Cincinnati Enquirer.

Strange but True.

Mr. Wibbleson—Here is a remarkable line that I found the other day in a magazine poem: "I have been young, but youth has passed from me."

Miss Seerley—I don't see anything so remarkable about that line.

Mr. Wibbleson—Ah, but wait. The poem is signed by a woman.

PIDGIN ENGLISH.

The Queer Jargon Used by the Business People of China.

The nondescript tongue known as "pidgin English" is almost the only medium of communication between foreigners and the Chinese, and nine-tenths of the enormous business done in China between the English and the Chinese is done through this grotesque gibberish. Mr. Chester Holcombe, in his "Real Chinaman," gives two amusing anecdotes to show how absurd it is.

A young foreigner who called upon two young ladies, also foreigners, was informed by their Chinese servant "that two piecey girlo no can see. Number one piecey top side makee washee, washee. Number two piecey go outside, makee walkee, walkee." He meant to say that the elder of the two was taking a bath up stairs, and the youngest had gone out.

When King Kalakaua of the Hawaiian Islands visited Shanghai, he occupied a suit of rooms up one flight of stairs at the Astor House. Two American gentlemen called to pay their respects one morning, and, meeting the proprietor, inquired if the king was in. "I will see," replied the landlord, and, shouting to a Chinese servant, asked: "Boy! That piecey king top side, had got?" "Hab got," laconically answered the servant. "Gentlemen, his majesty is in. Pray walk up," said the landlord.

Fire at Weddings.

Fire is an essential in some wedding celebrations. In Persia the service is read in front of a fire. In Nicaragua the priest, taking the couple each by the little finger, leads them to an apartment where a fire is lighted and there instructs the bride in her duties, extinguishing it by way of conclusion. In Japan the woman kindles a torch, and the bridegroom lights one from it, the playthings of the wife being burnt then and there.

Beautiful Women

Should have beauty and vigor of health. A strong stomach is the first essential to beauty. Nine-tenths of the sickness comes from weak digestion. Thousands of people have tried Hostetter's Stomach Bitters and regained their health. There is nothing like it. See that a private Revenue Stamp covers the neck of the bottle.

A woman can kiss a baby without disturbing it, but a man always awakens it.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder to be shaken into the shoes. It makes tight or new shoes feel easy; gives instant relief to corns and bunions. The Land of Horseshoes.

Horseshoes are an important branch of industry in Norway. About 6,000 tons are exported every year. Great Britain and France, where horseshoes are used not only for horses, but also for donkeys and oxen employed as beasts of burden, divide almost the whole Norwegian exportation between them in about equal quantities.

REGAINED HEALTH.

Gratifying Letters to Mrs. Pinkham From Happy Women.

"I Owe You My Life."

MRS. E. WOOLHISER, Mills, Neb., writes:

"DEAR MRS. PINKHAM:—I owe my life to your Vegetable Compound. The doctors said I had consumption and nothing could be done for me. My menstruation had stopped and they said my blood was turning to water. I had several doctors. They all said I could not live. I began the use of Lydia E. Pinkham's Vegetable Compound, and it helped me right away; menses returned and I have gained in weight. I have better health than I have had for years. It is wonderful what your Compound has done for me."

"I Feel Like a New Person."

MRS. GEO. LEACH, 1609 Belle St., Alton, Ill., writes:

"Before I began to take your Vegetable Compound I was a great sufferer from womb trouble. Menses would appear two and three times in a month, causing me to be so weak I could not stand. I could neither sleep nor eat, and looked so badly my friends hardly knew me.

"I took doctor's medicine but did not derive much benefit from it. My druggist gave me one of your little books, and after reading it I decided to try Lydia E. Pinkham's Vegetable Compound. I feel like a new person. I would not give your Compound for all the doctors' medicine in the world. I can not praise it enough."

A Practical Joke.

A business man from Baltimore found himself in a peculiar predicament one day, says the New York Press. He visits New York about once a month. He sleeps with his glass eye in a tumbler, and there a friend found it one morning. The sight suggested a practical joke—put the eye in Mr. X.'s overcoat pocket. Done! When the friend departed, being short of money for the moment, he pawned his own overcoat for $10. In the afternoon there came an urgent telegram to Mr. X., who had been unable to leave his room on account of the missing eye and whose frame of mind was all distorted and warped. The friend frankly confessed:

"Bill, I meant it only as a simple joke. You will find your eye in your overcoat pocket." But it was not there.

"It must be, because I put it there myself," urged the joker. The coat was held up by the tail and shaken.

"By thunder! I wonder if I could have put it in my own coat?"

"Where's your coat?"

"I've pawned it. I didn't want to borrow and needed a few dollars."

"How much is it in for?"

"Ten dollars."

Mr. X. produced $10 and the coat was redeemed. The eye was in the inside pocket. He carefully washed it, slipped it into place and walked out after 12 hours of solitary confinement.

Preparation.

It was evident the moment she entered the parlor that he was angry.

"What do you mean by suing me for breach of promise?" he demanded. "I never proposed to you in my life."

"Why, of course you didn't," she answered in a conciliatory tone. "And I wouldn't have accepted you if you had. But you know I am going on the stage, and I must make some preparation."—Chicago Post.

A Man With a Past.

"Edgar, tell me the truth! Is there any black spot in your life before you knew me?"

"Letitia, I will reveal all. When I was 10 years old I used to piece quilts."—Detroit Free Press.

It's easy enough to become a great financier if you have money for experiments.—Atchison Globe.

Sour Stomach

"After I was induced to try CASCARETS, I will never be without them in the house. My liver was in a very bad shape, and my head ached and I had stomach trouble. Now, since taking Cascarets, I feel fine. My wife has also used them with beneficial results for sour stomach."
JOS. KREHLING, 1921 Congress St., St. Louis, Mo.

Sly Old Commodore.

"When Commodore Vanderbilt was alive," says a New York Central official, "the board of directors of the New York Central used to find their work all cut out for them when they met. All they had to do was to ratify his plans and adjourn. Yet they had their uses. Occasionally a man would come to him with some scheme which he did not care to refuse outright.

"'My directors are a difficult body of men to handle,' he would say. 'I'll submit it to 'em, but I warn you that they are hard to manage.'

"The matter would be submitted to the board when it assembled and promptly rejected.

"'There,' the commodore would say when his visitor came to learn the result. 'I did the best I could, but I told you in advance that my directors were an obstinate lot.'"—New York Herald.

Art and Nature.

The milkmaid with the picture hat and the brocaded silk skirt tossed her head.

"In society, I suppose, I should be an impossible person," she exclaimed, "but it's different in art."

And after all, to be perfectly candid, there is nothing essentially degrading about milking an art cow.—Detroit Journal.

Just the Thing.

"In every city of reasonable size," said Brown, "they ought to have a Mothers' Exchange."

"What for?" queried Jones.

"Why, every woman knows exactly just how every other woman's child ought to be raised, and by trading mothers every child could get a proper training."—Kansas City Star.

Sharks were almost unknown in the Adriatic until the Suez canal was opened. Now the harbors of Fiume and Pola are so infested with them that residents dare no longer bathe in the open sea.

If you want to forget all your other sorrows, get a pair of tight shoes.—Des Moines Leader.

The Maid and the Miracle

Miss Lucy Tucker, the daughter of a prominent farmer of Versailles, Ind., was the victim of nervous prostration. Most of the time she was confined to bed, and was on the verge of St. Vitus' dance. It was a pitiful case which medical science failed to conquer. Finally a doctor prescribed Dr. Williams' Pink Pills for Pale People. Her father said:

"We began giving the pills at once, and the next day we could see a change for the better in her. We gave her one pill after each meal until she was entirely well. She has not been sick a day since. We think the cure almost miraculous.

"FRANK TUCKER, Mrs. F. TUCKER."

Mr. and Mrs. Frank Tucker, being duly sworn, state that the foregoing is true in every particular.

HUGH JOHNSON, *Justice of the Peace.*

From the Republican, Versailles, Ind.

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N.Y., 50 cents per box, 6 boxes $2.50.

This Paper is Printed with Nathan's News Ink.

SURE CURE FOR PILES

ITCHING Piles produce moisture and cause itching. This form, as well as Blind, Bleeding or Protruding Piles are cured by Dr. Bosanko's Pile Remedy. Stops itching and bleeding. Absorbs tumors. 50c. A Jar at druggists or sent by mail. Treatise free. Write me about your case. DR. BOSANKO, Philada., Pa.

Epileptic FITS Can Be Cured.

If you suffer from Epilepsy, Fits, Spasms, Spells, Falling Sickness, St. Vitus's Dance, &c., have children, relatives, friends or neighbors that do so, or know people that are afflicted, my New Discovery, Epilepticide, will give immediate relief and PERMANENTLY CURE them, and all you are asked to do is to send for a FREE Bottle and try it. It has cured thousands where everything else failed. My 90-page illustrated Book, "Epilepsy Permanently Cured," FREE.

When writing please mention reading in this paper and give name, AGE and full address.

All Correspondence professionally confidential.

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form.... Sold by every druggist in the malarial sections of the United States..... No cure, no pay.... Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured.. All other so-called "Tasteless" Tonics are imitations.. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

ST. LOUIS, MO., Feb. 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your Grove's Tasteless Chill Tonic. On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2660 dozen Grove's Tonic. We also find that our sales on your Laxative Bromo-Quinine Tablets have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.

Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.

KEDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of Grove's to where I sell one of the others. I sold 36 bottles of Grove's Chill Tonic in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 13, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your Grove's Tasteless Chill Tonic is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of Grove's Tonic. My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,
JAMES D. ROBERTS.

FARMER OF THE NINETEENTH CENTURY

He Pursues His Calling in a Scientific Way These Days and Does Not Leave Everything to Providence and the Weather.

IT used to be the rule that when a man wasn't fit for anything else he was considered good enough to be a farmer; that if he hadn't brains enough to master military tactics or the intricacies of the law or medicine or of theology, and was utterly lacking in creative ability, then his proper sphere of usefulness was the farm. And in those days even the "gentleman" farmer was a person of inferior standing, and he was made to feel his insignificance whenever he came in contact with the superior persons who ruled the State and made or expounded its laws. Society spoke of him as a "gawk," and his sons and daughters were "country bumpkins." But all this

IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

has changed and is destined to still further change. Science, which has done so much for the world at large, has taken the farmer in hand and is investing the man and his works with the dignity and standing that are theirs of right. The masses are being made to realize what they have known dimly all along, but never fully appreciated—that it is the farmer who feeds them, and that he is more necessary to them than they are to him; that without him works great and small would come to a stop and the peoples of all the earth be reduced to a state of savagery and cannibalism.

Farmer Knows Why.

Science is bringing not only the pub-

CHEMICAL LABORATORY, ALABAMA INSTITUTE.

lic to a realization of the importance of the farmer, but the farmer himself to an appreciation of the importance of his work and of the necessity of fitting himself for it by studying nature and inducing her by scientific means rather than by haphazard to yield her store. Formerly the farmer could tell you "when" without knowing "why." Experiment showed him that rotation in crops made his land produce better and last longer, but he couldn't tell nature's reason for it, nor explain the thousand other seeming mysteries of the soil. Science has done and is doing that for him. It is experimenting for him day in and day out the year round, and teaching him the why and the wherefore. Uncle Sam is backing science in this matter, and the farmer is getting the benefit without cost. The

LESSON IN IRRIGATION—UNIVERSITY OF WISCONSIN.

farmer learns from the bulletins that are sent out by the Department of Agriculture, and all over the land the farmers' sons and daughters are taking courses in agriculture and horticulture, farm gardening and dairying, and stock breeding and stock raising, in colleges supported jointly by the State and Federal governments.

Their instruction is practical, too, for the colleges have farms under cultivation and herds and droves of cattle and swine, and dairies and truck farms and orchards. The instructors are men who are entitled to write, "Bachelors of Science" after their names. They know all about the soils and the seasons, and what crops are adaptable and what are not, and their science goes so far as to include conditions in foreign countries and to be able to judge from them whether corn, or wheat, or barley, or whatever product of the farm will be most in demand for export, and so command the readiest market and the best price. They have reduced farming to a science, and are teaching it as a science. The course in agriculture includes history and government, French and German, English, and the higher mathematics and music, so that our farmers of the next generation will not only know how to get the best and the most out of the ground, but will be able to hold their own for general information and polite accomplishments with the elect of any land.

Where They Are Taught.

Colleges of agriculture are maintained in universities, with the aid of national funds, in Arizona, Arkansas, California, Georgia, Idaho, Illinois, Indiana, Louisiana, Maine, Minnesota, Missouri, Nebraska, Nevada, New York, Ohio, Tennessee, Vermont, West Virginia, Wisconsin, and Wyoming. In Massachusetts Harvard University has a school of Agriculture known as Bussey Institution. Besides these, agricultural and mechanical colleges have been organized in Alabama, Colorado, Connecticut, Delaware, Florida, Iowa, Kansas, Kentucky, Maryland, Michigan, Mississippi, Montana, New Hampshire, New Jersey, New Mexico, North Dakota, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Utah, Virginia, and Washington. Separate institutions of this sort are maintained for colored students in Alabama, Delaware, Florida, Mississippi, North Carolina, South Carolina, and Virginia. Massachusetts has the only college whose curriculum is wholly devoted to agriculture.

In the universities in which courses in agriculture are maintained the general tendency is to make this course correspond in scope and thoroughness with those given in the other departments, to divide the instruction in agriculture among an increasing number of specialists, and to provide buildings and apparatus and illustrative material on a scale in keeping with those in other branches. At the same time efforts are making to bring the university in close touch with the masses of farmers through special schools, farmers' institutes, nature teachings, and other forms of university extension work. Along with this is the deepening and strengthening of the scientific and practical researches, carried on with a view of widening the world's knowledge of the facts, laws, and processes required for the improvement of agriculture.

Thirty Thousand Farmer Students.

The classes in agriculture in these schools range in enrollment from 200 to 900 students. The total enrollment is 30,000. The full course in agriculture covers four years, and practical farmers who know enough of other matters to make them intelligent and desirable citizens are being sent out from these colleges at the rate of 8,000 a year, or 80,000 in a decade. That they will assist wonderfully in the development of the country need not be doubted. Their knowledge and training will enable them to get more out of the earth and themselves than the tens of thousands of other earnest and honest men who have taken up homesteads and gone to farming without any knowledge of or preparation for the cultivation of the soil.

In an article in the Year Book of the Department of Agriculture on "Some Types of American Agricultural Colleges," A. C. True, Ph. D., director of the Government's experiment stations, describes the essential features of some of these institutions of learning. Of the Massachusetts Agricultural College, which is near Amherst, on a farm of 400 acres, situated in a most beautiful part of the Connecticut river valley, he says:

"In 1897 the college had permanent endowment funds aggregating $360,000, and its buildings, farms and equipment were valued at about $315,000. The college buildings include combined dormitory and class room building, chapel and library, laboratory for chemistry and physics, entomological laboratory with insectary, botanic laboratory and museum, drill hall, dormitory, president's house, several residences for professors, farm houses, boarding house, horticultural plant houses, and barn, including creamery and dairy laboratory. The experiment station also has a chemical laboratory, botanical laboratory with plant house, and barns.

Excellent Equipment.

"On the farm 150 acres are under cultivation with a variety of field crops, and the extensive college barn is stocked with 100 head of cattle and equipped with the most improved agricultural implements and machinery. The horticultural grounds cover 100 acres, with orchards, vineyards, small fruit and vegetable plantations, and groves of forest trees. Much attention is given to floriculture and landscape gardening, and the ample plant houses are well stocked with numerous varieties of exotics. Some eighty acres are devoted to the work of the experiment station, including numerous plat experiments with varieties of field and horticultural plants, fertilizers, methods of culture, etc., feeding experiments with animals, soil investigations, etc.

"The laboratories of the different scientific departments are well equipped with apparatus for experimentation and demonstration and with illustrative material, such as specimens of plants, insects, animals and machines, particularly those of importance in their relation to agriculture. The library of 18,000 volumes has been carefully collected with reference to the needs of an agricultural college, and is thoroughly catalogued and managed with a view to providing the students every facility for obtaining the information they desire to gather from books. It is one of the most extensive and valuable collections of books on the science and practice of agriculture to be found in this country.

"The instruction is given by a corps of eighteen professors and assistants. The chairs include botany, chemistry, agriculture, horticulture, zoology, veterinary science, mental and political science, English and Latin, modern language, mathematics and civil engineering, and military science and tactics. There is also a lecturer on farm law. The student is required to follow a definitely prescribed curriculum during three years, and in the last year of the course he is allowed wide latitude of choice among numerous specialties, English and military science being the only required studies."

For a time the college was open to men only, but women may now attend special elective courses in such branches as botany, entomology, floriculture, fruit culture, market gardening and dairying. Candidates for admission must be at least 16 years old and are required to pass examinations in English grammar, geography, United States history, physiology, physical geography, arithmetic, the metric system, algebra (through quadratics), geometry and civil government. The students as a rule room in the college dormitories and are boarded in clubs or private families. The expenses for room rent, board, fuel, washing and military suit for the college year are estimated to range from $150 to $300. Students performing labor at the college are paid by the State, and there are small endowment funds for the assistance of needy students. The students have their athletic associations and glee clubs and social amusements the same as at Harvard and Yale, and they are required to attend prayers and worship in the college chapel.

The Michigan State Agricultural College is the oldest in the country. It was established by an act of the Michigan Legislature in 1855, and for thirty years, like the Massachusetts College, had only an agricultural course. In 1890, under a materially increased income, a mechanical course was added, and later a woman's course. The laws of the State prescribe that it shall be a "high seminary of learning, in which the graduate of the common school can commence, pursue, and finish a course of study terminating in thorough theoretic and practical instruction in those sciences and arts which bear directly upon agriculture and kindred industrial pursuits."

The college land, comprising 676 acres, is divided into the farm of 230 acres, devoted to field crops grown under a system of rotation, forty-five acres of woodland pasture, 114 acres of lawns, gardens and orchards, 240 acres of forest, and 47 acres of experimental fields and plats. The farm is equipped with cattle, sheep and swine of the principal breeds. There are an arboretum of 150 species of trees, a botanic garden containing 1,200 species of native and foreign hardy herbaceous plants, with some shrubs, a grass garden of 200 species of grasses and clovers, and a weed garden of 100 species of the most troublesome weeds. The students in agriculture are required to work two and one-half hours a day on the farm or garden. The annual average expenses of students for board room rent, heat, light, books, laboratory and other fees are estimated at $125. These expenses are often reduced by receipts for labor performed on the farm or elsewhere about the college. There are thirty or more professors and assistants in the faculty, and in addition to the chairs provided by the Massachusetts College there are professors of mechanical engineering, domestic economy, and household science.

Negroes Not Received.

The Mississippi Agricultural and Mechanical College is conducted on the same general plan, except that women and negroes are not received as students. Out of a total of 368 students entered last year 316 elected to take the agricultural course. By farm labor the students may reduce their expenses there to $100 a year.

Over 800 students took the farming course last year in the Kansas State Agricultural College, in Manhattan,

MASSACHUSETTS COLLEGE BARN.

The college farm comprises over 300 acres, and is well equipped with live stock. The State has supplemented the United States grants by the erection of a number of substantial buildings, which are valued at $350,000. Students of both sexes are admitted at 14 years of age, after passing an examination in reading, spelling, writing, arithmetic, geography, English grammar and United States history. Connected with the course of study here is industrial training in several of the arts, to which each student is required to devote at least one hour a day throughout almost the entire course. Young men may have farming gardening, fruit growing, woodwork, ironwork, or printing. Young women may take cooking, sewing, printing, floriculture, or music. Tuition is free, and the annual expenses of the student range from $100 to $200. Students are paid at the rate of 10 cents an hour for work.

CLASS SCORING PIGS—IOWA STATE COLLEGE.

The Iowa State College of Agriculture and Mechanic Arts is a flourishing and well attended institution. It has fifteen buildings, erected by the State at a cost of $500,000, and these include a hall for women. There are besides dwelling houses for professors and other employes, a creamery, barns, stables, seed houses and forcing houses. The college lands, of which 120 acres have been parked as college grounds, are 900 acres in extent. "The farm," Mr. True says, "consists of rolling prairie, bottom and woodland, and is stocked with good representatives of five breeds of horses, six breeds of cattle, seven breeds of sheep, and six breeds of hogs. These animals are used in class illustrations and for the various experiments in breeding and feeding for milk, meat, wool, growth, and maintenance, conducted by the experiment station as a department of the college. All the crops of the farm are grown for some educational purpose; all the animals are fed by rule and system, and the results of their management reported upon and used in glass work. Labor is not compulsory, but students in the agricultural courses are given work that is parallel with their studies. Some students pay for their board by work in the mornings and evenings. There is a practical working creamery and cheese factory in operation throughout the year. During the summer season from 15,000 to 25,000 pounds of milk are taken in daily and manufactured into butter and cheese. The number of students in 1897 was 573, including women."

Deep Down in the Earth.

The deepest hole in the earth is at Schladebach, near Ketschau, Germany. It is 5,735 feet in depth and is for geologic research only. The drilling was begun in 1880 and stopped six years later because the engineers were unable with their instruments to go deeper.

Bullet of Great Force.

A rifle of very small bore, invented by Capt. Daudeteau of the French army, fires a bullet with such force that it will penetrate a horse, from head to tail, at a distance of a mile and a quarter.

Cake at English Weddings.

The cake at English weddings is always a star feature. Usually at a fashionable affair it is fully six feet high and is a marvelous architectural structure of icing adorned with flowers and figures.

Some folks are so industrious that when they haven't anything else to do they worry.

UNDER RUSSIAN RULE

TREMENDOUS RESOURCES OF THE CZAR'S COUNTRY.

Almost a World of Itself, It Is Undoubtedly the Greatest Empire on Earth—One Man in Every Twelve Is the Czar's Subject.

Speaking of Russia the other day, Lord Salisbury spoke of it as "the nation that in some material respects is the most powerful nation on earth.

"Russia, with its enormous forests, its vast steppes and its huge rivers, is almost a world in itself. Extending over 8,644,100 square miles, or one-seventh of the entire land surface of the globe, it is but 3,000,000 miles less than the whole extent of our scattered possessions, on which we boast the sun never sets.

"Its water surface alone measures 293,018 square miles, or enough to make an immense sea in which our little England could be placed six times over and still have room for more.

"To every square mile of territory there are fifteen human beings who owe alegiance to the Czar, or a grand total of nearly 130,000,000. In fact, one human being out of every twelve on earth is ruled by the Czar. Its fighting men number over 11,000,000. It can put a fully equipped army into the field of 1,355,000 combatants and back it up with another almost as well accoutered of 1,100,000 men, a total number of first-class fighting men of over 2,500,000, with 497,415 horses and 1,486 heavy guns.

"Let the whole of this immense body of regular troops be overcome and there will even then be the reserve to reckon with, a force estimated at fully 9,000,000.

"The difficulties of mobilization would, no doubt, be very great, but these grow less every year. Russia has now 16,651 miles of railway owned by the state and 8,072 miles worked by private companies, while in course of construction there are nearly 8,000 miles more.

"In addition to its forces on land, Russia has a navy which, although by no means the finest in the world, will one day have to be reckoned with seriously. It is divided into four fleets, and its total consists of twenty-three battleships, fourteen coast defense vessels, sixteen cruisers, twenty-eight gunboats and ninety-six torpedo boats, manned by 1,249 officers, 326 engineers and 38,000 seamen.

"Then it has a mercantile marine consisting of 522 steamers and 2,135 sailing vessels, while on its rivers there is a flotilla of over 20,000 vessels of all descriptions, with crews totalling 90,350 men. All these would be available in case of war.

"Moreover, Russia is not dependent, like we are, on outside sources for food. Pasturing on its vast plains are to be found in European Russia alone 24,009,200 head of cattle, 44,465,450 sheep and 9,243,000 pigs, while under crops there are no fewer than 1,098,507,780 acres of arable land. After feeding its vast population it was last year able to export abroad over 300,000,000 quarters of cereal crops."

APPEAL TO ROYALTY.

Little Archduchess Grants the Petition of Her Small Compatriots.

A few years ago Madame F., the principal of a young ladies' school at Dresden, issued an edict that no more boxes of candy should be sent the pupils from home. Consternation reigned, but in a conclave of the oppressed gourmandes a little Viennese suddenly took the floor.

"Children," said she, "we cannot submit to such injustice. Madame is an Austrian, and as such she must submit to anything done by our imperial family. We will write to the little archduchess, imploring her to forbid madame to treat us so cruelly."

So a letter was written and despatched to the emperor's little granddaughter. It explained the situation, and concluded:

"Please, please tell your dear grandpapa to send word to madame that she is to let us have our bonbons again, as before. With this ardent prayer we close our letter."

A week later Madame F. was much surprised at receiving a huge box, addressed to the pupils of her institution. It come from Vienna, and stamped on the lid was the imperial coat of arms. She summoned the children, and the box was opened. On the top of its contents lay a pink and silver card, on which was written, in a round, childish hand:

"From Archduchess Elizabeth to her little compatriots in Dresden."

Of course it contained bonbons of every description, done up in the most exquisite manner. Accompanying them was a letter from a lady-in-waiting, explaining that, although personal requests were not usually heeded, this one, out of deference to the little archduchess, had received attention.

Madame F. could not, in loyalty, be angry, and she forgave the little conspirators, only suggesting gently that they might show their gratitude by embroidering their little patroness a bedquilt. And so they did, nibbling as they sewed, and putting the utmost care of their tiny fingers into the grateful stitches.

Longest Days.

The following list shows the duration of the longest day in various places all over the world: New York has, so to say, the shortest longest day, which is about 15 hours long; while in Montreal it is 16. London and Bremen each bask in a 16½ hours' length of day, closely followed by Hamburg and Dantzig with 30 minutes more. The longest day in Stockholm lasts 18½ hours; but both St. Petersburg and Tobolsk, Siberia, go one better with a day of exactly 19 hours—and their shortest 5 hours. June 21 brings to Tornea, Finland, a summer day nearly 22 hours long—and Christmas Day 2½ hours only. (How unfortunate are the children of Tornea!) The foregoing lengthy days, however, are easily left behind by Wardburg, Norway, which boasts of a day lasting without break from May 21 to July 22; but even this is surpassed by Spitzbergen, where—mirable dictu!—the longest day is something like 3½ months.

CHINESE FACTORY GIRLS.

They Appear Happy in Spite of Long Hours and Small Wages.

A lady who has resided several years in China draws an attractive picture of the girls in the Chinese silk factories. She says they are the gayest and brightest of the native women workers. The factories are large, clean, carefully ventilated, and well regulated. The girls are charmingly dressed in blue, with little decorated slippers, and smooth hair, decked with flowers, and silver-gilt or enameled pins, and each has two mirrors, her hair brush and her tooth brush. How much these are prized is shown by the fact that their forfeiture is the punishment for misconduct. Some of the workers powder their faces, though many of the country women have cheeks of rosy pink. One factory, at Sing Chang, employs 900 native girls, with European foreman and a European general manager. The work begins at 5:30 a. m. There is a ten-minute rest for a light breakfast, which is taken by the hands at their working places, the machinery being stopped meanwhile. At 11 o'clock the work is laid aside an hour for dinner, which is eaten in a large room. The girls make common stock of their provisions. Each girl has at her side, while at work, a little teapot in a padded basket, and a tiny teacup. She drinks tea frequently, without milk or sugar, and in small quantities. The working day is a trifle under nine hours. In one department where the cocoons are stripped of their outer covering, and dropped into separate baskets, according to their quality, the work is by the piece, and many women work only a few hours a day. Wages average about 12 cents a day. In the next department the sorting is more precise, and here the wages average 11 cents a day throughout the year. The spinning room is a pretty sight with its row of blue-robed girls. In preparing the cocoons for the spinner, each cocoon is brushed until the end of the thread appears. Six cocoon threads go to make the final filament, and each spinner works with thirty-six cocoons in a pan before her. The children here earn 5 cents a day, working from 8 a. m. to 5 p. m., while the women earn about 8 cents a day. In the finishing department there is the same attention to neatness of appearance as in the rest of the factory, the girls being scrupulously clean and tastefully dressed. Neatness is taken as an evidence of intelligence, and no slovenly girl could find a place in the filature. The last department of the factory is the packing room. Here the skeins are packed close, formed into square bundles, marked as to quality, and wrapped in white cotton for shipment to the mills of Europe to be made into fabric.—Los Angeles Times.

QUEER STORIES

More candy is consumed in Philadelphia, New York and Chicago than in the whole of France.

The United States uses the most eggs of any land, ten billion being required during the year, or 133 to each inhabitant. Canada comes next, with ninety eggs per inhabitant, Denmark eighty, France seventy-eight, Germany seventy-five, Great Britain thirty-nine and Italy but forty-seven.

Ostriches are not the only swift-running animals that can outstrip the speed of a horse. There is a land crab in Cuba, it is said, that can rival the ostrich, and go much faster than a horse. In contrast to this is the snail, that takes fourteen days and five hours to travel one mile.

The relative meat-eating capacity of the nations is about thus: The United States, 147 pounds; England, 100 pounds; Norway, 80 pounds; France, 77; Spain, 70; Germany, 64; Switzerland, 62; Belgium, 61; Austro-Hungary, 60; Russia, Portugal and the Netherlands, 50 pounds each; Italy, 24 pounds.

More goats are raised for their hair in California than elsewhere in the country, and the experimenters in this line of industry are meeting with a fair degree of success. The Angora goat yields on an average four pounds of mohair at a shearing, the product selling for from 32 to 37 cents per pound. C. P. Bailey, of San Jose, sold last year a trifle more than $8,000 worth of mohair from his flock, besides disposing of a number of goats for breeding purposes. He thinks there is a great future for the industry in those portions of this country where the climatic conditions do not require a shearing more than once a year.

New York's College of Forestry.

New York has established a State college of forestry. One of its labors will be to replant the tracts denuded of pine and other valuable conifers. It set out a large area this spring and is rearing 3,000,000 seedling pines for future use.

Half of what people call "education" is the worst sort of nonsense.

AN ILL-FATED FAMILY.

A Strange Fortune Has Pursued It for Two Centuries and a Half.

Strange fatalities seem to follow the Earls of Strafford. There have been nine earls of that title in the last 259 years. The first Earl of Strafford was decapitated by the headsman's axe on Tower Hill, and the last Earl by a railway train a month or so after his marriage with Mrs. Colgate, the rich New York widow. An account of the accident appeared at the time. The title has been forfeited once, twice extinct, once revived, and twice recreated. Five earls have died without leaving any male issue, and the original family that held the title, the Wentworths, has long been extinct.

EARL OF STRAFFORD.

The first holder of the title was Thomas Wentworth, the favorite minister of Charles I. That nobleman was a man of splendid ability, but in seeking to make his royal master "the most absolute prince in Christendom" he went against the spirit of the times and Charles was obliged to sanction his execution for high treason. The principal evidence against Strafford was a paper found by Sir Harry Vane, formerly Governor of Massachusetts. A branch of the Wentworths lived in New Hampshire, and two of that name born in that province, were governors thereof before the revolution.

In 1847 Sir John Byng, a famous soldier, was made Earl of Strafford. Among the tragedies of the Byng family—a collateral branch of the Wentworths—may be mentioned the death of one of them, who was smothered in the Black Hole of Calcutta, and the death of another, the late Admiral Byng, who was shot by order of court martial on the deck of his own flagship at Portsmouth in 1757 for failure to relieve Minorca. Another Byng was killed in the Sepoy war in India in 1857.

HANDY FOR THE SALESGIRLS.

Belt Attachment in Which to Carry Book, Pencil and Scissors.

A convenient article designed for the use of salespeople is that recently invented by Pauline Reibestein of Can-

BOOK, PENCIL AND SCISSORS CARRIAGE.

ton, Ohio. A metal device is made to contain the saleshook, scissors and pencil, so that these three essentials are always in reach. It is made in two forms, one being suspended from the waist by a cord, while the other is supplied with a spring hook to fit into the belt.

A Million Priests.

According to a lecture on Siam delivered recently in London by John Bartlett, that Asiatic country has more than its share of priests. The population of Siam, he said, amounted to about 6,000,000, and a curious feature was the large preponderance of Chinese, more especially in Bangkok. The Chinese practically controlled all the trade and commerce of the place. There were hardly any Siamese merchants. One million of the people were in the priesthood. He had traveled up river through the main territory of Siam for a distance of 350 miles, and during the journey it had been absolutely impossible to get out of sight of a temple. In each temple there were from ten to 300 priests, supported entirely by the people. Of the 1,000,000 priests only 300,000 were actively engaged. The remaining 700,000 were passing through the priesthood. Siam was a great stronghold of Buddhism, but the King was very tolerant of other religions.

The Siamese Government put but little restriction on trade, and an ordinary foreigner could come and go all over the kingdom without a passport. The greater part of the trade in Bangkok—at least 80 per cent. of it—was brought there by ships flying the British flag.

New Code of Laws for Japan.

The Japanese have adopted a new code of laws which is said to be formed so much in accordance with Western ideas that Europeans and Americans have no reasonable excuses for refusing to submit to Japanese courts. French and German law has been chiefly been copied. The objection to the English and American system was that, as it is not codified, uniformity in the administration of justice is impossible; hence, the skill of the lawyer and the caprice of a judge have often more to do with shaping the verdict than the terms of the law.

The Kaiser's Army of Servants.

There are 1,500 people upon the German Emperor's list of employes, including 350 women servants, who are engaged in looking after the twenty-two royal palaces and castles that belong to the crown. Their wages are small. The women receive not more than $12.50 a month and the men servants from $15 to $25 a month.

British Coal Miners.

The number of persons employed in the British collieries is over 385,000.

When a luncheon or party is said to be informal, it means that the hostess will offer no other apology for the refreshments.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FOR, SEPTEMBER 1 1899

The Iowa Democrats have reaffirmed the Chicago platform and favor the nomination of Bryan in 1900. This platform denounces trusts and declares against the conquest of the Philippines, because "militaryism means government by force means death of government by consent destruction of political and industrial freedom and the obliteration of the equality of the rights and associations of democratic institutions."

There seems to be no end to the disagreeable things which France is called upon to endure. On top of all the troubles at home comes the intelligence that an expedition in the French Soudan has treated the natives so abominably that another expedition was sent to bring it back, and the first expedition refused to obey orders and attacked the second, killing its leaders and several of the soldiers. The French army manages to keep itself before the world, if not in one way then in another.

The next annual convention of the National Irrigation Congress will be held at Missoula, Montana, the latter portion of next month and California should have a larger representation than it has yet sent to any of the annual gatherings. The first step toward the establishment of a national system of reclamation of arid lands must be an appropriation for surveys by Congress, and the character standing and action of this coming Irrigation Congress will have much to do in determining the outcome of the fight for an appropriation at Washington next winter.

Out of the mass of hysterical and conflicting dispatches concerning the South African situation we gather these important facts, namely, that the Boers are not yielding an inch to the English demand and that both are making steady and formidable preparations for war. It is true that one other fact has been stated, that the Boers are willing to concede a five years citizenship to Uitlanders, during which period the English and Transvaal authorities are to settle permanently the issues between the two countries. Unhappily, however, this news lacks confirmation.

The Scripps-McRae newspaper league is publishing a series of letters from Wardner, Idaho, which throws some light on the actual condition of affairs in the Coeur d' Alene mining district. The military despotism which now obtains there is simply outrageous in the sight of liberty loving Americans. But this is only a small illustration of a condition that will be the rule all over our land when imperialism and militarvism shall win in the next general election. The American citizen who does not to-day see the dangers that threaten our Republic is so blinded by political prejudice, or ignorance, that the will not or cannot see them.

Throughout the entire West the plan of constructing reservoirs to be under National control in which to store flood water for irrigation is universally approved. No more necessitous or beneficial work can employ the time of the California delegation in Congress than a comprehensive plan for the irrigation of the State, and for that matter, the entire western area. The annual appropriations by Congress for the rivers and harbors in the East and the Pacific Coast are no more strictly within the scope and province of Congress nor more far-reaching and certain in their beneficial results than would be appropriations for National storage reservoirs for the impounding of torrential and flood waters in the Sierra Nevada and Rocky Mountains. Many of the most conscientious and far-sighted men in the west are now advocating a government system of leasing the public arid lands at a nominal rental for pasturage and farm purposes and employing the proceeds for State irrigation works and other improvements.

Henry Miller of Miller & Lux gave a Fresno reporter the other day his idea of the livestock situation, and it is especially interesting because what Mr. Miller does not know about the market aspects of the livestock interests is hardly worth bothering about. We take the following from Mr. Miller's conversation. "The present conditions arise from two causes—dry winters and hasty sales of stock. Our ranch extends from Firebaugh in this county to near Newman in Stanislaus county—forty-eight miles in a direct line. Last Summer it was all stock and no feed, while this year it is all feed and no stock. After the dry season of 1897-98, owners of sheep, cattle and hogs sold them for whatever they could get. Thousands of animals perished from starvation and many thousands more were driven over into the neighboring states and territories, from which they have not been brought back. The hogs fared quite as badly as the sheep and cattle, and where they did not perish from want of feed they were slaughtered and sold. The result is that until favorable winters and the natural increase of stock make up for losses there will be a scarcity of animals and meat will come high. I think that things will be all right in a year or two, but not till then." Mr. Miller is too wise to prophesy beyond that, but we are not so gifted with self control. We believe that, of course, values will shade down, but we do not expect to see them return to the old levels. We believe that the production of good meats is going to do a better business in the State in future. We believe wise investment in stock and in improvements which will give abundant feed at low cost will be profitable and satisfactory.—*Rural Press.*

KEPT THE SKELETON.

QUEER REVENGE OF A MAN WHOSE FRIEND WAS MURDERED.

He Took the Bones of the Murderer From the Grave and Hung Them on the Wall of His Outhouse—A Tragedy of the Civil War.

"Mor ing, colonel."

"Morning, sir," replied the man who was leaning over the fence.

He was a short, thickset man, with a clear and piercing eye, his face shaved smooth, with not the suggestion of a wrinkle; yet his hair was as white as snow. He had a slight southern accent, and his hearty manner of inviting the visitors in and his cordial hospitality were wholly southern. One of the visitors knew him and had told the other that there was a man with a bona fide skeleton in his closet and that the skeleton had a story. It did not require any persuasion to obtain a glimpse of the skeleton. The owner presently led the way to an outhouse, and, opening the door, displayed the skeleton of a man, badly fastened together and hanging to the wall by the neck. The Missourian did not object to telling the story.

"That fellow," he said, motioning with his thumb to the skeleton, "was once an acquaintance of mine, and I liked him so well"—this with a laugh—"that I have kept him by me ever since, so that I can come out and stir him up whenever I feel disposed," and he gave the skeleton a dig in the ribs.

"It was this way," he continued, closing the door on his acquaintance. "During the war I lived in one of the southern states, where I was about the only northern man. They took nearly everything that I had as time went on, killed my stock, killed some of my people and finally announced that they were going to kill me. Nearly all the country was terrorized at that time by a good for nothing chap whom we will call Jim Conner; that was not his name, but it will do—one name is as good as another now.

"When the war broke out, he started in as a sort of independent guerrilla and began a system of looting and killing. I knew him well, and he sent me word that he was coming my way and was going to burn my house and hang me to a tree in the yard. I sent word back that I was ready for him. We heard of him all around—men shot, niggers killed, houses burned—so that the name of Jim Conner became a thing to scare children, not to speak of men. I was always trying to help northern men, and one time had two or three with me, passing them on as occasion offered.

"I had not heard from Conner or his raids for some weeks, when one day he rode into the yard and swore that he was going to burn the house. We had no means of protecting ourselves except by using a rifle, and with that I tried to pick him off from the top story; but he had picked up one of my friends who had been in the field, and they put him on a horse and stood behind him and shot at the windows of the house, at the same time gathering brush with which, they said, to burn the house.

"But no one dared to approach the house, as I was a sure shot. I supposed that they would wait until night and then creep up and burn me out. I kept out of sight and could not believe that they would murder a man in cold blood. But, hearing a shout, I glanced through a bullet hole in the shutter and saw them driving my friend's horse up to a tree—a fine old tree that I had planted as a boy. One of the limbs crossed the drive, and to this they fastened the rope and drove the horse away, leaving my friend dangling there, and I watching the operation totally helpless, while they were looking on.

"Some United States troops finally came along and drove them off and cut the body down, and we joined in the chase. I hunted the gang for weeks, then gave it up, as it was evident that they had given us the slip. After the war I moved to California and came here. I soon heard of a curious character who lived up in one of the canyons the life of a hermit. I never connected his name with Conner, it being more or less common. But when he died one day the story was that he had had a bad record back in Missouri; that he had been a murderer, etc., and it occurred to me that it might be my old enemy, the man I had been after for so many years.

"I can't say that I have a particularly revengeful disposition," said the skeleton owner, "but he had murdered my friend, and I had never given up the hope of finding him and was always on the lookout. The old fellow was alone and homeless, it seems, with no friends, and they had buried him by the side of his hut. I heard of it a few days later and employed some men to aid me in the investigation.

"Conner had a bad saber wound across the face, by which no one could ever fail to recognize him, and when we opened the grave there was the man, while papers which he left showed that he was Conner. I had found him too late to turn him over to the law. So I proposed to hang him where I could keep an eye on him for the rest of my life, and in my will I propose to leave instructions that he shall be left hanging, dangling in the wind, just as he had hanged my friend. I had his skeleton prepared, as no one claimed him, and hung him up as a warning to any of his seed that might follow in his footsteps."—Chicago Inter Ocean.

Would Be Cheaper.

"I have a proposition to make to you," said the regular patron as he took the restaurant proprietor off to one side.

"Well!" said the restaurant man.

"I have been coming here for some time, and I have discovered that a tip is necessary if one is to get good service."

"That's the case nearly everywhere."

"Well, what I want to suggest is that I'll pay the salary of my waiter if you will put up the tips. You really ought to be willing to take the more expensive end of the bargain, don't you think?"—Chicago Post.

An odd contrivance is used in China to protect the carrier pigeons from the attacks of birds of prey. Tiny bamboo tubes are fastened under their wings, and as they fly the air passing swiftly through the tubes makes a shrill whistle, which serves to frighten off the other birds.

This Dog Can Spell.

There is a South Side lady who owns a Gordon setter which she believes is endowed with almost human intelligence. This is not a hastily formed nor unfounded opinion, but has been developed by years of experience. Here is one of the many incidents from which has sprung her faith in her dog.

Last Sunday, having finished her dinner, the lady went into the drawing room to read the paper. On a rug near the window the setter was basking drowsily in the sun. The lady's two sons were still in the dining room finishing the repast, and the mother overheard something said about bones. Now, the good lady has a mortal dread that her beautiful dog will choke to death on a bone some day, so, raising her voice, she called out:

"Boys, don't give Dan any c-h-i-c-k-e-n b-o-n-e-s," spelling these two words so the dog's attention would not be attracted. "I am afraid he will choke."

As she spelled "chicken" the dog raised his head and listened; at "bones" he got up, walked into the dining room and looked at the bones the boys were picking.—Chicago News.

The Coquette.

A coquette is a being who wishes to please. Alas! coquettes are too rare. 'Tis a career that requires great abilities, infinite pains, a gay and airy spirit. 'Tis the coquette that provides all amusements, suggests the riding party, plans the picnic, gives and guesses charades, acts them. She is the stirring element amid the heavy congeries of social atoms, the soul of the house, the salt of the banquet. Let any one pass a very agreeable week, or it may be ten days, under any roof, and analyze the cause of his satisfaction, and one might safely make a gentle wager that his solution would present him with the frolic phantom of a coquette.—Lord Beaconsfield.

The Widow's Devotion.

There was a man hanged for murder in Sydney, Australia. By his widow's consent, his figure was exhibited in a local waxworks show. Every Sunday for six months the woman, dressed in deepest mourning, called and put a clean shirt on the unresisting form of the wax man. Then her visits stopped. Some time after, happening to meet the manager of the show the lady explained, with many blushes, that she had married again, and her new husband energetically objected to her wifely attention to the toilet of No 1's graven image.

An Artistic Proposal.

Lofter—Indeed, Miss de Vine, I must say it—you are the star of the links.

Miss de Vine—Now that is very nice of you, and you are the first to discover me too.

"Then may I have an astronomer's reward?"

"What is that, Mr. Lofter?"

"The right to give you my name."—Brooklyn Life.

No Company For Him.

Rich Old Party—What do you want a wife for when you can hardly support yourself? Why, sir, my daughter would starve!

Snookins (with great dignity)—Well, sir, if you are the kind of man to let your daughter and her husband starve I don't wish to enter the family.—Fun.

In the polar regions the sea contains less salt than near the equator.

OFFICIAL.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale to the highest bidder all those certain lots, pieces or parcels of land and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South Range Number Thirty-four East, Mount Diablo base and Meridian.

Also, Eighty inches of water in the Hughes & Gibson ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be received at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased.

P. H. MACK, Attorney for Administrator.
Dated August 23d, 1899.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899.

(SEAL) D. J. HESSION, Clerk.
By C. N. ROSE, Deputy Clerk.

P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

Trains 1 and 2 run daily. Train 3 runs Mondays, Wednesdays and Fridays. Train 4 runs Tuesdays, Thursdays and Saturdays.

Passenger trains make close connections Mound House with express trains of V. & T. R. R., which connect at Reno with east and west-bound trains of Central Pacific Rail

—o—

STAGE CONNECTIONS.

At Hawthorne, with U. S. Stage Company's daily coaches for Aurora, 26 miles; Bodie, 32 miles and for Lundy and Bridgeport.

At Luning, 125 miles from Mound House with Gilmer, Salisbury & Co's tri-weekly stages leaving Tuesday's Thursdays and Saturdays, at 6:00 a. m., for Downieville, Grantsville, etc.

At Candelaria, with U. S. Stage Company's stages from Columbus, Silver Peak, Montezuma, Alkali Valley, Gold Mountain, etc.

At Keeler, with stages from Cerro Gordo, 40 miles, Darwin, 22 miles, and Panamint.

This road has a first-class equipment, is opening up new and most promising mining districts, farming and grazing valleys. West of Owens River Valley the Sierra Nevadas rise rapidly to an imposing height and are easy of access. A trip to Mt. Whitney, the "Nose" of the Sierras, and to the cataracts and great canyons of the south fork of Kings river, offers to the tourist a new and unsurpassed region—soon to become famous

CARSON & COLORADO RAILROAD

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train on Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5.00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned a Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

MONDAY, Aug. 28, 1899.

Elvira Smith vs. George Smith—Decree of divorce granted.

Estate of Carmen G. C. Carrasco, deceased—Will admitted to probate and letters testamentary issued to Relles S. Carrasco.

TUESDAY, Aug. 29, 1899.

J. S. Stotler vs. P. J. Ginser—Action dismissed by plaintiff.

Methodist Church.

During the absence of the Pastor at Conference there will be no preaching services at either of the Independence circuit appointments. Independence Sunday-school will meet at the usual hour on Sunday afternoons.

Due notice will be given of the resumption of services.

JOHN J. PARDEE, Pastor.

Charley Rose has gone to Monache.

Miss June Skinner is visiting friends in town.

R. S. Carrasco was up from Lone Pine last Monday.

W. H. Unlmeyer was down from Big Pine at the end of last week.

Wm. McDonald and Fred Conn were down from Big Pine early in the week.

P. H. Mack Esq. and O. I. Mairs left Los Angeles Wednesday to be gone about ten days.

J. R. Moffit and Will Davis have gone on a trip to Monache where they expect to meet the latter's father.

The Independence school begins next Monday and the schoolhouse has been thoroughly cleaned and repaired.

Supervisor Jones was down from Fish Springs yesterday looking after road matters in this end of the district.

George Montgomery leaves here tomorrow morning for Salt Lake City and expects to be away about ten days.

Harry Cook sustained a rupture of a blood vessel in his right ear last week and came down from Mazourka for medical treatment.

J. Sub Johnson left for San Francisco on last Saturday morning's train on business connected with the sale of the Kearsarge mine.

W. L. Hunter returned home yesterday from an extended camping trip through the mountains. His health has very much improved.

Jim Sutherland, Charley Houle and Charley Doty killed two fine bucks on the headwaters of Pinyon creek last week and did not forget that they had friends in town.

The attention of all interested parties is directed to the call for bids for music and privileges at the coming fair published by Secretary Eldred in this weeks issue.

Alexander Ramez was admitted to citizenship in the Superior Court yesterday by Judge Lamar. Mr. Ramez has been a resident of the Sylvania section for many years.

R. S. Gibbs, the piano tuner, spent a couple of days in town this week. He has been kept very busy for the past month in Bodie and Bridgeport and was later than he expected getting here.

Mr. and Mrs. A. W. Eibeshutz left for San Francisco last Saturday and expect to away a couple of months. Mr. Eibeshutz will purchase an extensive stock of fall and winter goods before returning home.

D. Burdick of Bishop passed through town last Sunday on his way to Mojave. He expects to bring Dr. L. W. Allingham back with him, who intends to locate here. Dr. Allingham practiced at Bishop a number of years ago.

L. Wood, accompanied by his daughter Miss Eda, departed on Tuesday's train for San Francisco. The young lady has been troubled for some time with a slight deafness and has gone to the City for the purpose of consulting a specialist.

L. F. J. Wrinkle came in a couple of days ago from the Saline Valley copper country where he has been kept busy for the past month surveying and cutting out the eighty or more claims bonded by the company. He intends returning in a few days to complete the work.

Rev. John J. Pardee writes from Susanville as follows: "The appointments made at the session of the Nevada Mission of the Methodist Episcopal Church just concluded for Owens River Valley are as follows: Bishop, Rev. J. M. Wilson; Big Pine, Rev. J. H. Rosen; Independence, Rev. John J. Pardee."

CATTLE QUARANTINE.

Cattle South and West of the Established Lines Cannot Cross Them.

Governor Gage has issued the following proclamation, which explains itself:

Sacramento, August 19, 1899.

Whereas, The State Veterinarian of the State of California has ascertained that cattle located in that certain area of territory located south and west of the quarantine line hereinafter described are liable to communicate a contagious and infectious disease known as Texas, Splenetic, or Southern Cattle Fever to cattle located north and east of said line should said cattle located south and west be shipped, moved, or transported, driven or grazed over the lands situated on the north and east of said line; and

Whereas, Under and by virtue of an Act of the Legislature of the State of California, entitled "An Act to protect domestic livestock from contagious and infectious diseases, to provide for the appointment and duties of officials to carry into effect the provisions of this Act, and to provide an appropriation therefor," in effect March 18, 1899, the State Veterinarian of the State of California, in order to prevent the spread or communicating of said disease of Texas, Splenetic, or Southern Fever, in cattle, has on this 19th day of August, 1899, made a quarantine line as follows: Beginning on the Pacific Coast, where the Southern boundary line of Marin county connects with the Pacific Ocean; thence easterly and northerly along the southern and eastern boundary lines of Marin and Sonoma to the intersection of Sonoma and Solano counties; thence following the western, northern and eastern boundary lines of Solano county to the Sacramento river; thence northerly along the eastern boundary line of Yolo county to its intersection with the boundary line of Sutter county; thence easterly along the southern boundary lines of Sutter and Placer counties to the intersection with the western boundary line of El Dorado county; thence southerly and easterly along the southern boundary line of El Dorado county to the intersection with the western boundary line of Alpine county; thence in a southerly direction along the western boundary lines of Alpine, Mono and Inyo counties to the southwestern boundary of Inyo county; thence along the southern boundary of Inyo county to its intersection with the eastern boundary line of the State of California; and

Whereas, the State Veterinarian has, on this 19th day of August, 1899, made and established the following rules and regulations as to the crossing of cattle over the said quarantine line:

1. That from and after this date no cattle shall be transported by rail, shipped, driven, or moved in any manner whatever, from said area south and west of said line hereinabove set out and described to any portion of the State of California north or east of said line.

2. Exception to the above clause is authorized as follows:

Any cattle which shall have been dipped under the supervision of an Inspector of the Bureau of animal industry, U. S. Dept. of Agriculture, and a certificate of such fact given with a bill of health from such Inspector, shall be allowed to cross said line, until otherwise ordered.

3. That hereafter it shall be unlawful for any railroad, steamboat, or transportation company, its officers or agents, to accept for shipment, or to ship, or transport, any cattle originating south or west of the above described line destined to any point in the State of California north or east of said line, except in accordance with the regulations concerning cattle transportation as may be issued by the U. S. Department of Agriculture.

4. It is further ordered that a violation of any or either of the above rules and regulations shall be an offense and punishable as is provided by the laws of the State of California; and

Whereas, I, Henry T. Gage, as Governor of the State of California, have approved and do hereby approve of the quarantine line so made, fixed and established by the State Veterinarian, and have approved and do hereby approve of all of the above rules and regulations so made and established by said State Veterinarian.

Now, therefore, I, Henry T. Gage, as Governor of the State of California, by virtue of the authority vested in me by law, do hereby proclaim the above boundary of such quarantine, so made, fixed and established by said State Veterinarian to be the legal boundary of such quarantine within said State of California, and further hereby proclaim the above orders, rules and regulations prescribed by said State Veterinarian for the maintenance and enforcement of such quarantine to be the legal and binding rules and regulations within said State, and I do further proclaim that said orders rules and regulations shall be maintained and enforced within the State of California, and that a violation thereof shall subject all persons so violating any of said orders, rules and regulations to the penalties provided for in Section Eight of said Act of the Legislature entitled "an Act to protect domestic livestock from contagious and infectious diseases, to provide for the appointment and duties of officials to carry into effect the provisions of this Act, and to provide an appropriation therefor."

(Signed), Henry T. Gage, Governor of the State of California. Attest: C. F. Curry, Secretary of State.

Of course the line is not yet effective as against the quarantine put in effect by the Federal Government, which affects the whole State, but it is almost certain that the Department of Agriculture of the United States will adopt the line set forth and thereby take the northern part of the State out of the quarantine. The Department has been communicated with in regard to the matter and an early and favorable reply is expected.

Real Estate Transfers.

The following deeds have been recorded since August 24, 1899:

Nat Saylor to Frederick Conn—August 26, 1899. 160 acres borax land in Saline Valley; $10.

R. D. Tubwilder to Frederick Conn—August 26, 1899. 80 acres borax land in Saline Valley; $10.

C. J. Schalten to Frederick Conn—August 26, 1899. 80 acres borax land in Saline Valley; $10.

S. H. Spratt to Frederick Conn—August 26, 1899. 160 acres borax land in Saline Valley; $10.

John Hunt to Robert Pollard—June 5, 1899. ½ in Jose mine, $1.

Robert Pollard to G. O. Rayder—June 5, 1899. ½ int in Uncle Tom group, Mt Springs Dist.; $1.

J. C. Irwin, Administraior of Luther Clarke estate, to Bert L. Smith—August 16, 1899. Tiptop group of mines near Round Valley; $95.

The Proper Way

A correspondent of the Visalia *Times* writing from Mineral King says: Among the visitors at Mineral King this week was Mrs. M. N. Bowman, a newspaper reporter connected with the Los Angeles *Herald*. Mrs. Bowman was accompanied by Mrs. B. S. Wilkins, teacher of an Indian school at Independence, Inyo county and J. D. Lewis, a rancher of Owens Valley. This party had been on a visit to Kings river canyon and Milwood, and when at Mineral King were on their way to Mt. Whitney. The ladies were dressed in duck overalls and jumpers, and were making the trip astride horses. Mrs. Bowman is pretty well along in years, but was enjoying the trip and the scenery along the route they traveled. In a conversation with a *Times* representative she spoke in very complimentary terms of Visalia and Tulare county generally, she having once paid a visit to this section.

Small Income

The income of Mono county this summer from sheep licenses is very small, the amount collected and paid into the county treasury on the first Monday in August amounting to only $3,070, while $790 is the amount collected on cattle. The usual amount paid into our treasury for sheep licenses has run from $10,000 to $14,000, but this summer the Yosemite rangers have turned back numerous bands of sheep that were en route over the Sonora road to this county because they trespassed slightly upon the reservation. As the reservation now takes in most of Alpine county our Alpine friends are bereft of a large amount of yearly income by the unnecessary increase of the area of the Yosemite reservation.—*Chronicle-Union.*

Old settlers in Southern California are predicting a wet winter and they base their prediction on the fact that the summer has been such a cool one. They say that a hot summer is always followed by a dry winter, as has been the case for the past two years, and that a cool summer is always followed by plenty of rain. Everybody will hope that the weather prognosticators are guessing correctly.

NEW ADVERTISEMENTS.

BIDS FOR MUSIC.

Sealed bids to furnish music for the Annual Fair Ball in the general Big Pine Inyo County Cal., on Friday evening, September 22nd, 1899, under the auspices of the Board of Directors of the 18th District Agricultural Association. BEAUTIFUL KILLARNEY.

It Takes Three Days to "Do" Its Attractions Thoroughly.

A certain tourist, who was doing all the sights of the Holy Land with painful earnestness, was scandalized to see an American arrive one afternoon, hurry round all the sacred places, and make ready to depart betimes on the morrow. He ventured to inquire of this bustling traveler why, having come so far, he rushed away so quickly. "Sir," replied the Yankee, "I am timed to do Europe in a fortnight. I have thrown in the Holy Land, and if I stay here longer than one night I cannot see Killarney, which takes three days." That American had been well advised. Energetic, bustling tourists have endeavored to see all the beauties of the place in one day, and though they have been delighted and overwhelmed by what they saw, they have not been able to restrain a pang of regret at the thought of what they had missed.

Killarney, if not in itself, at least by description, is known the world over, and has a great reputation to maintain; but, unlike many other places of renown, it does not belie it. The lakes of Killarney may not prove to be quite as the stranger anticipated, but the impression he carries away is none the less one of profound admiration and wonder. The particular charm which enwraps him is that of the peaceful loveliness and serenity of the whole, and this strikes home with increased conviction after passing by the waterway from the upper to the lower lake. The former sheet of water, enveloped as it is by ragged peaks and gloomy, unclothed mountains, cannot vie with the lower lake, whose magnificent stretch of silver waves is fringed and caressed by foliage and trees, by rich meadows and sweet-smelling blooms, while the rugged outline of the wild hills is softened by the purple haze, and space is lost in an infinity of graceful undulations. The boat ride from the far edge of the upper lake to the ruins of Ross Castle is an experience which cannot be described. It must be enjoyed; and rest assured it will linger in the memory to the last day.—London Times.

WORLD'S PETROLEUM OUTPUT.

Yield Is More than 5,000,000,000 Gallons, Half of It from America.

More than 5,000,000,000 gallons of petroleum, according to the treasury bureau of statistics, is now produced annually in the world. Of this amount 2,500,000,000 gallons is produced in the United States, 2,250,000,000 in Russia, and the remainder is distributed among a dozen countries, Austria producing 87,000,000, Sumatra 72,000,000, Java 30,000,000, Canada 29,000,000, Roumania 24,000,000, India 15,000,000, Japan 8,000,000, Germany 7,000,000, Peru 3,000,000, and Italy about 1,000,000 gallons.

While the United States and Russia furnish the bulk of the world's petroleum and stand almost abreast in the quantity of crude oil produced, the amount of refined illuminating oil supplied by the United States is more than double that produced by Russia. This is due to the fact that a given quantity of United States oil produces three-fourths of its bulk in refined illuminating oil, while of the Russian oil the ratio is only about three-eighths.

LYING ON NAILS.

Hindoo Ascetics' Antics at a Sacred Bathing Fair.

Hindoo ascetics journey each year in January to a sacred bathing fair. This picture represents one of these ascetics reclining on a bed of tenpenny nails quietly telling his beads. His disciples are seated just beyond him. The fair is called the "Ganga Sagar Mela." The legend in connection therewith commemorates the bringing down of the Ganges river from the Himalayas by Bhogiratte in order to save Sagar Raja

LYING ON NAILS.

from the fearful calamities that befell him owing to the wrath of a holy man whom he had offended, named Kopil Mani. The fair is held on the seashore, and it is quite impossible to get to the place in ordinary country boats at any other time of year. It is computed that about 50,000 people visited the fair this year.

Battle with a Huge Shark.

A whip-tailed shark became entangled in a fishing net off the Delaware coast the other day. Captain Green, of Green Brothers' sturgeon fishing fleet, while watching his men at work noticed a great commotion in the water and some of his fishermen battling for life. He bore down to the spot and he and his crew assisted in killing the shark, but not until five men had been wounded by the monster. The shark measured 26 feet from tip to tip.

Men with Green Hair.

In the districts surrounding the copper mines of Cornwall, Cuba, Chile and other places where the ore is abundantly found, a curious sight is to be seen in the shape of men with hair that is quite green. This is not, as might be imagined, a fad, but the grave results produced by the men's surroundings. The crude ore, in order to secure a more marketable article, is roasted in enormous furnaces, and it is some strange emanation from the smelted copper that effects this chemical change in the hair of the miners, and turns it as green as grass. Investigations have proved that the fumes from the furnaces contain a certain quantity or arsenical matter, an dthis causes the startling change, although the texture and growth of the hair suffer no injury.

It isn't what a woman says that influences a man, but the way she says it.

No man who has never been tempted is sure of his honesty.

Use the fewest possible words when you have anything to say.

Quality

It is the high quality of Royal Baking Powder that has established its great and world-wide reputation.

Every housewife knows she can rely upon it; that it makes the bread and biscuit more delicious and wholesome—always the finest that can be baked.

It is economy and every way better to use the Royal, whose work is always certain, never experimental.

Never experiment with so important an article as the human food

There are many imitation baking powders, made from alum. They may cost less per pound, but their use is at the cost of health.

ROYAL BAKING POWDER CO., NEW YORK

WHAT MAKES SUCCESS.

It's the Man, Not the Job—There Are Possibilities In Everything.

"We are forever going to begin work in earnest tomorrow," said Mr. Staybolt, "and we are never satisfied with the job we've got, and we perform the labor involved in it in only a half hearted manner, but we are going to work in dead earnest when we get a job to suit us.

"The fact is that tomorrow, when we get to it, will be to us as today is to us now; we shan't feel any more like work. And that other job, when we come in actual contact with it and see it close at hand, won't suit us any better than the one we've got now does.

"The truth is that we are dawdlers and shy of work and trying to get along just as easy as we can. We hate to pitch in and go at things.

"The time for us to work is now, not tomorrow, and the job for us to collar is the one we've got. Round that up in style, do the work completely and thoroughly, and you'll be astonished to find how you'll bring it out and what chances there are in it. And everybody that knows about your work or is in any way concerned or affected by it, as it is done well or ill, will be delighted to see it well done—everybody likes to see a job, whatever it is, well done—and pleased with the doer, and there's money in it every time.

"It isn't the job that makes success; it's the man, and don't you forget it."—New York Sun.

An Exciting Adventure.

I had an exciting adventure while I was engaged in superintending the laying down of water pipes in Queensland. After work was done for the day I went up the surveyed course for the pipes to see that it had been cleared for the digging of trenches next day. The pipes, huge iron tubes two feet in diameter, lay scattered about.

I was alone, but suddenly I heard a tremendous roar, and looking up saw a great herd of cattle stampeding down upon me. Before I could get out of their way they would be upon me, so I crawled into one of the pipes.

On came the thunder of thousands of hoofs, and then a mass of roaring, maddened cattle swept past my place of refuge. Scores of them stumbled over the pipe in which I lay, and those which fell were trampled to death.

When the herd had passed I crept out and found seven dead cattle about the pipe.—Stray Stories.

High Art In Cookery.

Scalloped Oysters.—Select firm, plump oysters, and scollop them evenly and neatly with a pair of sharp scissors. Now, with a needle threaded with pink silk, if for a pink tea, or blue if you wish blue points, work a buttonhole stitch round the scallop. When finished, press carefully on the wrong side with a hot iron.

Shirred Eggs.—Carefully remove the shell from a fresh egg, and hold the white and yolk firmly in the left hand. Now, with a fine needle and thread, gather the material in straight rows about half an inch apart. Draw up to the required fullness and fasten neatly the ends of the thread.

Snow Pudding.—Take about four quarts, say four and a half, of fresh snow. Wash in several waters and put it to soak in hot water over night. In the morning knead it up and set it by the fire to rise, add some melted glue and set aside to cool.

Chicken Patty.—This dish is a lost art, as Patti is no chicken.

Egg Plant.—(See incubator.)—Puck.

His Head Was Turned.

A quaint story of paternal care on the parts of the clergy comes from Kreuzeber, a village in southwest Saxony.

In the middle of his sermon one Sunday the parish priest suddenly stopped, and, changing his voice to a more colloquial tone, said: "Herr Meinhardy, attend to the sermon. From this time forward I shall publicly name every one who looks at the girls during the service."

The unfortunate Herr Meinhardy indignantly repudiated this public reproach, explaining that it was a boil on the back of his neck that kept his head fixed at an angle which had led to the misunderstanding. — London Leader.

East of Chicago Doesn't Count.

When I was in Chicago in 1877 it was the metropolis of the west without qualification. Now it is merely the frontier city of the middle west. From the point of view of Omaha and Denver it seems to fill the eastern horizon and shut out the further view. Many stories are told to show how absolutely and instinctively your true westerner ignores the eastern states and cities. Here is one of the most characteristic: A little girl came into the smoking car of a train somewhere in Kansas or Nebraska and stood beside her father, who was in conversation with another man. The father put his arm around her and said to his companion: "She's been a great traveler, this little girl of mine. She's only 10 years old and she's been all over the United States."

"You don't say!" replied the other. "All over the United States!"

"Yes, sir, all over the United States," said the proud father, and then added, as though the detail were scarcely worth mentioning, "except east of Chicago."

Chicago, unfortunately, marks the limit of my wanderings, so I shall return to England without having seen anything of the United States, except for a sort of Pisgah glimpse from the tower of the Auditorium.—William Archer in Pall Mall Gazette.

Hair For Violin Bows.

The horse hair used in making violin and other similar bows is imported from Germany. A considerable part of the hair thus imported, however, coming originally from Russia. Horse hair for these purposes is white and black. The black is the heavier and stronger, and this is used in making bows for bass viols, because it bites the big strings better. In preparing the hair for use in bowmaking the white hair, used for violin bows, is bleached to bring it to its final whiteness.

The standard violin bow is 29 inches in length; longer bows are made to order. Shorter bows are used by young persons; but the bow commonly seen in the hands of a violin player is 29 inches long. Horse hair for violin bows is imported in various lengths, but mostly in lengths of 36 inches. Hair sufficient for one bow is put together in what is called a hank. There are grades and qualities of the horse hair, but the best is not very costly. A hank of the best white hair can be bought for 20 cents; it might cost 30 cents more to have it put into the bow. To rehair a bass viol bow costs more, the bulk or hair required being greater.—New York Sun.

NEW DEWEY STORY.

The Famous Admiral Nearly Started Another War with Mexico.

"In May, 1875, Admiral Dewey was commander of the old Narragansett," said Lieutenant Winslow, "and he was detailed to surveying the Gulf of California and the shores of the coast of the peninsula. It was not long after the Virginius affair at Santiago, and the feeling toward the Mexicans and Cubans was none too cordial. The Narragansett reached La Paz, near the southern end of the peninsula, and we no sooner got ashore than we heard that an American mining engineer and some Englishmen who owned the mine were prisoners in their mining shanties, forty miles back of La Paz, in the mountains. The American had resented an insult, a quarrel followed, and the American killed two Mexicans. The friends of the latter swore they'd kill the Yankee and the Englishmen, too, and the latter were soon obliged to barricade themselves. This siege had been on for several days when we dropped anchor.

"As soon as Commander Dewey heard of it he was very much interested. The next day he sent a messenger to the Mexican colonel in La Paz, who had a garrison of 600 soldiers there, asking him what he was going to do to give the American a trial before he was shot.

"'Oh, he got into the trouble—let him get out,' said the Mexican.

"Commander Dewey didn't like this reply, and the more he thought about it the angrier he got. The next forenoon he sent a note to the Mexican colonel telling him that an American citizen's life was in danger, and that the man was entitled to a fair trial. He told the colonel that he would allow him just twenty-four hours to rescue the American and protect the Englishmen. If at the end of that time relief was not on its way to the little mining party he would bombard La Paz and burn it.

"When we heard what Dewey had done we were all frightened.

"'Does he mean it?' we asked one another.

"As for myself, I was soon satisfied that he meant every word of it. I was in command of the guns. We had only two old howitzers on the Narragansett, the larger guns having been left temporarily at the Mare Island navy yard.

"'Get those howitzers ready for to-morrow morning and inspect all the small arms and ammunition,' said Dewey to me. Then he called the men to quarters and estimated that of the crew of about 120 we could land ninety able, armed men as a storming force. We drilled the men all that afternoon and far into the night. That night, on Commander Dewey's order, we steamed to a point commanding the principal streets of La Paz and trained the howitzers on the town. By next morning we were all ready to begin a second war against Mexico.

"At daybreak a Mexican corporal came on board with a message from his colonel saying that the Narragansett commander's request would be complied with. Early that morning we watched 300 armed Mexican soldiers start for the mining camp, and we kept the old howitzers trained on La Paz till the soldiers returned with the American engineer. When Dewey reported to Washington on the matter he minimized the importance of it, and it was passed over as a mere incident. Lieutenants Harris and Wright were on the Narragansett then, and Harris, at least, was with the fleet at Manila. It is somewhat singular that at that time, when we were expecting a declaration of war against Spain on account of the Virginius affair, Commander Dewey had his plans all made to sail the Narragansett to Manila."—New York Tribune.

Curious Christian Names.

I remember hearing the following story from the late Canon Bardsley, author of "English Names and Surnames." There was once a woman—"a little 'cracky,' I think," said the canon, by way of parenthesis—who had a son whom she had christened "What." Her idea seems to have been that when in after days he was asked his name, and kept saying "What," amusing scenes would follow, which was likely enough, especially if the boy was careful to pronounce the aspirate. Such a scene did, I believe, occur once when he went to school, and was told, as a newcomer, to stand up and furnish certain particulars. "What is your name?" asked the teacher. "What," blurted out the boy, amid the laughter of the class. "What is your name?" asked the master again, with more emphasis. "What," replied the boy. "Your name, sir!" roared out the infuriated pedagogue. "What, What!" roared back the terrified urchin. The sequel I forget, but I believe it was one of those cases in which the follies of the parents are visited on the children of the first generation.—Notes and Queries.

Calve as a Gardener.

Mlle. Emma Calve is probably the only great prima donna who combines farming with her brilliant operatic achievements. She has a large farm at Cevennes, and rusticates there each summer.

Last summer the famous singer went into her kitchen garden and cared for her own vegetables. No one was allowed to touch them, and the results were far better than when her gardener cared for the things. Mlle. Calve wore a short skirt of the blue jeans, sabots and a linen shirt waist. She spaded and hoed and watered her vegetables day after day, and proudly sent gifts of the finest fruits of her labors to friends in Paris.

The prima donna was very ill and nervous when she went to Cevennes, but this free, open-air life and the vigorous exercise soon restored her to the most robust health, and when friends ask her the secret of her cure she answers: "Spades and potatoes."

Mlle. Calve's chickens also come in for some of her attention, but the garden is her chief delight.—Philadelphia Post.

Smoking and Influenza.

Tobacco smokers have been more exempt from influenza during the recent epidemics than those persons who do not smoke.

When a woman begins to admire a man, she begins to persecute him.

Still More Counterfeiting.

The Secret Service has just unearthed another band of counterfeiters, and secured a quantity of bogus bills, which are very cleverly executed. Things of great value are always selected for imitation, notably Hostetter's Stomach Bitters, which has many imitators but no equals for disorders like indigestion, dyspepsia and constipation.

There are endless sets of Haviland China stored away in people's cupboards, and rarely ever used.

Ladies Can Wear Shoes

Ask your grocer for Utica Cleansing Compound for washing clothes, blankets, flannels, silks, carpets, and for general household use.

The Enormity Melted.

There was especial opposition to the disturbance of the old Granary burial ground adjoining the Common in Boston, through a portion of which the subway runs. It was necessary to remove the remains of 910 persons interred there. One elderly man of Scotch descent made a great fuss over what he termed "the enormity of molesting the bones of his ancestors."

After much argument, delay and persuasion the venerable Scot was induced to agree that if the city would construct a tomb according to his ideas he would consent to the removal without causing further trouble. On the day the vault was completed the guardian of his progenitors was taken over to inspect this new repository.

"Now," said Dr. Green, a former mayor, who had charge of the work of removing the bodies, "you can set a day and the remains can be brought over and deposited here."

"What!" exclaimed the old gentleman. "Have that nice new tomb littered up with those old bones? Never! Close up the old tomb and let 'em be!"

Thus did he secure, without cost, a new family tomb.—New York Tribune.

"Do Not Grasp at the Shadow and Lose the Substance."

Many people are but shadows of their former selves, due to neglect of health. Look out for the blood, the fountain of life, the actual substance; keep that pure by regular use of Hood's Sarsaparilla and robust health will be the result. Be sure to get only Hood's, because

THE STANDARD YARDSTICK.

Years of Study and Experiments Were Necessary to Produce It.

"People who handle the yardstick have but little idea of the years of study and experiments that were necessary to secure the standard yard measure," observed an official of the coast survey.

"Bird, a famous scientist, made the first standard yard in 1760, but the English government did not legalize it until 1824. Ten years afterward, when the house of parliament in London was destroyed by fire, the standard yard was lost, and England was again without a standard yard of length. Sheepsbanks next made a standard measure, which the English government adopted, and, so that it could not be again destroyed by fire, four authorized copies were made of it. One of these was deposited in the royal mint, another in the Royal society, another in the observatory at Greenwich, and the fourth was imbedded in the walls of the new house of parliament.

"The standard yard measures which are owned by the government are copies of the original, one of which is owned by the coast survey. The United States naval observatory has one also. The delicacy of its construction may be gathered by the fact that a change of temperature of one-hundredth of a degree of Fahrenheit has been found to produce a sensible effect on the length of the bar.

"The copies of the standard are made of bronze, for the reason that bronze is less affected by temperature than any distinct or single metal.

"The cost of the construction of the original standard yard measure involved the labors of Bird and his assistants for nearly six years. Sheepsbanks was 11 years in producing the accurate copies which he made from Bird's original measurements."—Washington Star.

HOITT'S SCHOOL.

THE TYPE TO BUY

...ONAUT.

The Argonaut's New Dress.

The "new dress" in which the *Argonaut* appears this week is none the less attractive because it is cut in the same style as those worn during the twenty years past. There is no more pleasing "face" of type than this. It is distinctive and classical, the creation of Van Dyck, who served the Elzevirs, the famous printers of Holland in the sixteenth century. The editions published by those Dutch masters of the art are highly valued for their beauty and excellence, and their artistic type faces remain the best models.

The publications that have adopted the cheaper and more rapid machine methods of the day have been obliged to sacrifice the beauty of their pages. There has come with the decreased cost of typographical make-up a monotony of appearance, a loss of individuality that is not alluring. The *Argonaut* continues steadfast in its admiration of the style chosen in the beginning.

As in the past, the new type of the *Argonaut* comes from a San Francisco house, the local branch of the American Type Founders Company, formerly Palmer & Rey. It is the eighth "dress" purchased there, and it is as satisfactory as the first. The competition of the machines now in use in the composing-rooms of daily papers has given the type-founders another problem. Their type must not only be sharp and clear when new, but hold its lines under wear, for every renewal means a heavy expense to the purchaser. Persistent efforts toward improvement in the quality of their products are a necessity, and that they will make the most durable type possible is certain. In former times they had only the rival founder to fear, now they must compete with machines that cast new type for every piece of "copy" passing through the compositor's hands. In the production of black-letter and ornamental type faces the founders have the field to themselves, still there is constant progress here, and new ideas are brought out continually. The American Type Founders Company, with its several branches, is acknowledged to be the world's greatest producer of novel and beautiful type designs.

HOW SCHLEY FLAYED CERVERA

WHEN the sun sank his red and perspiring face under the cooling waters of the Caribbean on the night of July 2, 1898, the blockading fleet off Santiago drew silently inshore to take up another night of vigil lest Cervera should slip by under cover of darkness and undo the work of the past forty days. Scarcely had the hiss which marked the extinction of the orb of day smitten on the ears of the men of the fleet when the searchlights took up the labor where the sun had left off and sent long tongues of flame into the crooked mouth of the harbor, sweeping to right and left, west and east over the grim fortresses which masked the entrance, peering in to where the Reina Mercedes was floating a watchdog against any attempt to break inside.

When the same sun after one more course from east to west again took his mighty bath over toward Panama, the blockading fleet was somewhat scattered although within signal call. Part of the vessels were along the coast line picking up the sailors of Spain and helping to save the survivors of the wrecks made such by themselves. The long vigil was over, nothing remained of sufficient importance to worry gallant "Dick" Wainwright with his little converted yacht. The fleet of the gray-haired admiral was in smoldering ruins along that coast line, while he himself a prisoner was sitting in the cabin of the flagship dressed in garments lent to him by her officers.

Independence Day, 1898, had received new significance, for it had become the day of one more stupendous naval accomplishment under the flag of the Union. Not even the brilliant battle of Admiral Dewey in the harbor of Manila exceeded the wonderful fight made by Schley on that Sunday morning. Spain's sea power was a mere reminiscence when the sun rose over Morro and Socapa on July 4. But one American had lost his life in the fierce fight extending from early in the morning until an hour and a half after the time for midday mess call. Hundreds of Spaniards had made their last fight on earth, four magnificent cruisers, excelling in power—on paper—the one armored cruiser which did such fearful execution, were blackened hulks lying ashore on the coast, two torpedo destroyers were under the sea, sent there by a fierce little yacht inferior in armament to them, and the survivors of all their crews were prisoners aboard the vessels of their conquerors.

A Severe Vigil.

For forty days Schley had kept guard there. For thirty days the blockade had been maintained under the one general order issued by Sampson to all the fleet on June 2. For thirty days the same six-mile circle had bound in the entrance to Santiago and made it impossible for anything, even a whaleboat, to emerge night or day without a challenge to be turned into destruction unless the challenge were heeded. It had been a nerve-racking, soul-wearying strain on officers and men, by day standing off under steam in a wide circle of six miles from the prows of the big battleships in the center to the same distance off the harbor entrance, but close inshore, where the little gunboats picketed, by night closing in to half distance with formation unbroken excepting that a battleship should close in on the entrance and blaze it with its searchlights until relieved, while another huge hulk attended to open fire on anything emerging, such had been the monotonous order of the watch.

Patiently and faithfully, punctual to the second on changing station, the watch had been kept. Time after time the veteran of Castile had sought for a break in that deadly guard and had retired into the inner fastnesses of the crooked harbor in despair. "If the enemy attempts to escape close in on him, engage and endeavor to destroy him or drive him ashore." So read the general order issued by Sampson on June 2, which was never changed until it had been carried into full effect. So with the fall of night just a month later the big ships moved slowly and sullenly nearer the point of possible attack.

When the first gray streak of dawn revealed the point where water and shore separate the Massachusetts, then on guard with her searchlight attended by the Indiana, turned her prow to the east and steamed away to Guantanamo. She left her station to coal, for her bunkers were getting too low in supplies to permit her to follow out orders if the emergency arose. Taylor, with the Indiana, relieved her, for no second ship was needed then. Back into the circle, with the Gloucester hovering on her port bow, the big battleship moved. With the increase of light once more the long semi-circle was taken up and the grim watch went on.

ADMIRAL SCHLEY.

ADMIRAL SAMPSON.

But the uneasy sea kept the big ships drifting to the east as they rose and fell. Over nearest the shore in the port division the little Vixen held her place. Next should have been the Marblehead, but she was detached that day. Then came the Brooklyn, flagship of the second squadron; the Texas, the Iowa, the Oregon, the New York, flagship of the chief in command; the Gloucester close inshore and east of her the Indiana. The position at daybreak was such that the port side was somewhat uncovered. It is believed that this unusual condition was noticed by the Spanish commander and that herein he saw his only chance of escaping with one or more of his vessels.

Sampson Steams Off.

Morning mess was called and disposed of, men lounged about seeking some cool spot, officers walked nervously about, but nothing indicated that a change to the monotony of the vigil was imminent. Over on the Oregon the jackies assembled in general quarters for Sunday morning inspection. On the other ships in rapid succession the same preparations for the same ceremony were noticeable—excepting the New York. Day station had been taken, the commander had made his observations and was about to leave his post for a time.

While the men were still on deck undergoing a rigid inspection by their officers the signal bridge of the fleet flagship broke out in many-colored bunting. On each signal bridge of each vessel in the mighty armament the officer on duty bent his glasses to read the signal. It was nearly 9 o'clock, stifling hot and eyes were straining across the brazen water in idle wonder when the stern guard would be broken. "Disregard the motions of the commander in chief" read the signal displayed by the big flagship. Then the beautiful cruiser steamed away toward Siboney.

On the deck of the Brooklyn, shaded by a big awning, sat Commodore Schley. Near by him was Captain Cook. The inspection was over, the men had been released and all was as monotonous as it had been for forty days. Just at this juncture the navigating officer on the forward bridge bent his glasses on the harbor entrance. His attention had been attracted to smoke which was coming therefrom. He quietly turned to Mr. Hodgson, executive officer, and said: "That smoke is moving, sir."

"Give me the glasses," said Mr. Hodgson, and he trained them on the object now increasing in size. "The enemy is escaping, sir," he bawled out to the squadron chief, dropping the glasses in his excitement.

"Signal the fleet to clear ship," said the commander.

"We have done so, sir."

From the signal bridges of half the vessels in the fleet came the signal that at last Cervera had dared the wrath of the blockaders. In swift reply came the order from the Brooklyn to close in and engage, but by the time the bunting flapped from the ropes the entire fleet had broken ground and was following out the general order to fight on sight. As they swung to port to meet the enemy the forward turrets of the Teresa blazed with a noisy defiance and the shot were turned loose among the vessels bearing down swiftly upon them.

Then the most remarkable naval battle of all time was under way. The big Brooklyn, the largest ship in the fleet, swooped down under half steam, belching flame and smoke from all her port battery. Then, with a mighty sweep of her bows, she sheered up to starboard and, swinging around in a circle, passed close by the Texas, reopening with her starboard battery. Swiftly she flew, gaining speed and power with each revolution of her screws. Classed as inferior to any one of the four gigantic cruisers opposed to her, she successively engaged them all.

The Texas, the Oregon, the Indiana, all swooped down, turning to meet the westward course of Cervera's ships. Their heavy guns threw tons of hard metal against the sides of the doomed ships, but only one had the steam and speed to follow the escaping leaders. With an experience gained in a race of 12,000 miles, the stokers and engineers of the mighty Oregon had learned a lesson which stood them in good stead. With a speed greater even than that of the Brooklyn, this leviathan passed to starboard of the Iowa and Texas and hung on the trail of the speedy Brooklyn, gaining rapidly on the flagship, hurling heavy shot and shell upon the enemy.

From out the entrance of the harbor, last of all, lying flat in the water with a limited exposure to hostile fire, came the most dreaded of all the ships which floated the flag of Castile that morning. With double the speed of the Americans, with deadly torpedoes aboard and with instructions to send in their deadly missiles on any ship daring enough to await their attack, slipped out the Furor and Pluton. During all the long watch off that harbor these two had caused the blockaders the greatest anxiety. Yet the result tends to show how useless in hot battle they and their class can be.

When the action began the Gloucester lay farthest inshore in the starboard division. She lapped over the huge Indiana and her gallant commander sent her forward and then swept in a wide circle, clearing the way for Taylor. She blazed away with her guns—mere toys compared to those of her big consort—but at too long range for effective service. Then Captain Wainwright, knowing the speed of his ship, held her back to gain steam. He was still waiting when the torpedo boats made the outer entrance. Then came his opportunity.

Opposing two vessels regarded as the most dangerous in the fleet of the enemy by this time was but one daring Yankee seaman with a crew of daring Yankees aboard a fragile yacht built for pleasure and not stern war. It was a contest none need have felt shame in avoiding, but Wainwright had seen the Maine sink below the waters of Havana harbor, had seen his men in mangled heaps crushed out of life, and he knew no hesitation. Like a greyhound his little vessel shot forward. Down under the fire of the battleships which had turned their fire upon them the yacht bore in between the deadly torpedo boats. Often in that brilliant action they tried to torpedo the Gloucester, but the skill of the commander and the skill of the men behind the guns smothered both vessels with a damaging fire.

In and out like a snake of flame and smoke raced the Gloucester. Back toward the harbor entrance the worried torpedo ships turned in a vain effort to escape, but escape was not to be. Smothered at their guns by a boat with fewer weapons and lighter projectiles, but with deadly aim, they blew up into fragments. One went ashore and the other dropped beneath the waves, while the victor humanely devoted his time to the rescue of the few men who had survived his awful fire. Less than one hour had passed, less than sixty minutes had been necessary to show the limited value of such vessels against the deadly accuracy and rapidity of the Americans.

Cervera Opens Fire.

As the Teresa opened fire she received the return fire of all the ships of the American fleet. Sheering to starboard she made a futile effort to escape to the west. Closely following in her track came the Oquendo, the Vizcaya and the Cristobal Colon, all superior in armament to the Brokolyn and but little inferior to the bulldogs of the American navy. The Spaniards made a gallant and desperate fight, but the constant rattle of the rapid-fire guns in main and secondary battery aboard the enemy, combined with an accuracy at long and short range little short of marvelous, made the Castilian gunners flee from their guns.

The Iowa and the Indiana being short on steam were operating at long range until well after the action commenced. But they closed in and by the lapse of half an hour were dealing deadly blows at all but the swift Colon, which seemed in a fair way to glide out to the sea to the west and make good her escape. The Oregon, with a burst of speed which has caused naval authorities and writers to gasp and continue gasping, set sail for the flying flagship, and before the Colon gave up the fight was well up with the chase. In to the shore turned the flagship of the enemy, but as she turned Captain Clark's gallant vessel flew by, raking her as she faltered. Then she flew the white flag and dashed a wreck on the beach.

On flew the Oregon, followed by the Texas, Indiana and Iowa, all delivering hot volleys from large and small guns. The Brooklyn, ahead of her enemy, was sending back her compliments from the after turret, while her forward pieces bore on the Colon, which passed inshore of the Oquendo, just as the Oregon raked the flagship. As the Oquendo veered inshore the Oregon passed astern and sent a compliment or two as she headed for the Vizcaya, now hotly engaged with the Brooklyn and Texas. The Iowa and Indiana, coming up slower, also beat the ship into a shapeless mass of twisted iron and steel. Less than a full hour of fighting and two of the escaping fleet ashore, abandoned and with colors trailing their decks.

Nine and eleven miles from the harbor entrance lay two of the best of Spain's warships—one the flagship—battered out of all semblance to vessels of their former power and speed. Just ahead, but under a fire which nothing afloat could sustain and remain afloat, the proud Vizcaya, commanded by the officer who had showed her off in New York harbor about the time of the Maine disaster, was reeling along hopeless but still defiant. Her consort, the Colon, was gaining rapidly and seemed to be about to escape. The Vizcaya suddenly turned inshore, ran up the white flag and her susviving sailors leaped into the hostile sea to avoid the rain of iron which was slaughtering them in winrows.

Seventeen miles of travel and less than two hours of fighting and three of the mighty cruisers were gone. On swept the Brooklyn and Oregon, the big battleship now close on the quarter of the flagship, hanging grimly to the chase. Up lumbered the Indiana and Iowa and, no longer able to maintain the chase, turned to the rescue of the unfortunates. A flag broke out on the New York, now rushing by, and Captain Taylor, on the Indiana, saw his ship's number called. Then he received a signal order to return to his station off the blockade and guard the harbor entrance. So slowly and reluctantly he came about and dropped out of the fight.

"Fighting Bob" Evans, with the Iowa, having done as much damage as possible while the enemy's fleet existed, now turned his attention to caring for the survivors. Even while at this work the New York, under full steam and with screws revolving under forced draught, plunged by on her way to get into the fight. On the bridge was the commander-in-chief, whose orders were being so gallantly and thoroughly carried out by the ships of the two squadrons in his absence. He sent Taylor back, flagged Evans to care for the wounded and surviving and then raced ahead to where in the distance he was able to see puffs of white smoke mantling the Oregon, and then later on see a geyser of water beyond the fleeing Colon as a thirteen-inch shell exploded on the inshore side.

Orders Were Obeyed.

But it was too late. Even as the fleet flagship drew near to the chase the Colon turned inshore and the last of the enemy signaled submission and defeat. Then up went the signal of Schley that the battle was over and the victory won. All that remained was to see to the rescue and comfort of the survivors. Three of the American ships had made fights without parallel in naval history.

Some people can't even tell the truth without exaggerating.

LAW AS INTERPRETED.

An action of mandamus to compel the reinstatement of a pupil in a school is held proper in Jackson vs. State, Majors (Neb.), 42 L. R. A. 792, if the action of the officer or officers by whom the pupil was refused admission to or continuance in the school was an arbitrary or capricious exercise of authority.

The right of a municipality to an injunction against improvements by abutting owners upon streets in a manner materially different from that directed by the Board of Trustees is sustained in Drew vs. Geneva (Ind.), 42 L. R. A. 814, where the abutting owner was acting in defiance of a municipal ordinance.

The right to a way by necessity for land completely surrounded by that of other owners is held, in Ellis vs. Blue Mountain Forest Association (N. H.), 42 L. R. A. 570, to be founded on an implied grant and to depend on a previous ownership, so that the right does not arise in case all the land surrounding a tract is bought by another owner, who procures the discontinuance of the highways leading to the tract inclosed.

A pipe line for oil laid under ground in a wagon road or crossing under a railroad track, which, by stipulation in a deed to the railroad company, it is required to construct and maintain for the grantor, is held, in United States Pipe Line Company vs. Delaware, Lackawanna and Western Railroad Company (N. J.), 42 L. R. A. 572, to constitute a trespass even if it does not injure the railroad, as it is not within the easement reserved.

The failure to construct fire escapes on a hotel as required by an ordinance is held, in Weeks vs. McNulty (Tenn.), 43 L. R. A. 185, insufficient to make the proprietor liable for the death of a guest by fire, where it does not appear that the fire escape would have afforded him any benefit, but there is evidence that he had locked himself in his room and tried to break the door to make his escape, and also that he might have escaped safely by leaping from the window to the roof of an adjacent building.

THEY USED A CODE.

Advantages of So Doing Are Explained by One Who Knows.

"Don't tell me anything about the advantages of a cable code. I know all about the code business, and it's a delusion and a snare."

The man looked angry and worried, but was finally induced to relate his experience.

"It was like this," said the angry man. "When my wife went to Europe we agreed to use the P D Q code, in order that we might correspond by wire at the lowest possible rate. There is hardly anything that one can't tell in a few words by the use of a code, and sentences of ten and fifteen words which would cost $2.50 or $3.75 by the ordinary tariff, exclusive of address and signature, can be sent for 25 or 50 cents. The first message came to me on the day my wife landed at Queenstown, and, although it consisted of only three words, it told me that she had had an enjoyable trip, met a lot of nice people, and never missed a meal. I went among my friends and expatiated on the advantages of the code business, and now I feel like going to them to take back all I said, and this is the cause."

And he showed a cable message with the words "Nurry Chiraide."

"I hunted all through the book," he said. "I've studied it inside out and upside down, and can't find the words, and I don't know if the message means 'I am desperately ill and want you to come at once,' 'My money has been stolen; send me a fresh supply,' or 'I leave for Rome to-morrow,' or any other thing.

"But I got even on the code business. I sent a message in reply with these words, 'Amulet Amiel.'"

"And what does that mean?" asked the interested listener.

"That's the point. The words are not in our code book, nor in any other code book that I know of, and I sent them to give my wife a chance to exercise her imagination, so that she may be able to talk intelligently on the subject of codes, for I want no advantage in that direction."—New York Tribune.

Mothers-in-Law.

How many of the mothers-in-law of our immediate acquaintance deserve the reputation with which they are universally accredited? Their chief fault perhaps is their persistent inclination to steer and to rule the private and domestic affairs of their married sons and daughters. That this spirit exists, and in many instances is carried too far, nobody can deny—instances are constantly exhibited, usually more glaring in the early stages of young married life. Of course, the explanation of this is natural and excusable. The mother, who for years has been in close sympathy with a son or daughter, and has known and gratified each wish and desire instantly, is suddenly called upon to give up every claim. This is a superhuman task, and it is not remarkable that for the first few months she finds it an impossible one. It is given to but few women to keep eyes and ears and mouth shut when they want most to open them.

Irish Potatoes and Bots.

So far as known the juice of Irish potatoes is better calculated to cause the bot to let go the lining of the stomach than any remedy that can, with safety, be given the horse. The juice does not kill the bots, but causes them to become numb. Hence they curl up and let go, and the horse is relieved from his bots. Six to twelve tubers will furnish enough juice, when scraped, to relieve the worst case.

THE ALUM BAKING POWDERS.

Names of Some of the Principal Brands Sold in this Vicinity.

The recent discussion in the papers of the effect upon the human system of food made with alum baking powders and the opinions that have been published from noted scientists to the effect that such powders render the food unwholesome, have caused numerous inquiries for the names of the various alum powders.

The following list of baking powders containing alum is made up from the reports of State Chemists, Food Commissions, or other reliable authority:

Baking Powders Containing Alum:

K. C. ..... Contains Alum.
Jaques Mfg. Co., Chicago.
CALUMET ..... Contains Alum.
Calumet Baking Powder Co., Chicago.
HOME ..... Contains Alum.
Home Baking Powder Co., San Francisco.
BEE-HIVE ..... Contains Alum.
Washington Mfg. Co., San Francisco.
CLOVER LEAF ..... Contains Alum.
Pacific Mfg. Co., Los Angeles.

In addition to these, it is learned that many grocers are selling what they call their own private or special brands. These powders are put up for the grocer and his name put upon the labels by manufacturers of alum powders in San Francisco and elsewhere. The manufacturers, it is said, find their efforts to market their goods in this way greatly aided by the ambition of the grocer to sell a powder with his own name upon the label, especially when the grocer can make an abnormal profit upon it. Many grocers, doubtless, do not know that the powders they are thus pushing are alum powders which would be actually contraband in many sections if sold without disguise.

It is quite impossible to give the names of all the alum baking powders in the market. They are constantly appearing in all sorts of disguises, under all kinds of cognomens and at all kinds of prices, even as low as five and ten cents a pound. They can be avoided, however, by the housekeeper who will bear in mind that all baking powders sold at twenty-five cents or less per pound are liable to contain alum, as pure cream of tartar baking powders cannot be produced at anything like this price.

Former Brutality in War.

Before a battle in former times the priests solemnly devoted to the gods the whole of the hostile army then in sight, and, if possible, no man of it was left alive. A writer in The Nineteenth Century says that when Hermann decoyed the great host of Varus into the forest depths all the Romans that escaped death in the battle were captured and led into the dark recesses, where every man of them was sacrificed upon hastily erected altars.

Latham, in his edition of Tacitus, quotes six contemporary authorities to show that this practice of concluding a victory with human sacrifices was customary among our Teutonic ancestors. Some crucified their prisoners, others hung them up to trees for archery practice, but in general a captive was either slain on the spot or else reserved to be sacrificed to the gods. Even when the progress of agriculture induced them to keep a majority of the prisoners alive to be slaves they appeased the gods for this indignity by increasing the tortures inflicted on the small remainder.

Gibbon describes how, before the blazing altar, every hundredth man's arms were hacked off him and, before his eyes, thrown into the flames. All that a red Indian would have done last century was freely practiced by our ancestors of 12 centuries ago. And the highest ideal of a man then included, as a duty, dark cruelty and grewsome revenge against all his enemies.

Men's Feet.

The man buying a pair of shoes found the right one perfectly comfortable and easy, the left one rather snug.

"It's usually so," said the salesman; "the left foot is commonly a little bigger than the right foot."

"Why don't you make the left shoe a little bigger, then?" asked the customer.

"Well," said the salesman, "the difference is usually not great, and it might not be enough so that it would be noticed if trying on shoes. And then it is not so great but what the difference in feeling of the two shoes disappears very soon. And then, too, in some cases the man's right foot is the larger, the man being right footed in this respect as men are sometimes left handed, the reverse of the common habit in the use of their hands. If shoes were commonly made with the left a little bigger than the right, to fit the majority of cases, they'd be worse than ever when you hit a right footed man. So the shoes are made alike in size, a man gets a pair that fit him comfortably to start with and they adapt themselves quickly to any slight differences in the feet."—New York Sun.

How Care Kills.

Wise people have long been aware that "care killed a cat," but it has been left to the X rays to explain how and why. Dr. Fritz Lange of Munich has turned his fluorescent screen upon the stomach of a happy and contented cat and has seen the process of digestion going on as it should in all well regulated stomachs. Then he has introduced care and irritation into the feline mind by placing a live mouse just beyond reach and has seen digestion stopped thereby.

The Society For the Prevention of Cruelty to Animals may cry out on behalf of the cat, or the mouse, or both, but the lesson against worrying is as complete as any Christian Scientist could desire. Worrying stops digestion, causes dyspepsia, retards all the normal physical processes and demoralizes both body and mind. It wastes the forces of life, destroying the tissues without accomplishing anything.

STATUE OF FRANKLIN.

Inventor, Philosopher and Patriot Commemorated in Bronze.

For years the absence of a suitable memorial to Benjamin Franklin has been a reproach to Philadelphia, where he achieved his scientific and literary fame. The stain is now removed. Recently there was unveiled a statue which fittingly commemorates the inventor, philosopher and patriot. It is located in front of the postoffice and stands on the site where Franklin is supposed to have made his historic experiment with a kite. The sculptor is John J. Boyle, of Philadelphia.

THE FRANKLIN STATUE.

A Blow at Cupid.

"It was pretty hard to have the honeymoon clouded before we had been married two hours," complained a newly married man, as reported by the Detroit Free Press. "Fact is, though, the excitement of the wedding day took away the little sense I had remaining.

"We were married at noon, and after dodging the customary rice and old shoes, left for the station. We had barely time to catch our train, and I rushed up to the ticket window at once. Then, once more, we had to run the gauntlet of friends, who think it smart to throw rice down one's collar and have it sift down into one's shoes.

"We got aboard at last, and when the train started I heaved a sigh of relief. When the conductor came around for the tickets I handed mine over. After looking at it for a moment, he asked me if the lady was traveling with me.

"That was the last straw, and I snapped out for him to mind his own business.

"'That is what I am trying to do,' he answered, coolly. 'One more fare, please.'

"Then it flashed upon me that in the hurry and excitement of the moment I had forgotten that I had a wife—and I wilted right then and there. I paid the other fare and tried to laugh it off, but the look that my wife gave me will linger with me as long as I live. It took me two hours to argue her out of the impression that I didn't love her any more, and she isn't fully satisfied yet."

TABLE FOR BICYCLE CLEANING.

Stand that Holds the Wheel Rigid and in Handy Shape.

Everything concerning the bicycle is of great general interest because of the popularity of the wheel. Among the recent novel inventions is a very convenient bicycle cleaning and repairing stand. Under certain circumstances the bicycle is like a slimy eel. It will not lean up against the wall, and it defies the most ingenious to devise a scheme for holding it while repairing or cleaning it. The table of Charles Colsten, of Jersey City, fills the bill. The wheel stands upon the saddle and handlebars on the table, which places it at a very convenient height. Two springs grasp the handle bar in such a way that the machine is held perfectly rigid.

BICYCLE CLEANING TABLE.

Peculiar Crime.

Escroquerie is a crime which has no distinct counterpart in any country but France. An English lady was recently sentenced to twelve months' imprisonment for ordering a costume she was not able to pay for, and an English governess was sentenced to six weeks' imprisonment for taking a cab without being able to pay the fare. The French are eminently practical people, and see no great difference between running off with an article and getting it without paying for it. It often happens that the English fall under the law with regard to escroquerie.

To Measure Devotion.

The measure of a woman's devotion is the extent to which she will make herself uncomfortable for you; the measure of a man's is the effort he will make to have you as comfortable as he proposes to be himself.

British Postoffice System.

England makes $20,000,000 a year profit out of its postoffices.

A terrible calamity befell a fishing party last week. After reaching its destination some twenty miles away it discovered that the keg of beer had been left behind.

Paradoxical though it may seem, the word "trust" excites a good deal of suspicion.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, SEPTEMBER 8 1899

In a speech delivered at Winnemucca, Nevada, while on his way to California, William J. Bryan said in part:

"I believe the outlook for success in 1900 was never better than at present.

On the old questions of the campaign of 1896 we are stronger than we were during that campaign. On the new questions we are gaining steadily. The Chicago platform at the convention next year will be reaffirmed entire. In fact, I doubt whether any opposition to the platform will manifest itself in the convention. The two greatest of the new issues that are before the country are; First, the trusts; second, the Philippine question. The first question can scarcely be called new; but the trusts have been so multiplied that the question assumes an importance which it did not have in 1896. Many methods have been suggested for the extermination of trusts. The most feasible, it seems to me, is to require every corporation to obtain a license from the federal government before it is permitted to do business outside of the state in which it is organized.

This license can be granted under conditions that will squeeze the water out of the stock and prevent the monopolization of any industry. This nation must choose between being a republic or an empire. This is becoming more and more clearly recognized. While some were carried away by the excitement attending the war, I am certain that the second, sober thought on the part of the people will lead them to oppose any departure from the principles of self-government as set forth in the Declaration of Independence. An imperial policy cannot be defended on any grounds. From a financial standpoint it will be an exposure to a large majority of people, and a profit only to the capitalists who would organize syndicates to develop the Philippines. The islands will never offer a home for our surplus population. The white race will not live in the tropics. Only 100,000 persons of British birth reside in India out of 300,000,000 after 150 years of British possession. The imperial policy demands an increase of 75,000 men in the standing army. An army of 75,000 will cost the people not less than $100,000,000 a year. That money spent in reclaiming the arid lands of the west would furnish homes for far more Americans than will ever reside in the Philippines. From a religious point of view it cannot be defended. A despotism in Manila is not consistent with a free government in the United States. This nation cannot endure while half of its people are citizens and half vassals.

Again comes the report that an extra session of the Legislature is to be called, and this time the story is put forth with a minuteness that to many will give it color of probability. It is claimed that sixty-one Republican members of the Legislature have signed an agreement to go into caucus for a Senator in the event that an extra session is called, and to settle in ten days the entire question of a successor to Stephen M. White. To the great majority of Republicans this announcement will be disquieting. It is true that there is universal regret over the failure of the Legislature to choose a Senator. It is realized that California with only one half its representation in the upper house of Congress is doing injustice both to itself and to the Republican party. But, however the urgency of the case, the people of this State are not yet brought to such a pass that they are willing to barter all self-respect for the sake of having full representation in the Senate, and there is a well founded belief that any plans that may now be formed for an extra session and for the election of a Senator, have for their object the choice of the man of men whose selection the people of the State would regard as the deepest humiliation. A Senator is desired, but a moral leper in the person of Dan Burns is not, and it is not exaggeration to say that rather than be represented by that malodorous person, the people of California would prefer to worry along indefinitely with only a single Senator. Of one thing members of the Legislature may be certain. If the plot to to elect this political outcast should succeed, the people will never forgive the treachery that alone can make such infamy possible.—*San Diego Union (Republican.*

The man lives not who can correctly prophecy what will be the issues of 1900. If the same conditions existing now would prevail then speculations might be indulged in with some reasonable degree of prophetic accuracy, but events are likely to occur at any time to disturb the best laid plans and the most accurate calculations. The war in the Philippines is at this moment an absorbing question, and if a national election were to be held in a few months its conduct would no doubt be a predominating issue. Close it with victory to American arms in the mean time and the issue will be relegated to a place of minor importance. Even the trust question may be satisfactorily ended by some providential interposition, but there is no great danger of that as long as a Republican Administration is in power, for it would have the effrontry to fly in the face of providence on the industrial trust problem.

A Chicago farm journal recently sent out a number of inquiries to ascertain the opinion of the farming population on expansion and questions relative thereto, and the answers indicate that the preponderance of evidence of evidence goes to show that the agriculturists of the middle west do not approve of the policy of the present administration of "benevolent assimilation" of a semi-barbaric Asiatic race.

A VERY QUEER DEAL.

IN A FAMOUS GAME OF DRAW POKER IN OLD DAKOTA.

The Dealer Gave His Rival Four Jacks and Himself Four Queens. When the Show Down Came, the Jacks Had Turned to Aces.

In the northwest they still talk about the last poker game that Major Edwards and Stanley Huntley played together. They were pioneer editors of newspapers in Dakota in the old territorial days. Huntley had just sold his paper in Bismarck for $2,500 cash and was coming east. He and the major had sat in many a quiet game together, and Huntley went over to the major's office to say goodby and play one last game. The major produced the cards, locked the door, and the two faced a green table.

The major had the reputation of being a skillful dealer, and Huntley's previous experiences had taught him that cards sometimes appeared in the major's hand on a show down whose legitimate existence could only be accounted for on the hypothesis that the age of miracles had not passed. So he had fortified himself for this farewell game not only with the $2,500 which he had received for his newspaper property, but also with four large but not overworked aces.

There was no limit, but for an hour the game went along quietly enough. The major was out $300 or $400, but, as both players remarked, the game was "young yet." At last a jack pot for $50 came and remained. Back and forth across the table went the deck. Neither man could get openers. Each time the deal passed the pot was sweetened $40. At last there was $380 on the table. The major dealt. Huntley looked over his cards and found four jacks.

As has been said, the major was a slick dealer, and when a big pool was at stake and it was his deal he generally managed to give his opponent a good stiff hand, while taking care that he himself had one just a shade better.

So, when Huntley found the four jacks in his hand it seemed to him that the time had come to precipitate his four aces into action. The jacks were retired unostentatiously, and with a faint—a very faint—shade of disappointment in his voice Huntley announced:

"I can't break it."

The major was still examining his cards with that hesitating air that some people always believe means "studying out a straight." Finally he said:

"I'll have to break it for $500. It's a big pot."

Huntley looked mournful and said

"I'll stay. Gimme a card."

"None for me," announced the major briskly, as he threw over a card and laid down the deck. "I'll bet you $500.'

"I'll raise you $500," said Huntley.

"Five hundred more," said the major.

"When I sat down," said Huntley, "I had $2,500 in my pocket. I'll raise you the full amount of that on this one hand. If I lose, I'm broke."

The major took another look at his hand and replied

"I haven't got as much as that in cash. I'll make out a bill of sale of the building and plant, newspaper and all, and put that in the pot. If you win, you can hold it till tomorrow, when I'll settle."

"Go ahead," said Huntley.

The major wrote out the bill of sale and threw the slip of paper into the pot on top of the big pile of greenbacks. Both men had emptied their pockets.

"Now I'll call you," said the major.

"Fours," said Huntley, and he laid down his four one spots. The major never flinched. He examined the aces, one after another. Then he laid down his hand and said briefly:

"You win, Stanley. All I had was four queens."

The next day the major redeemed his bill of sale and Huntley came to New York and began to write the "Spoopendyke Papers," which were first published in the Brooklyn Eagle. He's been dead for years now.

About two years after the famous poker game Major Edwards was visiting New York, and he looked up Huntley. They dined together at the Astor House. After coffee and when the cigars had been lighted the major said:

"Stanley, of course when gentlemen like you and I play poker together there's never any question about the game being straight. But there's one thing that's been puzzling me for two years, and I want to ask you about it.'

"Go ahead, major," said Huntley, puffing his cigar.

"Stanley, why in thunder did you refuse to open that last jack pot when you had four jacks in your hand?"

"Major," returned Huntley thoughtfully, laying down his cigar, "who dealt that last hand?"

"I did, Stanley," said the major.

"Well, then, major, since four aces won the pot, how in thunder could it have been a straight game?"

"That's so," said the major reflectively. "Let's get a cab and go to some theater."—New York Press.

The Expert Met His Match.

At a North Side boarding house one of the newly arrived boarders, named Burton, is an expert accountant. The first evening after his arrival he began boring the other boarders by talking "shop" and relating the great feats of mathematics that he had accomplished in his time. Smith, one of the star boarders, made up his mind to rid the parlor of shop talk, at least for that night.

"I have a little piece of addition work that I think you would have a hard time in doing. If you can add it without the aid of a pencil and paper, you are a good one."

"Name each item, and I will add,' said Burton.

"Five barrels of cider at $4.56 a barrel. Have you got that down?"

"Yes."

"Four bushels of bran at 90 cents a bushel. Have you got that down?"

"Yes."

"Fifteen kegs of horseshoe nails at $2.35 and two strings of garlic at 50 cents a string. Have you got that down?"

"Yes; go on."

"Six gallons of castor oil at $4.25. Have you got that down?"

"Yes."

"Sure you've got it all down?"

"Sure, I have," said Burton.

"H—m! How does it all taste?"—Chicago Journal.

A Good Trick.

The parrot's determination to speak his set phrases under all sorts of circumstances often produces strange situations. The story is told of a sleight of hand performer who kept a parrot that he had trained to say, whenever one of his master's tricks had been finished: "That's a good trick! What's the next one?"

One day the juggler, being in a seaport town, gave his performance in a loft on one of the wharfs, which happened to be just over the place where a large quantity of powder was stored in kegs. The juggler was about to perform some feat which required the lighting of a candle. He lighted it and threw the match away without making sure that the blaze had gone out. The match, still burning, fell through a crack in the floor, and dropped into one of the kegs of powder, which exploded with great force, throwing the building into the air.

The parrot, who was blown up with the rest, did not stop until it reached the pinnacle of the topmast of a great ship which lay off the wharf. There he clung desperately, and looking down to the world below he called out in a shrill voice:

"That's a good trick! What's the next one?"—San Francisco Examiner.

Clearly Proved.

Mrs. Bolivar heaved a deep sigh.

"Before we were married," she said, "you promised me that my slightest wish would be your law."

"Did I?" said Mr. Bolivar, in a tone of surprise.

"You said," continued Mrs. Bolivar, "that you would give up the club and not play poker any more."

"Did I, really?"

"You swore that you would give me whatever I wanted and that I might go to the seashore every summer and stay as long as I liked."

"Is it possible?"

"Yes. And you said that you would never take another drink and never flirt the least little bit, and now you do all these things and have not kept a single promise. It proves conclusively to me that you never loved me."

"I beg to differ from you there, my dear," said Mr. Bolivar oratorically. "Your premise is all wrong. Your reasoning is woefully at fault. Your statements prove conclusively that I did love you. In fact, I must have adored you madly if I told such whopping lies to get you."

And with this vindication Mr. Bolivar considered the argument at an end.—Kansas City Independent.

Uses of the Music Roll.

Enter girl with that subtle air of refinement which belongs only to such as earn their living and are ashamed of it.

"I wish to look at music rolls," she says.

Smiles the clerk affably.

"Here is something very fine," he says. "We guarantee that butter won't soak through it so as to show on the outside."

Yes, the habit of eating certainly does get people into awkward situations now and then.—Detroit Journal.

His Only Chance.

"Do you know that you talk in your sleep, Henry?" asked Mrs. Peck.

"Well, do you begrudge me those few words also?" he snapped back.—Philadelphia North American.

OFFICIAL.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northeast quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be receive' at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased.
P. H. MACK, Attorney for Administrator.
Dated August 23d, 1899.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, state of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant.

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, state of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899. D. J. HESSION, Clerk.
[SEAL] By C. N. ROSE, Deputy Clerk.
P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

IN the Matter of the Estate of CARMEN C. G. CARRASCO, Deceased.

Notice for publication of Time Appointed for Probate of Will.

NOTICE is hereby given, that SATURDAY, the Twenty-sixth day of August, 1899, at 10 o'clock a. m. of said day, and the Court Room—Probate—of said Court, at the town of Independence, in the County of Inyo, State of California, have been appointed as the time and place for proving the will of said Carmen C. G. Carrasco, deceased, and for hearing the application of Refilos S. Carrasco for the issuance to him of Letters Testamentary thereon.

D. J. HESSION, Clerk.
P. H. MACK, Attorney for Petitioner.
Dated August 8th, 1899.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

TUESDAY, Sept. 5, 1899.

Annie Hutchings vs. W. B. Hutchings—Decree of divorce granted plaintiff.

Estate and guardianship of Maggie P. Campbell—Hearing of account continued for a week.

THURSDAY, Sept. 7, 1899.

Archie E. Fitzgerald vs. Rose Fitzgerald—Decree of divorce granted plaintiff.

Methodist Church.

During the absence of the Pastor at Conference there will be no preaching services at either of the Independence circuit appointments. Independence Sunday-school will meet at the usual hour on Sunday afternoons.

Due notice will be given of the resumption of services.

JOHN J. PARDEE, Pastor.

DIED.

ROSE—At Independence, Cal., September 5, 1899, James Norman Rose, a native of New York, aged 63 years.

George Montgomery will arrive here on to-day's train.

J. R. Moffett arrived home Wednesday from a camping trip to Monache.

Robert O'Neal Esq. of Bishop has been in town for the past several days.

Mrs. Louis Schalten of Big Pine was a visitor in town early in the week.

Mr. and Mrs. W. B. Hutchings of Bishop spent several days in town this week.

S. E. Vermilyea Esq. came down from Bishop last Monday, returning next day.

Will Sanger came in from Saline Valley yesterday and returned home to Alvord.

Archie Fitzgerald came down from Bishop on Wednesday, returning next day.

Johnny Dunlap was down from Bishop last Tuesday on business in the Land Office.

Miss Muth Rasmussen left on yesterday morning's train for her former home in Denmark.

R. W. Troeger who is connected with the Lane mine at Darwin spent several days in town this week.

A hunting party consisting of Jim Sutherland, Charley Doty and Tom Key left for Monache last Monday.

The quail season does not open until October 1st, so don't be in a hurry. The close season on deer begins October 15th.

Henry Rhine arrived here from San Francisco last Monday evening and will remain in the Valley a couple of weeks.

Dr. L. W. Allingham arrived here yesterday by private conveyance from Mojave. He expects to locate here and practice his profession.

Barnes & Anderson went back to their mine last Monday and are getting another shipment of ore ready for milling. It is already on the dump and only needs sacking.

Bertrand Rhine has accepted the sale of foreign exchange and will draw direct on any country, no matter how remote, in sums to suit the purchaser. This will be a great convenience to persons desiring to send money direct to friends and relatives in foreign countries.

A deal has been consummated in Los Angeles the past week by which the Anthony group of mines in the Panamint country will pass into the hands of new owners and it is the purpose of the latter to begin active work at once on the property. It is said that the price Mr. Anthony received for the property is $45,000 —*Mining Review*.

N. E. Conklin and family arrived here Wednesday from Monache, where they have been spending the summer. All are well and hearty and the outing has evidently been of great benefit to them. Mrs. Conklin and the children will go to Bishop in the morning. Mr. Conklin says his cattle have done very well this summer and he expects to winter them here.

In the Hutchings divorce case an agreement was reached between the parties by which what is known as the homestead, or home place, becomes the property of Mrs. Hutchings upon the youngest child reaching majority. In the mean time she is to have exclusive control of the place but is enjoined from selling, mortgaging, or in any manner alienating her interest in it until that time.

Cutting Time and the Feeding Value of Alfalfa.

For the past five years the Utah Experiment Station has been carrying on a line of investigation to determine at just what time in its growth alfalfa should be cut for best results—composition, annual yield per acre and feeding value all being taken into account. In connection with this work the feeding value of such well-known roughage crops as timothy hay, corn fodder and red clover has been compared with that of alfalfa. For this experiment a field of alfalfa was divided into three equal parts, one being regularly cut when the bloom first appeared, the second when in full bloom and the third when half the blossoms had fallen —These being denominated early, medium and late cuttings respectively. Incidentally there was made a comparison of the first, second and third crops. The details of this investigation are reported in bulletin No. 61 of the Utah Station, a copy of which may be obtained by addressing the director at Logan. Below are given the more important facts, together with the conclusions which may be legitimately drawn from the results:

1. The largest annual yield of hay per acre is obtained by the method of early cutting and the lowest by the late, the average result standing as follows: Early cutting, 100, medium 92 and late 85

2. The early cut alfalfa contains the highest percent of protein and fat, the most valuable food constituents, and the lowest percent of crude fibre—the most indigestible portion. The former decrease constantly while the latter increases rapidly from early bloom to the full maturity of the plant.

The proportionate amount of leaves to stems is greater at early bloom than at any subsequent time, and both leaves and stems contain a greater percent of protein and a less percent of crude fiber at this time than at any later period in the growth of the plant. The relative proportion of the leaves to the stems in the different cuttings is as follows: Early, 42 to 58, medium 40 to 60, late 33 to 67

4. Alfalfa leaves as compared with stems are very much richer in protein, fat, and nitrogen free extract, and they contain a much smaller proportion of crude fiber. The percent of protein and fat grows constantly less and that of the crude fiber greater from the time of early bloom to maturity. The average composition of all cuttings and crops shows the leaves to contain 150 percent more protein than the stems, 300 percent more fat 35 percent more nitrogen free extract and 256 percent less crude fiber.

5. The more important nutrients—protein and fat—have the highest percent of digestibility in the early cuttings, and it grows less and less with the age of the plant.

6. In the feeding tests the highest gains were made from the early cuttings and the lowest from the late, the results standing as follows: Early cutting 100, medium 85 and late 75.

7. The variation in the amount of the different cuttings eaten per day was very slight, being the highest for the early cuttings and the lowest for the late, but the quantity of dry matter and also of digestible matter required for a pound of gain was decidedly lowest for the early cutting and highest for the late, the relative amounts of dry matter standing as follows: Early cutting 100, medium 131 and late 166.

8. The annual beef product per acre was largest from the early cuttings, not only in the general average, but in each separate season's test, and that from the late cuttings the smallest, the proportional products standing as follows: Early cutting 100, medium 79½, late 62½.

9. Taking all points of comparison into consideration, both separately and collectively, including everything that pertains to the largest yield and highest feeding value, the tests favor cutting alfalfa when the first blooms appear.

10. The first crop gave the largest yield in each of the five test and in fourteen out of the fifteen cuttings, while the third crop gave the lowest for every test and every cutting but one. The average acre yields for the five years, including all cuttings, stand in the following relation: First crop 100, second 78 and third 36; for the early cuttings alone, first crop 100, second 85 and third 66.

11. In the average composition of all cuttings for three years the nutrients of the three crops vary but little. The second has slightly the highest percent of protein and fiber and the third the most fat and nitrogen free extract.

12. The third crop has the largest proportion of leaves to stems; but the percent of protein in the leaves is highest in the second crop and next highest in the first. The leaves of the first crop contain the most fat and of the second the least.

13. The third crop produced a higher average rate of gain in the feeding tests than the first or second and also higher than any of the separate cuttings. The amount eaten daily was also highest of all, but the dry matter and digestible matter for a pound of gain were the lowest. In a pound per pound comparison the gain stands as follows: First crop 100, second 81, third 126; dry matter for a pound of gain, first crop 100, second 115 and third 169.

14. The beef product per acre, taking the average result of all cuttings for the five years, was very much the highest for the first crop, and decidedly the lowest for the third, standing as follows: First crop 100, second 61 and third 45; but taking the early cuttings alone, they stand, first crop, 100, second 80 and third 69.

15. Pound per pound, taken as a whole, the results show the highest feeding value for the third crop and the lowest for the second.

16. The average annual beef product from early cut alfalfa was 705 61 pounds per acre. It required 9575 pounds of timothy to produce an equal weight, 11,967 pounds of red clover and 10,083 pounds of shredded corn fodder.

Obituary.

One by one the grim Reaper is gathering the pioneers into his fold. The last one called was James Norman Rose, who died on Tuesday last and whose remains were followed to their last resting place at the Odd Fellows and Masonic cemetery by a large number of mourning friends. The deceased came to California with the Argonauts and settled in this county among the very earliest in 1864. For many years he owned and farmed what is now known as the Baxter place, but he possessed too much of the venturesome spirit of the early gold seekers and unfortunate speculations swallowed up his property. He possessed a kindly genial nature, and while he never sought a quarrel he never allowed himself to be imposed upon. He had been ill for more than a year, and for months past it was known that he could not recover. He possessed naturally an iron constitution and struggled gamely with death to the end. A married daughter resides in Washington and three sons and a daughter here. All were with him and ministered to his last last moments with loving care. The sympathy of the community is with the bereaved ones.

Real Estate Transfers.

The following deeds have been recorded since August 31, 1899:

S. E. Densmore to E. E. Densmore—August 25, 1899, Lot 1, Block 10, town of Independence, $100.

H. W. Barton to Frederick Conn—August 28, 1899, 80 acres borax land in Saline Valley, $167.

Chas. A. Weaver to T. H. Henebry—August 27, 1899, ½ int in 3-stamp quartz mill in Jail Canyon, $1,500

T. H. Henebry et al to Chas. H. Weaver—August 24 1899, und ½ int in Gem and other claims, Jail Canyon, $1,500.

John E. Curran to E. E. Shuey—August 24, 1899, und ½ int in Gem and other claims, Jail Canyon, $500.

The following are the directions given by the Santa Clara County Fruit Exchange for curing prunes: Let them get perfectly ripe; at first and second pickings do not touch the trees; at later pickings the tree may be jarred by the hand, but never shaken; cut the skin slightly with the lye, but do not destroy it, if the skin is badly injured by the lye the fruit will not sell as first grade; cure the prunes thoroughly; to test, squeeze a handfull in the hand; if on opening the hand the prunes fall apart they are cured, if they stick together they are not.

Where a party relocates an abandoned claim the fixtures and improvements, not removed by the original locator, become the property of the new tenant, to whom the law gives exclusive possession of the ground, and the former locator, having forfeited his right, has no business upon the premises and therefore can remove nothing from it. All decisions in similar cases have been rendered in this direction.—*Scientific Press.*

NEW ADVERTISEMENTS.

FOREIGN EXCHANGE.

I am now prepared to perfect direct Foreign Exchange in all parts of the world in sums to suit. Inquire for rates etc. of BERTRAND RHINE, At the Postoffice.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Ben. H. Yandell, Attorney for Plaintiff.

The people of the State of California send greeting to Susie Troeger, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 5th day of September, A. D. 1899.

D. J. HESSION, Clerk.

[SEAL] By ..... Clerk.

Ben. H. Yandell, Independence, Cal. attorney for plaintiff.

NOTICE TO CREDITORS.

Estate of Carmen G. C. Carrasco, deceased.

Notice is hereby given by the undersigned, Executor of the estate of Carmen G. C. Carrasco deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said executor at the law office of P. H. Mack, in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

RELLES S. CARRASCO.

Executor of the estate of Carmen G. C. Carrasco, deceased.

P. H. MACK, attorney for Executor.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schen, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the state of California send Greeting to Gilbert J. Roote, W. C. Fitz-Simmons and William H. Patterson, Defendants:

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 12th day of August, A. D. 1899.

D. J. HESSION, Clerk

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als, Plaintiffs, vs. Gilbert J. Roote et als, Defendants. Summons. P. W. Forbes and P. H. MACK, Independence, California, Attorneys for Plaintiffs.

Notice of Forfeiture.

TO CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

NO REMEDY EQUALS PERUNA, SO THE WOMEN ALL SAY.

Miss Susan Wymar.

Miss Susan Wymar, teacher in the Richmond school, Chicago, Ill., writes the following letter to Dr. Hartman regarding Pe-ru-na. She says: "Only those who have suffered as I have, can know what a blessing it is to be able to find relief in Pe-ru-na. This has been my experience. A friend in need is a friend indeed, and every bottle of Pe-ru-na I ever bought proved a good friend to me"—Susan Wymar.

Mrs. Margaretha Dauben, 1214 North Superior St., Racine City, Wis., writes: "I feel so well and good and happy now that pen cannot describe it. Pe-ru-na is everything to me. I have taken several bottles of Pe-ru-na for female complaint. I am in the change of life and it does me good." Pe-ru-na has no equal in all of the irregularities and emergencies peculiar to women caused by pelvic catarrh.

Address Dr. Hartman, Columbus, O., for a free book for women only.

Remember that cholera morbus, cholera infantum, summer complaint, bilious colic, diarrhœa and dysentery are each and all catarrh of the bowels. Catarrh is the only correct name for these affections. Pe-ru-na is an absolute specific for these ailments, which are so common in summer. Dr. Hartman, in a practice of over forty years, never lost a single case of cholera infantum, dysentery, diarrhœa, or cholera morbus, and his only remedy was Pe-ru-na. Those desiring further particulars should send for a free copy of "Summer Catarrh." Address Dr. Hartman, Columbus, O.

The Clever Spider.

"One of my friends was accustomed to grant shelter to a number of garden spiders under a vacant varanda and to watch their habits. One day a sharp storm broke out, and the wind raged so furiously through the garden that the spiders suffered damage from it, although sheltered by the veranda. The mainyards of one of these webs, as the sailors would call them, were broken so that the web was blown hither and thither, like a slack sail in a storm.

"The spider made no fresh threads, but tried to help itself in another way. It let itself down to the ground by a thread and crawled to a place where lay some splintered pieces of a wooden fence, thrown down by the storm. It fastened a thread to one of the bits of wood, turned back with it and hung it with a strong thread to the lower part of its nest, about five feet from the ground. The performance was a wonderful one, for the weight of the wood sufficed to keep the nest tolerably firm, while it was yet light enough to yield to the wind and so prevent further injury. The piece of wood was about 2½ inches long and as thick as a goose quill.

"On the following day a careless servant knocked her head against the wood, and it fell down. But in the course of a few hours the spider mended her web, broke the supporting thread in two and let the wood fall to the ground."—Our Animal Friends.

Dublin Bootblacks, 1780.

Among the populace of Dublin in 1780, says the University Magazine, the shoeblacks were a numerous and formidable body. The polish they used was lampblack and eggs, for which they purchased all that were rotten in the markets. Their implements consisted of a three legged stool, a basket containing a blunt knife, called a spudd, a painter's brush and an old wig. A gentleman usually went out in the morning with dirty boots or shoes, sure to find a shoeblack sitting on his stool at the corner of the street. The gentleman put his foot in the lap of the shoeblack without ceremony, and the artist scraped it with his spudd, wiped it with his wig and then laid on his composition as thick as black paint with his painter's brush.

The stuff dried with a rich polish, requiring no friction and little inferior to the elaborated modern fluids, save only the intolerable odors exhaled from eggs in a high state of putridity and which filled any house which was entered before the composition was quite dry and sometimes even tainted the air of fashionable drawing rooms. Polishing shoes, we should mention, was at this time a refinement almost confined to cities, people in the country being generally satisfied with grease.

The Barber Was All Right.

"After being shaved in a Chicago hotel barber shop," said the man from South Bend, "I walked out and down the street and entered another shop and took a chair. The barber lathered and scraped me without a word, and 15 minutes later I submitted myself to a third. He lathered and rubbed as if I had not been shaved for a month, and just as he took up the razor I asked:

"'Didn't you notice that I had been shaved twice already this morning?

"'Yes, sir,' he replied.

"'But you are going to shave me again?'

"'No, sir. I supposed you came in here to get the skin taken off and part with some of your cheek!'"—Pittsburg Dispatch.

The Worst Ever.

Burgling Bill—Is he lazy? Why, honestly, if dat feller wuz goin ter commit murder, he'd do it in New York state so's he could sit down when he died.—Kansas City Independent.

FOOD OF A LIFETIME.

EDIBLES REQUIRED BY A MAN MAKE GREAT BULK.

In Seventy Years of Life He Eats a Herd of Cattle, and Drinks More than Would Fill the Heidelberg Tun—Interesting Comparisons.

A prominent scientist of a mathematical turn, having a little spare time on his hands, devoted some of it recently to computing the bulk of food he has consumed in the seventy years of his life. The resulting figures are surprising, and in the comparative details of his report the average man who eats and drinks will find much to interest him. The scientist says, in summing up, that if all the bread he has eaten could be duplicated and gathered together it would weigh fourteen tons. He has feasted on a good-sized herd of oxen, sheep and pigs, which, if represented in one animal of each of the kinds mentioned, would make the prehistoric mammoths look like babies in comparison. "If all the milk, tea, coffee, beer, wine, liquor and and water I have used or wasted in those years," he continues, "had been stored in a vessel of sufficient capacity its size would make the famous Heidelberg tun look like 30 cents. Being an ordinary man, without special likes and dislikes in the matter of food, bread was the staff of life with me, as it is with most men and women."

What a Giant Potato!

He reckons that he daily ate one and one-half pounds of bread, biscuit, cakes and crackers during sixty out of his seventy years of life, adding that as a boy under 10 years he probably consumed about half that quantity. This makes in seventy years 280,000 to 300,000 pounds of bread, etc., a quantity equal to 441 cubic yards. "A man eats on the average three potatoes a day, weighing in the neighborhood of one quarter of a pound," continues this authority. "That isn't much per week and per year, perhaps, but amounts up in sixty or seventy years. Imagine twenty-one potatoes piled up week after week for seventy years, making due alowance for a lesser consumption during the first ten years. The giant potato evolved would fill two flat railway cars of the longest kind, and 100 men would be unable to move it. Carrots and turnips, though healthful vegetables, are not eaten in great quantities, yet if those consumed by the 70-year-old man in life were formed into one a big donkey would look insignificant beside it. The rest of the vegetables he consumed would fill twelve farmers' big wagons."

The Baby and the Ox.

One of the illustrations printed herewith, showing an ox and a baby, gives the comparative size of the ox needed to supply all the beef he got away with in sixty years. The proportions are drawn accurately; the baby weighs twenty pounds, the ox 360,000 pounds. Most people eat fish of various kinds, besides meat and vegetables. Figuring one-half pound of fish as the average daily consumption, the total amount consumed by a man, if he lives to a ripe old age like our friend, the mathematician, is 10,900 pounds. The calculator asserts that he has eaten 10,000 eggs. Americans are great sugar eaters. The statistician quoted confesses to having eaten 6,0000 pounds of sugar since his birth. To offset the sugar, a person eats twenty-five pounds of salt per year, or about 1,600 pounds in a lifetime of seventy years. Assuming that the average weight of a man is 160 pounds, ten men's forms could be made out of the salt the septuagenarian has consumed so far. Of butter he consumes a ton, adding 250 to 300 pounds of cheese to aid digestion. The average man, he says, will eat apples in quantities to aggregate in size one big apple measuring fifteen to sixteen feet in circumference; the giant orange made up of the oranges he eats in a lifetime would measure at least ten feet in circumference, the pear five feet.

As to Consumption of Tobacco.

Man consumes five and a half pounds of solids a day, namely: One and a half pounds of breadstuffs, one pound of meat, half a pound of fish, two pounds of vegetables and fruit and half a pound of various other foods. That means nearly a ton a year, or fifty-four tons in sixty years. A man drinks at least a half pint of tea or coffee for breakfast, lunch, dinner or supper, and between times he has a full pint of something weak or strong, or both. This makes 550 pints, or sixty-nine gallons, per annum, equal to 4,380 gallons in seventy years. All in all, a man consumes 198,000 pounds of food and drink in seventy years, if his appetite is good. That equals 1,280 times his own weight, assuming that he weighs not less than 150 pounds.

Man must have his cigar, his pipe, his cigarette, or all three of them. Our mathematician says he began smoking in his twentieth year, and that he averaged one dozen of cigarettes a day. Up to the present time he has smoked 219,000 cigarettes, which in the aggregate would fill a wrapper sixteen feet long and eighteen inches thick. He smoked also six cigars a day, which, made up in one wrapper, would weigh about two tons and measure sixteen feet three inches, and two feet thick. "I never used to smoke more than an ounce of tobacco a day," he adds. A little figuring will show that the insignificant ounce a day means 1,150 pounds of tobacco in fifty years.

THE FOOD REQUIRED IN A LIFETIME.

TO CURE CONSUMPTION.

A Parisian Doctor Who Claims a Mastery Over the Dread Disease.

It will be an incalculable boon to consumptives if the claims of Dr. Francisque Crotte, an eminent chemist of Paris, who is now in this country, become realized in the measure he predicts for them. He claims to have discovered a cure for consumption, and further points to an experience with the disease in Paris, where he is said to have permanently cured 3,000 cases within five years. Dr. Crotte's treatment consists in inhalation of antiseptics, which are forced through the tissues by an especially designed machine to the seat of the disease, and which successfully kill the microbe of tuberculosis. Dr. Crotte proposes to establish clinics in this country and take up the work actively, engaging to cure 100 per cent. of the patients in the first stage of the disease, 75 per cent. of those in the second stage, and 30 per cent. of the cases which are called as hopeless, in the third stage. All he asks is for the patient to have enough pulmonary substance to live and breathe. The period of treatment for children in the first stage is from fifteen to thirty days, of adults in the same stage from thirty to ninety days. The period in the second stage is from sixty to ninety days, and for children and adults in the last stage a much longer time is required.

DR. FRANCISQUE CROTTE.

Speaking of tuberculosis, Dr. Crotte says that 50 per cent. of the people of the United States are afflicted in some form. Seventy-five per cent. of the people of England are similarly affected, and from 30 to 40 per cent. of the people of all Europe. Poorly cooked meat and milk are prolific sources of contagion. Horses are the most dangerous of all animals as a source of contagion, and their flesh, the doctor says, should not be eaten at all.

Censorship in Turkey.

Turkish papers were not allowed to print the news of the assassination of the Austrian Empress. They simply announced that she had died.

There are numerous cures for rheumatism, and it usually lingers long enough to give the victim a chance to try them all.

All men are born equal, but it doesn't take some men long to outgrow it.

Get What You Ask For

Always buy CASCARETS Candy Cathartic. They are guaranteed and positively unequaled. Accept no other. Imitations and substitutes are often offered by dealers who "cut prices" and hand out a cheap fake when Cascarets are called for. Satisfaction is bought only with Cascarets. If you can't get the only genuine Cascarets from your dealer, write us, we will mail them postpaid on receipt of price in stamps.

DRUGGISTS

CASCARETS are absolutely harmless, a purely vegetable compound. No mercurial or other mineral pill-poison in Cascarets. Cascarets promptly, effectively and permanently cure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhœa and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Write for booklet and free sample. Address STERLING REMEDY CO., CHICAGO or NEW YORK. 308

Would Go With Mamma.

Little Girl (to visitor)—My papa's a good man. He'll go to heaven, won't he?

Visitor—Oh, yes, indeed! And are you going to heaven too?

Little Girl—Oh, no! I'm going with mamma!—Pittsburg Chronicle Telegraph.

Rich Yet Starving.

Doctors frequently have very wealthy patients who are starving. They have money to buy food, but their stomach has not the strength to digest it. It lies there a heavy, fermented mass, the sole cause of dyspepsia, nervousness and biliousness. The surest remedy to cure a weak stomach is Hostetter's Stomach Bitters.

If all the men who started out to study for the ministry had succeeded, what a plenty there would be.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder to be shaken into the shoes. It makes tight or new shoes feel easy; gives instant relief to corns and bunions. It's the greatest comfort discovery of the age. Cures swollen feet, blisters and callous spots. Allen's Foot-Ease is a certain cure for ingrowing nails, sweating, smarting, hot, aching feet. We have 30,000 testimonials. All druggists and shoe stores sell it. 25c. Trial package FREE by mail. Address, Allen S. Olmsted, Le Roy, N.Y.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Beware of Ointments for Catarrh that Contain Mercury.

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used, except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c per bottle.
Hall's Family Pills are the best.

Vaccinated the Rifles.

Orders that were issued by the German West African officials that all firearms in the hands of natives should be stamped and registered aroused much discontent. Lieutenant Eggers, in Damaraland, however, got along with no trouble. He had inoculated cattle for the rinderpest three years before, as the Damaras saw, with good results. He therefore announced that he was ready to vaccinate their rifles so as to insure their shooting straight and doing no hurt to their owners and the Damaras crowded to him to get their guns stamped.

His Share.

Judge—Was the stolen article gold or only gilt?

Prisoner—It was silver, sor. The guilt was all me own, yer anner!—Jewelers' Weekly.

Epileptic FITS Can Be Cured.

If you suffer from Epilepsy, Fits, Spasms, Spells, Falling Sickness, St Vitus's Dance, &c., have children, relatives, friends or neighbors that do so, or know people that are afflicted, my New Discovery, Epilepticide, will give immediate relief and PERMANENTLY CURE them, and all you are asked to do is to send for a FREE Bottle and try it. Dirt For the Dirty Ones.

"In several of the provincial towns," writes Mr. Ransome, "one finds hotels said to be conducted on the foreign principle and certain Japanese hotels have a foreign side. The European accommodation in such places is, as a rule, terrible. The rooms are dirty, the beds are rickety, the bedclothes are apparently seldom washed and the tables and chairs are seldom capable of standing on more than two legs at a time.

"When I first went to Japan I could not understand how, on the foreign side of the Japanese hotels, the accommodations could be so inferior, when the Japanese portion was kept scrupulously clean. One would naturally think that a people whose houses were so spotless would revolt at having a portion of their premises in a filthy condition.

"But, as explained to me by the landlord of one of these hybrid establishments: 'Foreigners are dirty by nature. They go about their houses in their boots, and consequently they cannot wish to have their rooms kept in proper condition.'"—Literature.

HOITT'S SCHOOL.

But such are not the only uneasy heads. Overworked, harrassed, anxious people of all ages and both sexes are uneasy with aches, pains, impure blood, disordered stomachs, deranged kidneys and liver. For all such, Hood's Sarsaparilla is the effective and faultless cure. It infuses fresh life through purified blood.

Hood's Sarsaparilla
Never Disappoints

"Eaten a Mountain."

A good example of the caustic humor of a Scotch examiner floats this way from we know not where. It seems that Scotch parish schoolmasters are, on their appointment, examined as to their literary qualifications. One of the fraternity being called by his examiner to translate Horace's ode beginning "Exegi monumentum oere perennius," began as follows: "Exegi monumentum." (I have eaten a mountain.) "Ah," said one of the examiners, "ye needna proceed any further; for after eaten' sic a dinner this parish wad be a puir mouthful t' ye. Ye maun try some wider sphere."—"Poet Lore."

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form. . . . Sold by every druggist in the malarial sections of the United States. . . . . No cure, no pay. . . . Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

St. Louis, Mo., Feb, 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2660 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.

Please rush down order enclosed herewith, and oblige. Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.

KEDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, Tex., Sep. 13, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,
JAMES D. ROBERTS.

THE LAND OF SWEET SOMETIME.

Over the water we'll sail some day
To the land of Sweet Sometime
And we'll anchor there for a year and a day
In the ripples of gold on the lower bay
In the sunset's rays sublime!

It's over the river in Somedayville,
By the lake of Soon-to-Be,
And Later On is the mighty hill
That rises out of the laughing rill,
The river of Wait and See!

It's always summer—the whole year through
In beautiful sometime land,
There are happy skies that are deep and blue,
There are roses waiting to bloom for you
To blossom at your command!

So out to the breeze let us spread the sail
Till it beats in a merry rhyme,
And off we'll go in the moonlight pale,
Till we reach the land of the fairy tale,
The land of Swee, Sometime!
—Criterion.

Erla the Flower Girl.

"FLOWERS, 5 cents a bunch!" This cry came from the pale, tremulous lips of a maiden of 18 summers. It was on a crowded city street ,and the heat was so intense that people were longing to be once more in the seclusion of their homes.

"I will take ten bunches," said a polite voice in her ear. She turned with a start. Ten bunches! She had not sold a bunch to-day. With deft fingers she selected the freshest and best bunches, and with a look of gratitude handed him the flowers.

Erla Seymons was a lovely girl, who did all in her power to help her feeble mother. Some days she sold flowers.

As Harold Nelson and the young lady with him (who was his sister) went on their way Nena remarked: "What a beautiful girl! What a pity she has to sell flowers on the street!"

Harold in his heart echoed her words. This was not the first time he had seen Erla Seymons.

And Erla forgot to cry, "Flowers, 5 cents a bunch!" She was standing idle, her brown eyes fixed on vacancy, thinking of what or whom? Thinking, unconsciously, of the young man whom she thought so kind.

That night in the library of the elegant mansion of the Nelsons Nena remarked: "Harold and I saw such a lovely girl; he was just smitten, and on a flower girl, too."

"Nena, don't talk in riddles, but tell me about it," said her mother, gently.

Then Nena, in her light-hearted fashion, related their experience of the morning.

All through this recital the Hon. Frederick Nelson listened intently, but said nothing; he had also seen Erla, the flower girl, and remembered her.

The next day, as she was about to hail a car, his ear caught a sound of a voice saying: "Flowers, 5 cents a bunch."

"That is the girl," he muttered, "she is the picture of Nella."

Why is this man talking in this manner? We shall have to turn back and read the past pages of the history of the present Hon. Frederick Nelson.

Years ago at college, he had for a room mate a young man about his own age, named Leroy Seymons.

Leroy was a youth of steady habits and good character. They soon became fast friends and college chums. But now something happened to cause a drifting apart of the two. At an entertainment given by the students they both first met Nella Stanton. Unlucky day! Both met to love. One night in the secrecy of their room they agreed that each should do his best to win, and that neither should interfere with the other.

Nella favored Leroy and when he proposed was accepted. When Frederick was told by Leroy that he had been accepted the blow was hard, and nearly stunned him. Then, as painfully realized that Nella, whom he loved nigh unto madness, loved Leroy, his grief and rage knew no bounds.

He accused Leroy of treachery, saying he had not given him fair play. He ended by calling him a traitor to the holy bonds of friendship and saying he never wished to see his face again. Stunned by such treatment, Leroy uttered not a word, but, collecting his things, left the room.

From that day to this Frederick Nelson and Leroy Seymons had not looked into each other's faces. Shortly after Frederick read of the marriage of Leroy and Nella.

All this time Leroy and his young wife were living happily together in a distant city.

One year, two years, passed, and the couple were blessed with a beautiful little daughter, whom they named Erla.

She was the pride of their hearts; all their thoughts and plans were for her alone. One day a cruel blow fell upon the head of Nella. Leroy had been killed! O, the terrible anguish! But she would be brave for her baby girl's sake. After their money was gone Nella hired some cheap rooms and supported herself and Erla by her needle. And now she depended on her daughter for support, as her fragile health prevented her from even this means of support. Meanwhile Frederick had married a refined girl named Lottie Ashley, whom after the first grief and disappointment passed away, he loved. His one desire now was to see his old friend and ask his forgiveness. Instead of boarding the car he retraced his steps and walked to where Erla was standing.

"I will take the whole basket," he said in a business-like tone. Erla could have fallen at his feet for gratitude. She had sold only two bunches all this morning and now to sell the whole basket, and mamma so much needed some little luxury, and now she would have it. Happy tears filled her lustrous eyes, and she said in a tremulous voice: "O, sir, you are so kind!"

Not yet sure as to the correctness of the deal which had taken such possession of him, he asked in a low voice, in which the eagerness was hidden: "What is your name?" "My name is Erla Seymons, sir." This was the chance he had coveted; it was his time. "Erla Seymons!" he ejaculated in a well-feigned surprise; "I used to know a man by the name of Leroy Seymons."

"That was my dear father," replied Erla in a choking voice.

"Where is he now?" he asked in excitement which he could not suppress.

"He is dead, sir." This was, indeed, hard when he thought himself so near his desire.

"And your mother?" he asked, with hesitation.

"She is feeble."

* * * * * * *

Two years have passed. Mrs. Seymons has regained her health and is living comfortably (thanks to her friend, Frederick Nelson). Erla is a lovely, talented maiden of 20.

There is soon to be a grand wedding. The happy couple are Harold Nelson and Erla Seymons.—Boston Post.

STALKING A PEACOCK.

Brilliant Birds Are Fascinated by Leopards and Tigers.

"The gods made nine gems, but only one peacock," says a proverb of India, the native and ancient home of the beautiful bird. The proverb, however, is not strictly in keeping with facts. There are two peacocks—the bird of India and Ceylon, and a second species, the peacock of the Far East, of Java, Burmah and Siam. It is a legend of the Indian jungles that leopards and tigers can fascinate peacocks, and a writer in the London Spectator refers to the experience of Colonel Tytler to show how strong is the faith of the natives in the story.

Colonel Tytler, while stalking a peacock, was surprised to see how near it allowed him to approach. The bird paid no attention to him, but was gazing intently, as if fascinated, at a little patch of jungle just in front.

Looking in the same direction, he saw a leopard stealing on its belly toward the bird. He was surprised, but his astonishment was greater when, on raising his gun, one barrel of which was loaded with ball, and covering the animal, the leopard threw up its paws, and shrieked in a voice hoarse with terror, "No, Sahib, no, don't fire!"

Colonel Tytler for a moment thought he must be going mad. The next moment he saw a man disguised in a leopard skin, with a well stuffed head and a bow and arrow in one paw, standing before him. The man so dressed was a professional fowler, who said that in that disguise he could always approach near enough to shoot the birds, and sometimes catch them in his hand.

Unmistakable.

A disagreeable truth may be conveyed in a diplomatic manner by the exercise of a little skill. A young man called one afternoon at the parental dwelling of a young lady upon whom he had called several times before, and who was beginning to grow slightly weary of his attentions.

On one occasion it happened she was not at home, and he merely left his card and went away.

He had not walked many blocks when he met her on the sidewalk, returning home, and the following conversation took place:

"Ah, Miss Thompson, how do you do?"

"Quite well, I thank you, Mr. Johnson. Beautiful day, isn't it?"

"It is, indeed. By the way, Miss Thompson, I have just come from your house. I called to see you."

"Did you?" she said. "It is too bad I am not at home."

The significance of the "am" did not escape the young man. After a commonplace remark or two he bade her good day and passed on—and he never called again.

Sawdust.

Sawdust, in spite of the various uses to which it has been put in the arts and industries, still continues to a great extent to be a waste product. It has recently been found, however, that not only the sawdust but all the refuse of sawmills may be advantageously utilized in the manufacture of calcium carbide. For this purpose the dust, scraps, slabs, et cetera, are carbonized by a rapid and simple process, and in this condition furnish a charcoal especially valuable in this direction. The charcoal is run through an apparatus for reducing it to a fine powder, and this latter is mixed with an equal quantity of thick lime, and the mixture submitted for ten hours to an electrical current of intensity sufficient to melt iron. The production of the carbide commences at once, and in the stated time is complete, the resultant material being in masses convenient to go at once into commerce.

City Boy's Idea.

A Gallatin County farmer hired a boy from the city to assist him through the summer. The farmer told the kid to go out to the barn lot and salt the calf. The kid took a quart of salt and industriously rubbed it into the calf's hide. The colts got after the calf for the salt and had about all the hair licked off the animal before its condition was discovered.—Montgomery, Ill., News.

Quaker City Street Car Lines.

Street railway companies in Philadelphia pay the city nearly $70,000 for car licenses.

Some medicine is so disagreeable that one can't even forget to take it.

STILL TELLS TIME.

INDIANA SUN DIAL ERECTED 78 YEARS AGO.

Only Town Clock of the Kind in the Mississippi Valley How the Standard Time of To-day Came to Be Adopted.

New Harmony, Ind., is probably the one town in the Mississippi valley that has a sun dial town clock. It is probably the oldest and most reliable timepiece in the country. It has been turning off the minutes and hours and days since 1821 without over 50 cents' repair. It never runs down, never goes on a strike and as long as the sun does business it is reliable. To-day it is something more than a timepiece—it is a curiosity. It is historical—probably having an edge over any other timepiece in Indiana in this respect. New Harmony was a colony settlement. The building on which the dial is placed was built by the colonists and was used by them as a barracks. It was erected in 1814. There were no railroads in those days and as everything was local there was no need of anything but sun time. The whole world ran on the same schedule then. For several years the colony operated by a number of sun dials and hour glasses, but this became unsatisfactory and at last George Rapp, the leader, conceived the idea of having a town clock.

First of Its Kind.

He was probably the first to endow any Indiana town with such an adjunct. He went to the forest and cut the solidest black walnut tree he could find. He finished it down to six-foot lengths and made a facing 6x4 feet. A strip was nailed across the top to throw off the rain. He then had the colony blacksmith turn out a piece of steel

THE SUN DIAL TOWER CLOCK.
[The picture as shown by the marking between wires was taken at 2:20 p. m.]

wire. The date of the construction—1821—was printed across the top in letters of fire—in other words, burned in, as were also the hours. At the top and in the center is the figure of the sun—a thing of glory, with a man's smiling face and rays jutting from all sides. From the nose of the sun the steel wire was run, coming to a point and then fastening directly below the sun. The sun was then put to work and the hour markings were defined. Of course, the 12 noon hour was where the wire ended at the botom of the board. On the east side—from the top—the hours ran down in the following order: 6, 7, 8, 9, 10. Eleven was on the bottom of the board, between 10 in the corner and 12 in the center. On the west side of the dial, running down the side, were placed 6, 5, 4, 3, 2, and 1 was on the lower edge, occupying a position on the west which 11 did on the east. It will be seen that there were two sixes. It was the begining and ending of the day. Other markings until the sun went down could be reckoned on the wall very readily.

Though the storms of seventy-eight years have beat against the dial, it has not begun to show the wear. The figures are as distinct as though they were placed there yesterday. The colony passed, another one took its place and passed and New Harmony became an ordinary town. Generations have passed and babies have grown old and died, but still the old clock knocks off the hours just as reliably as it did in 1821, when it was put into place. The old building is now occupied by a merchant who has shown good business judgment by utilizing the surounding space on the walls by signs setting forth his line of wares.

Sundials are curiosities now. Probably less than one person under 35 years out of every 1,000 population ever saw one. Still it has been but a short time since the sun dial regulated affairs, and though watches were used they took their time from the dial. Up to 1869 there was no uniform time. In that year Professor Charles F. Dowd first took active measures for establishing a standard time. He sought the railroad managers as the persons best adapted to bring such a plan into general service. In that year in this country alone there were about seventy-five different standards—all of them on the sun basis.

Adoption of Standard Time.

From his work and energies evolved what is now known as standard time—and which also has the sun dial as its basis. Four meridians, each one hour apart—sun time—were chosen as standard meridians. They are the seventy-fifth, which passes near Philadelphia; the ninetieth, passing near New Orleans and St. Louis; the one hundred and fifth, passing near Denver and the one hundred and twentieth, near Virginia City. By the division thus adopted the space between them readily became divided into minutes and they into seconds, so that after all the world is thus transformed into one great sun dial of imaginary lines not only tracing the minutes, but even the smaller divisions. Theoretically it was intended that each meridian should govern the belt seven and a half degrees on each side of it, but there has been a slight variation from this. The local time of those places at the edge of the belt will differ from the standard time by half an hour. The details of the system were worked up by W. F. Allen, secretary of the railway time convention. It was not until 1883 that the railways took hold in earnest. In that year 90 per cent of them adopted standard time, and now the United States and the commercial world operates on that plan. The time of the seventy-fifth meridian is called eastern time, that of the ninetieth called central and that of the one hundred and fifth mountain and the one hundred and twentieth Pacific. The adoption of standard time made New York's time four minutes slower than previously. At the conference of the International Geodetic association held in Rome in 1883 the question of cosmopolitan time was first discussed.

Widow's Sweet Revenge.

A story that people are laughing about concerns a young state department man. He is a self-made man, and there is nothing about him to disturb in the slightest degree one's conviction that gentlemen are born, not made. Of late he has been markedly attentive to a lovely young widow. The widow's well-bred discouragement of his addresses has been wholly lost on him, and recently hearing from an acquaintance that she was to celebrate her birthday at such a time, he had the impertinence to send her an expensive present of an exceedingly impertinent kind. It, or rather they, were in a satin box and their buckles gleamed with gems. The widow wrote a note of thanks, and before she sent it she showed it to somebody who told the story. This is what she said:

"My Dear Mr. Brash: Thank you ever so much for remembering Fido's birthday. He needed a new collar, and the one you sent looks so well on him. It was so thoughtful of you to send two, for Fido is so bad about losing things."

And then that vindictive woman signed herself "Yours, sincerely."—Washington Post.

Russian Scepter.

The Russian scepter is of solid gold, and contains 208 diamonds, 360 rubies and 15 emeralds.

English Letters Lead.

Two-thirds of all the letters posted in the postoffices of the world are English.

A woman always likes the hat that some other woman wears better than she likes her own, and blames the milliner for it.

The effect of a mule's kick does not depend upon the soundness of his brain.

Many a man who claims to be discreet is but a coward.

THE VENEZUELAN BOUNDARY DISPUTE AT A GLANCE.

The controversy over the boundary between Venezuela and British Guiana has been waged for years. It brought the United States and Great Britain to the verge of war in 1895, when President Cleveland sent his famous message to Congress declaring that this country would not permit Great Britain to determine the boundary line by using violence against Venezuela.

Venezuela never recognized the different boundary lines proposed by Great Britain, even as demarcations of disputed territory.

A brief description of the most important of the boundary lines follows. The map shows all the several boundaries and is an invaluable guide to the proceedings of the tribunal:

1814—The British acquired 20,000 square miles in Guiana from the Dutch.

1836—The British resident minister in Caracas notified the Venezuelan Government of the urgency of erecting light houses and placing buoys in Barima Point and Boca Grande of the Orinoco, showing these places were acknowledged to be in Venezuelan territory. In 1890 Barima Point was claimed by the British.

1840—A man accused of murder was taken to trial in Demerara. The lawyer in charge of the defense proved that the crime had been committed in Cano Moruco, and the accused was acquitted by the court under the plea that the murder had been perpetrated in Venezuelan territory. In 1896 Great Britain claimed Cano Moruco.

1840—On account of the boundary posts planted by Mr. Schomburgk and which bore the British flag, the Venezuelan Government sent instructions to Mr. Fortique, its plenipotentiary minister in Europe, to demand from the British Government the recognition of the integrity of the territory of Venezuela.

1881—Lord Granville proposed a limit line to Dr. Rojas, minister of Venezuela at London.

1884—Mr. Fortique proposed to Lord Aberdeen a line to be accepted by both governments as a final settlement of the dispute. Other lines were proposed subsequently by the Venezuelan Government through Dr. Julian Viso and Dr Jose Maria Rojas.

1886—Lord Rosebery proposed a new boundary to the Venezuelan minister Guzman Blanco.

1890—Lord Salisbury proposed a boundary which has been called a "capricious line for arbitration."

1895—The Royal Geographical Society of London issued a map in which the position of Schomburgk's line was changed from its position on the maps of 1840 and later dates.

The extreme of the claim of the British is defined in a memorandum sent by Lord Salisbury in 1890 to Minister Urbaneja.—New York Journal.

THE "KISSING BUG" UNDER THE MICROSCOPE.

IF you meet a dark-eyed stranger whose features resemble a pair of bicycle lamps on an ice pick, feeling his solitary way by means of a fishpole covered with dog's hair, you will be safe in assuming that he is melanolestes picipes, alias kissing bug. In order to recognize him after this fashion, however, it will be necessary to use a microscope. The illustration was obtained by this means at the Smithsonian Institution.

This hideous insect is called melanolestes picipes by the scientific men and is a predatory insect. Until recently it was never known to feed on man. Its favorite pasture has been the cubicular bug that inhabits bedding, and its most acceptable feeding time just after that bug has had a meal of blood from a human being. In this way melano, etc., gets a taste of human blood. It has now gone into the business for itself, and taps its food supply without the aid of a vicarious distributer.

The kissing bug is black, has a fat body, and does all its hunting by night like the wolves in "The Jungle Book." It is about an inch long, has a narrow, pointed head, and a beak as sharp as that of a mosquito. When it sucks its victim, who is always asleep, feels no pain, but the stung parts swell to ten times normal size in from two to four days. Collodion is used in the treatment. The probable cause of the prevalence of the melanolestes this year is the great abundance of insect life to be found everywhere. Nature has provided this species to prey upon caterpillars and other insect pests, and with the disappearance of these the melanolestes will disappear also. Again, nature has provided millions of parasites which in turn feed upon this insect and destroy its eggs.

As a rule the melanolestes picipes makes his home under the bark of rotten trees. The insect runs with great swiftness and is hard to catch on that account. It flies mostly at night. In the larvae state these creatures resemble somewhat the common bedbug. In fact, in the States of California and Texas and in all the Southwestern country where considerable annoyance and suffering are caused by its depredations, it is commonly known as the "Great Big Bedbug."

WIDOWS OF BRIGHAM YOUNG.

Six of His Twenty-six Wives Hold Celebration to His Honor.

SIX of the twenty-six wives of Brigham Young recently held a reunion in Salt Lake City in honor of the ninety-eighth anniversary of the prophet's birth. Four or more of his wives were prevented from attending owing to sickness. A feature of the reunion was a great banquet at which there were present 300 descendants of the Mormon leader. As many more are actively engaged in missionary work in other parts of the world.

The widows of the prophet range in age from 60 to 80 years, and all occupy exalted positions in Mormonism to-day. Zina H. Young is the most conspicuous of these. She was converted to Mormonism in her fifteenth year and became the wife of Joseph Smith. After the death of Smith she became the wife of Young and crossed the plains in his calacade, driving oxen, cooking, washing and enduring many hardships.

SIX OF BRIGHAM YOUNG'S WIDOWS.

Harriet Barney Young. Emily Partridge Young. Harriet Folsom Young.
Lucy Bigelow Young. Zina Huntington Young. Naamah Carter Young.

Emily D. Partridge Young is a second "time" wife. She and her sister were made wives of Prophet Smith at Nauvoo, Ill. After Smith died the sister, Emily, became one of Brigham Young's wives.

A third widow, Naamah Kendel Jenkins Carter Twiss Young, expects to be claimed at the last day by John S. Twiss, to whom she was married first by Brigham Young himself.

Brigham Young's favorite wife is Harriet Amelia Folsom Young, said to be a relative of Mrs. Grover Cleveland. She had a great influence over the Mormon leader, and her word was law in the household.

Others of the widows whose faces appear in the accompanying illustration are Harriet Barney Young and Lucy Bigelow Young.

The celebration shows how strong a hold the dead leader has on the Mormon Church to-day. Mormons still hail him as an infallible leader and look back with regret to the days when he ruled like a king in mountain fastnesses.

DREYFUS' FAITHFUL WIFE.

The Experience Through Which She Passed During Five Years.

Mme. Lucie Dreyfus, the devoted wife of the former prisoner of Devil's Island, five years ago was the handsome, honored companion of an officer to whom the most brilliant prospects were conceded. Nothing was lacking to their happiness. They had all the money they cared for, the welcome and friendship of the best society, a beautiful home and lovely children. Then, like a thunderbolt from a blue sky, came the disgrace. His wife, and his wife alone, believed in his piteous wail, "I am innocent." Twelve of his brother officers had examined Dreyfus and pronounced him a traitor. But she knew him and loved him; and when he appealed to her not to believe the verdict, she knew in her heart that her husband was doomed unjustly.

MME. DREYFUS.

Later, when her efforts had succeeded in arousing a new interest in his cause, six ministers of war affirmed and affirmed again: "Dreyfus is a traitor. Rest in peace, good people, he suffers justly."

But her love proved better than these great men's judgments. She protested bravely, "He is not a traitor!"

And in her modest retreat she repeated daily to the children of the prisoner: "Papa has not betrayed France. Pray that papa may come back to us!"

And she was not allowed even to write of what was being done to secure him a new trial. She longed to be near him. She was not allowed to go. Little wonder she was at times nearly beside herself with impotent rage. Her friends have told of those dark moments when she paced the floor madly, tearing her hair and denouncing humanity to the vengeance of God.

THE ILLINOIS A GOLD MINE.

Over 3,000 Men Engaged in the Fish Industry of That Stream.

Over 3,000 men are employed in the fish industry of the Illinois river. Each year this industry expands and extends, and it is but a question of time when that river will be accepted by Illinois as one of the principal sources of food supply in the State. The big fishing point of the river, where the business is handled in a wholesale way, are Henry, Lacon, Chillicothe, Peoria, Pekin, Havana, Bath, Browning, Beardstown, Meredosia, Kampsville, and Gafton. The fishing season—that is, the commercial season, when the law permits the use of seines in the river—opens July 1 and closes April 15. During that time the fishing companies with their tug boats and smaller steam craft harvest the fishing crop, using seines which vary in length from 500 to 1,500 yards. In Lake Peoria alone there are nine seines, each 1,000 yards long, and last year in one haul over 6,500 pounds of German carp were taken. As the fisherman received 3 cents a pound for his fish "on the ground," that single haul was worth $1,950. Near Beardstown a single haul of the seine brought 150,000 pounds of fish.

The fish are packed in boxes in 150-pound lots, stowed away in refrigerator cars, and most of the carp and buffalo are shipped to New York. Chicago takes about 40,000 pounds of carp a week from Peoria in the season. Then there is a system of live storage, by which the captured fish are kept alive until winter, when a better price can be obtained for them. The fish are loosed into pens, which are made by driving stakes close together into the bottom of a bayou or shallow bay near the point of shipment. Here the captives thrive and fatten until they are netted again and placed on ice for shipment.—La Salle Tribune.

It Was Lucky.

The little boy's mother awoke the other night and remembered that something had been left unlocked in the lower part of the house. So she quietly stole down the stairs and attended to the errand. She was on her way upstairs again when a hoarse little whisper assailed her ears:

"Who's that?"

She looked up quickly, and there on the top step, outlined against the gloom, stood the tiny white figure. And the figure's arm was outstretched, and in the small hand was a gleaming toy pistol.

Of course he knew as soon as she spoke, and was presently back in bed again, with his precious shooting iron beneath his head.

At the table next morning he gravely remarked:

"It was a mighty lucky thing for you mamma, that you spoke when you did."

A Gigantic Horse.

The weight of the heaviest horse ever known was 3,000 pounds, or very nearly 1 ton 7 hundredweight. This Clydesdale horse was exhibited at New York in 1889. It was 20½ hands high, and although only 5 years old, measured 32 inches round the arm, 45 inches round the stifle or knee-joint, 95 inches girth, 34½ inches round the hip, and 11 feet 4 inches in length. It was of perfect proportions, with a head 36 inches in length.

Hawaiians Eat Devilfish.

The mere thought of eating an octopus is enough to make the everyday civilized being shudder, yet in the Hawaiian islands these devilfish, as they are comonly called, are a much-prized delicacy among the natives, while the imported Chinese and Japs have also acquired the taste.

Any boy who will voluntarily hire himself out to a farmer during his summer vacation is bound to amount to something. There are so few of them that people will have no difficulty keeping their future careers in mind.

The penalty fame brings to a man is that every girl he ever treated to ice cream claims to have once jilted him.

It must be a great satisfaction to a woman to get on a dress that is not a shirt waist, and have no fears of a parting in the back.

If a woman has any style to her, she is always dressed in such a way that she can't eat with any comfort.

A circus crowd is always more fun than the circus itself.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, SEPTEMBER 15..... 1899

That the preservation of the forests of the arid region is a duty distinctly belonging to the general government seems to be a general opinion. Large appropriations have been made for the survey of proposed forest reservations, thousands of square miles of forest land have been reserved and ways and means for forest preservation are now being discussed and considered. One of the strongest arguments which is advanced showing the importance of forest preservation is the influence which forests are known to have in conserving moisture, the forest acting like a great sponge which takes up rainfall and then allows it to gradually seep away, supplying streams, brooks and springs. Inasmuch as the commercial value of these forests is comparatively insignificant, except for furnishing fuel and rough timber, the water question is really the important one. Here, then, we have the government through its administration of forests, practically spending money to store water and conserve the flow of streams. Why, therefore, is it not a proper government function to spend money for building works which will artificially store water, as the forests do naturally? Undoubtedly the preservation of forests is a highly important question, and especially in the west, and the government is the proper agency to insure such preservation, but the principal arguments which can be brought forward in support of the policy, apply with increased force to government construction of reservoirs.

W. E. Skinner, general agent for the Union Stock Yards Company of Chicago was lately in Cheyenne and gave to a local paper his views on the cattle situation substantially as follows: He states that he can see nothing likely to lower the present satisfactory prices of cattle for at least some time. Western range cattle are bringing from $4.80 to $5.55 the top of the beef market being $6.45. Statistics prove there has been a shortage of over 2,000,000 head of cattle in the United States during the past two years. This, taken into consideration with the enormous visible corn crop, which must be considered safely made at this time in the States of Ohio, Indiana, Illinois, Iowa, Nebraska, Kansas, Missouri and Texas and Indian and Oklahoma territories, insures a big demand for feeders, which will necessarily make a larger number of cattle short of the demand of the markets, and consequently keep up prices. This encouraging state of affairs exists in a greater or less degree in regard to all livestock, the prospect for sheep being equal to that for cattle.

The administration organs have nothing to say about the election in the eighth Missouri district for a successor to the late Congressman Bland. The Republican nominee made the fight that the McKinley administration and his Philippine policy were on trial, while the Democratic nominee stood on a platform which declared that "we are absolutely opposed to the militarism and imperialism of President McKinley. We want no empire, we are willing to stand by the Republic." The Democratic candidate is a a radical anti-imperialist and in Republican districts, where the issue of anti-imperialism was most clearly drawn, his gains were the greatest. The question of imperialism will overshadow all others in the next election, unless the war in the Philippines is over by that time and the people in that country are permitted to establish their own government. The voters in the United States will not go back on the Declaration of Independence in the year 1900, no matter how big a sack the trusts may raise for campaign purposes.

There are two sorts of persons in this world; those who are ready to tell us only of our faults and failures, and those who are prompt to point out the ways in which we have done well. The first sort cause us discomfort; the second sort give us encouragement. Both sorts of persons do good and do harm. It is not well for us to feel that we are always making mistakes, nor ought we to feel that we are always doing just right—especially when we are not. Our friends need guidance and good sense in their comments on our course, in order to encourage where we need encouragement, and to warn and caution where warning and caution are needed.

Silver mining is again receiving attention in Colorado. The Denver Mining Reporter says that many silver mines in the State of Colorado are at the present time paying the owners a much better profit under the leasing system than was realized by direct operation when silver was worth $1.29. The difference in price is partly overcome by more economical methods in handling and treating ores, and the balance is the price paid by the miner for the satisfaction of "bossing" himself.

An unsettled condition of the political situation in Africa is attracting attention to that country. Statistics recently prepared by the Treasury Department of the United States shows that there has been a large increase in the demand for the manufactures and products of the United States, amounting since 1893 to an increase of 218 percent. Railroad bridges in the valley of the Nile, mining machinery for the gold and diamond districts and clothing and foodstuffs for the Soudan have all found an increasing demand.

Paymasters in the Philippines have asked for shipment to them of coin instead of notes, alleging that the acts of that country had almost entirely destroyed $300,000 in paper money. During the last year more than $7,000,000 has been paid to the soldiers in the Philippines.

THE FEAR OF A MOUSE.

One Instance Where It Made a Lunatic of a Woman.

A mouse has long been known to be the bitterest enemy of womankind. Just why the average run of femininity should fear such a helpless, harmless little creature cannot be explained.

During the civil war a famous female spy was betrayed through the instrumentality of a mouse. The woman was masquerading as a boy and succeeded admirably in deceiving the enemy until one evening while dining with a party of men at a farmhouse a black mouse jumped from a cupboard to the table, almost in the face of the supposed boy. With a shrill feminine shriek the spy threw up her arms and rushed across the room, and, springing on a couch, went into hysterics from sheer fright. The men, of course, suspected her and, rather than be searched, she confessed, but by the aid of the loyal old farmer and his wife she made her escape in the night.

A well known woman physician of Chicago says she can do any kind of surgical work without a tremor, but the sight of a mouse turns her strangely ill and thoroughly "unwomans" her.

Another woman has such a terror of mice that she recently went insane through fright at one of the wee creatures. The woman was sweeping her cellar when a mouse darted out from an old barrel and ran about her feet. She tried to step on it and beat at it with her broom, calling piteously to her little boy to help her. But the boy, thinking she was in fun, frightened the terrified mouse toward the woman whenever it tried to get away. At length the boy rushed at it in earnest and the mouse darted under the woman's skirts and she fell to the floor insensible, only to lose her mind when at length consciousness returned to her.—Cleveland Plain Dealer.

NO CHINESE IN LEADVILLE.

Two Pigtailed Celestials Who Were Tabooed by the Town.

Every well known nationality except the Chinese is represented in Leadville. Only two Celestials ever entered the camp, and the story of their short stay is unique and interesting. There wasn't much of a demonstration on their arrival, for it was late at night when they climbed down from the roof of one of the coaches into the busy streets and hastily surveyed the strange surroundings.

Word was whispered about in the dives with which the street was lined, and soon the pigtails were encompassed with a quiet and gentlemanly mob of perhaps a hundred miners and hoboes. Scarcely a word was spoken, but as soon as the luggage of the passengers and the mails were taken from the boot of the Concord the China boys were assisted to the seats they had just vacated, the driver was given a tip and the distinguished arrivals were whirled out of town in much quicker time than they had entered it, for it was a down hill pull to Malta, the nearest settlement down the gulch. There they were left to shift for themselves as best they might.

What means of communication with each other these strange little people have I know not, but the news of the reception that was tendered to the first representatives of their race to visit Leadville traveled rapidly, and the fact soon came to be understood by them, in all localities where they congregated in Colorado, that they were not wanted. I later queried a Chinaman in an adjoining town as to whether he had ever been in the great mining camp, and his reply was characteristically laconic: "I no go Lead-v-i-l-lee. Lead-v-i-l-lee too muchee likee hellee!"—Santa Barbara.

Prosperous Marine Trade.

Farmer (who has never seen the sea before to fisherman on the Great South bay)—Who's all this here water belong to?

Fisherman (patting his chest)—Us, me man, to us.

Farmer—Heow much d'yer charge fer it?

Fisherman—Oh, we generally charges 10 cents a gallon.

Farmer—Cheap enough. I'll take a gallon of that hum with me for me old woman. But what kin I put it in?

Fisherman—Go over there to the tavern, and they'll lend you a jar.

Farmer gets his jar and has his gallon of water put in and leaves it at the railroad station while he goes for a walk. On his return he finds the tide at low ebb. "Gosh," he says, "don't they do a big trade!"—New York Press.

Twain Wasn't Well.

Here is a story of Mark Twain, whose after dinner speeches are unique. At a dinner to which he was invited his name was associated with the toast of "Literature" by an orator, who referred with great eloquence to Homer, Shakespeare, Milton and—Mark Twain. In response the humorist thanked the speaker for his kindly references and excused himself from making a longer speech by saying, "Homer is dead, Shakespeare and Milton are no more, and I—I don't feel very well myself!"—Detroit Free Press.

Earned the Reward.

"Ma, Mrs. Smith gave me a big piece of cake."

"Jimmie, I've often told you not to ask for anything to eat when you are over there."

"But, ma, she gave me the cake because I told her who was here to dinner last night."—Chicago Record.

Would Be Cheaper.

"I have a proposition to make to you," said the regular patron as he took the restaurant proprietor off to one side.

"Well!" said the restaurant man.

"I have been coming here for some time, and I have discovered that a tip is necessary if one is to get good service."

"That's the case nearly everywhere."

"Well, what I want to suggest is that I'll pay the salary of my waiter if you will put up the tips. You really ought to be willing to take the more expensive end of the bargain, don't you think?"—Chicago Post.

An odd contrivance is used in China to protect the carrier pigeons from the attacks of birds of prey. Tiny bamboo tubes are fastened under their wings, and as they fly the air passing swiftly through the tubes makes a shrill whistle, which serves to frighten off the other birds.

Wonderful Feats of Shooting.

M. Bordeverry, a Frenchman, can give most of the crack rifle shots of the world several large pointers about their art. His accuracy and rapidity of aim are simply astonishing. At a distance of 30 feet he can cut a piece of cardboard through the edge as it is poised upon the head of an assistant. At a similar distance, leaning himself flat on his back over the seat of a chair, with a pistol in his hand, he can send spinning a threepenny piece which rests, half hidden, upon his assistant's head. He will knock the ash off your cigar at a distance of 30 feet or light your wax vesta for you, if you care to hold it. At ten yards he can cut a swinging thread, and at the same distance, with three successive shots, he will pick off three small trifles balanced one upon the other upon the head of his assistant.

OFFICIAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schea, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 12th day of August, A. D. 1899.

(Seal) D. J. HESSION, Clerk.

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als. Plaintiffs, vs. Gilbert J. Roote et als. Defendants. Summons. P. W. Forbes and P. H. Mack, Independence, California, Attorneys for Plaintiffs.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Ben. H. Yandell, Attorney for Plaintiff.

The people of the State of California send greeting to Susie Troeger, defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 5th day of September, A. D. 1899.

D. J. HESSION, Clerk.

(SEAL)

Ben. H. Yandell, Independence, Cal. attorney for plaintiff.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEHEMIAH C. PALMER, - - - Plaintiff,

vs.

MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of July, A. D. 1899.

D. J. HESSION, Clerk.

(SEAL) By C. N. ROSE, Deputy Clerk.

P. H. MACK, Independence, Cal. Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be received at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,

Administrator of the Estate of Jedediah S. Collins, deceased.

P. H. MACK, Attorney for Administrator.

Dated August 23d, 1899.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train on Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above. Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

THURSDAY, Sept. 14, 1899.

Estate of John Kewley deceased.—Petition for sale of real estate granted.

Minnie E. Gummer vs. O. I. Mairs—Demurrer to stand submitted upon the filing of the defendants reply brief.

Methodist Church.

There will be services as follows on Sunday, Sept. 17th:

Lone Pine—Preaching by the pastor at 11 a. m.

Georges Creek—Preaching service at 2:30 p. m.

Independence—Sunday School at 2:00 p. m., and preaching at 7:30 p. m.

All are cordially invited these services as they are convenient for them.

JOHN J. PARDEE, Pastor.

MARRIED.

FAUSEL—ROEPER—At the home of the bride's parents, Independence, Cal., by the Rev. J. J. Pardee, Sept. 14, 1899, Nettie M. Roeper and Max Fausel.

Henry Rhine left for San Francisco on Thursday's train.

Upton Tracey was down from Fish Springs this week.

Walter Ober is running the Butte boarding house at Randsburg.

Oscar Fausel came over from Saline to attend his brother's wedding.

You ought to hear Sub Johnson play the banjo. He's a "cuckoo".

P. H. Mack Esq. arrived home from Los Angeles last Saturday morning.

The weather turned quite cool this morning. Time to get your stoves up.

Clair Tyler came in from Ballarat last Saturday and remained in town all the week.

J. Sub Johnson arrived here Wednesday evening from a two weeks' visit to San Francisco.

R. M. Guiniss and Clarence Johnson left for Saline Valley to-day to work at the copper mines.

Cap. Wat and Alexander had a difference of opinion this week which cost Cap $5 in the Justice's Court.

The Lone Pine school begins next Monday. Miss June Skinner will be the principal and Miss Mabel Chalfant the assistant.

There will be two base ball games and a number of horse races at Lone Pine tomorrow. There will be all kinds of fun for everybody.

Dave Holland came down from Bishop last Tuesday. He says the cyanide plant at the Casey mine will be ready to start up this week.

Miss Addie Lewis left for San Francisco on Saturday morning's train, after spending the summer pleasantly with friends and relatives here.

George Montgomery got back last Monday from a flying trip to Salt Lake City. He was to have been here on Friday but missed connections.

Rev. J. J. Pardee arrived home on Wednesday evening's train. Preaching notices for next Sunday will be found under their proper heading.

Special rates to the Fair have been fixed by the C. & C. as follows: From Independence to Alvord and return, tickets good from Sept 16 to 25 inclusive, $1.50.

The Board of Supervisors will meet next Monday for the purpose of fixing the rate of taxation for the next year. The State rate has been fixed at $.601 on the $100.

Norm Mairs left for Long Valley this morning to gather his cattle preparatory to bringing them out. A letter from there says that the weather is getting very cold and feed is short.

Ernest Laird arrived here on Wednesday's train from Carson, where he has been employed all summer as a stenographer. Miss Georgia Johnson has resumed her duties in his place.

The Fair Directors have not forgotten the press, as is proved by complimentary tickets to track, pavilion and ball received by the INDEPENDENT this week, for which we tender many thanks.

Quite a crowd of Independence people are going to Lone Pine to-morrow for the 16th celebration. We have not been advised as to what the program will be, but there will be a ball in the evening anyway.

California State Mining Law.

During the last few days the daily papers of this State have been printing an old chestnut, ancient and venerable, which a San Francisco daily had only discovered in relation to the State Mining law. For in the issue of this JOURNAL of 15th April last, under the above heading we printed a copy of the State Assembly Bill No. 140, by which that law was repealed, and says in Section 1 "An act to repeal an act prescribing, etc., etc., is hereby repealed," and in that issue made the remark: "Though the wording of the act is such that it defeats itself, it no doubt will hold good, and by it the State law of 27th March, 1897, has been repealed, etc., etc.,"

Since the publication of the recent articles referred to in the daily press, consultation with the best legal talent and a member of the Legislature informs us that the Supreme Court (if the matter is brought to a test case) will uphold the intention of the Legislature to repeal the local law, even when through error the wording of the act, if read in a certain way seems to be contradictory. There is no doubt as to the origin of this scare, for this latest discovery is reported to have been made by eminent attorneys in San Francisco, who were no doubt looking for a job, and the present prosperous condition of the mining industry presented a grand chance.

As this error was not observed in time by our worthy governor, who has the qualifications of a great gauger of laws, natural, human and divine, we still fail to find a reason on this occasion, as on the former one, to account for the fact that even one legal error passed observation by the eye which is capable of interpreting correctly all law. As a consequence, the only law now in force is the Federal Statute regulating the location of mining claims.

It is to be regretted that the bill framed by Assemblyman Mack of Inyo County, which was intended to take the place of the late State law, and make its operation more easy, did not become a law on account of being vetoed, as it was not signed by the Governor. The late State law although it was not perfect nor all that could be desired, was much to be preferred to the federal law which is now in force, as it made work during the first year necessary, and enforced early development of the claim, thereby making the occupation of the wholesale or professional claim locator, who does no work, but merely re-locates every two years, impossible. As the title to State Assembly Bill 140 is clear, and does not contain the contradiction found in the first section of the act already quoted, the intention of the legislators to repeal the late State law will be upheld by the courts, and any parties who now locate and jump claims, by thinking that the late State law is still in force, are in error.—*The Mining and Metallurgical Journal.*

Declared Off.

BIG PINE, Sept. 11, 1899.

☞ Public notice is hereby given that at a meeting of the Board of Directors of the 18th Agricultural District, held Sept. 11, 1899, it was ordered that the purse offered for a Base Ball Game to take place on the 4th day of the 12th Fair, be withdrawn and that the same be declared off.

J. R. ELDRED,
Sec'y 18th Agr. Dist.

It is stated that the Utah sheepman have arranged a plan with the officers of the United States Government whereby their flocks will graze on the Uintah forest reserve, and neither the Government's property nor the water storage facilities of that part of the Rocky mountain region, nor the great sheep industries of Utah will suffer. The Government has compelled the sheepmen to sign an agreement which sets forth their willingness to assist in the preservation of the forests from fire, etc., and they are allowed to graze their sheep in all parts of the reserve except the heavy timber belts within the district assigned to them.

In mining deeds, where the consideration is stock in a mining company, it has been held that revenue stamps shall be affixed to the document in proportion to the par face value of the stock transferred, and not in proportion to its real or market value. The law provides that $1 worth of stamps shall be affixed for each $1000 value in the consideration.

The month of August just closed was the coolest in a record of twenty-three years. The normal is 73 degrees, while the average for last month was but 68 degrees, showing the month to have been 5 degrees cooler than the normal temperature as deduced from records of twenty-three years.

Mr. and Mrs. S. A. Fraser and Mrs. M. A. Lubken and John Lubken came up from Lone Pine yesterday and were guests at the wedding of Miss Nettie Roeper and Max Fausel. Mr. and Mrs. George Free came down from Bishop and were also present.

Billy Mitchell left for Long Valley this morning to look after his cattle interests. Like everybody else here he is deeply interested in building the Mazourka road to Saline Valley and offers to donate a beef steer toward the work.

I. H. Mulholland will leave for Big Pine to-morrow with Hillsdale and Quoin for the races. Julian Eibeshutz will send up the bay gelding, Inyo, to try conclusions with the steppers from the north.

Quite a number of people here will take advantage of the low rate of fare offered by the C. & C. and go to the Fair by rail. It is reported that some fast horses are coming from Bodie and there will be some good sport.

The Supervisors of San Bernardino county have appointed Scipio Craig a delegate to the Irrigation Congress at Missoula and allowed him $200 for expenses. Other counties should follow the example.

A Wedding.

One of the most popular of the Independence young ladies changed her name last evening from Miss Nettie Roeper to Mrs. Max Fausel. The young lady has been a resident of Independence ever since she was a little girl, and by her genle amiable nature has won the regard of all our townspeople. Mr. Fausel, who is well and favorably known in the community, is to be congratulated on the lovely bride he has won. The wedding ceremony was performed at 8 o'clock by the Rev. J. J. Pardee. Miss Rosa Roeper acted as bridesmaid and Mr. Norman Mairs as best man. The bride's dress was of white organdie over white silk, with a bridal veil and wreath of orange blossoms. The bridesmaid wore pale blue silk trimmed with true lover's knots. After the ceremony congratulations and good wishes were in order, and then followed the wedding supper. The finest products of the culinary art and choice wines served to enliven the company until nearly ten o'clock, when the young men of the town made their appearance with the customary serenade and congratulations. They were royally received by Mr. Fausel and his bride, and treated to supper, wine and cigars. The young couple repaired to their new home which was in complete readiness to receive them and where it is heartily wished they will find all happiness and prosperity awaiting them. Following is a list of the wedding presents: Mr. Norman Mairs, set of silver knives; Miss Rosa Roeper, set of silver forks; Mr. John Baxter, glass set; Miss Stella Robinson, silver pickle jar; Mrs. Matlack, silver bread tray; Miss Edna Matlack, carving set; Mr. Oscar Fausel, rocking chair; Mr. and Mrs. Roeper, table linen; Dr. I. J. Woodin and Irving Woodin, silver pudding dish; Mr. J. Willett, silver berry dish. Miss Annie Schabbel, silver pie knife; Mr. and Mrs. Geo. Free, silver syrup pitcher; Mrs. F. Rhine, silver butter dish and knife; Mrs. J. C. Willett, silver tea and table spoons; Mr. Matlack and Lizzie, glass water set; Miss Effie Roeper, silver berry spoon, butter knife and sugar spoon; Mrs. A. Lubken and family, china tea set; Mr. Leon Marks, silver soup ladle; Mr. and Mrs. S. A. Frazer, banquet lamp; Miss Maggie Gorman, glass water set; Mrs. C. Fausel, one pair blankets; Mr. George Thorpe silver syrup pitcher; Mr. and Mrs. J. C. Irwin, one dozen bottles wine; Mrs. Forbes and Mrs B. Rhine, bouquets; Mr. John Keegan, one sack potatoes.

Real Estate Transfers.

The following deeds have been recorded since September 7, 1899:

John Shepherd to James Edward Shepherd—120 acres at Georges Creek, $5

J. E. Dunlap and wife to W. B. Hutchings—Drake hotel property at Bishop $1000

Nellie G. McKnight to Georgia J. Johnson—640 acres near Bishop, $100

Frances E. Smith to Henry J. Bell—160 acres near Bigpine, 10

W. B. Hutchings to J. E. Dunlap—160 acres near Bishop, $500

J. E. Dunlap to Frank Shaw—160 acres near Bishop, $500

Joseph Halliday to William T. Halliday—160 acres near Lonepine, $10

J. B. Chamberlain to Sarah A. Chamberlain—160 acres near Bishop, gift

James N. Rose to Allie M. Morton—160 acres at Fish Springs, gift

J. S. Stotler to Phoenix Development Co.—¼ int in Comet mine, South Park Dist., $400

J. D. Mairs to Upton Tracey and W. C. Stewart—Cleveland mine, Fish Spring Dist., $1000

To the many friends who so kindly lent their sympathy and assistance during the last hours of our father's life we desire to return our grateful acknowledgment and heartfelt thanks.

D. J. HESSION,
Clerk

Approved July 11, 1899.

A. C. FREEMAN
Chairman.

Attest: D. J. HESSION, Clerk.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

A Great Name

is a guarantee of superior worth

There are many brands of baking powders, but **"Royal Baking Powder"** is recognized at once as the brand of great name, the powder of highest favor and reputation. Everyone has absolute confidence in the food where Royal is used.

Pure and healthful food is a matter of vital importance to every individual.

Royal Baking Powder assures the finest and most wholesome food.

There are many imitation baking powders, made from alum, mostly sold cheap. Avoid them, as they make the food unwholesome.

ROYAL BAKING POWDER CO., NEW YORK.

LIFE'S VARIORUM.

Some work for this, some strive for that, and grind at every turn;
Some long for what they haven't got, and what they have they spurn,
And some rush for the mountain peak to get the sun's last ray,
Then crawl into some sunless hole and sleep it off next day.

Some find this earth a first rate place to slave and strut and save
And life's chief pleasure to consist in being glum and grave,
And others with a twinkle in the hand and heart and eye
Will stake their lives that they can spend more than they can find laid by.

Some take a drink when they are dry and some when they are wet;
Some drink for sweet remembrance sake, some that they may forget,
And some there be, like you and me, free from all sham scot-free,
Who have laid down a rule for life—never to get athirst.

Some turn to this, some turn to that, for fortune and for fame,
And some won't turn for anything and get there just the same.
But there's a common turning point, a fate, unkind but just,
Where rich and poor and great and small turn one and all to dust.

—Galveston News.

Won In Spite of His Lawyer.

A well known attorney is telling a good story on himself. He had been retained to defend a counterfeiter and advised him to plead guilty. His client did so, and as there was in the mind of the court a fixed idea that if a prisoner pleads guilty he does so because he has no attorney the judge asked him why he made that plea.

"Because my lawyer told me to."

"Did he give you any reason for it?"

"Yes. He told me I would have no show before this judge."

The court flared up and ordered a plea of not guilty to be entered, and the counterfeiter was acquitted.—Philadelphia Call.

A Good-Luck Cross

Recently discovered in the grave of Queen Dagmar is supposed to keep away evil influences. There is no more evil influence than ill-health, and there is nothing which has so great a power to keep it away than Hostetter's Stomach Bitters, which cures dyspepsia and indigestion. A private Revenue Stamp covers the neck of the bottle.

If a man would just perch himself on the bargain counter a lot of women would be hurt in the crush to get him.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder to be shaken into the shoes. It makes tight or new shoes feel easy; gives instant relief to corns and bunions. It's the greatest comfort discovery of the age. Cures swollen feet, blisters and callous spots. Allen's Foot-Ease is a certain cure for ingrowing nails, sweating, smarting, hot, aching feet. We have 30,000 testimonials. All druggists and shoe stores sell it. 25c. Trial package FREE by mail. Address, Allen S. Olmsted, Le Roy, N.Y.

The first duty of a real man is to do his real duty first.

Ask your grocer for Utica Cleansing Compound for washing clothes, blankets, flannels, silks, carpets, and for general household use.

Piso's Cure for Consumption is the best of all cough cures.—George W. Lotz, Fabucher, La., August 26, 1895.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by druggists, price 75c. per bottle.
Hall's Family Pills are the best.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Utica Toilet Compound for the hands and skin. Salt or fresh water baths, shampooing, poison oak, bites, cuts, sores, burns etc.

Piled It on the Princess.

In China it is etiquette to regard one as older than he or she really is. When the Prince and Princess Henry of Prussia visited Shanghai, they met a notable mandarin, one of whose first questions to the prince—this being an invariable matter of Chinese politeness—was:

"How old are you?"

"A little more than 36," answered the prince, smiling.

"Indeed!" said the mandarin. "Your highness appears 50."

The mandarin then turned to the interpreter—Herr Voight, a German—and inquired the princess' age. She answered, "Thirty-two." The interpreter interpreted, and the mandarin made a remark in Chinese evidently intended to be complimentary. The interpreter blushed uneasily and hesitated to translate the remark. The prince saw the difficulty and laughingly commanded:

"Out with it, Voight!"

"He says," the interpreter then translated to the princess, "that your highness looks like 60!"

He had meant it well, and of course the princess had sense enough not to take it ill.

Should Women Smoke?

I have no earthly objection to women smoking; only, if they do smoke, they should smoke seriously. Most of them just fool a little with a cigarette. Now, that scarcely amounts to smoking at all. If they really mean it, let them take to cigars and pipes.

I know a dignified old lady, a Polish countess—what is her name? Countess? Countess?—oh, well, Thingamojisky—it ends in 'isky,' anyhow—and I respect that woman. She genuinely smokes, and no mistake about it. There is no playing there. She looks on it as a sacred duty. She has a long pipe with a wooden stem and the bark on, and a fine big bowl—a regular man's pipe. When she was visiting me, she just loaded up and smoked, and loaded up and smoked, and loaded up and smoked again. She meant business.

I know another lady who has a long Turkish pipe, and she, too, means business. If women are ever to be genuine smokers, that is the way they must go to work.—Mark Twain.

The Good Old Quill.

The art of cutting a quill by adept "quill drivers" was dying when I began schooling. Steel pens had been known for some time, but were not in general use. The goose quill pen died a hard death as a commonly used writing tool. My first schoolmaster was a first rate hand at cutting a quill, and he could use it with wonderful effect in flourishes. It was his boast that he could fill the first page of a lad's schoolbook with name, age, date and flourishes—in which were depicted wonderful swans and other birds—in such a fashion that none but experts like himself could tell where the quill pen was taken from the paper for a fresh dip. My last master could neither cut a quill nor use one with advantage. Quills as pens remained in use in some houses as the only writing tool up to a dozen to 20 years ago.—Notes and Queries.

Sothern and Laura Keene.

While in New York and before he had made any hit, the elder Sothern had a dispute with Laura Keene concerning some trivial affair at a rehearsal, and Miss Keene went into one of her tantrums. After the quarrel on the stage she retired to her dressing room and, still angry, sent for Sothern and began to rate him fiercely.

"Stop, Laura—stop just a minute!" interrupted the comedian and advancing to the light deliberately turned it down.

"What do you mean by that, sir?" she demanded in a rage.

"Oh, nothing," replied Sothern, "but you have always been so lovely to me that I can't bear to look upon your beautiful face when you are in a passion. Now, go on."—San Francisco Argonaut.

ANIMAL ANTAGONISMS.

Beasts Confined In Cages Fight For the Sake of Fighting.

Fights in sheer devilment sometimes take place between animals in confinement. A short, sharp battle took place in Edmonds' menagerie between a lion and a tiger 40 years ago. The lion was the same which had escaped from Jamrach's yard in what was then Ratcliff Highway and bitten a boy. Mr. Edmonds bought it, and is said to have billed it as "the tiger that swallowed the child." Of course, the beast was a great draw, but after a few days in its new quarters the tiger managed to draw forward the sliding shutter and squeeze itself into the adjoining den, where a lion was confined. The lion resented the intrusion, but was immediately seized by the throat, and, though there were tremendous struggles, the fight was practically over as soon as it commenced. The tiger never loosed its hold, and in a few minutes the lion was dead.

About 20 years later a fatal fight took place in the lion house of the Zoological gardens, Regent's park, between a tiger and a tigress. The latter was ill-tempered, and, in sparring with her mate, drove her claw through his nostril, and so began the fray. The tiger threw her down, and struck her several times with his paw, but without doing serious damage, and then turned away as if to discontinue the fight. This the tigress would not suffer, for she sprang at his flank and fixed her teeth in his thigh. This was more than he could stand. One wild bound freed him; in a moment she was knocked over, and he gripped her by the neck, in which his huge canine teeth made fearful wounds. Sutton, the keeper, now managed to drive him off, and he used to say that when the tiger loosed his hold the blood spouted from his victim's neck and splashed on the roof of the lofty den.—Cassell's Magazine.

LOADED WITH HARD LUCK.

Several Bitter Experiences of a Youthful Runaway.

Young John Kathner, an inexperienced hobbledehoy thirsting for adventure, ran away from home the other day with 100 marks in his pocket. Determined to see the world he booked for Berlin, intending to surprise a spinster aunt residing there, with whom, however, he was not personally acquainted. On reaching his destination he strolled about the city making inquiries for Aunt Kathner's place of abode.

A woman accosted him: "What, you are from Abbau! What is your name?" On hearing it, she exclaimed: "Himmel! Why, then, I am your aunt; come home with me." Young Greenhorn did her bidding, they supped together, and he was sent to bed.

On awakening next morning he discovered that his clothes and his money were gone, and so, too, was auntie. In his despair he rushed to the window in his nightshirt, crying out his misfortune to the passersby.

A woman with an infant in her arms responded to his appeal. "I will go and find your auntie," said she, "and leave baby with you meanwhile." Hours passed, with baby howling for sustenance.

At length a constable came to Johann's rescue with a suit of clothes, and bundled him and "his infant" off to the police station, where the inspector wired to the young man's father.

"Your son Johann is here with his infant. You can take them in charge on payment of the expenses incurred."—Berlin Correspondence.

One of the Directors.

"Impossible," exclaimed the caller to the proud mother. "I can't believe that your son, who has only been in the employ of that great corporation for six months, is already a director.

"Well, I can. James is a splendid penman, and here is the news in his last letter." He had just finished directing 10,000 circulars.—Detroit Free Press.

The Gossip.

More attention should be paid to the old fashioned saying, "He who brings will carry." If a man brings bad stories about others to you, he will carry bad stories about you to others. This is so true it is a wonder that people are not more cautious in their talk when with gossips. Don't let any one carry anything from you.—Atchison Globe.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

Biliousness

You're bilious, you have a throbbing sensation in your head, a bad taste in your mouth, your eyes burn, your skin is yellow with dark rings under your eyes, your lips are parched and you feel ugly and mean, as if you wanted to kick a lame infant or kill a canary bird. Your system is full of bile not properly passed off, and what you need is a cleaning up inside. Don't continue being a bilious nuisance to yourself and those who love you, but send out at once for a box of Cascarets and feel bright and cheerful all the time.

Be sure you get CASCARETS! Don't let them sell you a fake substitute!

"I have used your valuable CASCARETS and find them perfect. Couldn't do without them. I have used them for some time for indigestion and biliousness and am now completely cured. Recommend them to every one. Once tried, you will never be without them in the family."
EDW. A. MARX, Albany, N. Y.

Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK. 369

Hopeless Credulity.

"The gross superstition one occasionally encounters among fairly intelligent people is very disheartening," lamented a physician. "Some time ago I was called in by an upper class mechanic, a man who earns $6 a day. I found him in a state of alarming nervous depression, and he complained of agonizing neuralgia in the head. I questioned him sharply, and he finally informed me that he had been 'conjured' by an old negro servant whom he had discharged. It seems he had found a small red flannel bag full of dough hidden under his mattress, recognized it as a voodoo 'charm' and had never been well since. He told me this in an awestruck whisper, and I made no effort to conceal my disgust. I told him he ought to be ashamed of himself for allowing an ignorant darky to play on his imagination, but I could see plainly that he was unconvinced. Finally I gave him some simple treatment, and in a few days he was all right. But what sickened me was the dense, hopeless credulity of"—

"By the way, doctor," interrupted a listener, "what was it that you gave the man yourself?"

"Oh, merely some bread pills," replied the physician. "There was no use taking such a case seriously. What are you laughing at, anyhow?"

"Nothing," said the other demurely.—New Orleans Times-Democrat.

Lovely Little Pug Noses.

They are distributing an advertisement in Germany that runs thus:

"A studio for improving the human face.

"This studio is highly recommended to ladies and gentlemen who wish to possess faces in the present fashion.

"This is the best house in the world for improving and changing the color of the eyes, which can be rendered flashing and bright, deep as the sea or full of laughter.

"This house must not be thought to have anything to do with any other establishment. It possesses vast laboratories, and over 1,200 apparatuses are in use to change and improve the features.

"A great specialty is made of dimples and of producing lovely little turned up noses.

"Terms are moderate, and the strictest discretion and secrecy are observed."

People in Paris are talking a great deal of this advertisement, writes a correspondent of madame, but, except that the establishment is in Vienna, I have not been able to discover the address of this most wonderful house for manufacturing eyes and noses.

A Lively Barrel.

An actor tells of a tragic experience he had while playing in a little town in southern Texas. In one of the scenes of the play, in which he acts the villain, he hides himself in a barrel, that he may listen to a conversation between the hero and heroine, whose future well being he is trying to destroy. In the town hall there was little if any "property" material. A barrel would do to conceal himself in, so a "hired hand" was sent out to find one. He succeeded.

The time came for the actor to do his part. He slipped in the barrel with ease. The man and the woman appeared, and while they were in the midst of an animated conversation there came a howl from the barrel that fairly shook the rafters. This was followed by the eavesdropper crawling out with his hands to his face, and he in turn was followed by a swarm of wasps. The wasps got among the stage people and those in the audience, which created so much confusion that the show was broken up.—Galveston News.

Double Proof.

"Do you believe in heredity, Mrs. Simpson?"

"Indeed I do. Every mean trait Bobby has I can trace right back to his father."

"Does his father believe in heredity too?"

"Yes. He traces Bobby's faults all back to me."—Chicago Record.

Lake Superior is 1,008 feet deep, 601 feet of this body being above sea level and 407 below it. The bottom of this great lake is about 375 feet deeper down than the channels giving admittance to New York harbor. Lake Erie's greatest depth is 210 feet.

SYMPATHY.

I looked into baby eyes of blue,
While my thoughts were far away—
Into beautiful orbs in whose liquid light
Shone a life that was bounded by play.

But a grieved look came to the rosy lips
And a cloud o'er the lustrous eyes,
As earth darkens when hideth the sun god away
And obscured is the blue of the skies.

I smiled in the dear little, pensive face,
But she gave me no answering smile,
And I wondered when down o'er my cheek ran tears
That had filled my sad eyes erstwhile.

And I thought how strange that the baby eyes
Should behold what the world could not see,
For the wise had replied to the smile on my lips,
While the child heart responded to me.

—Rose VanB. Speece in Scranton Republican.

HOW WE GET OUR TEETH.

It Is an Interesting and Somewhat Complicated Operation.

An eminent dentist is authority for the following interesting explanation:

It would take too long to describe the formation of the teeth, but it may interest you to know that the enamel is derived in the first place from the epithelium, or scarf skin, and is in fact modified skin, while the dentine, of which the bulk of the teeth is composed, is derived from the mucous layer below the epithelium.

Lime salts are slowly deposited, and the tooth pulp or nerve is the last remains of what was once a pulpy mass of the shape of the future tooth, and even the tooth pulp in the old people sometimes gets quite obliterated by calcerous deposits. The 32 permanent teeth are preceded by 20 temporary deciduous or milk teeth.

These are fully erupted at about 2 or 2½ years old, and at about 6 years of age a wonderful process of absorption sets in by which the roots of the temporary teeth are removed to make room for the advancing permanent ones. The crowns of the former, having no support, become loose and fall away.

One would naturally suppose that the advancing permanent tooth was a powerful factor in the absorption of its temporary predecessor, but we have many facts to prove that it has no influence whatever. Indeed, the interesting phenomena of the eruption and succession of the teeth are very little understood.

I may remark in passing that a child of 6, who has not yet lost any temporary teeth, has in its jaws, either erupted or nonerupted, no fewer than 52 teeth more or less formed.

HOITT'S SCHOOL,
Menlo Park, San Mateo Co. Cal., accredited at the Universities. Location, climate, and careful attention to Mental, Moral and Physical training, places Hoitt's among the foremost Schools for Boys on the Coast.—*S. F. Chronicle.* Will re-open in the new building August 15th, (9th year.) Ira G. Hoitt Ph. D., Principal.

Difficulties.

"There is some one giving away the facts concerning our secret proceedings!" exclaimed one official.

"But we haven't really done anything."

"Of course. And that's the damaging fact which has been divulged."—Washington Star.

Remember that you can buy Jesse Moore A. A. Whiskey, for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

The wheat of Mexico amounts in value to nearly $30,000,000 a year. The rice crop is worth $6,000,000. Ten million dollars' worth of beans are grown each year, for beans form a staple article of diet among the peasants.

Astronomers tell us that in our solar system there are at least 17,000,000 comets of all sizes.

"A Good Name At Home Is a Tower of Strength Abroad." In Lowell, Mass., where Hood's Sarsaparilla is made, it still has a larger sale than all other blood purifiers. Its fame and cures and sales have spread abroad, and it is universally recognized as the best blood medicine money can buy. Remember Hood's Sarsaparilla Never Disappoints.

Shocked the Chief Justice.

Lord Russell of Killowen, the chief justice of England, was up in London for a few days last long vacation, and having nothing to do after the morning accepted a friend's invitation to lunch at his club. After luncheon a scratch rubber was with difficulty got together, very few members being in the town. The fourth man, a young subaltern in the guards, only joined after mentioning that he played a very poor rubber. Unfortunately the chief cut him as partner, several times in succession. At first he only fidgeted a little and made one or two mild inquiries. But after something extra diabolical his lordship broke out with, "I really think, sir, you are playing badly on purpose to annoy me."

"Oh, shut up!" said the soldier. "How can any fellow play when you keep jawing at him?" Lord Russell, with quiet dignity, observed, "I don't think you know to whom you are speaking, sir."

"Oh, yes, I do," said the warrior. "You are the lord chief justice, but you're not in your blooming police court now." Tableau.

A Startling Answer.

A Latin professor was explaining the derivation of our word "ostracize" to his class in a local academy. He told the story of the early Roman republics and the scheming of the politicians of the times. He related how, when any man in the republic became obnoxious to his neighbors, they used to write his name on an oyster shell (Latin—ostreum, shell), and on the receipt of a specified number by the consuls that man was banished, killed or otherwise removed in some one of those pleasant ways the old Romans had. When he had finished his explanation, he said:

"Now, the boy here in the front seat, what did we derive from the old Latin use of the shell, which was called ostreum?"

The answer he expected was far from what he got, for the little student with spectacles in the front seat arose and delivered himself thus:

"From the Roman habit of using shells to get the best of people, we derive the present Coney Island shell game, which is a fascinating and costly sport."—Brooklyn Times.

Her Unfair Test.

She—Which would you rather be, a little toad in a big puddle or a big toad in a little puddle?

He (after long and serious thought)—Well, all things considered, I'd prefer to be a big toad in a little puddle.

She—There! I have always thought that you had no real ambition to make a man of yourself.—Chicago Times-Herald.

DISEASES OF MEN.
Venereal, blood, Skin, All Nervous Diseases, Kidney, Liver, Urinary Diseases, Cured when accepted for cure.
31 Years Successful Experience.
DR. CORDIN'S SANITARIUM,
514 PINE ST (Above Kearny.) SAN FRANCISCO.

SURE CURE FOR PILES
ITCHING Piles produce moisture and cause itching. This form, as well as Blind, Bleeding or Protruding Piles are cured by Dr. Bosanko's Pile Remedy. Stops Itching and bleeding. Absorbs tumors. 50c. a Jar at druggists or sent by mail. Treatise free. Write me about your case. DR. BOSANKO, Philada., Pa.

Ready Made Mermaidens.

In reference to a recent paragraph on mermaidens, a correspondent writes: "It may not be generally known that Japan exports these shams in assorted sizes, in glass cases, at so much per footrun. They are made of the body of a fish and the dried head of a monkey, so skillfully united that it is difficult to detect where one begins and the other ends. Of late the market for mermaidens has been flat. At one time they were fairly common in the curiosity shops.

PHILADELPHIA SHOE CO.
10 Third St., - San Francisco.

WE SELL CHEAP
Ladies' fine Vici Kid Lace Shoes, with silk embroidered Vesting tops, new coin toes and tips. Reduced from $2.50 to $1.95. All widths and sizes. We want your trade. Send us a trial order. Money refunded if goods are not satisfactory.
Country orders solicited.
Spring Catalogue, 128 pages. Just out. Send for one.

WHISTLE IT AWAY.

Have you any petty cares, boys?
Whistle them away;
There's nothing cheers the spirits
Like a merry roundelay.
No matter for the heartaches,
'Neath silk or hodden-gray,
For the sake of those who love you,
Just whistle them away.

'Tis strange how soon friends gather
About a cheerful face;
That smiling eyes and lips count more
Than beauty, wealth or grace,
But I have seen it tried, boys;
When trouble comes to stay,
The brave heart leaps to work and strives
To whistle it away.
—Selected.

The Family Specter.

"BY Jove, Gordon, I don't know what to make of you!" exclaimed Tom Fairleigh, drawing on his gloves with considerable show of vexation. "Amy Hepburn's happiness is dear to me; in fact, I came here to-night to tell you that I love her——"

"To tell me!" broke in Gordon; "why don't you tell her?"

"Wait, can't you? Let me finish. I have told her and she declined me. It was very gently and with the greatest possible regard for my feelings, but nevertheless I was declined. Don't think me a fool because I come here and make a confession which can be nothing less than mortifying. I'm doing it for Amy's sake."

"For Amy's sake?" echoed Gordon.

"Yes; I want to see her happy and you are the man to make her so. She declined me on your account. Of course, I knew long ago that you were my rival, but I did not know until two hours since that you were the successful one. You aren't worthy of her and don't deserve her, but don't think for a moment that I believe myself more worthy or more deserving." Pausing suddenly, Fairleigh walked to his friend's side and laid a hand on his shoulder. "I can't understand what you mean by leading Amy to believe that you care for her, while all the time dividing your attentions with Nell Forthdyke. Would you be inhuman enough to break a heart as loyal as Amy's?"

"Don't be tragic, Tom. I'm not going to break anybody's heart. Nell is rich, you know——"

"And so are you," sneered Fairleigh, walking hurriedly to the door and laying his hand on the knob, "but Amy Hepburn is poor. Society dares you to wed with poverty. If you love Amy, are you man enough to take the dare? Examine into the financial condition of the Hepburns, reflect upon the cause of their downfall in fortune, and then let me see if you are strong enough to leap this Brahminical barrier of cast."

With this parting shot Fairleigh passed quickly out of the room and slammed the door behind him. Harry Gordon gave vent to a long whistle, settled himself back in his chair and thoughtfully lighted a cigar.

"That was quite a jolt," he muttered, looking upward through the curling wreaths of smoke. "'How happy I could be with either were t'other dear charmer away.' It's as sure as can be that I love one and fancy the other, but who will unravel the Gordian knot? Which is it to be—Amy or Nell?"

A knock fell on the door—not on the outside door, but on a door leading into a closet. Harry Gordon stirred uncomfortably in his chair, a vexed look coming into his eyes as he fixed them upon the closet door. After a brief interval of silence the knock was repeated.

"Now, what in the world aroused you?" cried Gordon.

"Business is business," came a hollow voice from the other side of the closet door. "I'm here for a purpose, and if I do not make that purpose manifest once in a while you'll forget all about me."

This remark was followed by a cacking cachinnatory outburst that seemed to grate harshly on Gordon's ear.

"Well, what do you want?" he asked.

"I want to come out and show myself. You know I'm here, but a little ocular demonstration won't come amiss, I take it. Remember, I'm showing consideration for you. I might have kicked open this door and stalked out into the room. But I didn't. I rapped."

"Can't you put it off? Come out tomorrow. I've got something else to think about now."

"The high and mighty order of family skeletons are not in the habit of playing second fiddle or taking back seats for anybody. I'm coming out at once."

"All right, then," groaned Gordon, squaring himself about in his chair. "Come on."

The closet door flew open and a well-developed skeleton strode out and dropped with a rattle into a chair. The cavernous eyes were blankly expressive—to Gordon. For him also there was something sarcastic in the grin of the fleshless jaws.

"Dust me off," said the skeleton; "I want to show up as frightful as possible to-night."

The request presented itself to Gordon as a command, which he was powerless to disobey. Picking up a feather duster, he plied it vigorously above the gleaming white bones.

"A-choo!" he sneezed, dropping the duster and falling into his chair.

"You ought not to neglect me," said the skeleton. "I'm one of the family and should be treated as such. Now, then, let's have a chat."

The skeleton crossed his bony legs and settled back comfortably.

"Will it do me any good to have a chat with you?" queried Gordon.

"That remains to be seen. It used to do your father good. Why, it was my custom to visit him every night. As he sat before that table there, writing, I'd sneak out of that closet, come quietly up behind him and put an arm caressingly about his neck." The skeleton laughed, working his bony jaws with a succession of crackling sounds that made Gordon shiver. "How it used to startle him! He would turn white as a sheet as he looked up into my face. Once he sprang to his feet in desperation and we had a wrestle all about the room, overturning chairs, tables and everything else that came in our way."

"You succeeded well in shortening my father's life," returned Gordon, gloomily. "Under your tyranny he sunk into his grave long before his time."

"So he did, so he did, and he passed me on to you with the rest of his property, real and personal. It was a rich inheritance, my dear boy, even though I had to be dragged at its heels. Yet don't accuse me of any responsibility for your father's taking off. He was the author of my existence. Like Frankenstein, he built me up, bone by bone, and was not content until he had made a gigantic monster and breathed into my bony breast the breath of life. Then, in order that I might not afflict his sight, he stowed me away in that closet. Suppose I became the instrument of his own undoing? Is it not true that he was, nevertheless, the author of his own downfall?"

"Your logic seems to be as merciless as it is correct," answered Gordon, with knitted brows. "Still there are some points relating to your history on which my mind is a trifle obscure. What possessed my father to call into being a creature of your disagreeable character?"

"The almighty dollar, young man. He created me in order that you might inherit a little more wealth. He did not think then how I should one day sit astride his shoulders like an old man of the sea, nor did he think that it was possible for me to afflict his son. For obvious reasons my relations with you are not so intimate as they were with your worthy father. I was evolved out of the wheat pit of the Board of Trade. Your father was a bull, and he mercilessly gored both life and fortune out of a certain bear who was not nimble enough to get out of his way."

"And who was this bear?" asked Gordon.

"A man named Hepburn."

"Amy Hepburn's father?" murmured the young man, rubbing his hand across his brow in an effort to remember.

"Yes, Hepburn lost every penny he had in the world through that disastrous wheat deal. He was forced into bankruptcy, and, unable to bear the disgrace, took his own life. His money went to increase the store your father left you, my boy, and it is now possible for you to live in luxury while Hepburn's wife and children must struggle on as best they can. However," and the skeleton got up and started back to its closet, "it is not for me to moralize. Now that I've caught myself delivering a homily, I'll just take my departure. Au revoir, my dear fellow."

Halting at the closet door, the skeleton waved its adieu and disappeared within. Gordon sat in his chair, deep in thought, while his cigar burned itself out between his fingers.

At last he got up and shook his broad shoulders as though freeing himself of a disagreeable burden.

"Society has dared me," he muttered, "but I know my heart now, and I'll do as I please!"

After Harry Gordon and Amy Hepburn had been married and had returned from their honeymoon, Harry brought his bride upstairs to his old bachelor's den and seated her in a chair.

"My dear," he said, "I have a confession to make to you. My father once did your father a grievous wrong, and I have made myself the happiest fellow in the world undoing it. However, as we are not to have any secrets from each other, you must know about this."

A look of astonishment came into Amy's blue eyes as she watched her husband proceed to the closet, throw open the door and go to rummaging about inside.

"What in the world are you looking for, Harry?" she asked as he returned to her side.

"I'm looking for something that doesn't seem to be there—the Gordon family skeleton, Amy. For the first time in fifteen years it is not to be found in that closet."

Just then a clanking tread was heard in the hallway without, the door was pushed slowly ajar and the skeleton limped in, supporting himself on a crutch and looking very much the worse for wear.

"There it is!" cried Gordon. "What's the matter with you, old chap? Here, sit down. I want to make you acquainted with my wife."

The family skeleton dropped into a chair and shook until it rattled like a score of castanets.

"I'm done for," it groaned. "You've fixed me, young man. I just dropped in to say good-by forever. But don't introduce me to your wife. We met before."

"That's so, Harry," said Amy. "I know all about this family skeleton of yours. Don't let it worry you, my dear," and she threw her soft arms about his neck. "Let the dead past bury its dead. If we are happy, isn't that enough?"

"Enough, yes!" and he pressed a rapturous kiss upon her fair cheek.

That kiss pronounced the doom of the Gordon family skeleton. Forthwith it began to fade into the air, finally vanishing and leaving not a wreck behind.

Mean people say that the man a widow selects to support her at her husband's funeral is the one she usually marries afterward.

SPOILING A HUSBAND.

A HUSBAND can be spoilt by various methods. He can be so overwhelmed by a thousand-and-one attentions of love and kindness on the part of his wife that he accepts this role of divinity as a matter of course, and becomes the incarnation of selfishness; or he can be made to become a nonentity by the overbearing conduct of a dictatorial wife, who keeps the reins of government in her own hands and drives all vestiges of manhood out of her husband.

The woman who manages to spoil her husband by the first course of action does so quite unwittingly. She is usually a good-hearted, affectionate creature, who is constantly yearning to display her love by word and by deed. Probably before she married she spoilt her brothers by waiting on them hand and foot. Whether she received their thanks or not was quite immaterial to her. During her engagement her demonstrativeness was held in check by natural maidenly reserve, but once married, the old instinct asserts itself, and she instantly sets to work to squander the wealth of her love by lavishing it upon the object of her affection.

By degrees the lover-like attentions of the young husband grow fewer in number, and colder in proportion. Whereas before marriage he waited upon her, anticipating her wishes with lover-like rapidity, she now waits on herself. Complete self-effacement marks her status. The choicest fruit, the most comfortable chair and the coolest corner of the room, each is allotted to the spoilt husband, who accepts all as a matter of course.

He allows her to fetch and carry for him, often without a word of thanks. Truly a spoilt husband, this, and a spoilt disposition in consequence, which exerts a potent influence on those with whom it is brought into contact during the routine of daily life. This might have been otherwise had a little common sense and self-restraint on her part led her to exact her due share of respect and devotion.

Submits and Then Kicks.

Rev. E. S. Tead, pastor of the Somerville, Mass., Congregational Church, said the ladies of his church should take their hats off and, like a good little wife, Mrs. Tead sat bareheaded through the service on Sunday. But she did not like it, and said, naively: "Of course I sat bareheaded through the service. What else could I do? I am the pastor's wife. Think of what people would say if I went directly contrary to Mr. Tead's request. All the same, I think it's too bad if we are not to be allowed to wear hats to church, same's we've always been accustomed to."

MRS. E. S. TEAD.

The Wife's Portion.

It seems to me that no class of women work as hard as the farmers' wives. By this I do not mean the wealthy or even the well-to-do farmer, but the wife of a man who is doing his best to get a living and pay for his home. If the woman is a true helpmate she will help in a way by being careful of expenses and see that nothing goes to waste. It is comparatively easy when there is a limited number of little folks to be cared for, but the mother of a large family who is the wife of a farmer in poor circumstances has no rest day or night. While the work is hard the care presses the most heavily. It seems to me that very few compared with the many really enjoy life; they are so dissatisfied with what they can afford that it takes away the enjoyment of what they do have. A very good way is for the woman to have a certain share of the profits as her own, to do with as she pleases. There is no justice in the wife of any man working hard for the family and trying to earn her clothes besides. There is no true wife but earns her support and should have it. She will also consider circumstances and guide herself accordingly.—Orange Judd Farmer.

What to Expect in a Child's Love.

I do not think we should expect of children the sort of love of which we ourselves are capable. The child's love for the parent and the parent's love for the child are essentially different, and we may only arouse a sort of antagonism in the young by insisting upon our right to a self-sacrificing affection. Let us be content with the sweet dependence, the demonstrative fondness that is nature's response to our nature-prompted bestowal of ourselves upon our children. A degree of sturdy selfishness, however, is the prerogative of healthy childhood, and cannot be regarded as altogether blameworthy.

The Woman Who Stoops.

The woman who stoops is rare, thank goodness, but she does exist as an eyesore to beholders and a discomfort to herself. Weakness of the system is sometimes responsible for stooping shoulders, but carelessness is the great cause. Poring over books, writing for hours at a time and neglect to aid a defective vision with glasses are the main causes.

The cure should begin with the pillow. Use one small, flat pillow at night or dispense entirely with the luxury of a head rest. Bear the infirmity in mind and walk erectly and sit with the shoulders where they should be. Expand the chest and keep the eyes on a level with people's faces. Practice walking about the room with a book balanced on the head and hold the chin up when reading, with the book placed on a level with the face. Have the eyes tested occasionally, and if you need glasses procure them at once. Often the trouble is but temporary and the use of glasses for a few weeks or months will remedy the eye trouble.

A Heroine.

She rescued Jas. Young at Atlantic City. To-day she is the heroine of that city, where policemen take off their hats to her and people cheer her as she passes along the street. Frances is 12 years old. She was at the wharf when, as the result of bantering by several men, James, who is aged 14, dove off the pier. He could not swim, and called for help. While the men laughed at him the girl jumped into the water and brought him ashore unconscious. He was soon revived, and the first intimation Frances had that she had done anything wonderful was when Young's parents and 300 neighbors called on her and made speeches to her and gave a purse full of gold to her.

FRANCES FRENCH.

The Wrinkles of Youth.

Note the women you meet each day and see how many smooth foreheads you see even on young faces. Almost all of the wrinkles and puckers are the result of carelessness—the few exceptions are lines caused by pain and suffering. The long, straight lines on the forehead are caused by the senseless habit of elevating the eyebrows. That is supposed to give expression to the face, when all it really does is to make ugly lines with which need quantities of cold cream and gentle massage to remove. Middle-aged faces are often marked by lines just over the temples, while the rest of the face remains smooth and young looking. They can be avoided by the exertion of a little thought, a little care in keeping the face in repose. And just think how you can rest the poor, overworked muscles by allowing the eyes and mouth to give the necessary expression and serenity to spread itself over the remainder of the features.

How Women May Rule.

Among the more delicate weapons used by women tact is one of the most effective—the power of listening, of brightening at the proper moment, and laughing at the right joke, and of knowing the exact temper in which a man is conquerable, and when it is best to let him alone. A woman who possesses this weapon generally rules by that fine instinct which strengthens her own position by strengthening her husband's. It is a feminine weapon guided by a multitude of little wisdoms and precautions, and by arts as varied as the sex. It rules a man so gently that he is kept in constant good humor with himself; nor is he uncomfortably conscious that he has laid down all his own arms before this sheathed sword. If there be any other weapon equal to tact for domestic use, it is silence. In the hour of revolt this force is supreme.—Ladies' Home Journal.

Leads an Orchestra.

Miss Viola Sanford, 25 years old, is the leader of an orchestra of men in Charleston, S. C. As a young girl she conducted an orchestra of men and women. At the Atlanta exposition she was given a pearl brooch by the ladies. She plays for all the leading dramatic attractions that visit Charleston. She tells a laughable experience with a well-known New York manager, to whom she had been presented hurriedly as "having charge of the music." Taking it in a literal sense, he brought forth a liberal supply of sheet music and put it in her care, then remarked: "Little girl, how long before your father will be here?"

MISS SANFORD.

The Tight Skirt.

Of course, the new skirt, fitted as it is without a single wrinkle over the back, when trailing a foot or two in length over green lawn or velvet pile carpet, is all very well; but how about the half-attempted, half-accomplished version of the dressmaker who just misses the right curves and grows creases in the wrong places? Then, indeed, the drastic denouement is obvious. The new dresses in her hands become deeds of disaster instead of things of beauty, and there is much gnashing of teeth over disappointed ambitions.

A Hint.

After all, it's a bit cruel to take flowers from their cool resting places in a vase of water, and choke them to sudden death by wearing them in the hot streets. A good deal more enjoyment can be had out of them by letting them live in peace, and in looking at them comfortably encased in a vase of water.

Protect Our Food.

The doctors inform us that alum is a poison, and that alum baking powders should be avoided because they make the food unwholesome. Prominent hygienists, who have given the matter most study, regard these powders as an evil that should be suppressed by state action. In Minnesota and Wisconsin alum powders are not permitted to be sold unless they are branded to warn consumers of their true character, while in the District of Columbia the authorities have, under the direction of Congress, adopted regulations to prohibit the use of alum in bread altogether.

Are not the people of other states, as well as those of Minnesota and Wisconsin, entitled to warning of a danger which is apparently menacing them at close hand, and is not the whole country entitled to absolute protection, as the people of the District of Columbia are protected, by legislation which is entirely prohibitive?

Until we can have protection in the form of a statute, how can our state boards of health, state analysts or food commissions better serve the public than by publishing in the newspapers from time to time the names of the baking powders which they find to be made from alum?

Meantime, it will aid the housewife in designating the alum powders to remember that all powders sold at twenty-five cents or less per pound are of this dangerous class. Pure cream of tartar powders are usually sold at from forty-five to fifty cents a pound.

Strange French Laws.

A trial has just taken place at Paris which may serve as a warning to American tourists visiting France.

A well to do man of perfectly clean record and good social position named Froment Adelot has been sentenced to two months' imprisonment for wearing, without right, in the buttonhole of his coat, the tiny bow of red ribbon usually worn by the knights of the French Legion of Honor.

You can buy them for a few cents in any of the shops devoted to the sale of insignia of European orders, and I have known of not a few English and American tourists who, seeing a number of people wearing these little bows of red ribbon in their buttonholes, did likewise.

This, however, entails heavy penalties, and it is punished by the authorities as the illegal wearing of the insignia of the national orders.

It must be thoroughly understood that even supposing any American belongs to some patriotic or other society here in the United States, the insignia of which comprises a bow or button of red ribbon worn in the buttonhole, he cannot wear it in France without risking jail.—Washington Post.

The Curious Cassowary.

Every explorer who visits the Australasian islands discovers a new kind of cassowary. None of these birds possesses any wings to speak of, and their bodies are clothed with dense masses of curious, hairlike feathers. According to a recent traveler, these feathers are put to a very remarkable use.

When a cassowary feels hungry—so the legend runs—it wades out into a stream until only its head and neck are above water and spreads out its long plumes on either side. Numbers of unsophisticated little fishes immediately mistake these for a new kind of water weed and nestle confidingly up to the motionless cassowary for shelter.

Then that artful bird suddenly presses his feathers close against his body, walks ashore and shakes out his prisoners on the bank; so that he not only enjoys a delightful bath, but obtains an excellent meal into the bargain.

The Rat That Sailed.

A rat was caught alive on board a naval vessel in a trap, and the beast was thrown from the trap into the water without being killed. A large gull that was following in the wake of the ship to pick up scraps of food thrown overboard by the steward swooped several times, endeavoring to pick the rat up. Once the bird got too close to the rat's jaws, and the beast grabbed it by the neck. After a short fight the rat succeeded in killing the bird. When the gull was dead, the rat scrambled upon the bird's body, and, hoisting one wing as a sail and using the other as a rudder, succeeded in steering for the shore. Whether the rat reached shore or not is the question, since the ship soon got out of sight of the skipper and its craft.

It Grades Down.

When a girl's engagement to an out of town man is reported, it is first said that she is to marry a king. As time progresses the girl's mother confesses that the young man is a prince. It leaks out later that he works on a salary and has to work Saturday nights, and later, just before the wedding, no one is surprised at learning that he is a clerk and gives dancing lessons on the side to make a living.—Atchison Globe.

Birthmark In the Eye.

Jesse Lee of Atlanta has the letters of the alphabet clearly imprinted on the iris of his eyes. He inherits this strange phenomenon from his father, A. F. Lee, who had the same markings on his eyeballs. The grandmother of Jesse Lee is said to have pored incessantly over the Bible previous to the birth of her son, and it is supposed that the birthmark is due to her constant application to the letters of the alphabet.

Helps Trade.

Whenever a young wife proposes to bake her own bread in order to save 5 cents a week, the man who has put on the market an infallible cure for dyspepsia smiles like a cat that has just eaten the canary.—Nauvoo Rustler.

FOR LITTLE FOLKS.

A COLUMN OF PARTICULAR INTEREST TO THEM.

Something that Will Interest the Juvenile Members of Every Household—Quaint Actions and Bright Sayings of Many Cute and Cunning Children.

There's a dear little maid in the fashion-plate book,
(I'm glad it's not Bessie nor me!)
She always has such a dressed-up look,
With her dainty hands bent in a tiresome crook.
How she stands it we never can see;
The quaint little fashion-plate girl!

I know she'd be frightened to slide down the hay,
Or to frolic and romp as we do.
Supposing we wait till some sunshiny day,
And then ask her out on the hillside to play.
I think she'd be willing, don't you?
The poor little fashion-plate girl!
—St. Nicholas.

Watermelon Time's a-Comin'.

Old wortermelon-time is a-comin' 'round again,
And they ain't no man a-livin' any tickleder'n me,

A HAPPY DARKY.

For the way I hanker after wortermelons is a sin—
Which is the why and wherefore as you can plainly see.
—James Whitcomb Riley.

How a Doll Averted War.

A strange story is told of how a child's plaything once had a soothing influence upon a warlike Apache tribe, and was the means of avoiding a serious war. It happened when Mr. Bourke was in Arizona with General Crooke. The General was trying to put a band of Apaches back on the reserve, but could not catch them without killing them, and that he did not want to do. One day his men captured a little Indian girl and took her to the fort. She was quiet all day, saying not a word, but her black beads of eyes watched everything. When night came, however, she broke down, and sobbed just as any white child would have done.

They tried in vain to comfort her, and then Mr. Bourke had an idea. From the Adjutant's wife he borrowed a prety doll that belonged to her little daughter, and when the young Apache was made to understand that it was hers to keep, her sobs ceased and she fell asleep.

When morning came, the doll was still clasped in her arms. She played with it all day, and apparently all thought of ever getting back to her tribe had left her.

Several days passed, and as no overtures about the return of the papoose had been made by the tribe, they sent her, with the doll still in her possession, back to her people.

Mr. Bourke had no idea of the effect his benevolent act would have upon the Indians. When the child reached them, with the pretty doll in its chubby hands, it made a great sensation among them, and later on its mother came back to the post with it.

She was kindly received, and hospitably treated, and through her the tribe was soon afterwards persuaded to move back to the reserve.

The Boy Talked Slang.

Nice little boys are always the subject of friendly interest, but one never knows what kind of an answer to expect from them when questioned.

"You are a nice little boy," said a kindly old gentleman to a bright youngster of 5. "Have you any little brothers?"

"No, sir," replied the boy; "I'm rather short on brothers, but I've got sisters to burn."

More Hungry than a Schoolboy.

The other day a certain little boy brought home with him from school a remarkably voracious appetite, and when he sat down for his luncheon he said: "Oh, I'm so hungry. I could just eat anything. I don't believe there ever was anybody as hungry as I am now." Whereupon his mother laughed and told him a story of a certain hungry man who lived many generations ago. This man's name was Albinus. Albinus was a Roman who lived in the days when the Roman empire was flushed with glory and contended with Severus for the ruling of the land. Judging by descriptions now extant of Albinus his appearance must have been anything but prepossessing. He had a body resembling a leopard's, so historians tell us, the feet of a bear and the mouth of a lion. But strange though he undoubtedly was to look upon, the most remarkable thing about him was his appetite. This was so greedy that it took 500 figs, 100 peaches, 10 melons, 20 bunches of grapes, 100 small birds and 400 oysters to satisfy it each morning at breakfast. The exact quantity of food he ate for dinner and supper has not been recorded, but as breakfast was the lightest meal of those old Roman heroes it is to be presumed that at the more pretentious meals a proportionately large amount was consumed. When the boy's mother had finished telling him about this great eater of antiquity the boy pushed back his plate and said: "Well, I guess I can't come up to him. I may as well go back to school."

Jonah the Strongest Man.

Sunday school teacher—Who was the wisest man, Johnny?

Johnny—Solomon.

Teacher—That's right. Now, Willie, who was the strongest man?

Willie—Jonah.

Teacher—Wrong. But what reason have you for believing Jonah was the strongest man?

Willie—'Cause the whale couldn't hold him after it got him down.

Couldn't Get the "Teen."

"Mamma," said little Bessie, who was just learning to make figures, "can you make thirteen?" "Certainly, my dear," answered the mother. "Then I wish you'd show me how," continued the little student. "I can make the thirt all right, but can't get the teen."

The Other Place.

"Now, boys," said the Sunday school teacher, "our lesson to-day teaches us that if we are good while here on earth when we die we will go to a place of everlasting bliss. But suppose we are bad, then what will become of us?" "We'll go to a place of everlasting blister," replied a small boy at the foot of the class.

He Would Be a Preacher.

"Mamma," said small Charlie, "I think I'll be a preacher when I grow up." "Very well, my son," replied the fond mother, "but what put the idea into your head?" "Well," replied the little fellow, "I s'pose I've got to go to church all my life, anyway, and it's a heap more fun to walk around and talk than it is to sit still."

His Visitor.

Success reminds us that little humble deeds of kindness and mercy were the commonplaces of Mr. Gladstone's life. He did not say, "I am great; therefore I may be absolved from the duties of lesser men." To him, as to every true soul who sees life as it is, the human was worth more than any mere intellectual attainment.

"Has any one been to see you?" asked the Vicar of St. Martins-in-the-Fields of a poor crossing-sweeper who was lying ill.

"Yes," was the answer, "Mr. Gladstone."

"Which Mr. Gladstone?"

"Mr. Gladstone," repeated the sick man.

"But how came he to visit you?" asked the vicar. He could not understand why the Chancellor of the Exchequer, though he was then living in that parish, should call upon a crossing-sweeper.

"Well," said the invalid, "he always had a word for me when he passed my crossing; and when I was not there, he missed me. He asked my mate, who had taken my place, where I was, and when he heard I was ill, he put down my address on paper. So he called to see me."

"And what did he do?"

"Why, he read to me out of the Bible, and prayed."

A Welsh Sermon.

The Welsh are noted for their fondness for sermons and music. The annual Eisteddfod, the national bardic congress, is attended by thousands, who, on the great day of festival, "chair" the fortunate bard, the winner of the prize.

A similar enthusiasm greets the Welsh preacher who is eloquent in speech and practical in expounding the scriptures. The following story of a Welsh preacher, told in the "Journals of Walter White," illustrates the graphic, simple exposition, which commanded the attention of the congregation:

"Noe worked at the Ark, driving in nails, plump, plump, plump. The haythen came and said, 'Noe, there's good hunting in the woods here, hares and foxes, leave your work and come and hunt.' But Noe kept on hammering, plump, plump, plump.

"The haythen came again: 'Noe, there's good beer at the Red Lion, leave your work and come and drink.' But Noe kept on hammering, plump, plump, plump; and then the rain came, and the flood lifted up the Ark, and carried Noe away, and left the haythen all screaming and squabbling in the water.'"

A Common Experience.

"I am afraid you will be angry with me."

Mrs. Von Blumer looked at her husband anxiously as she spoke, and, taking from her desk a neat array of papers, laid them where it was possible for her to snatch them back in an emergency.

"The fact is, dear," she said, "I have been buying a few clothes, and these bills are a trifle more than I expected. I had to have the clothes, of course, but I suppose I might have got along with less."

"Of course," said Von Blumer, as he took up the papers and glanced over them carelessly, "you might have got along with less. But, never mind; it's all right." A great feeling of relief showed itself in Mrs. Von Blumer's face. "I expected you would make an awful fuss," she said in some surprise.

Von Blumer looked at her with a joy that no transient setback could dampen.

"I would under ordinary circumstances," he said. "But I have just been examining my dress suit and find I can wear it another season."—Life.

It doesn't make a miller dyspeptic to bolt his meals.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY SEPTEMBER 22..... 1899

In an article by Henry G. Hanks in the *Electrical and Mining Review* the following extract will be found of interest to our readers:

"A single mineral fragment, picked up by chance on an ice bound island, caused the second and third voyages of Frobisher, which were followed by the exploration and settlement of a large area of northern North America. There is a certain similarity between this circumstance and the alleged accidental finding of a small gold bearing mineral specimen in California thirty-five years ago.

The mining excitement in Owens Valley, now Inyo County, California, in 1862 was indirectly caused by the discovery of the Comstock mine in 1859. All the lost mine stories since the Death Valley tragedy were revived, and several parties started out in the hope of finding another great mine. Of these Dr. French's party in 1860 were practically the pioneers. In the autumn of 1862 a small piece of mineral, not larger than a hickory nut, as I remember it, was brought to San Francisco and shown to many people. Of this specimen, which showed considerable free gold, the following story was told.

"While serving on a picket post duty a United States soldier, who had been actively engaged in the Indian war which followed the discovery of the Comstock, had the inclination to examine the rocks near his camp, from which he broke this single specimen. He described the locality as being in the range of mountains east of and parallel to the Sierra Nevadas, and forming the eastern boundary of Owens Valley, ten or fifteen miles north of Owens Great Lake. Upon this showing some prominent men of San Francisco decided to send out an exploring party to search for the soldier's mine or discover others, and the San Carlos Exploring and Mining Company was formed. A party of three was outfitted and sent away. One was a well known mountaineer and author, another was an ex-cavalry captain, who had served in the Mexican war, and the third one having some knowledge of geology, mineralogy and mines. The explorers went to Stockton, purchased horses and pack mules, followed roads and trails to the Yo Semite, thence to the crest of El Capitan, crossed the Yo Semite Creek above the falls, camped at Lake Teneya, named some mountains including Cathedral Peak, followed up Toulumne Valley to Mono Pass, climbed down Bloody Canyon to Mono valley and went by way of Mônoville and the north shore of Mono Lake to Bodie and Aurora, where they remained for several days. Leaving Aurora, the party continued their journey southward, passing along the eastern shore of Mono Lake, Adobe Meadows, Hot Springs and Whiskey Flat to the head of Owens Valley, down which they traveled to a point where Owens river skirts the foothills of the Inyo mountains, then unnamed. Here they made their camp, about six miles northeast from Camp Independence. From Bodie to this camp the party did not see a single human being excepting a timid young Indian who came to the camp asking for food, for which he gave a full equivalent in labor; nor any habitation save a deserted cabin at Hot Springs, the owner of which had been recently killed by the Indians. The next day after making camp the party discovered a vein of rich galena within a mile. Some large masses of the glittering ore were broken from the vein and piled in a goodly dump by the side of the discovery croppings. From this time a genuine mining excitement began; miners, prospectors and adventurers came into the valley and the population thereby increased rapidly. Two rival towns, San Carlos and Bend City, were laid out, and prospectors swarmed over the foothills and valleys on each side of the valley, and many discoveries of rich ore were made; but before these could be more than prospected an Indian war broke out and all mining operations were practically suspended for months. Many families left the valley and others gathered at Union Mill, an adobe structure recently built. This structure was fortified and the men organized for military duty, standing guard day and night. When these troubles were seemingly settled, many returned; but the same conditions being repeated caused another warlike outbreak. When at last the hostile Indians were driven from the valley or settled on reservations, mining was resumed, but the elements of failure began to appear. The first difficulty was the refractory character of the ores, refractory, however, only when fruitless efforts were made to reduce them by amalgamation. It was then discovered that mining companies, mostly in San Francisco, cared more to sell and manipulate stocks than to open the mines. Not a single hoisting plant was set up in the valley. A few shallow shafts revealed well defined veins showing copper, lead, gold and silver. At that time such ores had no immediate value, for those containing gold could not be induced to part with that metal by any amalgamation process. Many miners, discouraged by these conditions, went to new districts which were continually being discovered. A few special mines were found, the superficial ores of which could be milled with success in a common quartz mill. So-called base metal ores, which were largely in excess of the free milling ores, were generally too poor at that time to warrant the high cost of shipment to the smelters. At first this was considered an insurmountable difficulty. Several attempts were made to introduce the Mexican mode of smelting in a small way, but only with partial success.

A NIGHT OF MISERY.

RIDING IN A LOCKED BOX CAR WITH TWO SCARED MULES.

An Experience Which, According to the Victim, Made Sherman's Definition of War Seem Like the Description of a Sunday School Picnic.

"Well," said the Footprint to Slug Seven as he settled down on his stool and began to throw in a handful of type, "if I didn't have a time of it getting down here out of those mountains."

"Been up in the mines?" inquired Slug Seven.

"Yep," replied the Footprint. "Just came out. Footed it from Angels to Milton yesterday and rode into Stockton on a side door sleeper last night. A side door sleeper," continued the Footprint, "is not the most comfortable mode of traveling. Personally I prefer to ride on a red cushion, but the heartless and exorbitant demand of the railroad trust for spot cash compelled me to walk or come as freight. I came as freight."

"Sure," said Slug Seven.

"The unpleasant feature of the trip," continued the Footprint, "was the base betrayal of confidence on the part of the brakeman with whom I negotiated for an undisturbed passage. For a cash consideration of six bits and a drink of liquor he verbally contracted to waybill me from Milton to the division end at Stockton. We went up street to take the drink and—well, you know how one word brings on another. By train time the $4 I had sunk in my jeans had been fished to the surface and sent across the bar for red liquor.

"The brakeman was full when he started for the yards. So was I when I started after him. The brakeman confided to me on the way through the yards that he owned the whole train and I could ride anywhere and any way I wanted to. I told him that I was surrounding at least a quart of Milton whisky and if it was all the same to him and he had a nice, dry, empty box car I would be shipped as an unbroken original package. He agreed, and we went over where the train was standing made up to find that empty. The brakeman ran a door open, gave me a hurried boost in and ran the door shut and locked it. After a bit I struck a match to look about and what do you suppose that cuss had done?"

"Give it up," said Slug Seven.

"Billed me as live stock, by gum! Fact! There I was locked in a box with two mules, both loose, and all of us good to keep company to the division end. What was that Sherman said about war? Said it was hades, didn't he? Well, it ain't. It's only an imitation. The real, orthodox, rose colored hades is to spend a night in a locked box car with two mountain ranch mules.

"It isn't a long run from Milton to, and I concluded, after the train had bumped along about three miles and those scared mules had begun to charge around and kick a rat-a-tat tet-tat on the sides of the car, that the only plan of campaign left to me was a back movement and a sudden mounting of one of the animals. It wouldn't be a dream of pleasure on that mule's back, but it would be safer than dodging long rapid fire hind heels unlimbered for action. I got on the mule all right, and after a little bucking he steadied down tolerably well. The animal was evidently scared to death and seemed to take comfort in being straddled by a rider.

"Well, I was just chuckling to myself over the state of affairs in the live stock department of the Expee railway and figuring that another hour would see us in the division yards, where my friend the brakeman would open the door, when the train stopped, evidently at a siding, as I knew we weren't near a station. We bumped about a bit and I took a double wrap in the mule's cora, then we stood still while some other cars were bumped about and then I heard two short toots of the whistle and a rumble that gradually grew fainter. The train had pulled out and we were side tracked!

"We staid there till morning, too, and I rode that son of a jackass, with a backbone like the ridge of a church roof, up and down and around that car every weary minute of all that weary night. To quit riding meant to go to sleep, fall off and have the liver and high lights and half tones trampled and kicked out of me by two scared mountain mules.

"I estimate that I rode that mule 136 miles and three furlongs in that car, and the car traveled 17 miles before being side tracked. The remaining three miles of the 20 between Milton and Stockton I made on foot, thus completing a journey of 156 miles 3 furlongs in a straight line between two given points that are but 20 miles apart, a mathematically impossible feat, accomplished by one jackass with the aid of two relatives on the male side of the house."

The Footprint sighed as he paused to bite off a chew of tobacco, and Slug Seven took advantage of the opening to remark that a man who had traveled so far under such circumstances must be dry.—Chicago Inter Ocean.

Proved His Theory, but Died.

The acme of realism was reached, though by accident, in a criminal trial a few years ago at Lebanon, O.

Two men had a personal encounter. One of them, after vainly trying to draw his pistol from his hip pocket, turned to flee. A moment later he fell, shot in the small of the back. One chamber of his pistol was found to have been fired. His assailant was tried for murder.

The defense contended that the man had shot himself while trying to draw his pistol, which had become entangled in the lining of the pocket, and that the prisoner's shot had not taken effect. The prosecution contended that such a wound could not have been self inflicted.

The defendant's counsel, Clement L. Vallandigham, undertook to demonstrate to the jury just how the dead man's pistol had hung in the pocket and just how possible it was to inflict such a wound. Suddenly there was a loud report, and the lawyer sank to the floor. The ball had entered the back almost in the identical spot where the dead man had been shot.

The defendant was acquitted. Mr Valandigham died.—Cleveland Plain Dealer.

DR. JOHNSON'S CONVERSATION.

[I was very assiduous in recording his conversation.—Boswell.]

What Johnson said! How talk would wane,
How mute would every man remain
When he, with utterance loud and slow,
Some truth would teach, some moral show!
His weighty words—a ponderous train—
Exploring freely thought's domain
With vigorous wit and wisdom plain,
And none would dare to question low
What Johnson said.

But "Goldy," of distinction vain,
Might interrupt in random strain,
While "Bozzy" listened all aglow,
Resolved his journal soon should know,
To all mankind's enduring gain,
What Johnson said.

—Dora Cave in Gentleman's Magazine.

HE ONLY LOOKED ON.

The Man Who Went to Boss the Hoisting of a Piano.

"It seems to me they don't do anything now in the same way they did a long time ago," said a man who had gone up to his house to boss the job. "I bought an upright piano, and when I had paid for it I told the agent I would be at the house at a stated hour, as I wished to be present when the piano was hoisted. I noticed the agent smile, but he said nothing. I thought no more of it until after I had gone home and noticed the way in which the piano was moved into my apartment on the fourth floor. When the men drove up with their cart, I asked them where the hoisting machine was. One of them whistled, and the other one said it would be there all right, and he winked at the fellow with the puckered mouth.

"Then they opened a kit of tools and began taking that piano to pieces. They first removed the action, and one of the men asked where he would take it, meaning what floor. While he was gone another man unscrewed the legs which supported the keyboard. The third man carried up the legs, and while he was gone the first man returned and took up the keyboard which the man with the screwdriver had taken off. That left the back and sides of the case and the sounding board. They were not taken apart. A fourth man was picked up and given the job of assisting the three in carrying up what remained of the piano. All this was done in about 10 minutes. I had nothing to do except to look on. As the team moved away one of the men called back, 'We'll send that hoisting machine up later.' Twenty years ago my piano was delivered by safe movers. They took half a day to do it."—Chicago Inter Ocean.

Liszt's Agony of Sensitiveness.

"Liszt had already played a great fantasia of his own and Beethoven's twenty-seventh sonata in the former part of the concert. After this latter piece he gasped with emotion as I took his hand and thanked him for the divine energy he had shed forth. At last I had managed to pierce the crowd and I sat in the orchestra. My chair was on the same board as Liszt's piano when the final piece began. It was a duet for two instruments, beginning with Mendelssohn's 'Chante Sans Paroles' and proceeding to a work of Liszt's. We had already passed the delicious chime of the 'Song Written in a Gondola.'

"As the closing strains began I saw Liszt's countenance assume that agony of expression, mingled with radiant smiles of joy, which I never saw on any other human face; only in the paintings of our Saviour by some of the early masters. His hands rushed over the keys, the floor on which I sat shook like a wire, and the whole audience was wrapped in sound, when the hand and frame of the artist gave way; he fainted in the arms of the friend who was turning over for him, and we bore him out in a strong fit of hysterics.

"The effect of this scene was really dreadful. The whole room sat breathless with fear, until Hiller came forward and announced that Liszt was already restored to consciousness and was comparatively well again. As I handed Mme. de Cicourt to her carriage we both trembled like poplar leaves, and I tremble scarcely less as I write."—Pittsburg Dispatch.

Tired Eyes.

A correspondent of Popular Science News tells of a party of Alpine climbers who, having spent five hours among the snows of the mountains, returned to their homes after dark. A great change had to all appearance taken place since the night before. Instead of being illuminated in the usual way, the place was supplied with green lights.

It took the travelers a little time to realize that they were suffering from Daltonism, or color blindness, superinduced by eye fatigue. The intense light caused by the sun shining upon the snow had for the time rendered them unable to judge of colors and given rise to their curious mistake. Three hours elapsed before the eyes regained their normal condition.

Chevreul explains that the eye cannot gaze long upon a given color without tending to become insensible to it. When the eye looks long upon a color, it should be rested by the complementary color. Thus an eye that has grown tired with green should be rested by red, which is green's complementary color.

How He Explained.

"How do you explain the phenomena upon which you base your new discovery?" asked the inquisitive friend.

"Why, I adopt the usual method. I use words so big as to prevent anybody who is not in the same business from undertaking to contradict me. And then if anybody objects, I can say it is professional jealousy."—Washington Star.

New York a City of Auctions.

New York is the city of auctions. There are 800 reputable auction houses and three times that number of auctioneers in New York, and they do a yearly business of about $75,000,000. This does not take into consideration the transactions of scores of small auctioneers who devote themselves entirely to the wants of the east side.—New York Herald.

Stirrups were unknown to the ancients. They were first used in the fifth century of our era, but were not in common use even in the twelfth century.

There are 48 different materials used in constructing a piano, from no fewer than 16 different countries, employing 45 different hands.

He Walked.

Time, 11 p. m. "They tell me your gait was esteemed one of the finest in the regiment."

"You flatter me."

"No; Lieutenant Wagstaff said you marched magnificently."

"The lieutenant may not be a good judge."

"I fancy he is. To my mind there is nothing that makes a man more presentable and really attractive than a graceful walk. My curiosity is greatly aroused. May I ask a favor of you?"

"Certainly."

"Then I would like to see you walk."

And she handed him his hat.—Cleveland Plain Dealer.

Speech and Hands.

A professor who has made a study of children says he has discovered why the majority of the people are right handed. Infants use both hands until they begin to speak. The motor speech function controls the right side of the body, and the first right handed motions are expressive motions, tending to help out speech. As speech grows so does right handedness.

Uses of the Mouth.

A baby tries to put everything he finds in his mouth, but even at that he uses his mouth to better advantage than most men.—Detroit Journal.

The Japanese have three forms of salutation—one for saluting an inferior, one for saluting an equal and another for saluting a superior.

OFFICIAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schen, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 12th day of August, A. D. 1899.

D. J. HESSION Clerk

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als, Plaintiffs, vs. Gilbert J. Roote et als, Defendants. Summons. P. W. Forbes and P. H. Mack, Independence, California, Attorneys for Plaintiffs.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Len. H. Yandell, Attorney for Plaintiff.

The people of the State of California send greeting to Susie Troeger, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 8th day of September, A. D. 1899.

D. J. HESSION, Clerk.

(SEAL) By C. N. ROSE, Deputy Clerk.

Len. H. Yandell, Independence, Cal. Attorney for plaintiff.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEH. C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899. D. J. HESSION, Clerk.

(SEAL) By C. N. ROSE, Deputy Clerk.

P. H. Mack, Independence, Cal. Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale, to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to-wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven, in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be receive at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased.

P. H. Mack, Attorney for Administrator.
Dated August 23d, 1899.

Respectfully submitted,
I. J. WOODIN,
Ex Public Administrator.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO, }

I. J. Woodin, being first duly sworn according to law, deposes and says: That he is the ex-Public Administrator of Inyo County, State of California. That while acting as Public Administrator letters of administration were issued to him in the matter of said estates; and that said letters have not been revoked. That he has read the foregoing return and account, and that the matters therein contained are true in substance and in fact.

I. J. WOODIN.

Subscribed and sworn to before me this 19th day of July, 1899.
(SEAL.) D. J. HESSION, Clerk.

TO LAKE TAHOE

A TRIP OF RARE ITEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above. Round Trip Tickets for sale at Ticket Office Reno. aug5-tf

SUPERIOR COURT PROCEEDINGS

Hon. Walter A. Lamar, Judge.

MONDAY, Sept. 18, 1899.

J. J. Wall vs. Surprise Mining and Milling Co.—Filed order for publication of summons.

Methodist Church.

There will be services as follows on Sunday, Oct. 1st:

Lone Pine—Preaching by the pastor at 11 a. m.

Georges Creek—Preaching service at 2:30 p. m.

Independence—Sunday School at 2:00 p. m., and preaching at 7:30 p. m.

All are cordially invited these services as they are convenient for them.

JOHN J. PARDEE, Pastor.

Real Estate Transfers.

The following deeds have been recorded since September 14, 1899:

Anthony Rossi to Nancy M. Rossi—Sept. 14, 1899, Lot of land near Big Pine, gift.

John Collins is visiting in town for a few days.

Johnny Miles was down from Big Pine yesterday.

The Mairs' cattle are expected back from Long Valley to-night.

Neal Bell went to Big Pine this morning to bring home his wagon.

S. H. Spratt came down from Big Pine Saturday, returning yesterday.

Mr. Fuller has located the first extension of the Farrington lead mine. Wish him luck.

Mr. Burt, formerly of Darwin, has made a location in Lead Canyon showing a good vein in galena ore.

J. W. Dobson, Superintendent of the Sierra Forest Reserve, is here looking after some timber cutting matters.

Sam Tyack came down from Bodie and was an interested spectator at the Fair at Big Pine. He is spending a few days in town.

Sub Johnson, Frank Carson and Sam Lunt will return this evening from Mt. Kearsarge, where they have been doing some surveying.

The Board of Supervisors met last Monday and fixed the rate of taxation for the ensuing fiscal year at $2.25 on each $100 of valuation.

Lieutenant Henry B. Clark, Dr. F. Pearl and five men from the Forest reserve were in town last week. They are looking out trails through the mountains.

Superintendent Hoskins of the Reward was in town to-day. He reports matters running along as usual. The cyanide plant is working very satisfactorily.

Mr. Turner, who is in charge of the geological survey, passed through town last Monday on his way from Silver Peak to San Francisco. They stopped at McIver's ranch a few days to rest up.

L. H. Wise, a special agent of the General Land Office, has been here for several days past looking into the matter of Indian allotments. He is said to be in favor of cancelling the majority of them, as the Indians are not living upon or using them in any manner.

Messrs. Cohen and Oxnane, mining experts for Captain De La Mar, arrived here on Friday's train for the purpose of examining the Barnes & Anderson mines. They brought in a number of pieces of beautiful specimen rock. At one point in the Alhambra the vein is twenty inches wide and there is a seam in it five inches wide that is alive with gold, running well up into the thousands. The main ore body, upon which most of the development work has been done, is four feet wide and will mill over sixty dollars per ton. Mr. Oxnane and Geo. Montgomery left yesterday for Saline and will go to Ballarat before returning. Mr. Cohen leaves for San Francisco tomorrow morning.

Dr. H. M. Hunter of Visalia has received the apointment of assistant agent of the State Dairy Bureau as inspector for inspection district No. 2, consisting of the counties of Tulare, Kern and Inyo. Dr. Hunter will immediately enter upon the discharge of the duties of his office, which is "to inspect dairies, factories of dairy products, and dairy products as to their sanitary condition, and as to the health of stock, and to prevent the sale of milk drawn from diseased animals to the people of this State, and to prevent the spread of infectious and contagious diseases common to stock."

THE FAIR.

Notes and Observation of the Week's Occurrences.

There was a large gathering of people from various parts of the County at Big Pine this week, to attend the annual Fair of the Eighteenth District Agricultural association. Mono and Alpine were sparsely represented, but Inyo was there in full force.

By Tuesday evening the exhibits at the Pavilion were in place and ready for inspection. The fruit and vegetables displayed were a surprise to everybody, as this was a year of short crops. The finest looking specimens of apples, pears, peaches, grapes, melons, potatoes, onions and pumpkins ever raised in this country or any other were brought in from Big Pine and the vicinity. Grain, mill-produce, and honey of the choicest variety were shown. One interesting exhibit was a buggy made entirely by Brad Collett of Bishop and painted by J. R. Weeks of that town. Mrs. Ober's carpet weaving machine with some of her carpet also attracted attention. For school work the Bishop school took the premium, the amount and quality of the work showing that both teachers and pupils had worked long and faithfully. Mr. Hampton's methods and devices for teaching various branches and impressing the youthful mind were especially meritable. In this connection the work of the Big Pine Indian school should not be overlooked. While not recognized in the premium list, it deserves a premium, showing what excellent work can be accomplished by the Indians under a competent teacher. In the art and needle-work departments some beautiful work was displayed. Mrs. W. W. Yandell's photographs prove her an expert in that line and Miss June Skinner's studies in black and white show what one of our girls with talent has accomplished during a term at Hopkins Art Institute. A rare display of pot-plants brightened up one corner of the room. There were several collections of preserved fruit and jellies, which one instinctively hurried past, as the more you stood and admired the more you coveted the same. The mineral display was rather limited. On Friday morning the cookery and dairy products were judged, and if any young man in the District is contemplating matrimony he'd better begin edging toward Big Pine right away, for the culinary display of the mother's and daughters was out of sight—soon.

On Wednesday evening a literary contest took place as follows.

First, second and third grades—"Entertaining Her Big Sister's Beau", Frankie Read, first prize. "Me And My Betsy", Wesley Newman, second prize.

Fourth and fifth grades—"Poor Little Joey" John Dixon, first prize.

Sixth, seventh and eighth grades—"Dunderberg's Photograph Album", Curtis Ober, first prize. "Tommy's Prayer", Clara Dawson, second prize.

Three young ladies delivered the orations. "The Benefits Derived From Our District Fair" was an able essay especially appropriate to the occasion, and Miss Minnie Allen was awarded the first prize. "A Plea For The Young", by Miss Celia Ober, showed most careful study and the highest literary merit. "Gomez, The Washington of Cuba" was a glowing tribute to the Cuban patriot dramatically rendered by Miss Maggie Peterson, who received the second prize.

A song by little Rosie Fletcher was part of the program.

On Thursday evening Hon. N. D. Arnot, Superior Judge of Alpine county, delivered the Fair address. The Judge dwelt upon the creditable and interesting showing the District had made in spite of its isolation and scattered population. A comparison between the first and last of these Fairs shows how our people are improving along every line, agricultural, educational, mining, stock raising etc. The Judge recognized the farmer as the bone and sinew of our district, and incidentally warned us against one of the dangers of our day, that of over-educating our children. The benefit of a practical education cannot be overestimated; but where the mind of the average child is developed and all training of a practical nature neglected, discontent for the younger generation and surprise and chagrin for the older are bound to result. It is beginning to dawn upon our intellects that the college bred man is not, as a rule, the successful man of the day. The Judge expressed his sincere gratitude for his hospitable reception at Big Pine and assured the people that their kindness was deeply appreciated.

Two well known attorneys, P. W. Forbes and S. E. Vermilyea were called upon for a few impromptu remarks. Mr. Forbes called attention to the great and varied resources of the District, and Mr. Vermilyea declared with truth and vehemence that these same resources are as naught unless we make them known to the outside world. He declared that we cannot expect to bring this country to the front by sitting with our hands placidly folded waiting for something to turn up. We lack energy and enterprise or we would have attracted outside brains and capital ere this. United effort in improving and advertising our country will eventually gain us recognition abroad.

On Friday evening the Fair was closed with a grand ball in Educational Hall. The friends who had gathered from all parts of the county and spent the week in social intercourse, now wound the Fair up fittingly to the tune of lively music and the clatter of supper plates.

The stock parade brought to view some fine live stock of various kinds.

The Big Pine Hotel proved equal to every emergency incident to the the crowded condition of the hamlet.

The combative spirit was uppermost among some of the Big Piners Tuesday, but they soon simmered down.

A gentleman representing Kohler & Chase contributed some good piano music at the pavilion, and incidentally advertised one of the firm's instruments.

Young Curt Ober would be great in pantomine.

The ladies of the M. E. Church furnished meals at the church during the week.

The costumes of some of the dusky Piute maidens would make you cross-eyed if you gazed long enough.

You can almost step across the river at Big Pine—if your legs are long enough.

Neal Bell won the spring wagon and Mrs. Gregg the preserved fruit raffled at the Fair.

The Indian accused of murder was turned loose with orders to leave the country. Somebody is selling whisky to the Piutes about Big Pine, and the people are considerably alarmed.

There was a unique Klondike exhibit at the Pavilion, collected on the ground by Oscar Hilton.

Two rigs collided Wednesday, one horse being pierced in the breast by a shaft of a cart and almost instantly killed.

Bishop ought to get a special prize for the fattest man and the thinnest man at the Fair. They weighed 307 and 107 pounds respectively.

Levy got behind a tree when the prize bull was led by with a chain, and Denny Hession gazed longingly at the buff Cochins.

S. P. Smith entertained a large number of people with an up-to-date gramaphone.

THE RACES.

The racing programme was undoubtedly the best from a sporting standpoint ever presented in the District. The races were all well filled and hotly contested. Owing to the fact that the track is but a half-mile oval, very narrow and the turns not graded the time was much slower than it overwise would have been and caused a great deal of wrangling over fouls. Following is the summary:

TUESDAY.

Indian pony race, mile and repeat, won by Smiling Jim, all the others flying the track.

½ mile and repeat, untried horses, won easily by Eclipse.

Eclipse	(Martineau)	1	1
Chappo	(Mitchell)	2	2
Amazon	(McKillips)	3	3

Time, :55, 55¼:

¼ mile and repeat, free for all. First heat Bob had flying start and opened up a big gap, winning by a neck from Quoin who came fast through the stretch; Quoin won second and third heats easily.

Quoin	(C. Mulholland)	2	1	1
Bob	(Martineau)	1	2	2
Dottie	(McKillips)	3	3	ro
Lone Star	(Randall)	4	ro	
Salvator	(Ober)	left track		

Time, :24, :24¼, :25

WEDNESDAY.

The men's bycicle was won easily by Buckman. The 2:40 class trot was the most exciting race of the meeting, each horse having won a heat. Inyo finished first in the first heat, Bishop a neck behind; but as both horses broke repeatedly Bay Jack was given the heat. In the second heat Bay Jack broke at the first turn and Inyo took a good lead, winning handily. Bishop trotted very steadily in the third heat and won easily. For the fourth heat Underwood replaced Horton behind Bay Jack but the horse was very tired and his position was not improved. Inyo got away fast and was never headed winning in a jog. Bishop's driver claimed a foul and the matter was taken under advisement till the next day. After a full examination the heat and race was given to Inyo.

Inyo	(Mulholland)	2	1	2	1
Bay Jack	(Horton)	1	2	3	2
Bishop	(Scott)	3	2	1	3

Time, 2:47, 2:44, 2:33½, 2:42

THURSDAY.

The ladies' bicycle race was won by Miss Powers. In the mile dash, running Quoin led the first time around but on the second round he left the track and before he got back the others had such a lead that he could not catch them; he came fast at the end and should have won easily. Two very handsome colts met to contest for the two-year-old purse, but owing to an unfortunate accident the Harry Gear colt was lame and could not make as good a showing as he should. A beautiful little grandson of Falliston carried off the honors.

(Scott)	1	1	
(Dixon)	2	2

Eclipse	(Naylor)	2		
Quoin	(C. Mulholland)	3		

Time, 1:56

FRIDAY.

In anticipation of the ball in the evening a big crowd of people were in town and the last day's racing was the best attended of all. The free-for-all trot was declared off and a special race for named horses substituted. Bishop and Bay Jack tried conclusions again; in the first heat Bishop was unsteady and Jack took the heat handily. In the second heat Bishop was steady and trotting without a break won easily; the third heat was a repetition of the second. The stallion Hillsdale, 2:15, was driven an exhibition mile against time; the condition of the track would not permit fast time to be made and his performance was a creditable one; he was nicely rated, trotting the first time around in 1:15, the second in 1:14¾, making the mile in 2:29¾. The last race of the meeting was a ¼ mile dash, free-for-all. Quoin barred. The starters were Dottie, owned by J. M. Horton; Bob, owned by R. W. Scott and Eclipse, owned by W. G. Sanger. The Sanger mare was the first away, followed by Bob and Dottie. Bob was sore and did not run up to expectations, Dottie winning easily.

Exhibition mile, to beat 2:38¼.

The Escape of Her "Rich Fool."

"THIS house to let."

It looked very big and imposing, this notice, and Mr. Dart stepped complacently backward to eye the general effect of it after he had wafered the document safely on the side of the front door.

"If people can't read that they must be blind! Now I'll go in and wait for some one to bite at the bait. No bother of real estate agents for me—no commission to eat up half the rent. I'll transact my own business or else I'll go into an idiot asylum!"

As he sat in the pretty reception-room belonging to the house which he had the good or bad fortune to own, he looked not unlike a big bumble bee in the heart of some huge tropic flower.

"It's trouble, trouble, and nothing but

"MOTHER, YOU MUST TAKE IT."

trouble," grumbled Mr. Dart, as he mused after his own saturnine fashion over the trials incidental to the position of landlord. "When it isn't taxes, it's leaky water pipes, and when it isn't that it's your neighbor's drains overflowing your cellar or your tenant taking French leave without paying his rent. I wish I was back on the old Stonyfield farm again, raising strawberries and cauliflowers. And I will be, too. I'll give this house to Harry Field; he's a good boy and if he really has fallen in love with pretty Olive Melton, it won't be a bad wedding present. I hope she's worthy of him—but women are all artificial nowadays. I suppose I must let him have his own way and go with him to see her this evening. For—Hallo, there! What's wanting?"

A tall, belligerent-looking man had given divers energetic jerks to the bell-knob.

"Is this house to let?" he demanded, very red in the face with much bell-pulling, as Mr. Dart thrust his head out at the window.

"Yes, sir, it is."

"How much is the rent?"

"Two thousand dollars."

"It's too much for a house in this locality."

"You think so, sir?"

"Yes, sir, I do."

"Well, sir, what a consolation it must be to you that you're not obliged to pay it."

And Mr. Dart drew his head back and slammed down the window, to the inexpressible rage of the tall man.

Hardly had he ceased congratulating himself on this masterly maneuver than a second peal reminded him that "this house" was yet "to let."

This time it was a fat woman, with a slovenly shawl and crumpled bonnet, and an abundance of cheap rings on her fingers. She went all over the house, and opened all the closet doors, investigated every separate cupboard shelf, and finally came to the conclusion that the house "would do."

"For, you see, I want a large house," said she, confidently, to Mr. Dart. "I keep a children's school and——"

"You do, eh?" said Mr. Dart. "Well, you can't keep it here."

"I've a great mind to take down the bill," he thought, with ruffled temper and face like a radish. "I hadn't an idea there was such meanness in human nature! Dear, dear, there comes somebody else—two ladies. I wish they were not ladies! I can kick a man downstairs when he says an impertinent thing to me, but I don't know how to deal with women! That nearest one is a clipper!"

The ladies were evidently mother and daughter—a subdued, weak-looking little woman in black, and a tall, handsome girl of 18 or 19, with brilliant black eyes, a complexion like snow and roses, and a singularly haughty way of carrying her lovely head.

"Sir!" began the mother, as they were ushered into the hall by Mr. Dart, but the younger lady interrupted her.

"Do hold your tongue, mother," she said sharply. "I can manage matters a great deal the best. Are you the agent of this house, sir?"

"Yes," said Mr. Dart, with a queer expression in his eyes.

"And is $2,000 the lowest rent—the very lowest?"

"Yes."

"I told you so, dear," interposed the elderly lady, meekly. "Our means will not——"

"There you go again!" snapped the daughter, "with your everlasting cackle about means, means! I'm sick and tired of the sound of it. Will you show us the house, sir?"

Mr. Dart obeyed, in his inmost heart pitying the subdued mother; the tall young lady swept like a queen through the passages, pausing in each room to survey its adaptations for the purposes to which she had assigned it in her mind.

"I like the house," she said, imperiously, as they paused at length in the lower hall. "Mother, you must take it!"

"My darling," deprecated the mother, "$2,000 a year! and papa's salary is only $1,200, besides the interest we have to pay!"

"Pshaw! do have done with your lecturing. What do I care whether papa is pleased or not? I'm going to be married, thank goodness, and get away from all your debts and grovelings and grumblings. A rich fool for a husband is better than no husband at all!"

"But, my dear," the conversation had fallen into an undertone, "you are not sure of it yet, and——"

"Yes, I am," said the daughter, sharply. "Don't I tell you he's completely under my thumb? And do you suppose I would be married from such a hole as that little house in March street?"

And turning to Mr. Dart, who was an unwilling and unedified listener to the conversation, she said, in a louder accent:

"We shall take the house. My father will call and see you to-morrow. Let this bill be taken down."

And she glided away, more like Queen Semiramis than ever, with the meek little mother following, a look of pained perplexity on her face.

At 8 o'clock precisely Mr. Dart was ready.

"Why, uncle," cried Harry Field, gleefully. "How nice you look!"

"Do I?" said the old gentleman, complacently. "Well, I flatter myself I am about the correct thing! Come on, my boy, or we shall be late."

"It's not far," said Harry. "It's only on March street!"

"March street! March street!" repeated the old gentleman. "It seems to me as if I had somewhere heard that name recently!"

But he could not remember where, and was still racking his brain when they reached the residence of the damsel whom Harry Field enthusiastically termed "his guardian angel."

The apartment into which they were shown was rather of the tawdrily-splendid order—satin-covered chairs, enameled with stray grease spots; marble mantels, undusted, and a gaudy velvet carpet, strewn with clippings of thread and scraps of paper, forming its chief characteristics.

Presently in walked a tall, beautiful girl, with black eyes and a wealth of raven hair, a smile dimpling her cherry lips and adding a new charm to her lovely face.

"Olive!" said Harry, proudly, as he advanced to greet her, "this is my uncle, Mr. Dart, and——"

He stopped short in astonishment, for Olive shrank back, coloring redder than the reddest peony in all the gaudy carpet patterns.

"Aha!" said Mr. Dart, plunging both his hands in his pockets. "I think we've met before?"

"Met before?" echoed Harry Field. "When? Where?"

Olive Melton, remembering the very

OLIVE SHRANK BACK.

free use of her tongue she had made, was too near the verge of a fit of hysterics to reply coherently, so Mr. Dent calmly narrated the brief interview they had that morning.

Harry's brow darkened as he listened.

"A rich fool!" he muttered, "and completely under her thumb. Olive, is this true?"

She could not deny it—she dared not, with the cold light of Mr. Dart's glittering eyes upon her.

Mr. Dart's house was "let" the next day to a widow and the two best apartments are occupied by the uncle and nephew, who keep "bachelor's hall" in fine style.

"And I believe," the widow says, in reference to her two favorite boarders, "that the old gentleman really means to live and die a bachelor; but as for Mr. Harry—as long as there's youth there's hope."

But Olive Melton's chances are gone.—New York Daily News.

Stand Up to Fit a Shoe.

"People would find less difficulty with ready-made shoes," said an experienced salesman, "if they would stand up to fit them on, instead of sitting down. Nine persons out of ten, particularly women, want a comfortable chair while they are fitting a shoe, and it is with the greatest difficulty you can get them to stand for a few minutes, even after the shoe is fitted. Then, when they begin walking about, they wonder why the shoes are not so comfortable as they were at first trial. Exercise brings a larger quantity of blood into the feet and they swell appreciably. The muscles also require certain space. In buying shoes this fact should be borne in mind."

Run Down.

China a Heavy Borrower.

According to the London Statist, the Chinese government has borrowed in Europe since 1894 $278,775,000.

AN ALASKAN ADVENTURE.

Three Members of an Exploring Expedition Fight Hunger and Cold.

For some time, early in the present year, the belief prevailed at Washington that Lieutenant Joseph P. Castner, of the Fourth United States Infantry, who was a member of a military exploring expedition in Alaska, had perished of cold and starvation.

With two private soldiers of the Fourteenth Infantry, Blich and McGregor by name, Mr. Castner left the commander of the main expedition, Captain Glenn, near the Tanana River, in the summer of 1898, in an attempt to follow up the Volkmar River to the headwaters of Birch Creek, and follow that stream down to Circle City. He found that the maps indicating the possibility of such a trip were grievously wrong.

He lost his mules in rafting them across the Tanana, or within a short time after their passage, but the three men went on afoot. They traveled 100 miles over a country which was all mountains or marshes. They pressed on farther and farther, their provisions rapidly giving out and their clothes being torn from their backs by thorns. On Sept. 15 they found they had provisions for one day only, and then they attempted to find their way back.

Castner climbed a lofty hill, and saw only range after range of snow-capped mountains. The next morning the three breakfasted off their last scrap of bacon. "For several days," Mr. Castner says, "our rations had run so low that the privilege of licking the frying-pan was one which we almost fought for. That afternoon I managed to shoot two small ducks. We ate them, bones and all.

"Next day we heard the howls of an old she-wolf across the canyon. Looking up, we saw her standing in front of two half-grown cubs. She was howling to call the attention of a third, which was out of sight down the canyon, but which presently came into view within easy range.

"One of the men fired and missed. He fired five times before he killed it, and each time the cub came closer out of sheer curiosity, till it fell dead fifty yards from the slayer. It had never seen a human being before. We got the skin off that wolf in double-quick time, and found the flesh delicious."

They hoped to live on little birds till they could get back to the carcass of the last mule they had killed. They built a raft, tearing up their last blankets for lashing lines, and launched out on the rapid mountain torrent called the Volkmar.

They shot rapids after rapids, getting soaked to the skin. Presently the raft was sucked under a log-jam; the three men clung to the logs for their lives, and their raft and everything on it was swept away. Their guns and ammunition and their shoes were gone. They could shoot no more game.

Barefooted and wet, they kept on their way, leaving tracks of blood on the snow, which had now, toward the end of September, begun to fall. By and by they reached the carcass of their last mule, but wolves and carrion-birds had picked its bones clean.

There were a few berries here and there, and on these the travelers lived for the next six days. "Here and there," says Lieutenant Castner, "a cranberry bush would be found, and around it we would gather for breakfast. The red seed-pods on the rose-bushes were plentiful, and I believe they saved our lives, for they were almost all we could find to eat. They had been bitten by the frost and had a sweet taste—at least, so it seemed to our famished stomachs."

At the end of the sixth day, when their feet were so sore that every step was torture, and when they were ready to lie down and die, they heard the sound of an ax. Seeking it, they found a party of Indians, who received them hospitably and fed them on moose-meat. In a few days they had recovered strength sufficient to enable them to start out again.

Eventually they reached—in November—the military post at Rampart, and then started with a dog-team on a 1,300-mile journey to Skagway. They arrived there Feb. 24, 1899.

Is a City of Auctions.

New York is the city of auctions, and at certain seasons of the year the hordes of auctioneers who sell to boarding-house keepers and young married people are in the zenith of their glory. There are three hundred reputable auction houses and three times that number of auctioneers in New York, and they do a yearly business of about $75,000,000. This does not take into consideration the transactions of scores of small auctioneers who devote themselves entirely to the wants of the east side. New York is the best auction town in the world for everything from a brown stone front to an old sewing machine. When the theatrical companies begin to come in from the road, auctioneers who devote themselves to this branch of the trade do a land office business. A strong pair of lungs and a persuasive tongue are no longer the chief stock in trade of an auctioneer. He must know the value of goods in order to buy a consignment of stuff outright, and sell it at a profit, instead of on commission.—New York Herald.

Candles Made of Naphtha.

A Russian engineer has succeeded in discovering a practical method of making naphtha candles. These are composed of naphtha, petroleum, tallow and a special substance to give the candles consistence. In St. Petersburg these lights can be bought at about the same price as stearine candles, to which they will become a formidable competitor. The naphtha candles burn with a smokeless flame and give out a powerful light. The inventor intends establishing a large factory for the production of these lights.

The Inventor of Lucifer Matches.

A monument will be erected to Charles Marc Sauria, said to be the original inventor of lucifer matches, at St. Lothair, a small village in the Jura, where he spent his life as a country physician.

He Knew.

Teddy (who has just begun to go to school)—Papa, do you know what six boys and five girls make?

"Yes," answered his father, "a racket."—Harper's Bazar.

Good For Little Folks

Children are particularly liable to bowel troubles in the summer time. The best preventive of summer complaint, diarrhoea, dysentery, is to keep the bowels open gently. The delicate tissues of a child's intestines should never be abused by the use of violent purges. The only liver and bowel regulator fit to be used by children is the ideal laxative and intestinal tonic, CASCARETS Candy Cathartic.

voice—Worcester Gazette.

I shall never be without CASCARETS. My children are always delighted when I give them a portion of a tablet, and cry for more. They are the most pleasant medicine I have ever tried. They have found a permanent place in my home. MRS. JOHN FLAGEL, Box 680, Michigan City, Ind.

In the Jaws of a Lion.

A lion comes at its enemy at full speed, galloping low, and dashes a man standing upright to the ground by the full impact of its body. Major Inverarity states that "the claws and teeth entering the flesh do not hurt as much as you would think," but that the squeeze given by the jaws on the bone is really painful. When knocked over, he was still keenly conscious and felt none of the dreamy sensations experienced by Livingstone.

Major Swaine, struck down by a lioness going full gallop, was unconscious for some minutes and did not know what had happened till he found himself standing up after the accident. "I felt no pain," he writes, "not, I believe, owing to any special interposition of Providence, but simply that the shock and loss of blood made me incapable of feeling it. There was no pain for a few days, till it was brought on by the swelling of my arm on the 12 days' ride to the coast."—Spectator.

Turkey's Elaborate Armories.

Turkey prides itself on its armories and claims that no other country in the world can equal them. Constantinople boasts the roomiest and handsomest of all. The armories there are like palaces, with all the comforts and conveniences modern genius can supply. These buildings are all erected on high ground, and in many cases strike the eye of the approaching tourist before the gates of Constantinople are reached. This is true particularly of the Haidan Pasha and Pera armories, which always arouse the admiration of newcomers to the Turkish capital. The armories are surrounded by huge gardens, with large courts and terraces, and reflect credit upon the Turkish architects.

The Peanut Solo.

Remenyi, the violinist, was playing one night in concert in Buffalo and was extremely annoyed by two persons in the audience who were cracking and crunching peanuts. He lost patience at last, quit playing and left the stage. He was loudly recalled, reappeared, and, stepping to the front of the stage, said with much impressiveness, "Ven zee gentlemen haf finished hes peanut solo, I vill go on." The speech was heartily applauded, and no more peanut performances were given during that concert.

Her Dear Friend.

Emma—Charley asked me to marry him last evening, and I had to refuse him, the dear fellow.

Ella—How did it happen?

Emma—Of course I like Charley, but as to marrying him—

Ella—I mean how did it happen that he asked you?—Boston Transcript.

Remember that you can buy Jesse Moore A. A. Whiskey for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

Clothing made of paper is not so very new after all, for Pompeiian excavations have revealed shoes made of paper.

The whistling buoy can be heard about 15 miles.

"Be Strong in the Battle of Life."

Happy is he who is prepared by perfect health, to win life's battle. Health comes only with absolutely pure blood. Over 90 per cent. of humanity have taints, or humors in the blood, which should be removed by Hood's Sarsaparilla, the best specific for both sexes and all ages.

We have 30,000 testimonials. All druggists and shoe stores sell it. 25c. Trial package FREE by mail. Address, Allen S. Olmsted, Le Roy, N.Y.

An ounce of common sense is worth more than a pound of nonsense.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c per bottle.
Hall's Family Pills are the best.

SURE CURE FOR PILES

ITCHING Piles produce moisture and cause itching. This form, as well as Blind, Bleeding or Protruding Piles are cured by Dr. Bosanko's Pile Remedy. Stops itching and bleeding. Absorbs tumors. 50c a Jar at druggists or sent by mail. Treatise free. Write me about your case. DR. BOSANKO, Philada., Pa.

The Points Were There.

Little Clara's parents often discuss reincarnation, and the small maiden has acquired some of the phraseology.

"Mamma," she said one day, "my kittie must have been a paper of pins in a previous state of existence."

"Why do you think so?" asked her mother.

"Because I can feel some of them in her toes yet," was the logical reply.

Then Do Your Cussing.

If you feel like cussing the paper and editor, remember that he can't run it and make it better without financial support, and that he will appreciate it more and it will do you as little harm if you go over and pay up your subscription if you are a delinquent subscriber, or, if not, pay a subscription for your friend.—Lawrence Democrat.

PHILADELPHIA SHOE CO.

10 Third St., - San Francisco.

EASY ON THE FEET.

That's what you are looking for, a shoe that is strong enough to wear well, but still will not hurt the feet. Try a pair of our Men's unlined calfskin bluchers, with bellows tongues, broad plain toes, and double soles that are hand sewed. No tacks, threads or nails to hurt the feet. No breaking in, but comfort from the start. Every pair guaranteed. The price, only $2.50. Send for a pair, and if not satisfactory, send them back, and we will refund the money.

Country orders solicited.

Spring Catalogue, 128 pages just out. Send for one.

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form.... Sold by every druggist in the malarial sections of the United States..... No cure, no pay.... Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured.. All other so-called "Tasteless" Tonics are imitations.. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

ST. LOUIS, MO., Feb. 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your Grove's Tasteless Chill Tonic. On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2060 dozen Grove's Tonic. We also find that our sales on your Laxative Bromo-Quinine Tablets have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.

Please rush down order enclosed herewith, and oblige, Yours truly,

MEYER BROS. DRUG CO.
Per Schall.

RETAILER.

KEDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of Grove's to where I sell one of the others. I sold 36 bottles of Grove's Chill Tonic in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 13, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your Grove's Tasteless Chill Tonic is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of Grove's Tonic. My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,
JAMES D. ROBERTS.

THE OLD HOME.

In the quiet shadow of twilight
I stand by the garden door,
And gaze on the old, old homestead,
So cherished and loved of yore.
But the ivy now is twining
Untrained o'er window and wall;
And no more the voice of the children
Is echoing through the hall.

Through years of pain and sorrow,
Since first I had to part,
The thought of the dear old homestead
Has lingered around my heart.
The porch embowered with roses,
The gables' drooping eaves,
And the songs of the birds at twilight
Amid the orchard leaves.

And the forms of those who loved me
In the happy childhood years
Appear at the dusky windows,
Through visions dimmed with tears,
I hear their voices calling
From the shadowy far away,
And I stretch my arms toward them
In the gloom of the twilight gray.

But only the night winds answer,
As I cry through the dismal air;
And only the bat comes swooping
From the darkness of its lair.
Yet still the voice of my childhood
Is calling from far away,
And the faces of those who loved me
Smile through the shadows gray.

A College Boycott.

IN a cloud of dust and smoke the train creakingly drew up to the little station. A score or more of passengers alighted. There were were many young men and young women on hand to note the arrivals. The coming of that train was one of the daily events in the college town. It was the only link that bound the quiet place to the noisy outside world.

But this particular train meant more than usual. It brought visitors, parents, friends, trustees. For this was the commencement time.

Among the arrivals was a quietly dressed man of middle age with a gray mustache and keen blue eyes. A tall young man pushed forward with outstretched hand.

"Father!"

"John, my son!"

A moment later the two were walking up the long main street beneath the beautiful maples, the young man lightly carrying the heavy traveling bag.

"By George, my boy," cried the older man, as he drew a long breath and gazed admiringly at the youth, "it does me good to see you—and to see you here. I seem to see myself again trudging up this very street—not quite so tall, perhaps, but I fancy much the same build. And how are you, my lad? You know I haven't laid eyes on you for nearly a year."

"Quite well, father, and in excellent spirits.'

"And the foot-ball knee?"

"Seems all right again. I'll prove it to you when we do a little of that hill climbing that you promised me."

"Yes, yes, my boy!" cried the old man with a merry laugh. "I'll show you where your father got in mischief in those dear old days. And to think that I've let all these years slip by without revisiting the old home."

As he spoke a group of merry boys and maidens passed by. They swept along without a glance at the tall youth. The older man turned and looked after them.

"How's that, my boy?"

"What, father?"

"Why, it seemed to me that they meant to snub you. Do you know them?"

"Yes, father; they are all college mates. They meant to snub me all right. Fact is, I'm boycotted."

"Bless my soul! Boycotted?"

"Boycotted, father. It's a funny story. You know I came here determined to devote a year to rest and special study. I had the lame knee to get in shape, and there were certain lines of work I wanted to pursue with Prof. Patton. He's the only man in the college or in the town who knows who John Sturges' father is. Perhaps I wasn't very friendly at the start. The boys wanted me to join them in several things. They wanted me to try for the foot-ball team."

"But you promised me you wouldn't play again."

"I kept my word, though it was a temptation."

The older man chuckled.

"What's the joke, father?"

"I was laughing to think of the greatest halfback of '96 trying for a place on a village team."

"Of course they didn't know, and they didn't like my excuse—the knee. I said I was too busy. That was the beginning. I'm pretty sure they considered me stingy, too. Perhaps you don't know, but I made up my mind to go through this extra college year on the same amount that you worried through on. That didn't leave me much for outside trifles. When they asked me for a contribution for the gymnasium fund I had to refuse them."

"That was quixotic, my boy."

The young man looked his father squarely in the face.

"Besides, dad, there is a girl in the case."

The older man started.

"A girl in the case," he dully repeated.

"Yes, father. A—a charming girl. But poor, very poor. She started in at college, but had to stop. Now she's teaching in a kindergarten. I think the girls—her college mates, you know—snubbed her because she couldn't dress quite up to their standard. And I think, too, they completed the boycott on me because I sympathized with her and paid her some attentions. But she's quite a clever girl, father. You must meet her."

"Yes, yes," said the older man, a little hastily. Then he suddenly laughed. "So you're boycotted, both for lack of college spirit and lack of college funds, eh?"

"That's about the size of it, dad. Funny, isn't it?"

"Very. But where are you taking me?"

"To my boarding place. I thought you'd rather room with me than go to the hotel."

"Of course. And who is your landlord?"

"It's a landlady, dad, and I'm her only boarder. Her name is Spencer—Mrs. Julia Spencer."

"Julia Spencer Do you know who Julia Spencer is?"

"Why, no, dad, I don't."

"She was your dead mother's dearest and oldest friend. She was Julia Ranney then, the prettiest girl in the village. At least she was until I happened to meet some one prettier. Why, boy, Julia Spencer might have been your mother."

"I'm very glad she isn't," said the young man.

"And why?"

"Because I mean to marry Julia Spencer's daughter."

The older man stopped short.

"Put down the bag," he said. His bright blue eyes sought his son's.

"Have you set your heart on this?" he slowly asked.

"Yes, father, I have."

"And you really mean to marry and settle down and take an active interest in your father's affairs? He's growing old and needs you."

"Yes, dad."

The older man put out his hand and the younger firmly gripped it.

"This is not," said the father, "quite the surprise you may think it. Prof. Patton wrote to me some time ago preparing me for what he seemed to think was inevitable. Still, it is a little startling, coming from your own lips."

"Annie has just turned the corner," murmured the young man. "Will you meet her now?"

"I'll meet her mother first," said the father. "You keep the daughter away for a half hour or so. Which is the house?"

"The cottage back of the big tree, dad."

The older man picked up the bag, and the younger one turned and walked rapidly down the street.

"John," the older man called after him.

"Well, dad?"

"Don't let it slip your mind that the boycott must be lifted."

The young man smiled back at his father and the latter wistfully watched him as he hastened up the street toward the trim-built young woman who was slowly approaching.

"Just like me," he muttered; "same old obstinacy. Ready to go through thick and thin for what he wants. God bless him, he's all right!"

With which closing apostrophe the older man caught up the valise and turned through the gateway that led to the cottage behind the big tree.

He looked back once more as he ascended the steps. He could see the two figures, now side by side, coming slowly up the street.

"Boycotted," he chuckled, "boycotted!"

It was the evening of President Lamson's reception to the graduating class. The assembly room was filled with the seniors and their friends. There had been music by the glee club, and the auditors were scattered in little groups about the apartment. Over in one corner sat John Sturges' father, with his old friend and preceptor, Prof. Patton. Near a window at the side of the room stood John Sturges himself, looking very well indeed for a penny-saving country lad in his immaculate evening clothes. By him stood a sweet-faced girl to whom he frequently bent in smiling deference. They were quite alone, John's classmates holding themselves strictly aloof, a fact which drew frequent amused glances from the boy's father.

Then President Lamson held up his hand. When all was still he beckoned to Prof. Patton. The latter arose and stepped forward.

"Friends," he said, "I have some pleasant news to impart. It will be, I think, of special interest to the graduating class. You all know, I am sure, that our gymnasium fund has grown with exasperating slowness, and that we are still a long way off from the desired amount. At least we were until five minutes ago." He paused and looked around.

"The fact is," he smilingly went on, "we have been entertaining a good fairy unawares. I am making this little explanation quite without the fairy's knowledge, because, as you will presently discover, he is the last man in the college who wants his merits advertised. And yet just a little explanation is due him. He came here quietly at his father's suggestion to add a year of special work to the education he had already received in one of the large Eastern colleges. He was prompted, too, by the necessity of giving a strained knee a long rest, an accident he received on the foot-ball field, for he was, if the daily journals are to be believed, the great half-back of '96. He came to this college because it was his father's Alma Mater and because that father, who has left his many business interests and come across the continent to be here this evening, desired him to meet and know his early friend and old preceptor." Here the professor bowed. "And now I have only to add," he went on more hurriedly, "that your old classmate, John Sheldon Sturges, has just subscribed $20,000 for the completion and equipment of the college gymnasium, and I want you to give him three cheers and the college yell."

There was a moment's hesitation and then the cheers and yell were given with a royal will.

"Father, father," cried John, as the elder Sturges pressed forward with hands outstretched to both his son and the blushing girl. "This isn't what I wanted at all."

But the father only chuckled.

"I told you that boycott would have to be lifted," he laughingly answered.

FEATS OF ARCHERY.

The Ancients Were Wonderful Masters of the Art.

Everybody has heard the story of William Tell, who shot an apple from the head of his son with a bow and arrow, and of the wonderful feats of Robin Hood, who roamed the green woods of "Merrie England," and could bring down a wild goose on the wing or split an opponent's arrow with his own.

There are many other curious feats of archery, however, that are not so well known. There was a famous William of Cloudesley, who split a hazel wand with his shaft from a distance of 200 yards.

Homer tells how Penelope promised her many suitors that he only should be favored

Who first Ulysses' wondrous bow should bend
And through twelve ringlets the fleet arrow send,

well knowing that only her husband could display such power, in proof of which, when they failed, he rewon his wife, for, bending his elbow,

The whizzing arrow vanished from the string,
Sung on direct and threaded every ring.

The Romans were very skillful bowmen, although they discarded the weapon in warfare, trusting to the charge and to hand-to-hand fighting. Many of the Roman Emperors were famous archers. It is said that Domitian would place boys in the circus at a considerable distance from him, and, as they held up their hands with the fingers outspread he would send the arrows between them with such nicety and accuracy of aim that he never inflicted a wound.

The wicked Emperor Commodus boasted that he never missed his aim or failed to kill the wild beast he shot with a single arrow. He would set a shaft in his bow as some wild beast was set free in the circus to devour a living criminal condemned to die. Just when the furious animal was springing on his prey the Emperor would strike it dead at the man's feet. Sometimes one hundred lions were let loose at once, in order that he with one hundred arrows might kill them. With arrows, the heads of which were semi-circular, he would sever the necks of the ostriches in full flight.

The Persian archers, according to Charlian, practiced at a mark placed on top of a mast twenty-six feet from the ground. Toward this the horseman rode, with bent bow, at full speed, and in passing the mark turned and shot at it backward, sometimes to the right and sometimes to the left, seldom missing. The Persian bow required a pull of 500 pounds.

It is said that the Turks were at one time very skilled archers. An old writer says that they practiced regularly with the bow from the time they were 7 or 8 years old to manhood. It was a common feat for them to shoot several arrows from a distance of ten yards into a mark not larger than a die. In July, 1792, Mahmoud Effendi, secretary to the Turkish embassy at London, shot an arrow 415 yards partly against the wind. In 1798 the Sultan of Turkey shot an arrow 972 yards—a feat scarcely surpassed by those attributed to Robin Hood.—Cincinnati Tribune.

Balzac Would Have Liked It.

"In my search for bits of life which are literatesque, to use Bagehot's word," said Gaster, gently rotating the cherry in his glass, "I seized with avidity on one that came to me yesterday in a letter from a relative in a distant town. I may say, by the way, that I don't approve of letters from relatives; they have to be answered.

"The town is the one I was born in; and, set in a waste of family affairs like an oasis, the letter told about the death of a woman whom I remember, I never made her acquaintance. She was a widow and lived with her spinster daughter, and I believe the first man to enter their house was the doctor who attended her in her last illness. They kept a big and savage dog for protection, and they rarely left the little yard which surrounded the house. All the work on the premises they did themselves, even to cutting the grass in summer.

"They kept no servants, and yet they were not poor. The postman rarely called. It was isolation complete and apparently desired.

"I was informed by the letter the widow died last week, and it seems that she left instructions for a funeral. One of the local ministers was asked to read the burial service, and my correspondent tells me that the daughter was the only other attendant, except the pall bearers. Had she relatives at all or friends anywhere? I do not know.

"The pall bearers were her tradesmen—the butcher, the baker, the grocer and the coal dealer who had supplied her wants.

"Her tradesmen were the pall bearers," repeated Gaster softly, and then asked curiously: "Would not Balzac have handled that well?"—New York Evening Sun.

Some men are so lacking in hospitality that they won't even entertain an idea.

REALISTIC LAKE BATHING.

Chicago Small Boy Defies the Law and Scorns Clothing.

Summer is the joyous season when the small boy goes down to the lake front, climbs over the frowning wall of the Illinois Railroad Company, trespasses upon the right of way regardless of the warning signs, and takes off his clothes in view of the audience when he has reached the breakwater, says the Chicago Chronicle. Then he jumps into the shallow water and flounders gleefully in the sand for some time. Passing railroad trains filled with passengers disturb him not. He pays no heed to the disturbed gaze of the resident on Lake avenue, who views his antics with undisguised disfavor. He wants to swim, and there is the water, and what more is necessary? Anon comes the railroad policeman with raucous voice and threatening club, hurtling across the tracks, filling the air with strange oaths and acting generally as though he were trying to disperse a riotous mob. Then the small boy takes his clothing, usually consisting of two pieces, and hies him along the piling to the convenient shelter of a boathouse. If the uniformed minion of the corporation pursues him he slips into the clothes with two motions and defies the law. If the copper gets tired of the job and weakens in the pursuit the small boy drops the clothes and dives into the water again.

If only one small boy did this he might not attract much notice. But there is more than one small boy in Chicago who pants for the cooling waters of the lake on sultry days, and when scores of them line the breakwater pier they occasion some comment among passengers on the suburban trains. The boys have never acquired the bathing-suit habit. The law prescribes it, but the small boy never did have much respect for the law and ignores it unless it begins to chase him with a club. Therefore the spectacular effect of the bathers is a bit startling to the eye as viewed from the flying trains.

They don't give the boy much of a chance in Chicago. If he flies a kite in the streets he is arrested; if he plays base-ball on forbidden territory he is chased from it by the police; if he throws stones, one of the prerogatives of all boys in all times, he is breaking the law, and if he goes swimming in the great, cool lake which stretches so invitingly before him he is harried by the police and arrested if they get near enough to him. The city eternally forbids him to swim in the big lake unless surrounded by proper facilities in the way of bathing suits and bathhouses, but it does not furnish the suits or build the houses. If both were supplied by the municiaplity the small boys in droves would take advantage of them. There are two or three public bathhouses in Chicago, but they are not what the average healthy boy wants. They are all right for the purposes for which they were designated—to furnish bathing facilities in crowded tenement districts. But the boy who wants to cool off and splash around in the water does not want to go into a building under a roof and slip into a warm, nauseating pool, the limits of which he can see with half an eye, and whose scant dimensions are shared by a hundred others at the same moment. He wants to get into the lake—into the limitless, heaving body of blue water which lies at the very door of Chicago—with nothing over him but the blue sky and plenty of room for 100,000 other bathers.

"POLICE!"

Finding himself without the facilities in the way of bathhouses and bathing suits, the small boy is obliged to make shift with what he finds—the lake and the pier—and if he unconsciously furnishes a summer spectacle to all beholders he feels it is not his fault. In the meantime bathing must be done from the piers with such scant protection from the gaping world as is furnished by the advertising signs and the boathouses.

Of course it is against the law—nearly everything the small boy does or wants to do in Chicago is against some law. But, while the law expressly forbids bathing in public without the outward and visible signs of a bathing suit it offers no recourse to the panting youngster who, free from school and home duties, wanders about toward the great, blue, cool looking lake on a hot day and is possessed of a desire to "go in." He sees no reason why he should not. The lake is public property. He climbs on the pier or walks out on some rotting stringer, "shucks" his clothing and wades slowly into the water. Perhaps a score or a half-dozen go in together. In half an hour a few more boys, drifting idly along, see the bathers and are inspired with the same desire to swim, and in they go. Policemen often try to arrest the lawbreakers, and there is a hasty exodus of the happy boys when they see the minions of the law coming.

BOYS BATHING ON THE LAKE FRONT.

GREAT PRINCE OF INDIA.

He Has Placed His Herd of Elephants at Disposal of Lady Curzon.

The pretty, girlish creature whose beauty once captivated the marriageable men of Chicago and Washington society circles, but who married an English lord and is now vicereine of India, has just added to her list of unsought admirers the Maharajah of Durbhunga, one of the premier noblemen of Hindoostan and a trusted adviser of Lord Curzon. This Hindoo prince has respectfully placed at the disposal of Lady Curzon the splendid herd of elephants that are among his vast possessions, thus making Lady Curzon the possessor pro tem. of more of these lordly creatures than any other woman in the world. Her ladyship has developed a great liking for the elephants, and frequently takes advantage of the friendliness existing between the viceroy and the maharajah to ride forth on one of the gorgeously caparisoned elephants of state.

LADY CURZON, FORMERLY MISS LEITER OF CHICAGO.

With that happy spirit of frank friendliness in the company of underlings that only an American woman knows how to indulge without loss of dignity, the vicereine has made herself the idol of the attendants at the palace of the Indian prince. To penetrate the reserve of an Oriental of high degree is a feat that not every white man or woman, even among the upper ten of India, can boast of having accomplished. To be given the freedom of the magnificent palace of his highness the Maharajah of Durbhunga is a compliment even to a viceroy and vicereine.

The elephants belonging to the rajah are under the control of an old man upwards of eighty years of age. Each elephant rejoiced in an appellation taken from the names of mythological or historic heroes; and it is their veteran keeper's boast that every elephant is known to him by name.

The title dates back only to 1808, when the then Maharajah Chutter Singh was formally recognized and invested by the British Government. But the origin of the family can be traced as far back as the reign of the Emperor Akbar, whose lieutenants they were in the province of Behar.

The growing friendliness of such a man for Lord and Lady Curzon is viewed with pleasure by those interested in the welfare of India, for if the hearts of the native princes are with the Queen's representatives the stability of the Government is doubly assured. To have won so emphatic a demonstration of regard from the Maharajah of Durbhunga shows that in the future of the great Indian empire the American wife of Lord Curzon is destined to play a significant part.

Development of English Language.

If some recently published statistics are to be trusted the English language is developing more than any other, past or present. While the German contains 80,000 words, the Italian 45,000, the French 30,000 and the Spanish only 20,000, Dr. Murray's English Dictionary is expected to contain no fewer than 250,000 words, more than half of which have come into use during the last half century. A great part of these additions are, of course, technical or scientific terms, which the wiser German translates.

Anecdote of Rosa Bonheur.

Mme. Rosa Bonheur (Rosa stood for Rosalie) was not without a sense of humor, so it is told of her that while presiding over a school of design in Paris, the pupils being girls, the artist was disgusted with the class, because, imitating their teacher, the young women had cut their hair short. "Grand Dieu!" cried Rosa Bonheur, "how horrid you all look! This is not a class of boys. You silly creatures, let your hair alone and do your best so as to retain all the advantages of your sex."

A Celestial Reproach.

Dorothy—Mamma, if I should die, would I go to heaven?

"Why, yes, darling; of course you would."

"And if you should die, would you go to heaven, too?"

"I hope so, dear."

"I hope so, too; because it would be very awkward for me to be known as the little girl whose mother is in hell."—Life.

Every woman occasionally curls her hair and starts out fiercely to be Happy in Spite of Fate. (By fate is meant an unappreciative husband.)

A woman should not feel flattered if people tell her she is as young as her daughter. They are making fun of her.

When you lose money and gain wisdom by it your loss is your gain.

Once Was Enough for Him.

"It is a Sanford man," says the Kennebec (Me.) Journal, "who has this statement sewn to his undershirt: 'My appendix has been cut out,' and he explains his case in this way: 'You see, these are the palmy knifing days to the surgeon. If a man falls in a fit, faints or happens to lose consciousness for any reason, they cart him off to the hospital and operate for appendicitis without waiting for him to come to and say what ails him. I've been sliced open once and I don't hanker for encores.'"

Drilled Dogs.

For some time past a lage battalion of dogs has been drilled in the village of Lecrench, near Cologne, to operate in conjunction with the German ambulance corps. Each dog is supplied with a saddle, in which are pockets containing all that is necessary for the first dressing of a wound, also a large gourd of brandy.

Notwithstanding the watchfulness of the attendants the rain sometimes beats its way into the circus tent.

Judging from their conversation some people evidently have pneumatic brains.

Torn carpets are always ready to trip the light fantastic toe.

CURIOUS WEDDING FEE.

A "Sporty Gent" Overreaches Himself Instead of the Minister.

"What is the largest fee I ever received for marrying a couple?" said a Detroit minister. "Well, it is hard to say, but I'll tell you the strangest fee I ever got, and that may answer your question. A number of years ago, when I was located in a western city, a couple called at my house and asked me to unite them in marriage. They were both rather overdressed and the man bore an air that you would call 'sporty.' I assured them that it would give me great pleasure to marry them.

"It happened at a time of my life when money was particularly acceptable, and, as I always understood that gentlemen belonging to the bridegroom's class were liberal with their funds, I congratulated myself upon the prospective size of my forthcoming fee.

"The ceremony was quickly over; the bridegroom placed an envelope in my hand, and I bowed him out. When they had departed I made haste to open the envelope. To my surprise all it contained was a lottery ticket.

"However, it wasn't the first time had suffered disappointment, so I merely smiled a bitter smile, swallowed my chagrin as best I could, and, rolling the ticket into a spill, I used it that evening to light the study lamp.

"Two weeks later I received a call from the sporty-looking party, who begged a thousand pardons, said it was all a mistake, and ended by offering me $100 if I would return the ticket. As that was impossible, and he seemed so anxious to get it again in his possession, I determined to ascertain, if possible, why he was so anxious to rectify what at best had been a very silly joke, so I pretended to hesitate over his offer.

"In rapid succession he raised his bids until he had offered me a total of $500. Then I gently told him how the matter stood, and he was actually ill-mannered enough swear in my presence.

"Out of the frightful torrent that he poured forth I managed to glean enough English to ascertain the fact that the ticket had drawn $1,000."—Detroit Free Press.

HIS ADVERTISEMENT.

Grocer Expresses His Opinion of a Fake Advertising Medium.

Everybody knows how the average business man is "worked" by the managers of picnics, excursions, festivals and the like, gotten up for the purpose of starting or increasing some "fund" of a semi-charitable nature. By inserting his business card in the program, invariably printed on such occasions, he is expected at least to assist in defraying the expenses of the necessary advertising. He is appealed to on the ground that all his competitors will be represented in the program, and he cannot afford to be left out.

A certain Mr. Skiles, a suburban grocer, was asked to have his card inserted in the program of a picnic to be given by a local secret society at a popular resort forty or fifty miles away.

"How much will it cost me?" he inquired.

"Only two dollars," replied the advertising manager.

"H'mph—only two dollars. How much space do I get for that?"

"One inch."

"H'mph—the whole of an inch! I can put any kind of an 'ad' I want to in that space, I suppose?"

"Certainly."

The grocer took a scrap of paper, wrote his advertisement on it, handed it to the manager, and in due time the program appeared with this card in it:

Beverly Skiles, Grocer, No. 537 Sparklandh Street, pays $2 for the use of this space. He thinks it is an outrageous price, inasmuch as all the groceries for this picnic were bought at some other store.

Mr. Skiles has always maintained that he got two dollars' worth of satisfaction out of this advertisement, if nothing else.—Youth's Companion.

Bismarck's Draught Board.

The late Prince Bismarck was an ardent lover of a game of draughts, and is said to have possessed the most valuable draught board in existence, the squares of which were made of gold and silver, to represent the light and dark squares respectively. The men were made of the same metals, the silver men having the addition of a diamond in the center, the gold draughtsmen having a ruby inlaid in the center of each.

Coffee Is a Seed.

Many of the children do not know that coffee grains are only the seed of a fruit which is very much like a cherry. It is very sweet and has a good taste. When the fruit is dried it shrivels up around the coffee grains, of which there are two in each one of the round balls, placed with the flat sides together. Sometimes in the cheaper kinds of coffee these little dried balls are found with their two coffee grains snugly held inside.

In Case of Ivy Poisoning.

A treatment highly recommended by a scientific magazine for poisoning from ivy is to wet a slice of bread with water, dust it with common washing soda, and apply to eruption, keeping the bread wet from the outside. Half an hour of this treatment is said to be a sure cure.

Table Salt a Luxury.

The greatest of luxuries in Central Africa is salt. The long continued use of vegetable food in that country creates so painful a longing for salt that natives deprived of it for a long period often show symptoms of insanity.

A man naturally looks pall after kicking the bucket.

Things are apt to look rather blow after a cyclone.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, SEPTEMBER 29..... ...1899

(Continued from last week.)

In 1864 a small exberimental furnace was in operation. In 1866 the Cerro Gordo silver-lead mines were discovered, and in 1863 Colonel Stevens was smelting ores with success; his chief difficulty was the want of fire proof material. In April, 1870, M. W. Belshaw & Co. (Egbert Judson) were successfully smelting their ores in blast furnaces. At that time they had at the works ready for shipment 1,200 pigs or bars of lead, all rich in silver. Ore containing less than 200 ounces of silver to the ton was considered second class. In April, 1873, there were 18,000 bars of lead on hand at the furnaces, the estimated value of which was $600,000. One hundred and twelve mule freight teams were employed in hauling ore from the foot of the lake to Los Angeles. Two furnaces turned out fourteen tons daily, valued at $28,000. The following table shows the importance of these mines and the smelting operations. Table of argentiferous lead or "bullion" produced in six years:

Year	Tons
1869	1,000
1870	1,500
1871	2,500
1872	4,000
1873	5,000
1874	6,000
Total	20,000

This output was valued at $1,800,000, which is equal to $90 per ton. About the same time the silver mines at Blind Spring were extensively worked and produced much bullion. Great gold mines are the exception, while so-called "base metal mines" at certain localities are more numerous and common. The ores of all known mines are variable as to quantity and quality; these ores, as a rule, lie in deposits of greater or less magnitude; when one is exhausted, another must be sought; quality and quantity cannot be known except by exploration. It is an expensive operation to smelt ores at the mines with charcoal, and generally more so with imported coke; when the argentiferous lead has by this process been reduced to the melted state, it has only been concentrated, and must still be shipped to a market; besides this, much mineral matter of value, such as sulphur, arsenic, antimony, iron, etc., is wasted, and a no inconsiderable quantity of metal is left in the slags. For these reasons, if for no others, it would be better, for some years at least, to ship the ores properly concentrated by wind or water power, and sell them to the smelters, whose business it is to so mix and manipulate them as to obtain the best results where fuel, plant and labor are cheaper and all conditions more favorable.

There is still another very important consideration bearing upon this subject. The buying and selling of smelting ores makes an immediate capitalist of the most humble miner. As soon as it becomes known that a locality can produce a quantity of smelting ores, metallurgical companies will soon send agents to purchase them. This would not only make a competition favorable to the miner, but would furnish capital to work their mines. To suppose a case: a miner takes out say ten tons of selected ore under the conditions named, which could be readily sold. With the money received the miner could take out say twenty tons more, without paying interest on the small capital now at his disposal. A succession of such sales would make it possible for him to put up concentration works, by the use of which he could change his low grade ores to high grade concentrates.

I have shown that in Owens Valley water and water power are very abundant, and that by their use the concentration of ores can be brought to a state of great perfection. Such concentrates would have nearly the value of smelted metal. From my own personal experience I think that many such mines might be opened and profitably worked within 200 miles radius from Owens Lake. After thirty-five years in which to consider this matter I still hold the same opinion. The many local mining excitements which followed the discovery of the Comstock, for example, Reese River, Esmeralda, Bodie, White Pine, Slate Range, Coso, Montgomery, Kern River, Darwin, Telescope, Panamint and others, were not without foundation and were not wholly speculative. I have given the reasons why these and other districts were practically abandoned and the superficial character of the attempts made to develop them. When we consider that within the last thirty years many thousands of tons of pig lead, cotaining about 45 ounces of silver to the ton (in some years as much as 9,000 tons) have been resmelted and reduced from slags left by the ancient Greeks at the mines and furnacea at Laurium, 300 years before Christ, we may excuse Pacific Coast miners who temporarily suspend work upon mines which conditions prevented their working to advantage. I have also recorded success under difficulties in smelting the ores of the Cerro Gordo mines and ask, "Is it visionary to believe that other mines of similar character when conditions are developed and better understood?" I am unwilling to believe that the Cerro Gordo, Comstock, Esmeralda, Reese River or White Pine mines are by any means exhausted.

During a residence of nearly three years in Owens valley I knew of the discovery of many surface ores exceedingly rich in gold, silver, copper, lead, antimony, bismuth and iron, besides deposits of marble, limestones, and other building stones, salt, borax, and other economic minerals of less importance. It is not to be supposed that these rich ores fell from the skies. The science of geology is sadly at fault if they were not naturally concentrated in terrestrial rocks in place.

THE SCALING LADDER.

How It Is Used at Fires In Very High Buildings.

The most promising pupils among those admitted to the school of instruction at the New York fire headquarters are said to be those who have served an apprenticeship in professions that have called them aloft. Sailors, painters, roofers and steeple climbers have the advantage of their pireliminary training. The first thing that a neophyte is called upon to learn is how to handle the scaling ladder.

This bit of apparatus is a long, well seasoned tongue of timber with short crosspieces passing through it. It terminates at the top with a long hook, which has three or four catchelike projections on its undersurface and weighs from 20 to 45 pounds. There is a special knack in handling it dexterously, and many a time a man who is slight and small of stature can manage a ladder which a Goliath would find difficulty in handling.

"There is no piece of apparatus in the fire department," says one who has made a study of its methods, "which, skillfully handled, can be made to serve more purposes than this scaling ladder. The longest extension ladder in the department measures 90 feet, but the man with the scaling ladder can go up 14 or 15 stories without becoming exhausted. At fires before an extension ladder can be put in position one fireman can push a scaling ladder into a second story window, scramble up and go from story to story to the very roof. He is followed by a second fireman, who takes his ladder with him story by story, and this fireman by a third, until by the time the first man has reached the top there is a completed chain behind him, down which the rescued may be carried and the fireman himself escape."—New York Tribune.

SMITHERS' RETORT.

His Sarcastic Reply to the Private Boarding House Landlady.

Mr. Smithers is a somewhat fastidious young man who is looking for a new boarding place. Smithers can't abide the regulation boarding house, and always tries to live with a private family. He is now convinced that an "ad." which solicits boarders for a "nice private family" is often a snare for a stuffy double flat, inhabited by one small family and 24 boarders.

Smithers called one day last week at a place with a glowing description just on the flank of Michigan avenue's aristocracy.

"Hum! Suspiciously like a boarding house," thought Smithers as he took in the dimensions. A collarless negro servant who opened the door confirmed his suspicions, but he had gone too far then to back out. A sharp nosed, snippy landlady came in with a top lofty air.

"Er—ah, I believe I am mistaken,' he began. "I supposed I should find a private family. By the advertisement—hu-m"—

The laughter and the familiar boarding house hum of 14 clerks and ten lady stenographers came up from the dining room in the basement. The mistress of the conglomerate "private family" drew herself up proudly. "You are entirely mistaken, sir," she asserted in a grasping, $7 a week voice. "This is not a boarding house, although we have a few friends living with us."

Smithers sniffed the air. There was a distinct odor of prunes and corned beef.

"Well, I must say," he remarked as he turned up his coat collar and fled down the steps, "that it smells like a boarding house, madam."—Chicago Inter Ocean.

Tempted by Fishes.

The Koran gives a story of some very naughty fishes in David's time. Knowing that the Israelites were forbidden to catch fish on the Sabbath, the wicked creatures came out of the Red sea in unusual numbers and kept in sight of the people all throughout the day in order to tempt them. On the approach of night they returned into the sea again.

In a fatal moment some of the Israelites yielded to the piscine blandishments, caught several of them and had them for dinner, whereupon David cursed the Sabbath breakers, and God, to show his displeasure, changed them into apes and pigs. For three days they remained in this unpleasant condition, when a violent storm arose and swept them into the sea.—Pittsburg Dispatch.

Human Eye Faster Than the Pen.

"You read 1,000 miles," is the calculation of a clever individual fond of details. The eyes of the average busy man, in reading alone, travel 1,000 miles, which is equivalent to an "ocular trip" a third of the distance across our continent. Even the busiest man probably travels with his eyes 19 miles of type yearly, and there are doubtless many readers who travel six times the distance. If you read a yellow backed novel, your eyes have traversed from a mile to a mile and a half of type. The busiest pen cannot keep up with this pace. With ordinary use, your pen has not traveled as far as from New York to Albany.—Philadelphia Inquirer.

A Bald Statement.

"It's hard to be happy once you've got a reputation for saying sarcastic things," remarked the sad eyed man.

"What's the trouble?"

"I've lost another friend. I complimented him on being the most cool headed person I ever saw. He took it as an allusion to the fact that he is totally bald."—Washington Star.

He Was Scared.

The doctor looked at him.

"You are a dyspeptic," he said.

Then he put his ear to the patient's heart and gravely added:

"A high liver."

"Heavens!" cried the startled patient. "'Tain't as high as that, is it?"—Cleveland Plain Dealer.

A Load Off His Mind.

Mrs. Honkley (severely)—It's not necessary for me to ask where you were and what you were doing last night.

Mr. Honkley (brightening)—I'm glad of that, for I couldn't do it to save myself.—Chicago News.

Telling Secrets.

The man who tells you a secret and asks you not to tell doesn't treat you right. He enjoys telling it and forbids your having just as good a time.—Atchison Globe.

INYO MERCANTILE CO.

BERTRAND RHINE,
MANAGER.

THEIR FIRST HORSE CAR.

The People Were So Delighted That They Rode All Day.

"I made the survey for the street car lines in the City of Mexico," said the civil engineer, "and when we got the tracks down and the cars running we had a laughable time. Young men of the first families not only ventured to act as drivers and conductors, but insisted on taking those places without wages. The thing was like a new toy to children. People paid fare or withheld it, just as they saw fit, and some would ride around for half a day. The Yankee superintendent of the lines was in a sweat all the time, but it was kicking against a stone wall.

"The tracks were single ones, with switches here and there for the cars to pass, but such little things didn't bother the drivers. Some of them would start the mules on a dead run and go clear to the end of the line, and others would pull out on a switch and go to sleep or indulge in games with the passengers. I guess it was two months before the drivers consented to give up their siesta hours. At 12 o'clock precisely the mules were brought to a halt, no matter where the car was, and the driver would walk off to eat, sleep and smoke and be gone two hours. No Mexican ever hurries. Most of the complaints received were to the effect that the cars went too fast. Even after we got things somewhat systematic, Don Pablo Chora, the president of the road, returned from a trip one day to say to the manager:

"'Ah, senor, but I am afraid we shall never get our people to accept this enterprise.'

"'What is wrong now?' was asked.

"'Why, one of our greatest merchants paid his fare to be taken to the Alameda in 20 minutes, and, lo and behold, the driver cut the time down to 15! We shall be ruined by moving folks around too quickly. Let us tie up the legs of the mules and take the whips away from the drivers!'"—New Orleans Times-Democrat.

DOWN EAST CURIOSITY.

One Instance In Which It Was Not Satisfied.

It takes a down east man to ask questions, but once in awhile one of them finds his match. Jonathan overtook a gentleman who was traveling on horseback, notwithstanding the fact that he had lost one leg. His curiosity was awakened, as he rode alongside of him, to know how he chanced to meet with such a misfortune.

"Been in the army, I guess?" was the anxious inquiry.

"Never was in the army in my life,' the travaler returned.

"Fit a duel, p'haps?'

"Never fought a duel, sir."

"Horse throwed you off, I guess, or something of that sort?"

"No, sir, nothing of the kind."

Jonathan tried various dodges, but all to no effect. At last, almost out of patience, he determined on a direct inquiry as to the nature of the accident by which the gentleman had come to lose his leg.

"I will tell you," said the traveler, "on condition that you will promise not to ask me another question."

"Agreed, agreed!" exclaimed the eager listener joyfully.

"Well, sir," remarked the gentleman, "it was bit off!"

"Bit off!" cried Jonathan. "Waal, I declare; I'd just like to know, powerful well, what on arth bit it off!"—Christian Endeavor World.

Eat Sand For Dyspepsia.

The English, according to Science Pour Tout, have adopted quite an original plan. In many houses, on the table by the side of the pepper box and the salt box is placed a sand box—a little receptacle filled with very fine sand, as fine as flour, which is sprinkled over all the food. A medical journal has advised dyspeptics to adopt this remedy. The sand, mingling with the alimentary mass, renders it less compact and makes digestion more easy. This has become the fashion, and since the English have begun to eat sand it is certain that French snobs who imitate their neighbors across the channel like monkeys will soon be devouring it. Besides, gravel for digestive purposes has been in use by ostriches for a long time.

A DARK SHADOW.

I never saw my mother's face;
God drew a shadow o'er my baby eyes.
And there it lies,
Unchanged by time or place;

But I have felt her loving breast
Breathe heart sore sighing for the joys I miss
And felt her kiss
Upon my eyelids pressed.

I never saw God's lovely world,
But I have listened to the whispering trees
And felt the breeze
That spring's sweet leaves uncurled.

I never gazed upon a rose,
But I have laid the flower against my cheek
And heard God speak
And mysteries disclose.

And he has made me understand;
Though dark the shadow that now holds me blind,
God is behind.
Unseen I feel his hand

And know that from my darkened eyes
The lifelong shadow will be rolled away
One solemn day.
Oh, rapturous surprise!

My happy lips e'en now must sing.
These eyes, unclosing in the streets of gold,
Will first behold
The face of Christ, my King.
—Foodora Bell in Good Words.

REPARATION.

A Strange Coincidence In the Life of a Fireman.

"Soon after I entered the fire department," remarked a hostler of the city fire department, "it was my hard luck in responding to an alarm to run over and terribly injure a small boy, who was playing in the street. It was an unavoidable accident, but just the same it had its effect upon me, and for a time it preyed heavily on my mind and probably would have done so until today had it not been for the sequel which righted up matters somewhat.

"I kept myself pretty well informed as to the condition of the boy, and was extremely happy when I saw him on the streets again and to all appearances fully recovered from the injury which I had inflicted upon him. Well, time passed along, and, the boy's family having moved from the house where he resided and where we took him after the injury, for awhile I did not see him, though I occasionally heard from him.

"One rather rough night about a year afterward our company responded to an alarm in the northwestern part of the city. On arriving at the fire I was sent to one of the upper rooms of the burning building to rescue some children who were in the room and who were terribly frightened, as they had good reasons to be, for they were in considerable danger. There was a light burning in the room, and the moment I entered it I recognized the little fellow that I had driven over and injured. If there ever was a little fellow who was carefully wrapped up in bedclothes and with his little sister taken down stairs and to a place of safety, you can bet it was that boy and girl. The same look of fright was upon his face, which I had not forgotten, but I don't think my face looked as bad as when I had picked him up in my arms before. I was supremely happy in being able to return some good for the ill I had done him."—Washington Star.

A Poet's Impressions of Nilsson's Singing.

NEW YORK, Sept. 20, 1870.

I went at 1 o'clock today to hear Nilsson. She sang in concert at Steinway hall; t'other artists were Vieuxtemps, the violinist; Wehli, pianist; Brignoli, tenor, and Verger, baritone.

Mlle. Nilsson singeth as thou and I love. She openeth her sweet mouth and turneth her head o' one side like a mocking bird in the moonlight, and straightway cometh forth the purest silver tones that ever mortal voice made. Her pianissimo was like a dawn, which crescendo'd presently into a glorious noon of tone, which then did die away into a quiet gray twilight of clear, melodious whisper. She sang nothing mean or light or merely taking. Handel's "Angels Ever Bright and Fair," solo; a duet with Brignoli, by Blangini, and a noble solo, a scena from Ambroise Thomas' "Hamlet" (the insane song of Ophelia), with "Home, Sweet Home," for encore—these were all.—"A Poet's Musical Impressions," by Sidney Lanier, in Scribner's.

A doctor in France is not permitted to inherit property left to him by a deceased patient.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

No business.

Methodist Church.

There will be services as follows on Sunday, Oct. 1st:

Lone Pine—Preaching by the pastor at 11 a. m.

Georges Creek—Preaching service at 2:30 p. m.

Independence—Sunday School at 2:00 p. m., and preaching at 7:30 p. m.

All are cordially invited these services as they are convenient for them.

JOHN J. PARDEE, Pastor.

Hi. Hamilton is at Randsburg.

Clair Tyler left for Ballarat Wednesday.

A social dance at Mairs' Hall is billed for to-morrow night.

The river has never been so low as at present within the memory of man.

Jim Sutherland and Tom Key left yesterday on a prospecting trip to Coso.

Baxter and Robinson got through putting up their second crop of hay this week.

It is reported that Charley Rickey has been operated on for appendicitis at San Francisco.

Harrison & Godsmark have put on ten more miners in addition to their already large force.

Charley Robinson left this morning with his packtrain for the Barnes & Anderson mine.

William Breeding and Joe Beil were down from Bishop yesterday on Land Office business.

Barnes & Anderson are sacking ore and getting ready for another shipment to the Reward mill.

Sam Tyack left on Tuesday's train for Bodie. While here he examined several properties in the vicinity.

O. I. Mairs got back last Tuesday from a month's visit to Los Angeles. His health is very much improved.

Miss Maud Cook is expected home from Hawthorne this evening, where she has been visiting for some weeks.

Tom Ferguson has got back from a trip to Grant's Pass, Oregon. Tom thinks Inyo is a pretty good place to get back to.

John L. Bourland came down from Bishop last Monday and will return to-morrow morning. He has been in poor health for some time but has improved since his stay here.

M. H. Naylor and Neal Bell have about five tons of high grade ore ready for shipment to Selby's. It is taken from the old Rex Montes mine on Kearsarge mountain.

Any stock in any California corporation is assessable. No by-laws of any corporation incorporated therein can waive the right conferred by the State to assess the stock.

The Secretary of the Interior last week decided that a U. S. patent may issue covering a quartz and a placer claim, reversing the ruling of U. S. General Land Commissioner Best.

Messrs. H. S. Mackay and C. H. Scheu are expected to arrive here about the 1st, and will be accompanied by a noted Boston lawyer who will pass upon the titles to the various properties.

Pat Keyes has completed a run of ore at his mine and brought in a new bar of bullion yesterday. He says the mine is looking very well and he will commence getting out ore in a few days.

Charley Robinson got back yesterday from a trip to Saline Valley. He says it is so hot over there that the chuckwallas are hanging their tongues out, and the horned toads and lizards are all dried up.

Messrs. Montgomery and Oxnane got into Keeler on Tuesday from the copper camp at Saline Valley and left next day for Ballarat. Mr. Oxnane is an expert in the employ of Capt. De Lamar and will examine the Radcliffe mine for him. The owners of the property have refused $500,000 for it and only a good figure will buy it.

Every person who wilfully administers any poison to an animal, the property of another, or maliciously exposes any poisonous substance with the intention that the same shall be taken or swallowed by any animal, is punishable by imprisonmeet in the State prison not exceeding three years, or in the County jail not exceeding one year, and a fine not exceeding $500.

Board of Supervisors.

MONDAY, Sept. 18, 1899.

The Board of Supervisors of the County of Inyo, State of California, met at above stated time, for the purpose of leving taxes for the fiscal year, 1899, and 1900, pursuant to law.

Present, Supervisors James Jones, N. J. Cooley, J. J. Stewart, and A. C. Freeman, Chairman, presiding.

Absent, T. H. Henebry.

County Auditor's exhibit showing County financial transactions for the preceding fiscal year was submitted and filed.

County Superintendent's school census, reports, and estimates were submitted and filed.

Official notices from the State Board of Equalization as to levy of State taxes and assessment of the Carson and Colorado Railroad Company were submitted and filed.

Upon motion of Supervisor Stewart, seconded by Supervisor Jones, it was unanimously ordered that State and County taxes for the fiscal year beginning July 1st, 1899, and ending June 30, 1900, be and the same are hereby fixed at the rate of $2.25 upon each One hundred ($100) dollars of taxable property within the County of Inyo, that the same be levied and collected according to law and apportioned to the various funds as follows to-wit:

To the General Expense Fund		40c
" " Hospital	"	17
" " Salary	"	40
" " Road	"	20
" " State	"	601
" " Bond	"	15
" " School	"	30
" " Bridge	"	029
		2 25

Ordered that a special tax be levied and collected upon all property in Station School District for the current fiscal year at the rate of 15 cents upon each $100 of valuation, the amount to be placed to the credit of the said Station School District Bond Fund.

Ordered that a special tax be levied and collected upon all property in Big Pine School District for the current fiscal year at the rate of 50 cents upon each $100 of valuation, the amount to be placed to the credit of the said Big Pine School District Bond Fund.

Ordered that a special tax be levied and collected upon all property in Fish Spring School District for the current fiscal year at the rate of 30 cents upon each $100 of valuation, the amount to be placed to the credit of the said Fish Spring District Bond Fund.

Ordered that a special tax be levied and collected upon all property in Taboose School District for the current fiscal year at the rate of 40 cents upon each $100 of valuation, the amount to be placed to the credit of Taboose School District Bond Fund.

Ordered, that pursuant to assessment made by the State Board of Equalization on the 7th day of August, 1899, assessment for the Carson and Colorado Railroad Company be entered upon County Roll in accordance therewith as follows:

For the length of 74.25 miles of main track and for franchise, road-bed and and right of way, at a valuation of $1115 03 per mile, making in the aggregate $82791. That the number of miles of said railroad and the prorata valuation thereof being in the several school districts are as follows:

Station School District,	6¾ miles		7526 46
Poleta "	" 6	"	6690 18
Valley "	" 6	"	6690 18
Big Pine "	" 6½	"	7247 70
Fish Spring "	" 7	"	7805 21
Taboose "	" 7	"	7805 21
Milton "	" 2½	"	2787 58
Independence "	" 4½	"	5017 64
Union "	" 7	"	7805 21
Lone Pine "	" 13	"	14495 39
Keeler "	" 2	"	2230 06
Liberty "	" 6	"	6690 18
			$82791 00

Whereupon the Board adjourned.

Big Pine News.

Mr. Joe Danielson went over to his lead mine Monday to take some supplies.

Many thanks to Mr. Rossi for a sample of his prize wine and to Mrs. Baker for some of her choice jelly.

Mr. and Mrs. Ad Smith will leave Monday for the Los Angeles fair, and Mr. and Mrs. Callow will give them a farewell "high jinks" to-morrow night.

District Attorney Dehy spent several days at Big Pine this week in connection with a case against a Frenchman for selling whiskey to Indians. There was not sufficient evidence and the man was not held.

S. H. Spratt returned home to Big Pine yesterday, having finished his business in the Land Office satisfactorily. After a thorough inspection of the timber, Superintendent Dobson estimated the amount of timber on the ground wanted by Mr. Spratt at 728,000 feet, and the bid of the latter at 60 cents per 1,000 will be accepted in proper form.

Improvements On The C. & C.

Alterations are being made in the cars of the C. & C. Railroad at the Carson shops that will make the passenger accommodations on that line equal to any on the Pacific Coast. The passenger cars are being made over and each will contain ten reclining chairs which are adjustable to every position from the ordinary chair to a comfortable couch. The aim of the company is to provide all the comfort possible for passengers taking the two-days' trip over the C. & C., which, as the trains do not run at night, could not use the ordinary sleeper, and the company has introduced reclining chairs. The first two coaches so remodeled arrived on Saturday in Conductor Stock's train. The other coaches will be similarly equipped in time.—*Walker Lake Bulletin.*

Attention is directed to the advertisement of the Inyo Mercantile Company in this issue. Bertrand Rhine is the manager of the new concern. He has had nearly twenty years experience in the general merchandising business here, is thoroughly posted on the needs of the community and the requirements of trade, and should meet with success.

H. C. Cullom and L. H. Wise, special agents of the General Land Office, have been at Independence all the week investigating the matter of Indian allotments. They will leave here by private conveyance for the South Fork of Kern river, where there are a number of allotments in the Sierra Forest Reserve, and it is expected that a large number of them will be cancelled. Mr. Cullom is a brother of Senator Cullom of Illinois. He is accompanied by his wife, who will remain here until his return from Kern river.

Real Estate Transfers.

The following deeds have been recorded since September 21, 1899:

Henry C. Ratcliffe to Robert F. Harrison et als.—September 12, 1899. Radcliffe, group, six claims, South Park Dist. $50.

F. B. Parker to P. H. Winston et als. August 21, 1899. Oro Madre mine, Argus Dist., $500.

Frederick Conn et als. to Conn & Trudo Co.—March 20, 1899. Thirteen groups borax claims in Saline Valley, $10.

Conn & Trudo Co. to Western Borax Co. September 11, 1899. Same as preceding, $10.

H. P. Dover to Radcliffe Con. Mining Co.—August 26, 1899. Water right in Pleasant Canyon, $300.

A. F. McNulty to R. F. Harrison—August 31, 1899. Cooper water right, Pleasant Canyon, $300.

H. H. McMurry to W. P. McMurry—April 24, 1899. 120 acres land near Big Pine, $5.

Henry J. Bell and wife to Martha M. Smith—September 4, 1899. Lot of land at Big Pine. $10.

J. C. Irwin to Hop Sing Tong—December 22, 1898. Lot 6, blk 23, Independence, $10.

R. Day and wife to Phoenix Development Co.—June 28, 1899. Und. ¼ int. in Mineral Reef mine, South Park Dist., $600.

OFFICIAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - Plaintiff,
vs.
Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

(SEAL)
P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Scheu, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants:

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo. [Seal] State of California, this 12th day of August, A. D. 1899.

D. J. HESSION, Clerk

ROYAL BAKING POWDER

will aid the cook as no other agent will to make

The dainty cake,
The white and flaky tea biscuit,
The sweet and tender hot griddle cake,
The light and delicate crust,
The finely flavored waffle and muffin,
The crisp and delicious doughnut,
The white, sweet, nutritious bread and roll,—
Delightful to the taste and always wholesome.

Royal Baking Powder is made from PURE GRAPE CREAM OF TARTAR and is absolutely free from lime, alum and ammonia.

There are many imitation baking powders, made from alum, mostly sold cheap. Avoid them, as they make the food unwholesome.

ROYAL BAKING POWDER CO., NEW YORK.

Goat's Milk.

Modern Medicine says that goat's milk, contrary to the general impressions, differs from cow's milk not in being more digestible, but in being less digestible and less nutritious, although it contains a larger amount of solid matter than cow's milk. It is indeed the most indigestible of all milk.

Goat's milk has a peculiar and unpleasant odor and flavor, due to hircic acid or hircine. It contains an excess of fat and is therefore altogether too rich for an infant's diet.

Derided.

An Austin colored waiter told a Boston man at a hotel that in eastern Texas a white man had married a negro woman.

"Was he not derided?" asked the Bostonian in the classic speech of the "Hub of Culture."

"He was, sah," beamed the negro. "Dey rided him out ob town on a rail."—Household Words.

Still More Counterfeiting.

The Secret Service has just unearthed another band of counterfeiters and secured a quantity of bogus bills, which are very cleverly executed. Things of great value are always selected for imitation, notably Hostetter's Stomach Bitters, which has many imitators but no equals for disorders like indigestion, dyspepsia and constipation.

In some cities the council gets a fixed salary. In others it gets no salary but is fixed just the same.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder to be shaken into the shoes. It makes tight or new shoes feel easy; gives instant relief to corns and bunions. We have 30,000 testimonials. All druggists and shoe stores sell it. 25c. Trial package FREE by mail. Address, Allen S. Olmsted, Le Roy, N.Y.

Often when a young woman tries to crush a man with a look she only succeeds in mashing him.

Utica Toilet Compound for the hands and skin. Salt or fresh water baths, shampooing, poison oak, bites, cuts, sores, burns etc.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by druggists, price 75c. per bottle.
Hall's Family Pills are the best.

"OIL PAINTINGS."

Those That Cost 90 Cents Apiece and Sell For $2.

"Most of the cheap oil paintings," said the picture dealer, "are done by Italians on the east side in New York. They work in their living rooms, and most of the paintings have several half grown children as assistants. The wholesale dealers have a number of such artists on their books and agree to take all they can do, the firm supplying the canvas, but not the paints. Of course the pictures are done rapidly.

"An expert will range six or eight canvases on a shelf that is used instead of an easel and generally has a colored print tacked up above as copy. Then he proceeds to rapidly block in the subject. A favorite scene is a mountain lake with a ruined temple in the foreground. He will indicate the lake, the sky and the mountains without attempting any details and pass on to the next canvas. By the time he is through with the last one the paint on the first is dry, and he proceeds in the same order with the trees, clouds and temple. Meanwhile his helper is putting in all the small accessories, and by the time daylight wanes the row will be done. By this system of working the artist does not have to be continually changing his brushes, and he loses no time in waiting on the drying of pigment.

"We sell such a picture as he would turn out at about $2, including frame, the net cost of the canvas to the dealer being in the neighborhood of 90 cents. The workman gets 40 cents apiece for his paintings, and most of them average $2.50 a day year in and year out. I know one man who makes just double that amount, but he has two clever children. As you may see, some of the pictures are by no means devoid of merit in spite of their slap dash handling. In fact, a good many of the 40 cent artists occupy their leisure in doing artistic things which they may or may not be able to sell. The others bring in a steady income and keep the pot boiling."—New Orleans Times-Democrat.

TRUTH AND A TRUNK.

Look Out For Baggage If a Woman Tells You It Isn't Heavy.

I know a woman who travels around the country with a trunk as big as a house. Protests of husband and friends are of no avail, and it seems to me the case is a perfectly proper one for the Anticruelty society. When I mentioned this to the lady with the trunk, she said, "But they are only to look after children and animals."

"Perhaps they can twist their constitution to get the baggageman under the head of animals and prosecute you."

She did not appear at all discomposed. The last time she went away I groaned for the expressman. The house was in an awful turmoil, and the trunk was on the third floor.

"It's not very heavy," I heard her say. At the remark the expressman immediately called his helper from the wagon. "I always know what that means," he said, with a knowing nod to the maid. When he got up stairs, he could hardly lift one end. "Never failed," he said. "When they say it's light, it's dead sure to be heavy. They don't mean it, but they can't tell the truth about a trunk. I don't know whether they think we don't know about weight, or we'll charge them less if they say it's light, or what, but we always look out for the trunk that's called light." Then he and his helper tugged and pulled and jammed holes in the wall as they went down stairs.—Philadelphia Press.

A Triple Coincidence.

An almost incredible triple coincidence was noted in France a few years ago. In 1894 the deputy for the Ardennes was M. Ferry; for Loir et Cher, M. Brisson, and for the Vosges, M. Hugo. In 1793, 101 years earlier, each district had been represented in the chamber by a man of exactly the same name.—San Francisco Call.

Not Her Style.

"The idea!" exclaimed the sensational actress as she beat an angry tattoo on the floor with her slipper.

"What's the trouble? Can't you get your divorce?"

"Yes, but that lawyer has offered to secure it without publicity!"

NOT MUCH OF AN EATER.

It Took, So He Said, Very Little to Satisfy Him.

Captain B. W. Morgan, every inch a Welshman himself, likes to tell this story when there is another Welshman in hearing: He went home to dinner one day and found a paper hanger at work in the house. He asked the time, and Captain Morgan told him it was noon.

"I guess I'll knock off and go home to dinner then," the paper hanger remarked.

"Stay and eat with us," the captain said, and the invitation was accepted.

Captain Morgan was attentive to his guest during the meal. He had a prodigious appetite. The captain helped him to roast beef several times, until at last he had some curiosity to see just how much the fellow would eat without crying enough. The game was growing quite interesting when the fellow began to show signs of quitting.

"Will you have some of the plum pudding?" the captain asked him to revive his failing appetite.

"No, thanks," he replied. "I've had enough, I think."

"Oh, take a small piece of the pudding!" the captain urged. "It's genuine English plum pudding and home-made at that."

"Well, I don't mind trying it," he said.

The captain helped him to a section of the pudding weighing about a pound, and he ate it with much relish. Then he shoved his chair away from the table and leaned back for an after dinner chat.

"I'm not much of an eater," he said, not noticing the smile on the captain's face. "It takes very little to satisfy me. Say, you ought to see the Welsh eat."

"Are they hearty eaters?" asked the captain.

"Hearty eaters?" repeated the fellow. "Say, they eat like a lot of hogs."—Pittsburg News.

How He Was Cured.

Mrs. McPherson was attracted by the following advertisement the other day:

"To the Public—A gentleman who was cured of drinking, smoking, talking too loud, going out at nights, going to the races and gambling and who also gained 20 pounds of flesh in three years and was completely restored to health, will sell the secret to any respectable person for half a crown. If no cure, money refunded.—Address, in confidence," etc.

Mrs. McPherson sent for the remedy and received the following reply:

"I was cured of all the bad habits mentioned by a three years' enforced residence in her majesty's prisons."—London Tit-Bits.

Was His Own Doctor.

"For towering nerve," said a chief of division in one of the departments, "a young sun down doctor, attached to my force here, is the limit. He took three days' leave last week, and when he returned to the office he brought with him a doctor's certificate. It was signed by himself: 'This is to certify that Umptara Jones there he inserted his name) has been under my professional care for the past three days,' etc. He submitted it to me without batting an eye, and he looked real hurt and down at the mouth when I told him he couldn't make that kind of a game stick."—Washington Post.

She Insisted.

"Did that man to whom you were just talking say your affairs were mismanaged?" asked Mr. Meekton's wife severely.

"Now, Henrietta, that was simply a little aside. It wasn't intended for your ears at all"—

"I insist!"

"Oh, well, if you insist; he didn't say my affairs were mismanaged! He said they were Mrs.-managed."—Washington Star.

ROBERT DOWNING

Tells the Secret of His Great Endurance.

Robert Downing, the Tragedian.

Robert Downing was recently interviewed by the press on the subject of his splendid health. Mr. Downing promptly and emphatically gave the whole credit of his splendid physical condition to Pe-ru-na, saying:

"I find it a preventive against all sudden summer ills that swoop upon one in changing climates and water.

"It is the finest traveling companion and safeguard against malarial influences.

"To sum it up, Pe-ru-na has done me more good than any tonic I have ever taken."

Healthy mucous membranes protect the body against the heat of summer and the cold of winter. Pe-ru-na is sure to bring health to the mucous membranes of the whole body.

Write for a copy of Dr. Hartman's latest book entitled "Summer Catarrh." Address Dr. Hartman, Columbus, O.

Remember that cholera morbus, cholera infantum, summer complaint, bilious colic, diarrhœa and dysentery are each and all catarrh of the bowels. Catarrh is the only correct name for these affections. Pe-ru-na is an absolute specific for these ailments, which are so common in summer. Dr. Hartman, in a practice of over forty years, never lost a single case of cholera infantum, dysentery, diarrhœa, or cholera morbus, and his only remedy was Pe-ru-na. Those desiring further particulars should send for a free copy of "Summer Catarrh." Address Dr. Hartman, Columbus, O.

For the Family

All ages hail with delight the coming of the most wonderful, meritorious preparation that will lighten the ills of humanity and will do away with the taking of obnoxious, violent purges, inconvenient liquids, and pills that tear your life out. Simply because in CASCARETS Candy Cathartic you will find just what you want, convenient in form, pleasant of taste (just like candy) and of never-failing remedial action. They have found a place in every well-regulated household, and are the favorite medicine of the whole family, from baby to good old grandpa.

Don't be fooled with substitutes for CASCARETS!

a respite.—Cincinnati Enquirer.

"I take pleasure in praising your valuable remedy CASCARETS. I and my whole family received relief from the first small box we tried. I certainly recommend CASCARETS for the cures they make and trust they will find a place in every home. Yours for success." PETER WEBB, Jr., Palm Grove Ave., McKeesport, Pa.

A DESPERATE RIDE.

He Braved the Storm of Bullets and Saved the Regiment.

"That is one of the bravest men I ever knew," said General Rosecrans, pointing out his inspector general, Arthur C. Ducat. "I saw him coolly face almost certain death to perform a duty. Three on the same duty had fallen before his eyes, and he had to run the gantlet of a thousand muskets, but he did it."

The words were spoken to James R. Gilmore while on a visit to "Old Rosey's" army at Murfreesboro, who records them in his "Personal Recollections."

General Rosecrans referred to Ducat's behavior at the battle of Iuka. The inspector general had observed that a regiment of General Stanley's division was about to be overwhelmed by a much larger force of the enemy.

"Ride on and warn Stanley at once," said Rosecrans as Ducat reported the danger. An acre on fire and swept with bullets lay between him and the menaced regiment. Ducat glanced at it and said:

"General, I have a wife and children."

"You knew that when you came here," answered Rosecrans coolly.

"I'll go, sir," said Ducat, moving his horse forward.

"Stay a moment. We must make sure of this," said the general, beginning to write dispatches, the paper resting on the pommel of his saddle. He wrote three; gave one to each of three orderlies and sent them off at intervals of about 60 yards over the bullet swept field. Then he looked at Ducat, who had seen every one of the orderlies fall lifeless or desparately wounded. Without a word he plunged into the fire, ran the gantlet in safety, got to Stanley and saved the regiment, but his clothes were torn by minie balls, and his horse received a mortal wound.

POETRY WHICH BURNED.

The Successful Scheme of a Rhymester to Make Money.

A very wealthy, sedate and enterprising manufacturer in Pennsylvania has a brother who is trifling, dissipated and of course a spendthrift. But the fellow now and then displays remarkable ingenuity in "making a raise." All his life he has indulged, among other bad habits, that of writing execrable verse, much of which, however, he has managed to get printed.

Lately he conceived the monstrous idea of having all his stuff printed in a book and with the aid of an unscrupulous printer succeeded in bringing out the "work" in quite handsome shape. But in the most affectionate terms he "dedicated" the book to his wealthy brother, who regards his near and dissolute kinsman's "poetry" as really the most reprehensible thing that the incorrigible fellow does.

But the rhymester and his "black art" accomplice knew their business. They printed a large edition of the book and sent a copy to the wealthy man, who immediately purchased the entire edition and the plates and made "words that burn" of the "poems" by means of a bonfire. He also sent to his cruel brother and induced him to accept a salary to do nothing but throttle his verse fiend.

The wicked printer obtained capital enough to go to Chicago and carry on a reputable printing establishment, and the bad brother is earning more money by keeping his verse fiend silent than better poets do by keeping their muses constantly at work.—Woman's Home Companion.

A Hawaiian Temple of Refuge.

Kawaihae's one remaining point of interest is the ruins, back on the hill, of a temple of refuge built by Kamehameha the Great. It is the very last of the heiaus, where in the old days, during strife, the peaceful sought and obtained immunity from harm—for into these temples a man might not pursue an enemy. This ruin indicates a very substantial structure, in parallelogram form, about 220 feet long by 100 wide. Entrance is gained through a narrow passage between two high walls, and the interior is laid off in terraces and paved with smooth, flat stones. The wall up hill is 8 feet high, and on the down hill side 20 feet high, and both are 12 feet thick at base.—Caspar Whitney in Harper's Weekly.

A Sadly Lost Dime.

When last in New York, Carnegie had a bitter experience with a messenger boy, whose tardiness in delivering a business message came near upsetting a deal of great importance. Referring to this incident while at dinner with friends that evening, he told of an office boy who worked for him many years ago when he was of far less importance in the commercial world.

"James," said Mr. Carnegie, "was a willing boy, but his ability as a stutterer was simply wonderful, and I often found it more convenient to attend to little errands myself than to wait for his explanations. One day a neighbor wanted to send a nice note clear across the city, and I permitted James to carry it for him. The trip was a long one, and James was gone quite three hours. When he returned, I asked him how much he had charged for his services.

"'Fi-fi-fi-fi-fi-fi-fi-fifteen c-c-c-cents!' was the gasping reply.

"'Why didn't you make it a quarter?' I asked.

"'I c-c-c-c-c-could-could-couldn't s-s-s-s-say it,' he replied, with tears as well as hyphens in his voice.

"Right then I made up my mind never to give any one my services without first making sure that I could recite my price without stuttering, and I never have."—Cincinnati Enquirer.

The Return of the Rations.

In the civil war our soldiers faced privation and hunger. A little story in H. Clay Trumbull's book, "War Memories of a Chaplain," tells of the spirit in which they sometimes did it.

While before Petersburg doing siege work in the summer of 1864, our men had wormy hard tack served out to them. It was a severe trial to the men. Breaking open the biscuits and finding live worms in them, they would throw the pieces in the trenches, although the orders were to keep the trenches clean.

A brigade officer of the day, seeing some of these scraps along our front, called out sharply to our men:

"Throw that hard tack out of the trenches." Then, as the men promptly gathered it up, he added, "Don't you know that you've no business to throw hard tack in the trenches?"

Out from the injured soldier heart there came the reasonable explanation, "We've thrown it out two or three times, sir, but it crawls back."

Pretty Lively Eating.

When one grows weary of the eternal ices, blancmanges, charlottes and puddings served to us year in and year out for dessert, it is pleasant to hear of an innovation. A traveled American remarked that she once had the felicity of sitting down to a Japanese dinner at which were served such dainties as melons, ices, fruits and sea frogs. There was in addition to these sweets a covered dish, into which, at the beginning of the dinner, a bottle of wine had been poured.

When the sea frogs and other dainties had been discussed, the cover of this dish was removed, and a number of sandhoppers, hilariously intoxicated and jumping about in the wildest manner, were presented to the gaze of the astonished American guests. The lively dessert, so the fair traveler says, was caught by the Japanese with little bamboo sticks and eaten with great gusto.

The New Way.

The cannibal chief stood with his hand shading his eyes. A solitary figure was timidly creeping toward him from the jungle. Suddenly the old chief started. He took a quick step forward. "It is," he cried, "it is my son! He is coming home again!" Then with his eyes still fixed on the slouching figure he shrilly called to his head hunter: "Mbongwa, the prodigal is returning! Kill the fatted Kaffir!"—Cleveland Plain Dealer.

Pure Tea in packages at grocers' **Schilling's Best**

Odd Tendencies of Slang.

A writer in the Journal des Debats complains of the process of degradation which is going on in the French language. The peasantry, for instance, frequently speak of the ass, a humble partner in their daily toil, as "the minister," and other words of dignified import are applied to equally humble, if not actually base, uses.

The same tendency, however, appears, to be showing itself in Germany, where the title "monarch" passes current in modern slang as a designation for tramps and footpads. The other day a noncommissioned officer in charge of barracks at Danzig addressed this term to a troublesome private just as a captain happened to be passing. The latter at once reported the incident, and the barrack master was brought before the magistrates on a charge of "leze majesty."

Evidence was adduced to prove that in east Prussia "rascal" and "monarch" were convertible terms, so that the court acquitted the prisoner, although he loses his rank and his pension.

Remember that you can buy Jesse Moore A. A. Whiskey, for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

The title of "majesty" was first given to Louis XI of France. Before that time sovereigns were usually styled "highness."

A beggar is usually a touching object.—Berlin (Md.) Herald.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

FOR THE PARIS FAIR

UNCLE SAM'S HEADQUARTERS AT THE BIG SHOW.

Architectural Style Resembles That of the National Capitol—Washington and McKinley Statues Repose Side by Side—Description of the Building.

The United States national pavilion at the Paris exposition will be one of the most ornamental buildings on the grounds. The accompanying picture is the first accurate representation of it, for the "faked" pictures which have appeared in some of the papers gave no adequate idea of anything save its general contour, which has long been known. It is on the Quay d'Orsay on the left bank of the Seine among the buildings of the great powers, and is one of the best locations at the exposition. The plan is square with a large central dome and rotunda, which will be used as a general meeting place of Americans during the exposition. Three sides of the rotunda have rooms 13 by 36 opening out of it. That on the left of the main entrance will be used as a lounging-room for gentlemen, that on the right for ladies and that in the middle as a parlor for both ladies and gentlemen. The second story will be given to the States, where people who so desire can rest and register their names. The third story will be reserved for the private offices of the commissioner general and staff. The fourth floor will be given to the States and used in a similar manner to the second.

UNITED STATES BUILDING FOR PARIS

The building is 85 by 90 feet and 160 feet high from the lower level. There will be two electric American elevators. The style of the exterior of the building is classic, and while different in design from any of the buildings at the Chicago fair yet the feeling there prevalent has been kept and will be in marked contrast to the present French buildings, which are not so architectural in treatment. The main entrance is under a large portico which spans the esplanade, and under this every visitor who walks to the other national buildings will be obliged to pass. In the center arch of this portico, facing the River Seine, will be French's statue of Washington, while a bust of President McKinley will occupy a niche over the door. In the front of the building on the river bank will be a boat landing which will be highly ornamented as a classic barge. All the boats of the American line which connect with the American trolley system at Vincennes will make a landing at this pier.

The interior decorations of the building are in charge of an art commission composed of George B. Post, Charles A. Coolidge, John B. Cauldwell, C. F. McKim, John La Farge, Daniel C. French, Howard Russell Butler, Charles L. Hutchinson, Henry Van Brunt, Halsey C. Ives, R. S. Peabody and Henry Walters—a galaxy of artistic and architectural experts whose intention is to make it the finest example of decorative art which the United States has thus far produced in any exposition.

To Make Glassware Shine.

Tumblers and wine glasses should be washed in hot water and rinsed in cold, and should be dried with a clean cloth as soon as possible, and when perfectly dry rubbed with tissue paper. For cruets, decanters, etc., tear up some clean newspapers into pieces about as big as 10-cent pieces, put into bottles, half-filled with warm water; give bottles a rotary motion. When clean, decant and a little practice throws out the paper. They will be as bright as new. To clean glasses—wine glasses especially—which have become discolored on edges, use cigar ashes, friction and a damp cloth.

NEW CENTER OF POPULATION.

Census of 1900 Will Find It Near Eastern Illinois Line.

What will be the center of population of the United States in 1900, as revealed by the coming census. In 1890 it was a rural spot a few miles south of Greensburg, Ind., within the retail commercial radius of Cincinnati. What point will mark the center of population next year?

The entire distance which it has traveled in 100 years, since the taking of the first census, is 505 miles. The average rate of its western movement has been 50.5 miles each ten years. At that rate the center of population in 1900 will be at the intersection of the 39th parallel of latitude and the 87th degree of longitude, at a point about three miles southwest of Bloomfield, Greene County, Indiana, twenty-five or thirty miles east of the Illinois State line.

CENTER OF POPULATION MOVES WESTWARD.

The exact location of this point cannot be determined until after the census of 1900 has been taken. Many are of the opinion that the western movement will be less than heretofore, and some even declare that the East has outstripped the West during the past ten years in the matter of increase of population, and that the center will not move as far west as 50.5 miles. Government officials who are informed concerning matters relative to population believe that the center will remain in Indiana, and that its location will be somewhere in the vicinity of Terre Haute.

In 1850 the center of population of the United States was at a point almost due south from Parkersburg, W. Va. Ten years later it moved over to the southeastern border of Ohio, and for thirty years remained in that State. In 1870 it was near Chillicothe. In 1880 it dropped down almost to the center of Cincinnati. Ten years later it had crossed into Indiana, and will probably remain there until Illinois shall claim it in the twentieth century. It is noticeable that this center has always followed closely the thirty-ninth parallel of latitude. It is a further fact, curious enough, that the majority of the large cities of the United States, as well as of Northern Europe, are either on or reasonably close to the thirty-ninth parallel.

In determining the center of population of any country, the population is first distributed by "square degrees," as the area included between consecutive parallels and meridians has been designated. A point is then assumed tentatively as the center, and corrections in latitude and longitude to this tentative position are computed. In 1890 the center was assumed to be the intersection of the thirty-ninth parallel with the eighty-sixth meridian west of Greenwich. The population of each square degree was assumed to be located at the center of that square degree, except in cases where it was manifest that this assumption would be untrue, as, for example, where a part of the square degree was occupied by the sea or other large body of water, or where it contained a city of considerable magnitude which was located away from the center. In these cases the position of the center of the population of the square degree was estimated as nearly as possible.

Railways and immigration have been the great factors in pushing the center of population westward. Another matter which affected it was the acquisition of Texas and the Gadsden purchase. In calculating the center of population Alaska and our more recent acquisitions are not included.

A NATURE-LOVER'S WEALTH.

Desire for Wealth-Bought Luxuries an Error of Mind.

The following extract from an interview with John Burroughs, recently published in Success, contains things that are well thinking about.

"I consider the desire which most persons have for the luxuries that money can buy an error of mind. It means nothing except a lack of higher tastes. Such wants are not necessary wants, nor honorable wants. If you cannot get wealth with a noble purpose, it is better to abandon it and get something else.

"Peace of mind is one of the best things to seek—and finer tastes and feelings. The man who gets these, and maintains himself comfortably, is much more admirable and successful than the man who gets money and neglects these. The realm of power has no fascination for me. I would rather have my seclusion and peace of mind.

"This log hut, with its bare floors, is sufficient. I am set down among the beauties of nature, and in no danger of losing the riches that are scattered all about. No one will take my walks or my brook away from me. Flowers, birds and animals are plentifully provided. I have enough to eat and to wear, and time to see how beautiful the world is, and to enjoy it.

"The whole world is after your money, or the things you have bought with your money. It is the trying to keep them that makes them seem so precious.

"I live to broaden and enjoy my own life, believing that in so doing I do what is best for every one. If I had run after birds only to write about them, I should never have written anything that any one else would have cared to read. I must write from sympathy and love, that is, from enjoyment, or lot at all."

Thought Her a Vision.

In "Life and Letters of Harriet Beecher Stowe" Mrs. Fields relates an anecdote illustrative of the peculiar faculty of Professor Stowe of seeing visions. From early youth he had possessed the singular power of seeing moving about him persons who could not be perceived by others.

Mrs. Stowe, during her residence at Andover, planned to go to Boston one day on business. Making her preparations hurriedly, she bade the household farewell, and rushed to the station, only to see the train go out as she arrived. There was nothing to do but return home and wait patiently for the next train; but wishing not to be disturbed, she quietly opened a side door, crept noiselessly up the staircase leading to her own room, and sat down by her writing-table in the window.

She had been there about half an hour when Professor Stowe came in, looked about him with a preoccupied air, but did not speak to her. She thought his behavior strange, and amused herself by watching him; at last the situation became so extraordinary that she began to laugh.

"Why!" he exclaimed, with a most astonished air, "is that you? I thought it was one of my visions!"

Be thankful for what you have and console yourself with the thought that what you have not would render you miserable if you had it.

It is a good idea to trust very few people; those who are not dishonest may be careless.

If you live a natural, common sense life, you will be abused, but you will be happier, and live longer.

STYLISH EFFECTS IN FALL MILLINERY.

OUR BOYS AND GIRLS.

THIS IS THEIR DEPARTMENT OF THE PAPER.

Quaint Sayings and Cute Doings of the Little Folks Everywhere, Gathered and Printed Here for All Other Little Ones to Read.

Beyond the Isle of What's-the-use,
Where Slipshod Point is now,
There used to be, when I was young,
The Land of Anyhow.

Don't Care was king of all this realm—
A cruel king was he!
For those who served him with good heart,
He treated shamefully!

When girls and boys their tasks would slight,
And cloud poor mother's brow,
He'd say, "Don't Care! It's good enough!
Just do it anyhow!"

But when in after life they longed
To make proud fortune bow,
He let them find that fate ne'er smiles
On work done anyhow.

For he who would the harvest reap,
Must learn to use the plow,
And pitch his tents a long way off
From the Land of Anyhow.
—Youth's Temperance Banner.

Helping Pippo Tend the Sheep.

Pippo was a little boy in far-off Italy, a country of sunshine far across the sea, and every day he went out in the fields to tend the sheep and to see that they did not run away down along the little brook. It was nice to be all day under the shade trees, and, to keep him from being lonely, Pippo took with him a flute, and all day long he played sweet tunes upon it. The sheep soon got to know the sound of Pippo's flute, and when they heard it they knew that their kind little master was near, and if it sounded far away they came scampering back, for they liked to be near him.

PIPPO AND NINO.

One day while they were skipping about under the trees they heard the flute, but it sounded very strange. Surely that could not be Pippo? They all looked up to see, and sure enough it was not Pippo, but his little sister Nino, who had come out to spend the day with Pippo and the sheep. Under a big shady tree were the two children, little Nino blowing into the flute with all her might, while Pippo with his fingers played the tune.

The sheep did not know what to make of it at first, but as Pippo and Nino seemed to be having a nice time they thought it must be all right, and after a while they went on about their play. Nino thought that was the nicest day she had ever known, and after that she came often to the field and helped Pippo tend the sheep, until at last they got to know and love her as well as they did Pippo.

A Battle That Was Not Fought.

Many years ago two boys differed about some trifling matter while at play, and one of them challenged the other to fight. The challenge was accepted, and the heroes went into an adjoining field to settle the quarrel. Jackets and caps were thrown on the ground, and all was in readiness, but each appeared unwilling to strike the first blow.

"Now, then, strike me if you dare," said the younger boy, with a fierce countenance.

His companion looked at him, but did not like to strike. At length he said:

"Nay, I have nothing to strike you for."

"Well, then," said the other, who had provoked the quarrel at first, "let us be good friends again, for I have nothing to strike for either."

They dressed and left the field without striking a blow, and never quarreled after.

One of tmem now holds a very respectable position as a teacher of youth. How few battles would be fought, either among young people or old, if, in imitation of these boys, the disputants would try to find a reason for a quarrel before they strike a blow.

Beecher Romped with the Children.

Dr. E. K. Cressy, of New York, tells a good story of his boyhood. One day his mother went away and told him and his brothers to be quiet while she was gone. As there was a nice flat hairbrush with which she spanked them when they did not mind, they promised to be very good and not romp. They were as still as mice when Mr. Beecher called and found no one at home but these well-behaved boys.

"Well," said he, "you youngsters may just get ready for the romp of your lives."

"But mamma told us we mustn't romp," they said.

"I'll take all the blame," said the great preacher, and they began.

When Mrs. Cressy came home she heard a terrible racket, and rushed into the house to use the back of the hairbrush in the good old way, but she stopped at the door in astonishment.

There on the floor lay Henry Ward Beecher on the flat of his back, and the boys were dancing around and over him like a pack of young Indians.

All of them were "frozen stiff" at the sight of Mrs. Cressy, except Mr. Beecher, who arose and got the hairbrush.

"Mrs. Cressy, I told my friends here that I would take all the blame for this romp," he said, handing her the brush, with a bow, "and I am ready for whatever they are to get. You may begin at once."

But she didn't spank him.

Dolly's Hair.

Dolly's hair that you think so pretty very likely came from the back of a light-footed Angora goat, as nearly all the dolls wear hair of this kind. The Angora goats have a beautiful coat of long, silky hair that grows until it almost reaches the ground. This is cut off and sent to Munich, in Germany, where quick-fingered girls form it into wigs for dolls. Over $400,000 worth of this goat hair is shipped to Munich every year for this purpose alone.

Wouldn't Keep Them Buttoned.

Little Alice had been delegated to rock the baby to sleep. By and by her mother came in and found him still awake. "Why, Alice," she said, "isn't your little brother asleep yet?" "No, mamma," was the reply, "I tan't make him teep his eyes buttoned."

Why Harry Was Absent.

"Harry," said the teacher to a small pupil, "you were not present yesterday. Were you detained at home in consequence of the inclemency of the weather?"

"No, ma'am," replied Harry. "My mother wouldn't let me come 'cause it rained."

Human Nature Crops Out.

"Tommy," asked a mother of her 3-old son, "what would you do if I gave you a nice orange?" "I'd wish you would give me another," replied Tommy.

AN OLD FAMILIAR FRIEND.

New Endings Suggested for a Well-Known Tale.

The character of the old joke has become a decidedly stormy one.

A few evenings ago at a little downtown gathering one of the girls said she had heard such a good story.

"It happened out in the East End only last week," she said. "A young woman whose home is on one of the prominent cross streets was receiving a call from a young man, and it came on to rain dreadfully. You must remember the night. Several times the young man offered to go, but each time it rained harder than ever. He lived about half a mile away, but, of course, it meant a thorough drenching to venture out. Finally the girl said, 'Well, it would be simply uncivilized to turn you out such a night as this. Brother Robert is away from home, and you can have his room just as well as not.' The young man demurred a little, but finally appeared to appreciate the force of the argument. 'Now, excuse me a moment or two,' said the young woman, 'and I will see that the apartment is made ready for you.' So she went upstairs and told her mother, and then stepped into the brother's room to see that it was in order. She wasn't gone more than five minutes, but when she went downstairs the young man had completely disappeared."

Everybody breathed hard when she reached this dramatic climax.

"The young woman looked around the room in a bewildered manner. Then she looked on the hat table in the hall. His hat wasn't there. She was quite dazed. She waited about in an aimless manner, vainly striving to solve the mystery. Suddenly she heard rapidly approaching footsteps. A second later there came a soft rap on the door. The young woman threw it open and there stood the youth! He was evidently soaked through and through. 'Why, where on earth have you been?' she cried."

At this point the narrator was abruptly interrupted.

"Pardon me," said one of the listeners, "but if I remember it aright, the young man said that he went home to secure his nightshirt."

"Excuse me," said another listener, "but the way I heard it he went home to ask his father if he wouldn't split the morning's supply of kindling wood for the kitchen stove."

"I hate to be contradictory," said the third interrupter, "but I'm sure I was told that he went home for his mamma's good-night kiss!"

And the story wasn't finished.—Cleveland Plain Dealer.

The cheaper the man, the tougher the story he will tell or believe.

WOMAN AND EMPRESS.

GERMANY'S FIRST LADY IS THUS DESCRIBED.

Coming of Triplets to a Poor Berlin Carpenter's Wife Gives the Sovereign Opportunity to Show Her Kindly Consideration for Others.

The Empress of Germany is a woman first, a queen afterward, as the following little story of German life demonstrates:

In the month of January last the stork, as the Germans say, paid a visit to the wife of Mr. Stumkowska, a carpenter in the Wienerstrasse. This bird was no unfamiliar visitor in the family of the carpenter, as in the twelve years of his married life his family was increased by seven children, all girls.

This one-sided distribution was probably displeasing to Master Longlegs, for he seems to have made an effort to re-establish the balance at one fell swoop. In the first month of the year the family of Mr. Stumkowska was increased by three boys, which made it a burning question unto the father how they were all to be supported.

At this critical moment a mysterious Providence seemed to have taken the solution in hand. Packets full of baby clothes and other useful articles began to arrive. The sender, Count Keller, was unknown to the happy recipients. A sister of charity who attended Mrs. Stumkowska suggested an explanation of the mystery. Count Keller, she declared, was the chamberlain of the Empress.

One day there was excitement in the Wienerstrasse. A royal equipage had stopped at the corner of the street. In it were two ladies and a gentleman, who got out and he took themselves to No. 49. Before they entered the house one of the ladies bought some cakes and ordered some loaves to be sent to the fifth floor. Then they mounted to the fifth floor. "Good day, liebe frau," said one of the ladies; "we would like to see the triplets."

The proud mother pointed to the three babies lying side by side in the family bed, and who regarded the visitors with six big, blue eyes. "Your house is clean and neat," continued the visitor. "Do you look after everything yourself?" Frau Stumkowska replied that she looked after the house herself, but that it meant a good deal of work. "That I can believe," was the answer. "I've got children of my own, though I have not got so far as triplets."

The lady then asked if the husband had work and how Frau Stumkowska got on with her three boys. The first question was answered in the affirmative. As to the second, she said if she had a perambulator she would regard the future with more equanimity. The unfortunate triplets had so far had no proper resting place.

The lady who had conducted the conversation then rose to go and said: "I hope with all my heart that your children may be blessed with health and strength and that they may become honest and upright citizens." She at the same time handed the astonished mother a sum of money.

As the lady left the room the other lady accompanying her asked the happy mother, "Do you know who that lady is?"

"Mein Gott, I really believe it is the Empress."

The Empress nodded and smiled and, accompanied by the Count and Countess Keller, returned to where her carriage was waiting and drove to the palace.

Justin McCarthy contemplates a book on the state of Ireland in his youth.

It is not generally known that Henrik Ibsen, the dramatist, was for many years a druggist.

Mrs. Annie Hector, famous under the name of Mrs. Alexander, is still living. She has written thirty-five novels.

Mrs. Frances Hodgson Burnett is writing a novel at her place in Kent, England, where she constantly entertains American guests.

It is to be hoped, says an Englishman, that Mark Twain's latest pronouncement is what Artemus Ward used to call "a goak." He is going to write honest descriptions of all the notable persons he has ever met, and he will do this with such thorough candor and frankness that it will not be possible to print his descriptions for another century. No publisher is likely to pay Mr. Twain in advance for copy on these terms, and Mr. Twain will probably find his life somewhat solitary, as all sensible men will fight shy of him.

The literary amateur detectives who have been unceasing in their efforts to uncover the identity of Fiona MacLeod, the Scottish "Neo-Celt," may at last take a rest, as the novelist has at last made a public statement—of a kind, says the Criterion. She declares that she is not Mrs. William Sharp, nor Andrew Lang, nor any of the other celebrities with whom she, from time to time, has been identified. She is nobody but herself; she writes under the name of Fiona MacLeod and no other. She, however, declines emphatically, and with somewhat angry dignity, to satisfy curiosity as to her personality. She has "imperative private reasons" for wishing to preserve her incognito, and thinks that publicity, which she dislikes, would interfere with her writing. At the end of her letter, which is given to the world through her publishers, she appeals to the paragraphers for "The courtesy both of good breeding and good sense"—in fine, to be let alone.

FOUR MONTHS UNDER GROUND.

Long Sojourn of a Kitten in a Montana Mining Shaft.

Little Annie McGinn of West Butte owns a kitten that has just emerged from one of the strangest adventures that ever befell any little girl's feline pet. This cat in particular, after wandering through the mine workings under Butte since last fall, reappeared on the surface two miles from the place where she tumbled down a shaft Pussy spent fully four months wandering through underground Butte, but has survived in good shape.

The cat, becoming frightened at something, jumped down a shaft near the big Poulin hoist. She survived and opened up a howling contest by itself. Little Annie was heartbroken. Her brother secured a long rope and lowered it into the shaft, hoping that the kitten would "catch on" and be hoisted, but the cat only howled louder. Annie used to carry bits of meat and bread over to the hole and throw them down for the cat to eat. After a couple of weeks the moaning in the shaft ceased. Annie gave up her pet as lost forever, and Christmas at Annie's home was not as cheerful for the owner of the lost kitten as it might have been had kittie not been so venturesome.

Early in the winter the miners in the Green Mountain, the Mountain Con and other shafts in the vicinity imagined they heard sounds similar to those made by a sick infant. Later the same noises were heard in the Anaconda, Mountain View, Gray Rock, Modoc, Mountain Chief, Rarus and the other workings on the Meaderville slope.

While some children were playing near the dump of the Colusa mine they were startled upon beholding a cat tumbling down the pile of rock with a car load of waste that had just been dumped. The cat meowed piteously as it rolled over just in time to escape a big chunk that came bounding past. The children ran to the rescue and found a sorry-looking species of the cat family. Its hair was matted and soiled, its eyes red and it was sore and lame. The only mark of identification was the little ribbon about its neck, to which was attached a small brass bell. The feline underground explorer was returned to its owner at once.—Anaconda Standard.

LAW AS INTERPRETED.

The constitutionality of a statute providing for a special jury commissioner in counties of a certain population for the selection of a special jury list for criminal cases is sustained in People vs. Dunn (N. Y.), 43 L. R. A. 247, against objections on various grounds.

The sender of a telephone message to a telegraph operator, with directions to send it by telegraph is held, in Carland vs. Western Union Telegraph Company (Mich.), 43 L. R. A. 280, to be unaffected by a regulation, of which he did not know, that all messages must be given to the agent in writing.

The absolute right of a corporation to use the street railway tracks of another corporation is held, in Ingersoll vs. Nassau Electric Railway Company (N. Y.), 43 L. R. A. 236, to be protected against a subsequent statute which would make the exercise of that right depend on the consent of abutting owners.

One who can look out from the front of his house, with an unobstructed view, upon a park near by, is held, in Douglass vs. Montgomery (Ala.), 43 L. R. A. 376, to be entitled to maintain a suit to prevent destruction of the park in violation of the trust created by its dedication, although he may not be strictly an abutting owner.

German Street Railways.

An instance of the minuteness of the German municipal regulations in regard to street railways is shown by a recent ruling of the police department that it is dangerous for a conductor to pass along the steps of open horse cars which have transverse seats. The railway company has therefore been obliged to cut a passage through the seats and end partitions of some cars that it has been operating. As the width of the cars in Germany is restricted to two meters (6 feet 6¾ inches) outside, this ruling reduces the carrying capacity 25 per cent., so that a six-bench car will seat but eighteen people. Standing inside is prohibited on all German roads, but a limited number may stand on the platforms; this limit, however, which is plainly posted, is strictly enforced.—Boston Herald.

Cultivated Beauty.

A photographer accounts for the high rate of beauty among actresses by the fact that they cultivate becoming expressions of countenance. Here's a hint which other women—men, too, for that matter—might profit by.

American Exhibits in Paris.

Among the American attractions planned are a gold column of the value of a million dollars, a trolley line, and a pier landing where Americans will take steamer for the Vincennes woods.

Some literary society should decide what constitutes success in life. Is every one who fails to get rich enough to pay off the mortgage on the old home, a failure?

Was ever a man evicted from a house for failure to pay rent on a pleasant day? It is always reported that the eviction takes place in a driving storm.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, OCTOBER 6 1899

(Continued from last week.)

I am not prepared to predict that even a majority of these discoveries will develop into great mines, but I am convinced that when properly opened some of them will be found to be prolific, and will be worked successfully, like the mines of Spain, Austria, Saxony-Hungary, Norway and Sweeden, Greece and other old mining countries.

With some experience as a traveler in foreign countries, I know of no finer, grander scenery than may be found in the Sierra Nevada mountains on the west side of Owens valley, and it has always been a mystery to me why tourists and railroad companies do not realize this fact. Beerstadt made some of his most interesting studies in these mountains, and William Keith in his famous painting, "The Heart Of The Sierras", has pictured mountain scenery similar to that which I have so often admired. If the owners of the Carson and Colorado railroad, which now runs the entire length of the valley, would advertise the natural beauties of the route, they would soon become favorably known, and the Swiss chalet and commodious hotel would not long be wanting.

Owens valley, although in its natural state a desert, is not without beauty; and it can be wholly irrigated by Owens river and other mountain streams, and made to resemble the valley of the Nile Unlimited water power is everywhere available. The valley is an elevated inclined plateau, about 100 miles in length by ten or more miles in width, surrounded by mountains on all sides. It is easy of access from the north and south, but the few east and west passes are abrubt and difficult.

One may sit on a hot summer day by the side of beautiful, green-fringed, meandering Owens river, and see in plain sight, as Shasta from Sisson, not a single peak, but a grand range of snowy ones, and many a mountain valley throuh which the snow is drifting. Taking one of many mountain trails leading up wild, rocky canyons, the pleasure-seeking tourist may easily reach a locality where it is perpetual winter, or at least where the snow lies ever unmelted.

From this elevated position a retrospective view must naturally arouse in the mind of the beholder emotions of the most pleasing nature. While the crisp Alpine breezes, cooled by the snow on which he stands, keep the pine branches in constant motion, he may see to the eastward a strip of sloping land having the color and sheen of a Quaker maiden's garment, and he need not be told that the wavy green ribbon before him is Owens river, and that what appears a metallic disc glittering in the sun light, is Owens Great Lake. An excursion up the grand canyon through which Owens river flows down the mountain side would be found full of interest; and there are several small craters, from which fiery lava once flowed and now lies in sable confusion, a deposit known as "The Black Rocks." There are also several small cones from which volcanic ashes were once ejected. At Hot Springs from a trachyte hill a large stream of nearly boiling water bursts out, which I once saw reluctantly performing the menial occupation of rotating a badly constructed water wheel, which in turn gave motion to a battery of stamps. There is also on the east side of the valley the "White Mountain" of dolomite, like that used in the lower story of the Mills Building in San Francisco. These are a few of the natural objects of interest which occur to me as I write. Owens Lake is a great natural curiosity, interest in which could not be satiated by weeks of study. The Tourist would here find a striking similarity to the Dead Sea and the Jordan, and would be well paid if this were the only feature of interest. Almost due west from the mouth of Owens river and about eighteen miles distant, stands Mount Whitney, the grandest and highest mountain in the United States, and so easy of access that it is said a lady can ride to the summit. I could mention other inducements for tourists to visit this interesting locality, but the purpose of this paper is to give information as to its mineral resources rather than to describe the beauties of nature.

I trust my readers will not construe anything I have written into advice to rush to Owens valley, or any other special mining district, on a venture. Such mines as I hope to see developed will eventually require the investment of large capital. The valley is now quite settled up, much of the land is occupied, and perhaps the best known mining localities are claimed. Chances may still be better there for new discoveries than in older mining districts. The time for taking advantage of a wholly unexplored country, or for speculative booms, has passed, but legitimate mining on the Pacific coast on a large scale, will continue for many generations.

HENRY G. HANKS.

We are on the eve of one of the biggest booms of copper ever known. This metal for the past forty pears has held a very poor place in general estimation on this coast but the attention of our mining men is now being directed as much to copper mining as to gold and silver. In fact, the copper riches of the coast from the Straits of Magellan to Bering's Straits, are simply incalculable. The price of copper at present is 19½ to 20 cents per pound, or double what it was a couple of years ago, and this it is which has given the impetus to the development in locating, prospecting and buying going on all over the coast. Further, nearly all the ore on the coast contains sufficient gold and silver to pay the expense of working, leaving the copper itself, in most cases, clear profit.

A Famished Cat's Prudence.

At Osage City Mrs. C. A. Stodard was cleaning up her garret when by some means the family cat got into an old trunk filled with clothing and was shut in tight and fast. Just 20 days later Mrs. Stodard was in the garret again and heard the cat's feeble cry from the trunk. When the lid was lifted, the cat had just strength enough to climb out. It had torn the clothing in the trunk all to pieces in its clawing and had gnawed the sides nearly through in several places. But perhaps the most singular circumstance was found in the manner in which the cat took care of itself after securing liberty. Mrs. Stodard set before it a big dish of milk and a big dish of water. It would lap a little of each and then lie down for a few minutes, when again it would partake sparingly of the milk and water, and this proceding it continued through the whole afternoon. If that cat had been a human, doubtless it would have swallowed all that was placed before it at one gulp.—Kansas City Journal.

Drawn at Night.

The architect and his friend the builder were driving back to the former's office. They had been out to the edge of the city to look at some work on which they were engaged. As they drove by a certain house the builder looked up at it proudly, saying: "There is a house that I built myself. I not only built it, but I drew all the plans. Every bit of work in it is mine." The architect looked at the house and smiled in a provoking way.

The builder noticed the smile and looked at the house in a new light. "How hard I worked on that!" he said. "In the daytime I had to do something else, but every night I would sit up late drawing on those plans I drew on 'em every night for a month."

The architect looked at the house again and smiled once more, and the builder saw him.

Again he turned his eyes toward the product of his brain, twisted his neck to squint at it after the carriage had passed it. Then he looked at the architect with humility. "It looks as if those plans were drawn at night, doesn't it?" he said, and there was pathos in his voice.—Worcester Gazette.

Pools on Murder Cases.

Bookmaking in murder cases is one of the forms of gambling here, which has opened a new field to the men who are willing to lay odds. The suggestion smacks of the ridiculous, but a gaudily dressed young man, with a few "notes" in his left hand and $40 in money in his right, appeared in the criminal branch of the supreme court here a few days ago. "Who's on trial?" he asked an officer. Being told, he consulted his notes and said:

"Let's see. Lawyer Blank; defense, insanity; charge, murder." And then, turning to the doorman again, "I'll bet you 1 to 10 he's acquitted."

The court officer looked puzzled, but was astounded when the gaudily dressed informed him he was making "book." The court officer saw that he made tracks, but not before over $900 in bets had been placed on the outcome of the case. An investigation showed that there are a large number of these bookmakers doing business around the New York courts, and their profits are said to be very large.—New York Letter in Pittsburg Dispatch.

Landor's Cravat.

At a friendly dinner at Gore House, when it was the most delightful of houses, his dress—say, his cravat or shirt collar—had become slightly disarranged on a hot evening, and Count d'Orsay laughingly called his attention to the circumstance as we rose from table. Landor became flushed and greatly agitated. "My dear Count d'Orsay, I thank you! My dear Count d'Orsay, I thank you from my soul for pointing out to me the abominable condition to which I am reduced! If I had entered the drawing room and presented myself before Lady Blessington in so absurd a light, I would instantly have gone home, put a pistol to my head and blown my brains out."—"Landor's Letters."

The Englishman, it is calculated, expends on the average $250 a year for sustenance; the German $215, the Frenchman $210, the Italian $110, the Russian $95.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

JOHN J. MCLEAN,
Observer.

*Record beginning March 6th 1893

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

No business.

Real Estate Transfers.

The following deeds have been recorded since September 28, 1899:

None recorded.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:30 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 11 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

DIED.

BECK—At Camp Independence, September 21, 1899. Miss Isabella Beck, a native of Ireland, aged 59 years.

Ed. Reinhakel of Big Pine was in town one day this week.

E. H. Edwards came up from Lone Pine this morning.

N. Wines, the stage man, died at Santa Barbara last Sunday.

Tom Webb came down from Long Valley Monday and returned Wednesday.

There were pleasant showers all day yesterday and the weather is still threatening.

The post office has been removed to the Chenot building and a very nice room has been fitted up.

The Radcliffe mine is not for sale. An agent of Capt. De Lamar, who examined it last week, was informed that it could not be bought.

Goldberg, the jeweler, will be here soon and will remain two weeks. He has a fine stock and can fit you out with anything you want.

A. W. Eibeshutz was expected to arrive home this evening, but has been delayed by the snow sheds being afire. He will get here Monday evening.

Chas. Doty and his wife and little son started for their home at Ballarat last Monday. They have spent the summer in the mountains and in Independence.

The Misses Idelle and Christine Gregory have purchased the *Bodie Miner* of Jim Townsend. Miss Idelle Gregory is well known here, and we wish her every success in her new venture.

Ad Smith and family of Big Pine passed through town yesterday on their way to Bakersfield, where they will visit relatives. They intend to take in the Los Angeles Fair this month.

The bang of the hunter's gun is heard now and several fine bags of quail and duck have been fetched to town. The hunters repart that the mosquitos on the slough are almost as big as the ducks.

Bertrand Rhine has a force of carpenters at work on the Chenot building and will have it ready to put his goods in next Monday. He will have everything ready to open a week from to-morrow.

Ed Walker and Billy Grant came up from Olancha early in the week and celebrated the Fourth of July. Billy says its a little late and consequently takes longer to get through. Ed has gone home.

Col. W. R. Woodard General Manager of the Randsburg railway and E. H. Stagg, Superintendent, arrived at Independence last Tuesday and are still here. The gentlemen came by way of Ballarat and Darwin and will examine the new copper camps at Saline before returning and will be prepared to report upon the advisability of extending their road up this way. The Colonel is an inveterate sportsman and took the opportunity to bag a fine lot of mallards and quail while here.

Board of Supervisors.

MONDAY, Oct. 1, 1899.

A quorum being present, the Board of Supervisors of the County of Inyo, State of California, met at the above stated time in regular session.

Present, Supervisors James Jones, N. J. Cooley, and A. C. Freeman, Chairman, presiding.

Minutes of proceedings of preceding meeting read and approved.

Whereupon the Board proceeded to examine and allow claims against the County on the different funds as follows, to-wit:

The Board adjourned to meet Tuesday, Oct. 3rd at 9 o'clock a. m.

A. C. FREEMAN.
Chairman.

Attest:
D. J. HESSION, Clerk.

TUESDAY, Oct 3rd 1899.
9 o'clock a. m.

Board of Supervisors of the County of Inyo, State of California met at above stated time pursuant to adjournment.

Present, Supervisors N. J. Cooley, A. C. Freeman, James Jones, J. J. Stewart.

Supervisor A. C. Freeman, Chairman, presiding.

Minutes of the preceding day's meeting read and approved.

In the matter of the issuance of bonds of Valley School District, County of Inyo, State of California.

Whereas, it appears to this Board that the Board of Trustees of Valley School District did hold an election and submit to the electors of said District.

Whereas, bonds of such district should be sold for the purpose of raising money for purchasing school lots and building one or more school houses in said District and furnishing the same.

Whereas, it appears that such election was called by posting notices signed by said Board of Trustees in three of the most public places in said District for more than twenty days before said election and by publishing notice in the *Inyo Register*, a weekly newspaper printed and published in said Inyo County, not less than once a week for three successive weeks before the holding of said election.

Whereas, it appears that such notices did contain:

1st The time and place of holding such election. 2nd. The names of three judges to hold said election. 3rd. The hours during the day (not less than five) in which the polls would be open. 4th. The amount and denomination of the bond, the rate of interest and the number of years (not exceeding ten) the whole or any part of said bonds were to run,

Whereas, it has been proven by competent evidence to the satisfaction of this Board, that such election was duly held and conducted in all respects according to law.

Whereas, it appears that said Board of Trustees of said Valley School District have certified to this Board all proceedings had in the matter of the issuance of such bonds as reduired by Section 1884 of the Political Code of California.

Whereas, it appears to this Board and this Board hereby finds and declares that more than two-thirds of the votes cast at such election were in favor of issuing such bonds and that said Board of Trustees met and canvassed said returns and caused an entry of that fact and the votes cast on its minutes, and

Whereas, it further appears that the whole amount of bonds so voted does not exceed five percent of the taxable property of the District as shown by the last equalized assessment roll of this County.

Now, therefore, on motion of Supervisor Cooley, seconded by Supervisor Jones, it is by this Board hereby ordered: That the bonds of said Valley School District in the County of Inyo, State of California, do issue to the number of three of the denominations of two hundred dollars each, aggregating the sum of six hundred dollars. All of said bonds are hereby declared to be payable in gold coin of the United States of America with interest thereon in like gold coin at the rate of eight per cent per annum from date until paid on the 20th day of December of each and every year; that the principal and interest of said bonds is to be paid out of the bond fund of said Valley School District, the money therefor to be raised upon the taxable property of said District. The principal of this issue shall mature as follows, to-wit: One bond of two hundred dollars maturing December 20, 1905, and one bond of two hundred dollars annually thereafter until all shall be paid.

The form of said bond shall be as follows to wit:

UNITED STATES OF AMERICA,
STATE OF CALIFORNIA

Bond of Valley School District in Inyo County, State of California. Valley School District

Valley School District in the County of Inyo, State of California, hereby acknowledges itself indebted and hereby promises to pay to ..... or to the holder of this bond the sum of two hundred dollars, which sum the said School District promises to pay to the holder hereof at the office of the Treasurer of said County in the town of Independence in said County on the 20th day of December, 1905, with interest thereon at the rate of eight per cent per annum, payable annually on the 20 day of December of each and every year from and after the date hereof, at the office of the Treasurer aforesaid, on the presentation and surrender of annual coupons or interest warrants, both principal and interest payable in gold coin of the United States until the bond be finally and fully paid.

This bond is one of the series of three bonds of like tenor and date, each numbered respectively from one to three inclusive, amounting in the aggregate to six hundred dollars.

This bond is issued by the Board of Supervisors of Inyo County under and in accordance with the provisions of Sections 1880, 1881, 1882 1883, 1884, 1885, 1886, 1887 and 1888 of the political Code of the State of California, and the issuance hereof was authorized by more than two-thirds of the votes cast by the electors in School District voting at an election held therein on the 12th day of August, 1899, which said election was held to determine whether bonds of said school election should be issued and sold for the purpose of raising money for purchasing school lots and for building or purchasing one or more school houses in such school district and furnishing the same.

It is hereby declared that such election was duly called, duly held and conducted and the notice thereof duly given and the result thereof canvassed and declared in accordance with the provisions of the Political Code above mentioned, and that all the proceedings of the Board of Trustees of said Valley School District and of the Board of Supervisors of said Inyo County in the matter of the issuance of this bond were regular and in strict accordance with the provisions of the sections of the Political Code above mentioned.

This bond is in the form prescribed by order of said Board of Supervisors, duly made and entered in its minutes on the 3rd day of October, 1899, and shall be payable out of the bond fund of said Valley School District, and the money for the redemption of said bonds and the payment of the interest thereon shall be raised by taxation on the taxable property in said District.

In witness whereof the said Board of Supervisors has caused this bond to be signed by its Chairman and attested by its Clerk with the seal of the said Board attached this .... day of ....., 189...

.....
Clerk of Board of Supervisors.

.....
Chairman Board of Supervisors.

.....
County Auditor.

That to each of said bonds shall be attached interest coupons, which said coupons shall be in the following form, to-wit:

COUPON.
No....

The Treasurer of Inyo County, California, will pay to the holder hereof out of the bond fund of Valley School District in said County on the 20th day of December, 189.. at his office in the town of Independence, said County, the sum of ..... dollars for interest on Bond No...

.....
Chairman.

.....
County Clerk.

.....
County Auditor.

Said bond shall be sold by the Board of Trustess of said School District to the highest and best bidder for cash in gold coin of the United states, provided that the price paid in no case shall be less than par, and the proceeds of the sale thereof must be deposited in the County Treasury of said Inyo County to the credit of said building fund of said Valley School District and be drawn out for the purposes aforesaid.

At 12 o'clock m. Board adjourned to meet at 1 o'clock p. m. at which hour reconvened, all members being present as before.

The Board proceeded to examine and allow claims on the different funds as follows:

On General Expense Fund:

Georgia J. Johnson transcribing testimony	$ 15 00
Claim of Georgia J. Johnson, in sum of $10 for Reporter's fees, rejected.

Board adjourned to meet Wednesday

A. C. FREEMAN,
Chairman.

Attest.
D. J. HESSION, Clerk.

WEDNESDAY, Oct. 4, 1899.
9 o'clock a. m.

The Board of Supervisors of Inyo County State of California met at the above stated time, pursuant to adjournment.

Present, Supervisors J. J. Stewart, N. J. Cooley, James Jones and A. C. Freeman, Chairman, presiding.

Minutes of preceding day's meeting read and approved.

Whereupon at this time George Montgomery Esq., appeared before the Board and asked the Board to have a branch jail constructed at Ballarat.

Thereupon it was ordered that Supervisors N. J. Cooley and J. Jones be appointed a committee to investigate and report the affairs and condition of the County Hospital and Supervisors A. C. Freeman and J. J. Stewart be appointed a committee to examine into and report upon the affairs and conditions of the various county offices.

Whereupon the Board adjourned to meet at 1 o'clock p. m. at which hour reconvened, same members present as before.

The committee appointed to investigate and report upon the affairs and condition of the County Hospital report as follows: We, the committee appointed to visit and investigate the County Hospital report as follows: We find 15 male and 1 female patients, all in usual health and comfortable quarters, additional quarters in course of construction. The patients, as far as your committee could learn, are supplied with sufficient food and clothing, and well provided for generally. We recommend some changes for better sanitary regulations, which we believe will be carried out for the benefit of the patients.

N. J. COOLEY.
JAMES JONES.

The Committee appointed to investigate and report upon the affairs and condition of the various County offices report as follows:

We, your committee appointed to examine the books of the different county offices, beg leave to report as follows: We find the books kept to date in a business-like manner.

Respectfully submitted,
J. J. STEWART.
A. C. FREEMAN.

Proposals for painting branch jail at Bishop were opened and read as follows: Bids of H. P. Nelligan, C. E. Johnson and Allison E. Gish, and after consideration all bids were rejected.

Board adjourned at 4 p. m. to meet Thursday, Oct. 5, 1899, at 9 o'clock p. m.

A. C. FREEMAN,
Chairman.

Attest:
D. J. HESSION, Clerk.

Towne—That's the result of not having had a single good liar in the whole party.—New York World.

Not In It.

Mrs. Jackson—Is Mr. White in good society?

Mrs. Johnson—Mercy, no! Why, she calls her maid her hired girl.—Somerville Journal.

A Midnight Call.

"I want something to drink," said the mosquito to the sleeper; "anything will fill the bill."

"You'll find a mosquito bar right over there," sighed the slumberer only to awake and find that it was on him.—Kansas City Star.

Pleasant to Know.

He (preparing to leave)—I assure you, Miss Sweet, the time has passed away very pleasantly this evening.

She (abstractedly)—Yes. It is pleasant to know that it is past.—Boston Traveler.

The Reason.

Wagg—I think that there will be but little more fighting at the front.

Wigg—Why, it won't be the fault of our soldiers, will it?

Wagg—Not exactly, but they are having a hard time to find the front.—Cleveland Leader.

The Proper Head.

Mrs. Wiggles—Where shall I put down this $10 that you paid yesterday for pew rent?

Mr. Wiggles—Under "fire insurance."—Somerville Journal.

She Knew Him.

"Long before I met you I had heard of your family," said the Count.

"Yes," replied the beautiful girl, coldly, "I believe papa is quoted in Bradstreet's."

No Let Up.

"She plays the piano with perfect time."

"Yes, and lots of it."—Philadelphia Bulletin.

Method in Their Madness.

Crawford—What lesson does this frightfully hot weather teach you?

Crabshaw—Never to call a man a fool who goes in search of the north pole.—New York World.

A Pleasant Prospect.

Prospective Lodger—The main thing is that I get a room in a quiet house.

Landlady—O, this is a quiet house, sir! In the next room a singer lodges, and if it were not quiet he couldn't practice all day long, as he does now.—Lustige Blaetter.

Frightful Suffering.

The Major—Did you suffah from thirst, Cunnel, when you were cast away on that desert island?

The Colonel—Why, aftah six days of untold agony even watah tasted good.—New York Journal.

The Summer Girl.

"I wonder why it is that all the men are after her?"

"I suppose it's the faculty she has for always leading the procession."

Safely Stowed Away.

Mamma—Willie, did you eat that jam?

Willie—Why, mamma, I heard the rats in the closet, an' just thought I'd move it out of their reach.—Philadelphia North America.

Plenty for That.

Mrs. B.—Dear me! I went and bought this remnant of dress goods, and there isn't half enough to make a decent skirt.

Mr. B.—Oh, well, never mind; it'll make a bicycle skirt then, sure.—Philadelphia Bulletin.

She Rests Him So.

"Who is holding forth to your husband, Mrs. Brown?"

"It's Professor Sparkes. George raves about him. Says his conversation is an intellectual treat. Go and ask to be introduced."

"Thanks, but I hardly feel equal to an intellectual conversation this afternoon. I think I'll stop where I am, if you don't mind."—Punch.

Blameless.

"Marriage is so often a failure I don't blame so many women for being old maids."

"Blame them? Of course not. It isn't their fault."—Philadelphia Bulletin.

Not Usual.

"We discharged our cook. She refused to help do the canning."

"Well, that's the first time I ever heard of dismissing a servant for not being saucy."—Philadelphia Bulletin.

The Love They Bear Each Other.

Sally—Were you surprised at Clara's acceptance of Jack?

Dolly—Not at all. What surprised us was that Jack proposed to her.—Philadelphia North American.

Drowned Out.

"Did you enjoy the symphony concert?"

"Not a bit. A girl right in front of me was dressed so loud I couldn't hear any of the soft music."—Philadelphia Bulletin.

Delusions Unloaded.

"I told him that he wasn't my ideal man, and he told me I wasn't his ideal girl."

"And then?"

"Then we felt perfectly safe to go ahead and get married."—Chicago Record.

Where Americans Can Learn.

Americans, even though we are as hospitable as any nation on earth might well take a lesson from the Russians in regard to the respect they pay a letter of introduction. The English send word when you can be received, and you pay each other frosty formal calls and then are asked to 5 o'clock tea or some other wildly exciting function of similar importance. The French are great sticklers for etiquette, but they are more spontaneous and you are asked to dine at once. After that it is your own fault if you are not asked again. But in Russia it is different. I think the men must have accompanied my messenger home, and the women to whom I presented letters early in the afternoon were actually waiting for me when I returned from presenting the last ones. In Moscow they came and waited for hours for my return—I was mortified that there were not four of me to respond to all the beauties of their friendship, for hospitality in Russia includes even that.—Woman's Home Companion.

WHEN LIGHTS ARE LOW.

The rooms are hushed, the lights are low,
I sit and listen to the wind
That comes from out the distant hill.
It comes and croons in an undertone
Of alien regions vast and lone,
Of pleasures lost in a land unknown,
Then steals away, and all is still.
'Tis good to listen to the wind
When rooms are hushed and lights are low.

When those we love have come and gone,
'Tis weary to be left behind—
To miss sweet eyes where late they shone,
To look for what we may not find,
Long cherished forms that haunt the mind,
Soft voices that were once too kind;
To live and miss them one by one
Is weary work. Who'd stay behind
When those we love have come and gone?
—New York Times.

A TRAGEDY IN A PICTURE.

His Snap Shot of a Drink That Killed Two Men.

"The most remarkable snap shot picture in the world is owned by a friend of mine in a town in Georgia," said an enthusiastic amateur photographer. "Its story is extremely curious. It seems that he went one day to a blacksmith shop to get a shot at the men at the forge. The smith was engaged on a difficult piece of ironwork and had two helpers. Just behind them on a shelf was a pint flask full of yellowish white liquor, evidently the corn whisky for which the native Georgian has a peculiar liking.

"As my friend was preparing to take his picture one of the helpers caught sight of the bottle and communicated his discovery by dumb show to his companion. The smith's back was turned at the moment, and the first man reached stealthily for the prize, while my friend, unnoticed in the corner, quickly aimed his camera. It was a comical scene, and in his mind he had already named the photo 'The Stolen Drink.'

"The helper uncorked the flask and took a swift gulp, and his comrade snatched it and did likewise. Then for a brief, breathless instant they looked at each other, and as they did so their foolish grin gave way to such a stare of questioning horror as I never saw before upon a human face. I know because it was then that the camera clicked, and the picture is as clear as crystal. The flask contained carbolic acid. Within an hour both men were dead.

"When my friend took one print, he broke the negative so as to make the photograph absolutely unique. It shows the forward end of the shop. In the foreground is the anvil, with the smith bending over his work. Behind him are the two helpers, one still holding the flask, looking at each other. You can see tragedy in their eyes as plain as print. It is a frightful and dramatic tableau that could not be duplicated by any sort of art."—New Orleans Times-Democrat.

Chant of the Cyclone.

Ever see a cyclone, say? Bite the world and munch away? Eat up houses, fences, trees, just as easy as you please? Get a hustle on its jaws? Swipe the earth with fiendish claws? Hump its back and take a run through the orchard just for fun? From a hill to hollow flit, seeming to get strength from it? Never seen one? Well, I jing! It's a pesky sort of thing.

Ever see a cyclone, say? Take its track and speed away? Switch its tail and snort and bound, just like lightning o'er the ground? Get a swift move with its feet, racing for the winning heat? Then cavorting up and down, heeding no laws of the town? Pushing everything aside? Out upon a gayty ride? As though owning all the track, ever onward, never back? Never seen one? Well, I swow! It's a buster, anyhow!—Kingsley (Ia.) Times.

Yachting on Salt.

Save during the rainy season Lake Lefroy, in western Australia, is quite dry. But as the water evaporates as the hot weather approaches a smooth, glassy floor of crystalline salt is deposited. Those living on the shores have found a means of utilizing this. All boats which sail on the lake when possible are, during the rainy season, fitted with four wheels, and thus are enabled to continue their travels. As Lake Lefroy has an area of 100 miles, and the surrounding country is extremely rough, this means a great saving in expense, labor and time. The speed attained by these wheeled yachts is very considerable, though not quite equal to the pace of the ice yachts so popular in Canada.

Constipation

Caused by over-work! Over-eating! Over-drinking! No part of the human body receives more ill treatment than the bowels. Load after load is imposed until the intestines become clogged, refuse to act, worn out. Then you must assist nature. Do it, and see how easily you will be cured by CASCARETS Candy Cathartic. Not a mass of violent mercurial and mineral poison, but a pure vegetable compound that acts directly upon the diseased and worn out intestinal canal, making it strong, and gently stimulating the liver and kidneys; a candy tablet, pleasant to eat, easy and delightful in action. **Don't accept a substitute for CASCARETS.**

I'm bring a sargeon.—Jeweler's Weekly.

"I have gone **14 days** at a time **without movement of the bowels.** Chronic constipation for seven years placed me in this terrible condition; I did everything I heard of but never found any relief until I began using CASCARETS. I now have from one to three passages a day, and if I was rich I would give $500.00 for each movement; it is such a relief." AYLMER L. HIRST, 1089 Russell St., Detroit, Mich.

Sam Houston and His Corns.

Professor Hiram Corson of Cornell university, who used to be a reporter for the United States senate, tells this story about Sam Houston: "We reporters took turn and turn about each for an hour. One day I was sitting idly in the reporters' gallery, waiting my turn and looking on. Presently my attention was drawn by Senator Houston. Huge of frame, he was particularly huge of feet, and those extremities were rendered the more conspicuous in those days of boots by being incased in laced shoes. On this occasion there seemed to be an amount of pain in those feet proportionate to their size.

"The senator kept one upon his knee, rubbing it, with an anguished expression and periodically exchanging for the other foot. After awhile he unlaced his shoes and drew them off. Then the nursing of his aching toes continued for a time as before. But no relief came, and at last, to my utter amazement and amusement, he slowly divested himself of a long blue woolen stocking, and, taking the huge jackknife with which he was wont to pass the time whittling, he proceeded deliberately to pare his corns in the senate of the United States."

Ink Blots on Paper.

To remove ink from paper pour enough water over a teaspoonful of chlorinated lime to cover the stained portion. Moisten a clean piece of linen and rub it lightly with the mixture. If the stain is not of too long standing, it will disappear. If more than one application is required, let the paper dry before wetting the second or third time. If the spot is rubbed, the texture of the paper will be spoiled. Dry it gently with a piece of dry linen.

A Hen Hunt.

An English paper says that the hat of a certain shortsighted master at Eton blew off one day, and as he started in pursuit a black hen dashed out of the gateway. The schoolmaster saw the hen and thought it was his hat, and all Eton was electrified by the spectacle of a hatless and breathless reverend man hunting a black hen from one end of the street to the other.

But He Made a Good Officer.

Some 20 or 25 years ago a gentleman of this place was elected constable, and although he had no opposition his nervousness as to the result was quite noticeable all during the day. After the polls closed and he was declared elected he hied him to the river bank, in the meantime having armed himself with an old pepper box pistol, one of the earliest patterns of the revolver, and shortly after was heard to go through this colloquy with some one unseen. Pointing his pistol at a sycamore tree he exclaimed in dignified and dramatic style:

"Halt! I am constable of this district and command you to halt. You won't, eh? Well, here goes"—bang! "I hate to do it, but it is in the discharge of my official duty. Now, I told you to stop, but you wouldn't"—bang! Just then the old pepper box became unmanageable and bang, bang, bang, bang went the remaining four loads. The firing soon attracted a crowd and the tree was thus saved.

But, notwithstanding the episode of the sycamore and the scars it still shows, the gentleman is said to have made a good officer.—Hazlegreen (Ky.) Herald.

An Eye to Business.

A little boy named Peter at a public school saw his teacher faint and fall. In the general confusion it was impossible to keep so many curious heads cool, and the little ones flocked round the prostrate woman and her sympathizing colleagues. But this small boy kept both his color and his coolness. Standing on a bench and raising his hand, he exclaimed: "Please, teacher, can I run home and tell father to come? He makes coffins!"

Remember that you can buy Jesse Moore A. A. Whiskey for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

"Let us try to make our lives like songs, brave, cheery, tender and true, that shall sing themselves into other lives and so help to lighten burdens and cares."

It takes 72,000 tons of paper to make the postal cards used in the United States each year.

"Honor is Purchased by Deeds We Do."

Deeds, not words, count in battles of peace as well as in war. It is not what we say, but what Hood's Sarsaparilla does, that tells the story of its merit. It has won many remarkable victories over the arch enemy of mankind—impure blood. Be sure to get only Hood's, because

The Remorse of a Guilty Stomach

Henry McLellan, of Hamilton, Ill., is a veteran of the 16th Illinois Infantry. He said:

"For more than 15 years I was a sufferer from gastritis in its worst form. I was much reduced in flesh and strength and unable to attend to business. Finally my wife persuaded me to try Dr. Williams' Pink Pills for Pale People and to my surprise I began to get better. Three boxes effected a cure that has been permanent. When I began to take the pills I weighed 136 pounds; now I weigh 163. These pills did me more good than all the other medicines I have ever taken.

"H. K. McLELLAN"

Subscribed and sworn to before me this second day of December, 1897.
R. R. WALLACE, *Notary Public*
—From the Press, Hamilton, Ill.

To any sufferers from stomach or bowel trouble Dr. Williams' diet book is free on request.

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box. 6 boxes $2 50.

FISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form. . . . Sold by every druggist in the malarial sections of the United States. . . . . No cure, no pay. . . . Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

ST. LOUIS, MO., Feb. 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2660 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous: having sold during the late Cold and Grip season 4,300 dozen.

Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.

KEDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 13, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to Iowa and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,
JAMES D. ROBERTS.

A MEMORY.

A wail of a child at midnight,
The chime of a minster bell,
The sorrowful moan of a sorrowing soul,
And the sound of a passing knell.

An old worn book, on a corner shelf,
And a spray of faded yew,
A locket with hair all golden and fair,
And a ribbon of faded blue.

A needle-case, both empty and old,
And a case with hidden spring,
Wherein two golden watch keys lie,
A heart—and a wedding ring.

I take the book from the corner shelf,
And the ribbon of faded blue,
And before me stands the form I loved,
With hair of a golden hue.

And I gaze so long in those earnest eyes,
That my soul grows weak with pain,
Then she fades away—and I gently lay
The old book down again.

—Every Other Saturday.

VANE'S MANŒUVRE.

"YOU, Teddy?" asked Miss Ferrers, looking up from her easel for a moment, and bestowing a lovely smile upon the young man.

"The same," sighed Vane, as he cleared a chair of two paint brushes and a saucer of oily water. "Where should I be when I have a moment to spare, if not here?"

He grinned amusedly as his great shoulders came against the straight rods of the "show chair," and the fragile thing groaned under his weight.

"Why don't you have some substantial chairs?" he asked teasingly.

"Why don't you take anti-fat?" retorted Miss Ferrers, sharply.

Vane whistled under his breath.

"Don't let my presence keep you from your work at all," he said with a spice of sarcasm in his tones.

Miss Ferrers laughed.

"As if it ever did, you dear boy!" she said, dabbling away hustly at her canvas. "That's just the jolly thing about you, Teddy, one doesn't have to look out for your comfort, or see that you are entertained."

"Thanks," remarked Vane, musingly.

He moved his chair round to a position whence he could see the chic little figure on the high bench before the easel. In spite of their continual bickerings and fallings out, the little figure was the dearest in the world to Vane.

He became aware, presently that the hazel eyes of Miss Ferrers were quizzically returning his regard.

"What's on your mind, Teddy?" she asked, smiling again and causing two tantalizing dimples to dance about her lips. "If you've come away from work just to ask me to marry you, I tell you again, I won't. That joke's worn threadbare, dear boy. If we hadn't known each other ever since we were in pinafores, it might have been different, but as it is— Pouf! Go away, Teddy! You interfere with my work."

She took up her brush again and went back to her painting.

"If you're bothered, you've done it yourself, and never given me half a chance," Vane said in injured tones. "You're too prone to jump at conclusions, Glad. As to marrying, I don't come to ask you that. I told you that the tenth time would be the last, and you said 'No' then, you remember."

He stopped for a moment, the more fully to enjoy the pink flush that would creep into her cheeks in spite of her will. Then he went on:

"I've got all over caring for girls. It's dogs this time, Glad."

He moved his chair a little closer to hers and talked eagerly.

"Dick Story's father's got hold of some beauty Saint Bernard pups. I didn't know but you might care to go for a look at them."

He had said his little say, and subsided contentedly.

Miss Ferrers waited patiently for the color to die out of her cheeks.

"H'm!" she said, meditatively. "Thanks, very much. I should be pleased, I'm sure. Saint Bernards are such picturesque animals. Should you make this Nahant cottage red or white, Teddy?"

"Red," answered Vane, promptly, rising and going over to take a look at the sketch.

Miss Ferrers proceeded deliberately to make the cottage a white blot on the landscape. She was wondering, with a little hurt feeling at her heart, if he had really done caring for her, and Vane, towering over her, was not looking at the sketch at all, but rather at the ruffled golden hair and fair face, with an expression in his honest blue eyes that Gladys, with all her quick, bright glances, had never been able to surprise from him.

There was a sudden rustling of silken skirts in the hall, and the studio door was opened to admit a dainty little lady.

Flitting across the room she bestowed a kiss upon Gladys, and a bright, comprehensive glance upon Vane.

"I'm in trouble, sister," she said, leaning against Miss Ferrers' shoulder. "Oh, dear, I've left poor Horace outside!" She ran back to the door and swung it open. "Come in, dearie," she called.

Her husband having entered and deposited a large basket on the floor, and himself in an easy chair, the little woman dropped to the edge of a divan, and balancing herself there with extreme nicety, heaved a great sigh.

"What's in the hamper?" asked Gladys, smiling over at her brother.

The little woman broke into explanations.

"You just can't think, Gladys," she began hurriedly. "Poor dear Horace is called to New York on business. He must go to-day, so he's taking me with him and our help is going to visit her people."

"That disposes of the family, then," Vane put in, smiling across at the anxious little woman.

"That's just what it doesn't," replied her husband, trying to frame a smile. "You forget Van Winkle."

Gladys regarded her sister with a frown of disapproval.

"Surely you won't leave Van Winkle behind," she said.

"Surely Van Winkle is not going to New York with me," answered the husband, quickly. "I'm not the man to carry a heavy cat in a hamper, three or four days, through the streets of New York, or to put him up at a hotel and listen to his howls at night."

"But Van Winkle doesn't howl," protested his wife. "He's a dear, peaceable cat, and you know it, Mr. Parks!"

"Well, the dear, peaceable cat can't go with us, that's all," finished her husband, fiercely.

"I could leave him with auntie, only she is so very forgetful, and she leaves so much to Bridget." There were tears in the little woman's eyes as she turned toward Vane. "We've had him for seven years, Ned," she said, smiling through her tears. "Ever since we were married, you know, and Angoras are so short-lived, too. If Van Winkle were lost it would just break my heart."

"I understand," assented Vane, gravely. "And now you propose——"

"To leave him with Gladys for a few days," interrupted the little woman, eagerly. "We've fetched him in the hamper, Glad. Let Van Winkle out, Horace, dear—I'm sure Gladys is happy to do this for sister, aren't you, dearie?"

There was silence for a moment or two during which Miss Ferrers pensively eyed the silver gray Angora.

"I s'pose I am awfully wicked," she said at length. "Heigho! Well, I accept my punishment."

She took up her brush resignedly and turned to her painting.

"But, Glad dearest, I want you to listen to me for a moment," expostulated the little woman.

Five minutes later she wound up her remarks by saying:

"You'll be very careful and not trust him to auntie or Bridget, won't you, Glad? It would just make me ill to lose him, and I couldn't keep house, I know."

Gladys shrugged her shoulders, impatiently.

"I think I ought to understand," she said, rather crossly. "Feed him three times a day one-eighth of a pound of stewed liver and one gill of milk; let him sleep by the kitchen range at night, wash his face in the morning, or he will be out of sorts, and be sure not to let him get out. That's all, isn't it? If you say another thing, I declare I won't keep him! Now go, do, before you drive me quite frantic."

"But, Glad," put in the little woman, "Van Winkle is such a pet. Why, every morning——"

"My dear," interrupted her husband, "our train leaves in twenty minutes."

When they had finally gone, and Vane found himself free to do so, he laughed heartily.

"That fixes the Saint Bernards, I guess," he ventured. "They don't go well with cats, do they, Glad?"

"Don't be so perfectly silly!" said Miss Ferrers, severely. "And I'll thank you not to laugh at my relatives."

Vane hummed a popular air and sauntered about the room, inspecting the sketches that adorned its burlap-covered walls. Finally he came round to the little figure on the bench.

"To-morrow the dad is sending me to Washington for three whole weeks of business," he said, dismally. "Won't you tell a fellow you're sorry?"

"I'm sorry," said Miss Ferrers, very shortly.

Vane looked down at her for a moment, then drew himself up to his extreme height.

"I'm glad," he said, abruptly, "extremely so."

Without another word he left the room. Miss Ferrers stared after him in surprise.

"I really think he has tired of me," she said at length, with a faint attempt at a smile.

* * * * * * *

During the first day of his exile, Van Winkle conducted himself as well as might have been expected. It was almost the close of the second day, when Aunt Theo and Miss Ferrers were sipping their afternoon tea, that they first missed him. With the aid of long-suffering Bridget, the little house was searched from garret to cellar. No Van Winkle was forthcoming. The fact was that, discovering the door leading out to the storm porch to be ajar, he had slipped out, laid himself down on a pair of overshoes, and fallen asleep. After that, some one had closed the inner door, leaving him in the porch.

It happened that Vane had been delayed a day in his trip, and having repented his hasty leave-taking of Miss Ferrers, had called to tell her as much. So it was that when he opened the door boldly and stepped into the porch, Van Winkle, suddenly seeing the world before him, took to his heels and ran away as fast as ever he could, with Vane close upon him.

As Vane gained on him Van Winkle grew the more frightened, and finally subsided and crouched shivering in the snow. Vane put two big hands weightily upon him, and gathering him up, was about to return him to the house when it struck him suddenly that it would be a good little joke on Gladys if she thought for a little that Van Winkle was really lost.

He went up to a side of the veranda, and lifting the hinged end ever so little, thrust Van Winkle in, and dropped the board again. Then he presented himself at the door.

All was confusion. Bridget, with a brow, was scratching at all the dark corners of the hall, and heaping abusive language upon all coon cats.

Aunt Theo with her glasses on wrong side up and a much bewildered expression on her pretty old face, was wringing her hands silently.

Gladys herself, who had led the hunt, was gathered in a miserable little heap on the staircase, crying bitterly.

She looked up for a moment at the sound of Vane's voice.

"What is it? What's the trouble?" he asked Aunt Theo, gravely.

"Oh, Teddy," sobbed the voice from the staircase, "you know she said it would break her heart, and there were tears in her eyes, too, Teddy!"

"But what's the matter?" again asked Vane.

"Van Winkle is lost!" wailed Miss Ferrers. "Oh, to think it should happen when I—— Oh, I wouldn't have had it happen for anything in the world. They've had him seven years. Oh!"

Vane looked grave enough.

"I say, Gladys, don't sit there; get up and find the cat," he said.

"But we've hunted the whole house over," moaned Miss Ferrers.

"H'm! Go outside and look for him, then. He won't have gone far in this snow. He's too pampered. I'll warrant we can find him."

There was magic in the little pronoun "we."

"Oh, Teddy," gasped Miss Ferrers, smiling at him through her tears, "if only you will help me, I'll do anything in the world I can for you! I'll even marry you!" she cried triumphantly.

Vane shrugged his shoulders.

"H'm! You've promised that before, and failed," he said, indifferently.

Nevertheless he went out of the house, and round and round the lawn, searching diligently. When, finally, he thought a plausible length of time had elapsed, he went back to the piazza, and lifting the lattice end, ever so little, seized Van Winkle, and tucking the frightened creature under his arm, strode into the house.

No one was to be seen save Gladys, who was groping with an umbrella handle under an old locker in the sitting-room, and sprang up with a cry of delight when Vane said:

"Here he is, Glad—I guess you'll find him all right."

Gladys hugged the restored treasure to her breast as joyfully as ever her sister could have done."

"Oh, Teddy, you're such a comfort!" she said, heaving a sigh of relief.

"Thanks," said Vane. "By the way," he went on soberly, "I came over to say that I was sorry I went off in such a huff yesterday. We've been such good familiar friends all our lives, that I forget sometimes that you aren't my sister. I hope you'll forgive me for being such a boor."

"Certainly," Gladys said smiling, and wondering in her heart what he meant by such politeness.

"You forget what I promised you if you found Van Winkle, Teddy," she said, rallying him on his good conduct.

"Oh, never mind that," Vane laughed carelessly. "I know better than to try to hold you to your promises."

"But I meant it, Teddy," urged Miss Ferrers, causing the tantalizing dimples to play about her smiling lips.

"Yes, no doubt," Vane said ruefully. "We'll speak at more length on the subject when I have returned from Washington. Until then, good-by, Glad."

He offered his hand in a quiet, friendly way.

"Good-by, Teddy," said Miss Ferrers, still smiling, and thinking in her heart that she liked the old boisterous Vane much more than this proper young fellow.

When he had gone out of the room and she had heard the outer door close, she put her face down on the lid of the piano and kept it there for two or three minutes.

"Oh, Teddy, Teddy, Teddy," she said brokenly, "I meant every word of the promise. I did! I did!"

"Did you?" asked a familiar voice close at hand.

Gladys started up. Vane stood close by her, his handsome young face covered with smiles. An angry flush burned the tears from her eyes.

"You mean, deceiving creature!" she exclaimed.

"Did you?" he asked again, slipping his arm about her.

"Yes, I did!" answered Miss Ferrers, crossly.—Waverley.

Endless.

An Irishman who served on board a man-of-war, says the Oxford Democrat (Maine), was selected by one of the officers to haul in a tow line of considerable length that was dragging over the taffrail.

After pulling in forty or fifty fathoms of the line, which put his patience severely to proof, as well as every muscle of his arms, he muttered to himself, but loud enough to be overheard by an officer:

"Sure, it's as long as to-day and to-morrow! It's a good week's work for any five in the ship. Bad luck to the leg or arm it'll lave last! What! More of it yit? Och, murther! The say's mighty deep, to be sure!"

After continuing in a similar strain and conceiving there was little probability of the completion of his labor, he suddenly stopped short, and looking up to the officer on the watch, he exclaimed:

"Bad luck to me, sorr, if I don't belave somebody's cut off the other end o' this line."

Latest Paper Collars.

The latest form of paper collar is treated with a waterproof preparation, by means of which it will remain in good presentable condition for a couple of weeks, and, like the celluloid collar, it only needs to be wiped with a wet cloth to be kept quite clean.

"THE WOMAN IN WHITE."

She Is Now the Wife of Mr. H. S. Sternberger of Cripple Creek.

"The Woman in White" is married. Recently the Iowa girl who so nearly prevented the nomination of William J. Bryan for the Presidency at the Chicago convention in 1896 became the wife of . S. Sternberger, of Cripple Creek. Her maiden name was Minnie F. Murray.

MISS MURRAY.

Miss Murray was an editor and a Democrat. She was an enthusiastic partisan of ex-Governor Horace Boles, of Iowa, and supported him at all times through the medium of the Nashua (Iowa) Reporter, of which she was editor and part proprietor. In 1896, When Governor Boles had designs upon the Presidency, Miss Murray was so ardent in his behalf that she attended the Chicago convention and electioneered in his favor among the national delegates from one end of the great hall to the other.

On Saturday, July 10, the last day of the convention, after Bland's name had been turned down and before Bryan had become the dominant factor, Miss Murray could no longer contain herself. She saw an opportunity to gain an advantage for her favorite, and acted upon it without delay.

The convention had just adjourned for dinner. Not a delegate had left the hall. Miss Murray was seated in the balcony. She was dressed wholly in white. She waved a handkerchief and shouted the name of Boles.

In a minute she had attracted the attention of thousands of delegates and visitors. Every eye was fastened upon "The Woman in White." For a while nobody knew her name, but even the friends of other candidates shared the enthusiasm of the fair partisan, and shout after shout went up from the thousands of throats below. Louder and louder, and soon the streets of Chicago were resonant with the name of Horace Boles, of Iowa.

Had the convention then been in session it is more than likely that Horace Boles and not William J. Bryan would have been nominated for the Presidency.

TROLLEY CAR FUNERALS.

Threaten to Supplant Those of the Old Style in Chicago.

Trolley car funerals threaten to supplant the old style in Chicago. A saving of expense is one of the chief arguments in favor of the new plan. The

INTERIOR OF A FUNERAL CAR.

undertakers dislike to give up the liberal commissions from livery establishments they once enjoyed, but popular feeling is too strong to withstand. It costs but $11 for a motor car and a trailer, with an extra charge of $3 for every additional car needed.

On the line of the Chicago Electric Traction Company, a special funeral car, the Virginia, is provided. It is dark green in color. At each end is a vestibule, having a door in its front for the admission of the casket. In one of these vestibules the casket remains during the journey to the cemetery, screened from the rest of the car by heavy curtains. The car proper is richly furnished, and accommodates twenty persons.

The Calumet company has no special funeral car, but the back is removed from the seat of an ordinary motor car and on this the casket is placed. On either side of the casket the pall-bearers take their places while relatives and friends occupy the remaining seats. On the Calumet line, which covers a wide stretch of territory, south of 63d street, the number of trolley funerals sometimes reaches five a day. Arrangements with the undertakers in suburbs along the line are made by the company.

Proud to Know Him.

"The other night," said the fat boarder, "I slept in a room with a generous gentleman. I snore horribly—in fact, I'm a snorer from way back. We retired. In the morning when we arose this gentleman handed me a silver half dollar.

"'What's that for?' said I.

"'Oh, take it,' he replied. 'You have won it. You deserve it.'

"'But what for?' said I.

"'Oh, take the money and go and buy yourself several first-class drinks. I like you. You are the best one I ever saw. You are the only man I ever saw who could snore louder than I can holler.'"—Atlanta Constitution.

Color Your Own Pictures.

Some of our amateur photographers may be interested in learning an easy way of coloring a photograph nicely without having first taken lessons in drawing or painting. This is the method: After you have printed wour photograph, and before you mount it on cardboard, hold it against the window, placing the picture side toward the glass; then sketch clearly on the back of the picture the outlines of the parts to be colored. When this is completed place the picture side of the photograph against a blotter and apply the desired colors to the back of the picture, keeping within the sketched outlines. Then prepare a mixture consisting of ten parts benzine and one part vaseline, and pour this over the photograph, rubbing it thoroughly into the paper with the finger. Do this on the face and back of the picture. After the picture has become transparent through this process let it stand for an hour or two, then dry it with a cloth and mount it on cardboard. The color will show clearly.

HOLY MAN OF BENARES.

Dead After Many Years of Self-Imposed Suffering.

The famous Hindu holy man is dead. His name was Swami Bhaskarananda and he lived in the city of Benares. This devout Brahmin, who kept himself naked and self-immured, was visited by nearly all the Indian tourists during their stay at Benares, including the Prince of Wales. He spent his life in a rigid posture, giving no heed to his visitors and patiently waited for death in the holy city which, according to Hindu belief, means life everlasting.

Swami Bhaskarananda's whole life was devoted to one object—that of ob-

HOLY MAN'S POSTURE FOR YEARS.

taining emancipation for the imprisoned spirit by such bodily austerities as he believed would annihilate its conscious connection with the body and with material things. To attain this end he forsook his kindred and turned his back upon society. He sought out a filthy cave and there sat in a painful posture of the body for many years. That there could be no greater martyrdom than that which this devotee chose for himself is attested by the fact that tourists in India were not content with viewing the Golden Temple, the shrine of the monkeys and the cesspools of the gods, but almost without exception directed their footsteps to the cell of the heathen saint seeking reunion with God. Even Christian martyrology tells no more pathetic tale of the sacrifice of the body to save the soul.

DR. JOACHIM.

Recently Celebrated the 60th Anniversary of His Debut as a Violinist.

Dr. Joseph Joachim, who recently celebrated the sixtieth anniversary of his debut as a violinist and was signally honored at Berlin, is not so old as his long career would lead one to believe. Joachim, it must be remembered, came before the public, like Rubinstein, when he was a child. He is now 68 years old. He was born in Hungary and studied music at Vienna under Joseph Boehm. Later he was under the care of David and of Moritz Hauptmann. His first visit to Paris was in 1850, by which time, although he was only 19 years of age, he was already celebrated. In the same year, while still in his teens, Joachim was appointed director of the concerts at Weimar, and three years subsequently master of

DR. JOSEPH JOACHIM.

the Chapel Royal at Hanover. His title of musical doctor was conferred upon him by the University of Cambridge in 1877. Although his fame is chiefly due to his rare mastery as an instrumentalist, Joachim is a composer of the Schumann school. In 1882 he was appointed conductor of the Royal Academy of Music at Berlin and musical director of the Royal Academy of Arts. Oxford has given him her degree of doctor of civil law.

The Minister's Mistake.

In a rural parish in the Mearns, an Aberdeen divine, who had driven over in a hired vehicle, occupied the pulpit. Only one person attended service, and the minister apologized for the length of his discourse. His audience signified his approval of his preaching, and the minister continued. Guess his consternation when he discovered his audience consisted of his driver, who had been engaged by the hour.

A good many people don't want to know the truth, if it is opposed to their foolish prejudices.

PREHISTORIC MAN.

He Had a Third Eye on the Top of the Head.

Deep researches as to the structure of the human body have recently furnished some startling facts regarding changes which man is at present undergoing physically.

It is believed that man was formerly endowed with more teeth than he possesses now. Abundant evidence exists that, ages and ages ago, human teeth were used as weapons of defense. Unintentionally traces of such use are often revealed by a sneer. The teeth are sometimes bared, dog-like, ready, as it were, for action.

The practice of eating our food cooked and the disuse of teeth as weapons are said to be responsible for the degeneration that is going on. The wisdom teeth, in fact, are disappearing. Human jaws, found in reputed Palaeolitic deposits have wisdom teeth with crowns as large, if not larger, than the remaining molars.

In ancient times a short-sighted soldier or hunter was almost an impossibility; to-day a whole nation is afflicted with defective vision. It is almost certain that man once possessed a third eye, by means of which he was enabled to see above his head. The human eyes formerly regarded the world from the two sides of the head. They are even now gradually shifting to a more forward position.

In the dim past the ear-flap was of great service in ascertaining the direction of sounds, and operated largely in the play of the features. But the muscles of the ear have fallen into disuse, for the fear of surprise by enemies no longer exists.

Again, our sense of smell is markedly inferior to that of savages. That it is still decreasing is evidenced by observations of the olfactory organ. But the nose still indicates a tendency to become more prominent.

Trees Suggested Skeeters.

'Tis not often one runs across a loquacious street-car conductor. Usually they are just about as talkative as graven images. But there was a new man on the Indiana avenue line and he was hungry for a talk. Along about Forty-seventh street a man took a standing seat on the back platform and the conductor fastened on him instantly.

"That's a fine grove of trees," he remarked, pointing to a grove of maples, "but whenever I see trees I say to myself 'skeeters.' Yes, sir; that's the very first thing I say to myself—'skeeters.' I hate skeeters. I can't abide 'em. Consequently I don't like trees. No, sir; I'm a treeless plain man, I am—a boundless prairie feller. Why, sir, I had a good job and as nice a little home as you ever see down East an' I wuz fixed for life right there. But it was down in Jersey. An' the skeeters bit me till I didn't know my own name; would have answered to the name of Smith or Jones just as well. Well, sir, I throwed up my job an' sold my home and I started for New York. But, Lord love you, sir, I got into trouble quick. They stopped me 'fore I could get into New York. They said I had the smallpox, I was bit up so frightful. But I finally got West, an' here I am. An' whenever I see trees I thinks skeeters. Why, sir, down in Jersey many's the time I've seen them skeeters flyin' about smokin' clay pipes; yes, sir, smokin' clay pipes—to keep the other skeeters off 'em. Once I——"

But here the passenger jumped off between two blocks.—Chicago Inter Ocean.

Colorado's Gold Exhibit.

A solid gold nugget minlature of Pike's Peak, weighing over two tons and worth a million dollars, will be Colorado's gold exhibit at the Paris Exposition. It will reach New York City under guard in a special car, and thence the government will convey it to Paris. The exposition commissioners have guaranteed its safe return. It is purposed to duplicate the mountain in its natural features, so that visitors to its summit will recognize it in the nugget. The signal station on the summit, a squat building only eighteen feet high, but perhaps forty long and fifteen wide, will appear. Climbing up Engleman's Canon will be seen the famous cog road, with perhaps an engine and a coach, the regulation train on the highest railroad in the world.

Bad Postures in Sitting.

Physicians who teach physical culture assert that it is not the ice water we drink, nor the soda water, nor the amount of smoking that men folk indulge in, that causes us to be a nation of dyspeptics, but the bad postures that we adopt when sitting. A correct attitude in sitting requires proper height and width of seat, a desk or table of the proper height when desk work is required, and a proportionate amount of care upon the part of the pupil to sit upon his seat in a proper position. The relation of the person to the seat should be such that while the hips and shoulders touch the back of the seat, the other portions of the back remain clear. The center of the back can not touch the back of the seat without relaxation of the muscles and resulting flatness of the chest, and perhaps of the stomach, provided, of course, the seat has a backward curvature.

Travel in Dancing.

An average waltz takes a dancer over about three-quarters of a mile, a square dance makes him cover half a mile. A girl with a well-filled program travels thus in one evening: Twelve waltzes, nine miles; four other dances at half a mile apiece, which is hardly a fairly big estimate, two miles more; the intermission stroll, and the trips to the dressing-room to renovate her gown and complexion, half a mile; grand total, eleven and a half miles.

END OF A SPENDTHRIFT.

Lloyd Aspinwall, Man About Town and Squanderer of a Fortune.

Less than 50, but an old man in appearance, Floyd Aspinwall, once famous as a "sport," died at a New York hotel. For several years he had lived

LLOYD ASPINWALL.

a retired life, because his means would allow no other kind, but there was a time when he equalled Berry Wall and Freddy Gebhardt. He was handsome, clever and rich. He set a pace that few could follow and that sent to the grave long ere he went, the few foolish young men who did go where he led.

Aspinwall's grandfather was a merchant prince of the metropolis—William H. Aspinwall. The son of this man was Gen. Lloyd Aspinwall, soldier and clubman, who left the spendthrift whose death is now chronicled an immense fortune fifteen years ago. The younger Lloyd Aspinwall took to yachts, fast horses, fancy drinks and handsome women and the combination proved as fatal to him as to hundreds of others. He was a favorite in society years ago and married beautiful Cornelia Lutton. She left him ere long and died two years ago, their daughter following her within a few days. One cause of the separation of Aspinwall and his wife was his fondness for Lillian Russell, when she was a Casino favorite.

A single survivor with a memory of youthful days called to see him on the day of his death and that was his brother.

A FAMOUS REFORMER.

George W. Julian Was Once a Candidate for Vice President.

George W. Julian, who died recently at his home in Indianapolis, was a prominent figure in national affairs a third of a century ago. He was a rugged, uncompromising reformer. Born in Indiana eighty-two years ago, he was elected to the legislature of the state at the age of 28. Within a few years he was the free soil leader, and

GEORGE WASHINGTON JULIAN.

for several years served in Congress as a free soil member.

He was an unyielding foe of slavery. In 1852 he was the free soil candidate for vice president. When the Republican party was formed he joined it and in 1860 was sent to Congress. For the next ten years he was a prominent political character in Washington, noted for his unswerving honesty, his bluntness, his slight disposition to be crabbed when opposed, but always having his face set toward the right. He served on the joint committee on the conduct of the war and for eight years was chairman of the committee on public lands. He was re-elected to his seat in Congress four times. The first administration of Grant did not please him, because he believed the Republican party was drifting away from its original aims. In consequence he supported Greeley in 1872, and after that never really returned to the Republican fold.

The Advantage of One Eye.

During the late Spanish-American war a certain old colonel who had lost an eye at the battle of Gettysburg was very indignant because he was put aside as physically incapacitated, when he applied for admission to one of the New York volunteer regiments.

Filled with wrath and chagrin, the Colonel journeyed to Washington, bent on having a personal interview with the President. He succeeded in gaining an audience, and the President, after listening to his plea, said kindly:

"But, my good Colonel J., you have only one eye!"

"Just so, sir," was the prompt rejoinder; "but can't you see the great advantage of my having only one eye? When I aim my gun I sha'n't have to close the other!"

He fought at Santiago.—Youth's Companion.

Zebra Culture.

On several South African farms experiments have been tried with Burchell's zebra. The zebras become as tame as ponies, and are readily broken in for draft work. The object of their tamers has been to breed a mule which, like the zebra, is proof against the tsetse fly. The zebras themselves run well enough in a mule team, though they cannot stand over-driving.

The summer girl should not extend her gadding beyond the age of twenty.

HIGHER PRICES FOR BEEF.

Will the Future Supply Keep Up With the Demand?

Butchers all over the country are advancing the prices of beef, and consequently there is complaint on the part of customers. Some thoughtless restaurant proprietors sought to excuse their advance of the price of steaks by printing on the bill of fare that it was due to the "squeeze" by the "beef trust," says the Breeder's Gazette. The daily papers caught up the cry, but investigation soon led them to see that it is the farmer rather than the packer who is "putting on the screws." The prices of cattle on the hoof made plain the situation. As a matter of fact, the advance on cut meats was slow in coming. Cattle sold higher in February than in July, when the advance was made on the block, but the reluctance of butchers to increase their price is explained in the trade papers as due to the keen competition between cutters of meats in large cities and the difficulty in agreeing on a raise.

The comparative figures on beef steers make interesting reading. The average price on the Chicago market during July of last year was $4.95. During the month just past the average price was $5.55. This is a gain of 60 cents per 100 pounds over the values of last year. But when we consider the fact that the average price for July during the past 20 years was $4.80 we can appreciate the material advance registered in an average of $5.55 for the 30 days just past, a gain of 75 cents per 100 pounds over the average for a score of years. Little wonder it is that butchers feel obliged to mark up the value on some of their cuts. Journals of the meat trade are vigorously urging an advance all along the line, maintaining that prices to the consumer have been held down to a basis that left little margin for profit and that self preservation demands that more money be taken into the till over the block. The position seems sound. With the general increase of commercial activities and the advances in wages that have been recorded during the past 12 months, the people are fairly well prepared for an advance in prices of meats from the hard times basis.

It is interesting to note that while some attention has been given to the prophecy of a statistician in the grain trade that in 30 years the world will not be able to raise enough wheat to feed its inhabitants, it has seemingly been taken for granted that the supply of beef would keep pace with the increasing demands. That this has not been the case is thoroughly known to those who keep in touch with the industry. Nothing is more inexorable than the unrestricted operation of the law of supply and demand, and growers and eaters of beef are now beginning to feel the force of it.

Expansion In the Sheep Trade.

The present year bids fair to witness a remarkable advance in the interest manifested in flock husbandry, says The Breeder's Gazette. Rising values of wool always turn attention to sheep, and the advance now plainly evident has set farmer and ranchman to planning to take on a few more sheep. The steady growth of the mutton trade, the advance in wool and the comparatively high price of cattle are the chief factors now influencing the expansion of the sheep breeding industry. A keen demand is reported from all over the country. The flocks of breeders will be strongly re-enforced by importations. A large number of orders have been placed abroad, chiefly for Shropshires, and buyers now in England are making quite a competition for the top lots. Show sheep are being purchased in liberal quantities, so that it is now well assured that the sheep departments at the leading state fairs will furnish sensational exhibits. A fact of much interest is the selection of a large importation of Rambouillet sheep on the continent. These big bodied, fine wool sheep have been constantly growing in favor, and a demand for them from the ranches to thicken the fleece has made itself manifest. Altogether we are sure to witness much activity in the sheep trade.

Don't Trust Bulls.

Under no circumstances should the bull be trusted, either when being handled by an attendant or when running loose in the yard, as there are so many cases on record where they have become unruly and attacked their attendant without the least warning. A bull a year old or over should always be dehorned and have a ring inserted in his nose, with rope attached for handling by. And whenever it is possible the bull should be handled by a grown up person. He will then receive kinder and firmer treatment than if taken care of by the boys, because they cannot always resist the temptation of teasing the bull, which will be sure to spoil him if he is of a nervous temperament.—Live Stock.

Lack of Forage.

The Denver Field and Farm says: "In some instances the present lack of forage is due as much to the slowness of the farmers and stockmen to adapt themselves to the existing conditions as it is to the want of suitable crops for cultivation. It is difficult to get out of the old slipshod range ways, even though it is known that a little well directed effort will make a given amount of land yield several times as much forage as it did formerly. Careful attention to the development of native meadows and pastures and a more general cultivation of miscellaneous forage crops that can be grown with at least a fair degree of success in nearly all localities will do much toward solving the forage problem."

Oregon Mohair.

The Oregon Agriculturist estimates the output of Mohair in Oregon this year at 20,000 to 40,000 pounds in excess of last year's product and the quality good.

CUTS OF MUTTON

Character and Cost of the Different Parts of a Sheep.

The mutton sheep has been slow in invading America, says the New York Press. Here, as in Europe, the wool producing Merino held almost undisputed sway for many years. These conditions, however, are changing rapidly. Perhaps the recent depression in the price of wool is largely accountable for the readjustment and changed condition. At any rate, there is a constantly increasing demand for good mutton in the United States. The Chicago market alone in 1894 took nearly a million more mutton sheep than during any previous year, and the receipts during 1898 were the largest on record. Notwithstanding the impetus of increased demand and good prices and the rapidly increasing population, the number of sheep in the United States is considerably lower than in former years. The average of the number on hand each year, Jan. 1, from 1891 to 1895 inclusive, was 44,448,885, and the average of the number on hand Jan. 1, from 1896 to 1899 inclusive, was 37,972,212. During the former period two Canadian provinces, Quebec and Ontario, sent to our markets 1,524,046 head of sheep, valued at nearly $5,000,000. This importation of mutton sheep from Canada still continues, notwithstanding the fact that a heavy duty is imposed and that Canadian mutton is also made on higher priced feeds and lands than prevail in our own country. During the last year the number of sheep imported at Buffalo alone was 175,697, valued at $574,882. We have also been importing $25,000,000 to $30,000,000 worth of wool annually during recent years.

DIFFERENT CUTS OF MUTTON.

The production of prime mutton for American and European markets is rapidly becoming a permanently established industry of vast proportions in the United States. Our rich lands and abundant feeds are well suited to the economical production of superior mutton, and it has been clearly demonstrated that mutton sheep properly selected can grow a large part, if not all, of the wool demanded for American manufacturing.

How the butchers cut the carcass of a sheep and how the housewife should order her mutton are matters of interest to every family in the land. The diagram shows the method of cutting a carcass, and the prices given for the several cuts are based upon the Chicago market for prime mutton.

These weights and values for the cuts are the averages made by seven special mutton breeds:

Leg, 22.2 pounds, at 10 cents	$2 22
Loin, 17.5 pounds, at 9 cents	1 57
Rib, 14.5 pounds, at 9 cents	1 30
Chuck (breast, shank, shoulder and neck), 19.8 pounds, at 1¾ cents	34
Total	$5 43

The leg, loin and rib are the high priced cuts that determine the value of a carcass of mutton. An animal that fails in one of these fails essentially to meet the requirements of the market for high priced mutton. This is particularly true of the leg cut, and plump, well filled legs are indispensable in prime lambs.

The illustration shows good front and back views of a carcass selected as a model at the Union stockyards, Chicago. It exhibits a remarkably well filled leg, back, rib and loin, the flesh being even and thick at all points, and on cutting it was found to be of superior quality throughout. This is the profitable type of carcass to the killer and consumer, as it contains the highest proportion of choice meat and the minimum of cheap product and offal. It was taken from a 95 pound Southdown.

A Profitable Hog.

The Columbia (Mo.) Statesman tells of a neighbor who has a Poland-China sow 4½ years old which in January found 18 living pigs and raised them all. On June 15 she found another litter of 15 and is raising them.

Queen of Devons.

The Devon cow Molly V, 14,885, was bred and is owned by J. C. Williams, Caerhays castle, St. Austell, Cornwall,

IDEAL DEVON COW.

England. She was calved in February, 1895, got by Captain, 2204, dam Molly, 7986, by Sir Watkin, 1846. She is a level cow, with excellent girth, width, size, well covered back ribs and loins.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - Plaintiff,

vs.

Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

[SEAL] P. H. MACK, Independence, Cal. Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale, to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to-wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be receive' at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased
P. H. MACK, Attorney for Administrator.
Dated August 23d, 1899.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Ben. H. Yandell, Attorney for Plaintiff.

The people of the State of California send greeting to Susie Troeger, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 5th day of September, A. D. 1899.

S. E. Vermilyea Esq. came down from Bishop yesterday.

Ed. Schober of Bishop was at Independence yesterday.

Mr. and Mrs. C. W. Robinson visited Darwin during the week.

A free social dance will be given at Mairs' hall after the Inyo Mercantile Co's opening Saturday night. All are invited.

It's time that the new copper camp in Saline Valley should have a distinct name. What's the matter with Cuprite?

H. J. Deyo, who was running the mill at the World Beater mine, Pleasant Canyon, for some time past is spending a few days in town.

Rain fell this morning to the amount of .06 of an inch, making .18 all told for the storm. The snow fall is heavy in the mountains.

It stormed heavily on the mountains during the week and large masses of snow are piled up in the canyons. This is a good beginning, at any rate.

A couple of mining experts examined the Reward mine last week for Los Angeles parties and expressed themselves as being well pleased with the property.

L. H. Wise, the special agent of the General Land Office who has been investigating the Indian allotments on Kern river, got back to Independence yesterday.

J. E. Shepherd came down from the Casey mine last Monday, where he has been for the last two months. He says their cyanide plant is working quite successfully.

S. H. Spratt went to Darwin last Tuesday. He is reported to have obtained a contract to construct boarding houses, offices and other buildings at the Saline copper mines.

A. W. Eibeshutz arrived from San Francisco last Monday evening. While in the City he purchased an acetylene gas plant for lighting his store and it is now being put in place.

Lester Laird has obtained a good position at the new copper camp and left for Saline yesterday. County Clerk Hession has appointed him Deputy Clerk, which will greatly facilitate business transactions in that section.

H. S. Mackay and C. H. Schen arrived at Keeler last Monday and went to Darwin next day for the purpose of meeting Col. Woodard and talking over the railroad situation. They were accompanied by P. H. Mack Esq. and Geo. Montgomery.

E. T. Anderson brought down about twenty pounds of beautiful specimen rock from the Barnes & Anderson mine last week. The ore is an iron stained quartz and carries large masses of free gold. It is taken from the Alhambra mine, at a point about one thousand feet distant from the main shaft.

Board of Supervisors.

THURSDAY, Oct. 5, 1899.
9 o'clock a. m.

Board of Supervisors of the County of Inyo, State of California met at above stated time pursuant to adjournment.

Present, Supervisors N. J. Cooley, A. C. Freeman, James Jones, J. J. Stewart.

Supervisor A. C. Freeman, Chairman, presiding.

Minutes of the preceding day's meet-in read and approved.

In the matter of the issuance of bonds of Poleta School District, County of Inyo, State of California.

Whereas, it appears to this Board that the Board of Trustees of Poleta School District did hold an election and submit to the electors of said District.

Whereas, bonds of such district should be sold for the purpose of raising money for purchasing school lots and building one or more school houses in said District and furnishing the same.

Whereas, it appears that such election was called by posting notices signed by said Board of Trustees in three of the most public places in said District for more than twenty days before said election and by publishing notice in the *Inyo Register*, a weekly newspaper printed and published in said Inyo County, not less than once a week for three successive weeks before the holding of said election.

Whereas. it appears that such notices did contain:

1st The time and place of holding such election. 2nd. The names of three judges to hold said election. 3rd. The hours during the day (not less than five) in which the polls would be open. 4th. The amount and denomination of the bond, the rate of interest and the number of years (not exceeding ten) the whole or any part of said bonds were to run,

Whereas, it has been proven by competent evidence to the satisfaction of this Board, that such election was duly held and conducted in all respects according to law.

Whereas, it appears that said Board of Trustees of said Poleta School District have certified to this Board all proceedings had in the matter of the issuance of such bonds as required by Section 1884 of the Political Code of California.

Whereas, it appears to this Board and this Board hereby finds and declares that more than two-thirds of the votes cast at such election were in favor of issuing such bonds and that said Board of Trustees met and canvassed said returns and caused an entry of that fact and the votes cast on its minutes, and

Whereas, it further appears that the whole amount of bonds so voted does not exceed five percent of the taxable property of the District as shown by the last equalized assessment roll of this County.

Now, therefore, on motion of Supervisor Cooley, seconded by Supervisor Stewart, it is by this Board hereby ordered: That the bonds of said Poleta School District in the County of Inyo, State of California, do issue to the number of four of the denominations of one hundred dollars each, aggregating the sum of four hundred dollars. All of said bonds are hereby declared to be payable in gold coin of the United States of America with interest thereon in like gold coin at the rate of eight per cent per annum from date until paid on the 20th day of December of each and every year; that the principal and interest of said bonds is to be paid out of the bond fund of said Poleta School District, the money therefor to be raised upon the taxable property of said District. The principal of this issue shall mature as follows, to-wit: One bond of one hundred dollars maturing December 20, 1903, and one bond of one hundred dollars annually thereafter until all shall be paid.

The form of said bond shall be as follows to wit:

UNITED STATES OF AMERICA,
STATE OF CALIFORNIA

Bond of Poleta School District in Inyo County, State of California. Poleta School District

Poleta School District in the County of Inyo, State of California, hereby acknowledges itself indebted and hereby promises to pay to ..... or to the holder of this bond the sum of two hundred dollars, which sum the said School District promises to pay to the holder hereof at the office of the Treasurer of said County in the town of Independence in said County on the 20th day of December, 1903, with interest thereon at the rate of eight per cent per annum, payable annually on the 20 day of December of each and every year from and after the date hereof, at the office of the Treasurer aforesaid, on the presentation and surrender of annual coupons or interest warrants, both principal and interest payable in gold coin of the United States until the bond be finally and fully paid.

This bond is one of the series of four bonds of like tenor and date, each numbered respectively from one to four inclusive, amounting in the aggregate to four hundred dollars.

This bond is issued by the Board of Supervisors of Inyo County under and in accordance with the provisions of Sections 1880, 1881, 1882 1883, 1884, 1885, 1886, 1887 and 1888 of the political Code of the State of California, and the issuance hereof was authorized by more than two-thirds of the votes cast by the electors in School District voting at an election held therein on the 5th day of August, 1899, which said election was held to determine whether bonds of said school election should be issued and sold for the purpose of raising money for purchasing school lots and for building or purchasing one or more school houses in such school district and furnishing the same.

It is hereby declared that such election was duly called, duly held and conducted and the notice thereof duly given and the result thereof canvassed and declared in accordance with the provisions of the Political Code above mentioned, and that all the proceedings of the Board of Trustees of said Poleta School District and of the Board of Supervisors of said Inyo County in the matter of the issuance of this bond were regular and in strict accordance with the provisions of the sections of the Political Code above mentioned.

This bond is in the form prescribed by order of said Board of Supervisors, duly made and entered in its minutes on the 5th day of October, 1899, and shall be payable out of the bond fund of said Poleta School District, and the money for the redemption of said bonds and the payment of the interest thereon shall be raised by taxation on the taxable property in said District.

In witness whereof the said Board of Supervisors has caused this bond to be signed by its Chairman and attested by its Clerk with the seal of the said Board attached this .... day of ....., 189...

.....
Clerk of Board of Supervisors.

.....
Chairman Board of Supervisors.

.....
County Auditor.

That to each of said bonds shall be attached interest coupons, which said coupons shall be in the following form, to-wit:

COUPON.
No...

The Treasurer of Inyo County, California, will pay to the holder hereof out of the bond fund of Poleta School District in said County on the 20th day of December, 189.. at his office in the town of Independence, said County, the sum of ..... dollars for interest on Bond No...

.....
Chairman.

.....
County Clerk.

.....
County Auditor.

Said bond shall be sold by the Board of Trustess of said School District to the highest and best bidder for cash in gold coin of the United States, provided that the price paid in no case shall be less than par, and the proceeds of the sale thereof must be deposited in the County Treasury of said Inyo County to the credit of said building fund of said Valley School District and be drawn out for the purposes aforesaid.

In accordance with petition of citizens of Big Pine and vicinity, praying for the appointment of H. H. Robinson to the office of constable in and for 2nd Township it was

Ordered: That H. H. Robinson be and he is hereby appointed to the office of constable in and for 2nd Township, Inyo County, California, and the Clerk directed to issue certificate accordingly.

Petition of citizens of Inyo County praying for the appropriation of $300 for the purpose of placing an exhibit at the San Francisco Board of Trade and also at the Los Angeles Chamber of Commerce exhibits of the agricultural, horticultural, mining and other products of Inyo County considered. No information accompanying the petition as to who would collect and place on exhibition the proposed exhibits, or the extent of the same, or who would be responsible for the proper expenditure of the appropriation asked for, and it appearing to the Board that the sum of $300 will be entirely inadequate to obtain the object desired and the Board desiring further information in the premises before final action, it is therefore ordered that said petition be and the same is hereby laid over until next regular meeting.

At 12 o'clock m. Board adjourned to meet at 1 o'clock p. m. at which hour reconvened, all members being present as before.

Monthly reports of County Treasurer and monthly and quarterly reports of County Treasurer and County Auditor examined and approved.

Board adjourned to meet Friday, October 6, 1899, at 9 o'clock a. m.

A. C. FREEMAN,
Attest. Chairm
D. J. HESSION, Clerk.

FRIDAY, Oct. 6, 1899.
9 o'clock a. m.

The Board of Supervisors of Inyo County State of California met at the above stated time, pursuant to adjournment.

Present, Supervisors J. J. Stewart, N. J. Cooley, James Jones and A. C. Freeman, Chairman, presiding.

Minutes of preceding day's meeting read and approved.

Petition of citizens of Big Pine and vicinity representing to this Board that one R. Orcier is and has been conducting an immoral and disorderly saloon business in the town of Big Pine, said petitioners also praying for the revocation of the license of R. Orcier, being under consideration, ordered laid over till next regular meeting.

Complaint having been made to this Board in regard to the violation of the law against permitting minor children to visit saloons, to play at games of chance therein, or to be sold intoxicating liquors

Thereupon, we, the Board of Supervisors, do hereby instruct the District Attorney to call the attention, in writing, of the keepers of saloons or public houses where intoxicating liquors are sold, and of the several peace officers of the County to the provisions of Section 336 of the Penal Code, which makes it a misdemeanor to knowingly permit any person under twenty-one years of age to play at any game of chance therein; to the Act of March 30, 1878, against permitting minors under sixteen years of age to visit saloons, unless they are accompanied by their parent or guardian, and to an Act to prevent the sale of intoxicating liquors to minors under the age of eighteen years approved March 11, 1891.

Ordered: That the Clerk of the Board of Supervisors be directed to publish for a period of three weeks an advertisement inviting sealed proposals for the building of a branch jail at Ballarat.

Whereupon the Board adjourned to meet at 1 o'clock p. m. at which hour reconvened, same members present as before.

Ordered that a monthly allowance for the months of October, November and December, 1899, be allowed each of the following-named persons and the Auditor is hereby directed to draw his warrant on the Hospital fund for the same in the following amounts:

To Mrs. Wayland and Mrs. Barnes, warrant to be drawn by A. C. Freeman, $15.00.

To Mrs. Abechuco, warrant to be drawn by J. J. Stewart, $10.00.

To Mrs. J. Wilson, warrant to be drawn by J. J. Stewart, $10.00.

To Miss Emelie Thiebaut, $10.00.

It appearing to this Board that one Mrs. Lawrence, of Bishop, an indigent person, having recently sustained a serious accident, and it further appearing to the Board that she is in need of medical and other attention, it is hereby directed that Supervisor Cooley render her such relief as he may deem necessary and report to the Board at the next regular meeting.

Ordered that the sum of $251.77 be transferred from the General Road fund to the several road funds as follows:

To Road Dist. No. 1 fund.....$47 20
" " " 2 " 62 05
" " " 3 " 70 80
" " " 4 " 36 67
" " " 5 " 34 15

Board adjourned at 4 p. m. to meet Saturday, Oct. 7, 1899, at 8 o'clock a. m.

A. C. FREEMAN,
Attest: Chairman.
D. J. HESSION, Clerk.

SATURDAY, October 7, 1899
8 o'clock a. m.

James Jones	42 30
J. J. Stewart	34 80

Whereupon the Board adjourned for the term.

To The Public.

A report having become current that I have opened the Inyo Mercantile Co.'s business in other interests than my own, I desire to say to my friends and the general public that this is utterly false; that I am and will be the sole proprietor, and that no other person has any interest in the business. Yours for trade,

BERTRAND RHINE.

Our well known expert jeweler and watchmaker from Bishop will be at Independence about October 23d. All work will receive prompt attention. Watches and clocks always on hand for sale at reasonable prices. M. GOLDBERG.

NEW ADVERTISEMENTS.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist., Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 28th day of September, 1899 an assessment, No. 33, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.

CHARLES E. ANDERSON,
Secretary.

THE LAW OF RECOMPENSE.

There is no wrong, by any one committed,
But will recoil;
Its sure return, with double ill repeated,
No skill can foil.

As on the earth the mist it yields to heaven
Descends in rain,
So on his head whoe'er has evil given
It falls again.

It is the law of life that retribution
Shall follow wrong;
It never fails, although the execution
May tarry long.

Then let us be, with unrelaxed endeavor,
Just, true and right,
That the great law of recompense may ever
Our hearts delight.

Lottie's Blue Eyes.

THE harrowing conviction was forcing itself upon Miss Sophia's mind that her brother, Rev. Harmond Pendleton, at the mature age of 44, had actually fallen in love. This fact was in itself an offense to Miss Sophia, but it was not all, for the minister had committed the supreme folly of losing his heart to a chit of a girl, and a most objectionable young person altogether in Miss Sophia's eyes.

"Now if he had only fallen in love with Mary," mused Miss Sophia. "She is a most estimable young woman. But that doll-faced, vain, frivolous Lottie——" and Miss Sophia groaned. "A man of his age and a minister of the gospel to lose his wits over a pink and white complexion and yellow hair! Oh, it is too bad. If I only knew of some way to disenchant him!"

Just then two girls and a young man passed along the street. One of the girls was tall, dark-haired and stately; the other was pink-cheeked and yellow-haired. Her hands were full of roses and her laughing blue eyes were uplifted to the face of the young man by her side.

Miss Sophia snorted with disgust.

"Flirting, as usual, the shameless piece!" she ejaculated. "A nice minister's wife she would make! Harmon's an idiot!"

Then Miss Saphia suddenly awoke to the fact that the hired girl had been left much too long to her own devices, and rose hastily to her feet. In so doing she tripped over a stool and gave her ankle a severe wrench.

A little later Rev. Harmon Pendleton returned home and found Miss Sophia with her foot on a stool and her ankle swathed in bandages.

"Why, Sophia, what has happened?" asked the minister.

"I've sprained my ankle," replied Miss Sophia, with grim disgust. "I can't so much as put my foot on the floor."

"Why, this is indeed bad," murmured Rev. Harmon.

"And that is not all," said Miss Sophia. "Martha has just had word that her mother is very ill and to come home immediately. What to do I can't imagine."

"Why, get another girl."

"Since when has it become so easy to get help in Westonville at a moment's notice?" ejaculated Miss Sophia, with extreme scorn.

"I met Miss Armiger down the street," said the minister with sudden inspiration. "She intends stopping on her way home. Perhaps she can think of a way out of the difficulty."

"I don't doubt it; Mary Armiger is a most superior young woman," said Miss Sophia, with emphasis.

"Yes, she is indeed," readily assented the minister.

"So utterly unlike her sister Lottie," suplemented Miss Sophia.

"Yes, they are very unlike, certainly," said the minister quietly.

"Did you meet Lottie also?" asked Miss Sophia, furtively watching her brother's face. "She passed with Charlie Saunders, making eyes at him as usual. What an audacious flirt that girl is."

"Oh, I have not seen Lottie," replied the minister, and then he added: "Here comes Miss Armiger now."

He passed into the hall, returning in a few minutes with Mary Armiger.

"Why, Miss Sophia, I am sorry to hear of your accident," she said.

She had soft dark eyes and a low, sweet voice.

"I was just telling Sophia that perhaps you may be able to help her in her present awkward predicament," said the minister. "Martha's mother is ill, and she is going home this afternoon."

"Why, that is too bad," said Mary Armiger. "How long will Martha be gone?"

"A week at least," replied Miss Sophia.

"How would it do for me to come and keep house for you," asked Mary, after a few moments' thought. "Father and mother are going away tomorrow for about two weeks. There's the Widow Mason's daughter, Sarah, who would, I am sure, be glad to come and do the rough work."

"You would be doing me a kindness I should not soon forget," replied Miss Sophia, with surprising eagerness.

In fact she was really delighted with the plan. What an opportunity it would afford to bring Mary Armiger's sterling qualities under the observation of the minister! He was fully cognizant of her usefulness in the church, her good work among the poor and suffering of the parish; her domestic virtues could now be demonstrated to him.

Miss Sophia looked at her brother. He was gazing gratefully and appreciately at Miss Armiger.

"No one in trouble ever appeals to you in vain, Miss Mary," he said. "But this is really something of an imposition."

"Not at all. I shall be very glad indeed to come. Only," with a slight hesitation, "I am afraid I should be obliged to bring Lottie, as there will be no one at home."

Miss Sophia's brow darkened; the minister's pale face flushed slightly.

"By all means bring Miss Lottie," he said, as Miss Sophia remained silent.

Lifting her eyes one evening a week later, Miss Sophia saw upon the porch quite distinctly, for the moon was shining brightly, Mary Armiger and Charlie Saunders. She stiffened in her chair. Mary and Charlie being together, it followed that Lottie and the minister were bearing each other company. There rose before Miss Sophia's mind's eye a distracting vision of Lottie, lovely in her white gown, with pink roses in her yellow hair. The next moment, however, all thought of Lottie, engaged in luring the minister to return to his former folly, was driven from Miss Sophia's mind, for Charlie Saunders had placed his arm about Mary's waist and kissed her upon the lips.

Miss Sophia gasped in astonishment and horror. Could she have seen aright? Mary Armiger, the model of all that is best in womanhood, permitting an insolent boy to kiss her unrebuked!

As Miss Sophia sat bewildered the couple moved toward her.

"Why, Miss Sophia, you are all in the dark; I'll light the lamp," said Mary, as she stepped through the low window into the room, followed by Charlie.

Miss Sophia sat in grim silence until Mary had lighted the lamp. She fixed her eyes sternly upon Mary. Certainly she had never seen the elder Miss Armiger look quite so pretty before. There was a pink flush in her cheeks and her dark eyes were soft and bright.

"Mary Armiger, did I really see that young man kissing you a few moments ago or did my eyes deceive me?" asked Miss Sophia, with uncompromising abruptness.

Mary blushed, while Charlie, to Miss Sophia's intense indignation, began to laugh.

"I—I am afraid that you did, Miss Sophia," faltered Mary. "You see, I had just promised to marry him."

"What!" gasped Miss Sophia. "That worthless young scamp, who does nothing but flirt with your sister.

"Now, Miss Sophia, that's too bad," cried Charlie. "Lottie and I never thought of such a thing. She knows that I've been in love with Mary for ever so long."

Before Miss Sophia had time to collect her scattered wits sufficiently to make a reply the minister and Lottie entered the room. Lottie's cheeks were pinker than the roses she wore in her hair, and the minister's eyes were radiant.

For a moment Miss Sophia's eyes lingered first upon the girl and then upon her brother, and she made a quick movement to rise from her chair. The minister came to her assistance.

"I wish to go to my room," she said, laying her hand upon her brother's arm, but keeping her face studiously averted from him and the other occupants of the parlor.

When they reached her bedroom door she stopped and turned a rather white face toward him.

"I supose you will permit me to remain until you are married to that doll?" she said.

"Why, Sophia, surely you are not thinking of deserting me, now that I shall need you more than ever?" exclaimed the minister. "You see, if I were going to marry a woman like Mary Armiger, now"—and a suspicion of a smile crossed his lips, but was quickly suppressed—"I should not require any one to keep house for me. But it being Lottie makes it a very different matter."

For a moment or two Miss Sophia said nothing.

"Humph!" she at length replied. "I'll think about remaining."

DIMPLES MADE TO ORDER.

Paris Surgeons Devise a Way to Improve on Nature's Handiwork.

The hall mark of beauty lies in those little indentations made presumably by the finger of Cupid, but which so few women possess naturally. Being able to change the shape of the nose or the color of the eyes it follows that science has taken the making of dimples upon its hands and now one of the cleverest surgical operations results with little pain to the patient in a perfect imitation of the indentation wrought by the god of love and beauty himself. Paris originates it, of course.

The modus as practiced by the skilled surgeon who discovered the secret

MAKING DIMPLES.

is to draw up the flesh in either chin or cheeks by means of a glass suction tube, of course an infinitesimal amount of cuticle being all that is necessary to thus secure. This done, the portion drawn up by the force of the air is tied with a bit of silk thread, treated with cocaine, and then snipped off with surgeon scissors. The wound is made less painful by dressing until it is thoroughly healed, when the silk thread is removed and the neatest of little holes, the exact replica of a dimple, is there forever.

Of course, laughter has no specific influence upon the made dimple. The face in repose, in sorrow, in joy, will always be a dimpled one—a drawback that surgery has not yet been able to overcome. The made dimple is not responsive to emotions, but it is a potent factor in the charm of the feminine face.

People can ride a free horse so long that they will kick when the owner asks for the horse.

Hard to Get Out.

An English woman who has been traveling in Russia seems to have found it easier to get in than to get out of the czar's country. She sent her passport to the authorities before starting in order to have it vised and then blithely made for the frontier.

Arriving there, she was immediately detained and taken before the powers that not only be, but also do, at the Russian frontier. Here she was informed that her passport did not permit her to leave the country and that she would be obliged to make herself comfortable while the police found out all she had done while in the country.

At first she was rather pleased at the thought of how she would tell her friends about it when she got home. But when she found that she had to pay not only for her room, her meals, service and all that sort of thing, but also for long telegrams which the authorities were exchanging in regard to her case, her pleasure dwindled as rapidly as her funds did.

She finally got off, however, but without receiving any apology or any reimbursement.—New York Sun.

The Dumdum Bullet.

The dumdum bullet secured its name from the Indian arsenal by whose officers it was devised, and the name should not be spelled in two words or even hyphenized, as a great many people appear to think. Dumdum is a town and a military station about four miles northeast of Calcutta.

It was the experience in the Sudan and also in the Spanish-American war that the new magazine rifles, whose small calibers give them greater accuracy and greater carrying power than the old weapons, were faulty in one important particular.

The small caliber bullets have slight effect on those struck by them, and it was to obviate this difficulty that the dumdum bullet was devised. This bullet is one from which part of the nickel or copper covering is removed, so that the force of the impact spreads the soft lead, making a missile that inflicts a severe, shattering wound.

PE-RU-NA

FOR WOMEN

The debilitating drains and discharges which weaken so many women are caused by Catarrh of the distinctly feminine organs. The sufferer may call her trouble Leuchorrhoea, or Weakness, or Female Disease or some other name, but the real trouble is catarrh of the female organs and nothing else.

Pe-ru-na radically and permanently cures this and all other forms of Catarrh. It is a positive specific for female troubles caused by catarrh of the delicate lining of the organs peculiar to women. It always cures if used persistently. It is prompt and certain.

The microbes that cause chills and fever and malaria enter the system through mucous membranes made porous by catarrh. Pe-ru-na heals the mucous membranes and prevents the entrance of malarial germs, thus preventing and curing these affections.

The Old Man's Retort.

"You don't have any ruins in this blawsted country," said the British scion to his future father-in-law.

"No," said the old man, "we don't. And you won't have any left in England if your noble army of titled paupers can marry enough rich Yankee girls to put new roofs on your old castles."—Cleveland Plain Dealer.

Her Way of Getting It.

Wife (earnestly)—George, dear, I have prayed so fervently of late for a tailor made gown that I feel it would be flying in the face of Providence not to go and get measured at once.—Brooklyn Life.

Music for Nervousness.

Scientists claim that music has power to soothe the nerves. But the quickest way to cure nervousness is to strengthen the nervous system. We know of nothing which will accomplish this quicker than Hostetter's Stomach Bitters. Do not take a substitute. See that a private Revenue Stamp covers the neck of the bottle.

Lazy Liver

You know very well how you feel when your liver don't act. Bile collects in the blood, bowels become constipated and your whole system is poisoned. A lazy liver is an invitation for a thousand pains and aches to come and dwell with you. Your life becomes one long measure of irritability and despondency and bad feeling. CASCARETS act directly, and in a peculiarly happy manner on the liver and bowels, cleansing, purifying, revitalizing every portion of the liver, driving all the bile from the blood, as is soon shown by increased appetite for food, power to digest it, and strength to throw off the waste. **Beware of imitations!**

"I have been troubled a great deal with a torpid liver, which produces constipation. I found CASCARETS to be all you claim for them, and secured such relief the first trial that I purchased another supply and was completely cured. I shall only be too glad to recommend Cascarets whenever the opportunity is presented." J. A. SMITH, 2930 Susquehanna Ave., Philadelphia, Pa.

"He did it quickly and systematically and

How Emery Is Quarried.

Emery comes from the island of Naxos, in the eastern Mediterranean, whence it has been exported for the last two centuries or more. The beds are in the northeast of the island, the deposits descending into some of the neighboring islands, the emery being found in lenticular masses, resting on layers of schist in limestone almost identical with Parian marble, the finest marble known, which comes from the island of Paros, close by.

There are about 300 men engaged in the trade, all of whom have to be married before they are admitted to the fraternity. The material is much too hard to be dug out or even blasted. Great fires are lighted around the blocks till the natural cracks expand with the heat, and levers are then inserted to pry them apart. This system is continued until the blocks are reduced in size to masses of a cubic foot or less, and they are then shipped as if they were coal. There are said to be 20,000,000 tons yet available at Naxos, and the last reported year's export was 3,950 tons. It is one of the hardest substances known.—Ironmongery.

Don't Put a Bird In the Window.

"Never put a bird in the window," said a bird fancier to the reporter the other day. "I rarely go into the street in summer, or even on a mild day in winter, that I do not see unfortunate canaries hung in the windows. Even if the sun is not broiling the brains under the little yellow cap, a draft is blowing all the time over the delicate body. People have been told a thousand times that they must not put a bird in the draft, yet how few remember that there is always a draft in an open window!"—Berlin (Md.) Herald.

Pale as Death

Miss Cordelia Moore, of Malone, N. Y., until recently, has been a lifelong invalid from palpitation of the heart and weakness of the blood.

Physicians were puzzled over her case, their most skillful efforts were baffled. Various remedies were tried without avail. The proverbial "change of climate" was advised, but the constant change wore upon her until, to quote her mother's words, "she became a living ghost." Miss Moore said: "Upon advice of a friend I began taking Dr. Williams' Pink Pills for Pale People and before the first box was used I noticed a great change. I began to regain my appetite and felt better generally. After finishing the first box I took six more. The effect was wonderful. I grew strong and gained in flesh. "I never felt better in my life than I do now. I weigh more than ever before and I consider myself cured."

From the Gazette, Malone, N. Y.

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box, 6 boxes $2.50.

She, Too, Was of a Large Family.

At a little informal married women's luncheon out in Eckington the other afternoon, given by the hostess in honor of her "guest from the west," a dainty, languorous, black eyed woman under 30, the conversation switched to the subject of large families. It appeared that most of the lunchers came from prolific families. Each appeared anxious to give her family's large tribal record for a considerable distance back, and none noticed the alarmed countenance of the hostess as the talk progressed. The hostess made many ineffectual efforts to signal the conversation to a standstill; likewise, she unavailingly endeavored to side track the large family theme. But it was no go, and it was finally up to her "guest from the west" to set forth the numerical contributions of her ancestors to previous censuses. When the question was put to her directly, she exhibited nary a flinch, but, smiling languidly, remarked:

"I am the youngest of 12 daughters and 18 brothers."

"Impossible!" exclaimed all of the women except the hostess, who contemplated the figures on her fan with a drawn, dreary smile.

"Not at all," replied the guest. "You are perhaps unaware that I was born and reared in Salt Lake City."

"Oh!" blankly exclaimed the other women. "Quite so!"

Then the hostess experienced no difficulty in shifting the current of talk into the weather channel.—Washington Post.

Uncle Sam's Only "Tip."

Tips given to Pullman car porters by government employees while performing official duties are considered legitimate charges against Uncle Sam. They are the only tips which are accorded this distinction. This interesting fact has just been gleaned through the display by a government official of a bill of expenses which he intended to present for a recent trip which he made in the service of the government. He exhibited the statement as an evidence of the close manner in which the government did business. He had to present a receipt for every expenditure made, even a receipt from the Pullman car conductor for his berth.

The only item for which there was no receipt was "Tips, 50 cents." When asked what the tips were for, the officer said: "They were tips which I gave to Pullman car porters. The government allows those, but they are the only tips which are allowed. If I tip the waiter at my hotel or the man who carries my bag, the tip comes out of my pocket, but the tipping of Pullman car porters, a-quarter for each journey made on a sleeper, is such a recognized custom that the item for such tips is always allowed by the government to officers when traveling on government business."—New Orleans Times-Democrat.

Pricing a Pair of Trousers.

Lord Brampton was on one occasion presiding over a case in which the plaintiff was giving evidence against a man who had stolen a pair of trousers from his shop.

"How much were the trousers?" queried Hawkins.

"Well," replied the plaintiff, "it depends who wants to buy them. I sell them to one man for 30 shillings, to another for 25, but you can have them for 23 and 6."

"Sir," cried Hawkins angrily, "I want you to tell me how much those trousers are worth!"

"Well," replied the plaintiff, "shall we say 22 shillings to you?"

"Look here," thundered Hawkins, "if you do not instantly tell me what those trousers are worth, I'll send you to jail for 14 days for contempt of court."

"Well, well!" replied the frightened plaintiff conciliatingly, "you may have them for a guinea. I'm giving them away; still you may have them at that price."

Even the stern aspect of Judge Hawkins could not stop the roar of laughter which broke out on hearing the reply, a roar in which Hawkins, after a few minutes, joined himself.

Remember that you can buy Jesse Moore A. A. Whiskey, for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

The Chinese are very fond of foreign song birds. Forty years ago, when canaries were first introduced to that country, a pair cost $12; now they have multiplied to such an extent that a pair can be bought for 75 cents.

TELL HER SO.

You have not forgot the summer
When your love dream came to you,
And the wooing and the winning
Of the heart that's been so true.
Years have gone, and still you love her,
But we often careless grow;
Though your love's as warm as ever,
Do you often tell her so?

Do you think she has forgotten,
In the flitting of the years,
Words she loved to hear you utter—
Only meant for lovers' ears?
No! She never will forget them,
Tender words so sweet and low,
And to-day she longs to hear them;
If you love her, tell her so!

Those old, happy days of wooing
For the world she'd not forget,
Though the honeymoon is over,
You should be as lovers yet.
When the cares of life are many,
And its burdens heavy grow,
Help her bear them, and, I pray you,
If you love her, tell her so!

Loving words will cost you nothing,
And you cannot tell their power;
Cannot know how much they brighten
All the shadows of the hour.
Grudge them not, as on life's journey
Through this world of ours you go;
To the faithful hearts beside you,
If you love them, tell them so!
—New York Weekly.

JEPTHA BOGLE.

ABSALOM BOGLE was a rich old bachelor—worth his hundreds of thousands—and Absalom Bogle died. During all his life he had been known to form but one strong friendship, and that was for his only brother, who, in the other years, had helped him to prospect in the coal mines—his brother Jeptha. This Jeptha, unfortunately for himself, had become a misanthrope. He had loved and had been jilted; and, just when his prospects of success with his brother Absalom had been brightening, he had thrown up all his business, and gone to far off parts—to parts so far away that not a word had been heard of him from that time.

And Absalom Bogle died. He departed this mundane life on the fourth day of December, at noon. When his will was opened, which event transpired in the presence of many relatives, its provisions were found to be very simple. First, he bequeathed everything of which he might die possessed to his fondly remembered and well-beloved brother, Jeptha. But in case said Jeptha did not present himself and claim the benefit within one year from the death of the testator, then the property was to be divided among his other relatives according to their rank of kin.

Only in one direction, setting aside his brother Jeptha, did the tide of relationship to Absalom Bogle flow. There were no nephews nor nieces, no uncles, nor aunts, but only cousins. There were two first cousins, four or five second cousins, several third and fourth cousins, and so on, in increasing ratio, as they were farther and farther removed.

Sidney Spooner, Esq., was the attorney whom Bogle had selected to hold in trust his estate. For long years Spooner had been his legal adviser and business agent, and before his death he had invested the faithful attorney with full executive power over the property and had exacted in return no sign of a bond.

After Absalom Bogle's demise, with the world at large the months rolled on as usual, but with the cousins, near and far, of the dead and gone testator, they brought with them wearing anxiety and suspense of the most harrowing kind. The winter passed, and the springtime came; but the expectant cousins could do little work. They were driving hither and thither to see if any intelligence of Jeptha Bogle had been, or was likely to be, or could by any possible chance be, discovered. Spring passed, and the summer came; and as the Bogle heirs had sowed but little in the spring, save hopes of Absalom's money, they had little else to cultivate in the summer.

The summer passed and the autumn came, and the host of cousins, who had cultivated only hopes of golden heirship during the season of fructification, found nothing else to garner in the season of the sere and yellow leaf.

When the frosts of October had begun to trace their delicate pencilings upon the crisp foliage Mr. Spooner sent his clerk around among the relatives of Absalom Bogle to bid them prepare for presenting their claims at the appointed time. If the long absent brother did not show himself on or before noon of the fourth of the coming December the property would be theirs.

This clerk of Mr. Spooner was a quaint old fellow, answering to the name of Jedediah Sprout. He never hesitated to acknowledge that the attorney had taken him in out of charity, and in his humble way he sought to serve his patron faithfully. But the most wonderful thing about Jedediah Sprout was that he claimed to be a near relative of Absalom Bogle—nearer by far than any other living. He claimed descent from a brother of Absalom—an elder brother, much older than either Absalom or Jeptha—who had died in South America many years ago. The cousins looked up the family history, and found that the ancient brother in question had been one Solomon Bogle, a wild, wayward fellow, who, under a cloud, had changed his name to Sprout, and who had left no record of having ever married. Jedediah acknowledged that the said Solomon had never married, and yet he had the hardihood to claim to be his son.

Could anything be more impudent? The cousins, from the first to the sixteenth remove, held up their hands in holy horror. That a man, in possession of his senses, should unblushingly acknowledge such shame! And, above al, that, from such a slough of ignominy he should thrust himself into relationship with honest people!

And yet Jedediah Sprout worked in his humble station for Mr. Spooner. He visited the cousins with his instructions from his patron, and to each he tearfully presented his own claim.

"I ask not for a prime share of the wealth of my father's relative," he said. "I am very poor, and a mere pittance will serve me. Let me share with the very least."

But they scouted and jeered, and would not listen. They received the legal instructions which he brought from the attorney, and then kicked him out.

In a neighboring town lived Kate Winthrop. She had been Kate Wetherbee; but during the very last summer, while other cousins had been cultivating their golden expectations, she had married Jack Winthrop, and had settled down in a snug, quiet home, peaceful and happy. Her husband worked hard for a living, and she helped him; and she was grateful and glad that she had strength so to do.

Jedediah Sprout had called upon Kate and presented the attorney's instructions.

"Come in—come in, and rest," said Kate, in her winsome, cheery way. "Come in and stop for dinner; but don't say anything about the Bogle property. I don't care to hear it."

"But," urged Jedediah, "you are a relative!"

"My mother was a cousin, some four or five times removed," answered Kate; "but I found no claims upon that circumstance. My poor pittance wouldn't be worth the wrangling and tangling I should have to endure; and, moreover, Jack and myself have concluded that we had better paddle our own canoe."

By and by Jack came in, and to him Jedediah presented the subject. But Jack was as emphatic as his pretty wife had been. He didn't care to mix in the feverish, scrambling mess.

"But," said he, "I'll tell you what I will do, Mr. Sprout. I have heard your story, and in all honor and humanity I think your claims are just. If you cannot get the share of Absalom Bogle's property to which you are morally entitled, you are welcome to all you can get apart in the name of my wife. How is that, Kate?"

"I agree, with all my heart," cried Kate.

The rich moisture in Jedediah's eyes gave token of the feelings which he did not speak. He sat down and ate dinner with the happy young couple, and said no more upon the subject of business.

The weeks rolled on, and the morning of the 4th of December at length arrived. In the great, old, shambling house, which had been vacant since the day of Absalom Bogle's funeral, an anxious crew were assembled.

On that very morning Jack and Kate Winthrop had been visited by Mr. Spooner, who had asked their attendance on the coming occasion. They had replied to him that they had no interest in the matter.

"But," said Mr. Spooner, "Jedediah Sprout tells me that you will give your share to him."

"If he can get it," added Jack.

"If he is to get it at all," said the attorney, "it will be necessary that you and your wife should be there to relinquish it."

"On your honor, Mr. Spooner, do you think our presence would help poor Jedediah Sprout?" asked Kate.

The attorney replied that he thought it would.

"Then," said Kate, "we will go. What say you, Jack?"

Jack consented, and so it transpired that Kate Winthrop and her husband were present at the eventful meeting. The cousins of closer degree scowled upon them when they entered, and one wheezy old spinster informed them that it would have looked better if they had remained away.

"Not nearer than the sixth or eighth remove, at best," put in an ancient maiden of ascetic aspect. "Ugh! the assurance of some folks."

The hours slipped on, and the important meridian was close at hand. All had assured themselves that Jeptha Bogle was not in the land of the living. At all events he had not been heard from. And then followed a comparing of notes touching respective nearness of relationship. Genealogical registers of all kinds were at hand, and it was very evident that not a few of them had been recently altered and amended. Crimination and recrimination resulted, and a belligerent outburst was on the tapis when the clock struck twelve, and with the last stroke of the fateful bell Mr. Spooner appeared upon the scene, and with him came the man called Jedediah Sprout.

"Ladies and gentlemen and very good friends," said the attorney, with a formal bow, "I have the pleasure of introducing to you your very obedient and humble cousin, Jeptha Bogle! He bids you welcome to his mansion, and begs that you will honor him with your company to dinner."

"Bogle!" cried spinster No. 1, starting up. "What Bogle?"

"It's a base deception!" exclaimed the ancient maiden of ascetic visage.

"Who is Jeptha Bogle?" demanded a low-browed haberdasher, upsetting his chair as he arose, and coming very near to upsetting a wizen-faced old bachelor who sat next to him.

"I am Jeptha Bogle," said the attorney's companion. He now appeared in a suit of black velvet, and looked like a very kind-hearted gentleman. "I am the only brother of the Absalom Bogle who died one year ago in this house. I came on from South America six months ago, and made myself known to Mr. Spooner. I told him I had no use for all the money my brother had left, and that I was willing to divide the greater part of it with my relatives. Mr. Spooner applauded my motive, but advised me to examine for myself, and select the worthy ones. So I called myself Sprout and went at the work. As you would have done unto Jedediah Sprout, I give you full permission to do unto yourselves. Dinner will be ready in half an hour; but you will excuse me from sitting at table with you, as I am engaged elsewhere—Jack and Kate Winthrop will come with me. As they were not of the heirs expectant, their presence in this assembly is no longer necessary."

From astonishment to indignation and from indignation to boiling wrath, surged the cousins of all degrees; and in such wrathful mood they found no appetite for dinner; and, one by one, or in muttering, cursing pairs, they crawled away, invoking all sorts of maledictions upon the head of the returned brother who had so deceived and entrapped them, as well as upon the heads of the young couple, who, they were very sure, were to bask in the sunshine of Jeptha Bogle's good intent.

And in this last surmise they were not mistaken. Old Jeptha found a home with Jack and Kate, and he did not wait until death had cut short his share of the enjoyment before giving to them of the wealth he had resolved should be theirs.—New York News.

THE SACRED CARPET

Is No Carpet at All, Neither Does It Look Anything Like One.

"It is England's wise policy in all her colonies to have her army take part in the national religious ceremonies," says Lilian Bell, writing of her adventures in Cairo in the Woman's Home Companion. "So when the Sacred Carpet started from the citadel on its journey to Mecca there was a magnificent military display. It is an odd thing to call it a carpet, for it not only is not a carpet in itself, but it is not the shape of a carpet, it is not used for a carpet, and does not look like a carpet.

"We were among the fortunate ones who were invited to the private view of it the night before, when the faithful were dedicating it. They sat on the floor, these Mohammedans, rocking themselves back and forth and chanting the Koran.

"The 'carpet' is a black velvet embroidered solidly in silver and gold. It is shaped like an old-fashioned Methodist church, only there are minarets at the four corners. It looks like a pall. Every year they send a new one to Mecca, and then the old one is cut into tiny bits and distributed among the faithful, who wear it next their hearts. This carpet was about six feet long, and was railed in so that no one could touch it. A man stood by and sprayed attar of roses on you as you passed, but I do not know what he did it for, unless it was to turn sensitive women faint with the heavy perfume.

"But the next morning the procession formed, and amid the wildest enthusiasm, the bowing and salaaming of the men and the shouting and running of the children, and the singing of the Arabs who bore the carpet, it was placed upon the most magnificent camel I ever saw, which was covered from head to foot with cloth of gold, and whose very gait seemed more majestic because of his sacred burden, and thus, led by scores of enthusiastic Arabs, he moved slowly down the street following the covering for the tomb, and in turn being followed by one scarcely less magnificent destined to cover the sacred carpet in its camel journey to Mecca. That was absolutely all there was to it, yet the Khedive was there with a fine military escort, and all Cairo turned out at the unearthly hour of 8 o'clock in the morning to see it."

The Potters' War Against Lead.

For more than a hundred years manufacturers of pottery have been trying to find a substitute for lead in making glaze. The use of lead for this purpose dates back to the ancient Assyrians and Egyptians. The objection to it is that, unless strict precautions are taken, it poisons the workmen, causing paralysis, blindness, and even death; but despite the efforts of modern science, stimulated by the offers of premiums and medals, no satisfactory leadless glaze has yet been found. Recent advances, however, have led to the expression of the opinion before the Society of Arts in London that success is at last within sight.

An Author of Familiar Sayings.

George Herbert is the author or compiler of many shrewd sayings, such as:

"Wouldst thou have thy cake, and eat it, too?"

"The wearer knows where the shoe pinches."

"Little pitchers have wide ears."

"It is a poor sport that is not worth the candle."

"God's mills grind slow but sure."

"Half the world knows not how the other half lives."

"His bark is worse than his bite."

"The mill cannot grind with the water that is past."

"Whose house is glass must not throw stones at another."—Woman's Home Companion.

Out of Date.

"What's that?" asked the rich man, who was buying a few paintings.

"That's Pegasus," replied the dealer. "Pegasus, you know, was a winged horse."

"Send it back to the artist and tell him to put the wings on an automobile and I'll buy it," said the rich man.—Chicago Evening Post.

Figures of Presidential Election of 1896, and Congressional Election Following, with Reference to Next Year's Campaign.

(New York Herald.)

Map Showing Election Results of 1896, Republican States Shaded.

Republican Vote, 7,104,779; Representing 271 Electoral Votes.
Democratic Vote, 6,502,925; Representing 176 Electoral Votes.

Map Showing Election Results of 1898, Republican States Shaded.

Republican Vote, 5,499,064; Representing 272 Electoral Votes.
Democratic Vote, 5,427,224; Representing 175 Electoral Votes.

THE active work of the presidential campaign of 1900 began recently in Chicago, where the Democratic national committee met and indorsed the Chicago platform of 1896 and Mr. Bryan, who was present. Mr. Bryan at present has control of the machinery of the party, and there seems little doubt of his renomination. Some of the leading gold Democrats of 1896 are announcing their opposition to the platform and candidate once more, but the exact amount of opposition within the party cannot be determined for some time.

Mr. Bryan's friends lay claim to success on the following grounds:

1. Most gold Democrats will vote for Bryan either because they do not like the treatment they have received from Republicans or because they are opposed to imperialism.

2. Many former Republicans will vote for Bryan because they are opposed to trusts and imperialism and because they think free silver would help the situation.

3. A reaction against an administration always sets in, and in normal times it is virtually impossible to re-elect any President.

4. Bryan is better known than in 1896, fear of a panic no longer exists and this country is able to establish free silver on its own account and maintain it.

The Republican view is quite different. They prophesy McKinley's re-election on the following grounds:

1. McKinley's successful administration of civil and military affairs.

2. The prosperity that has come from the Dingley tariff and the gold standard.

3. Gold Democrats will not support Bryan and the Democratic party cannot be made to unite on any one.

The study of election figures of 1897 and 1898 is interesting at this time. No one will claim that they necessarily foretell the result in 1900, but they do give a pretty correct idea of what the Democrats must overcome in order to win. The two diagrams given herewith show the results of the elections in 1896 and 1898, the Republican States being shaded. It will be noted that McKinley carried a compact body of States covering the northeast section of the country and Oregon and California in addition. These States represented a total of 271 electoral votes, Bryan capturing one in California and one in Kentucky. The vote for the two leading candidates was:

McKinley	7,104,779
Bryan	6,502,925

being the largest vote ever cast in a presidential election. These totals vary slightly from some other estimates, as some persons count the votes of the highest electors and some the lowest, while others give the average. McKinley's total plurality was little more than his pluralities in New York and Pennsylvania combined.

There were few State elections in 1897, and in none of them were the changes important except that New York and Kentucky went Democratic.

In 1898 there were State elections in all but a few of the States and in all the congressional districts. The diagram above shows which States were carried by each party, those by Republicans being shaded. It will be noted that the Democrats gained over 1896 only two States—Kentucky and Minnesota—and the latter only on the governorship, where fusion elected a popular Scandinavian by 20,000 plurality, though the Republicans carried every congressional district by pluralities aggregating over 32,000.

On the other hand, the Republicans gained Washington, Wyoming, Kansas and South Dakota, which have twenty-one electoral votes, the same as Kentucky and Minnesota. The total vote in 1898 in the various States foots up as follows: Republican, 5,499,065; Democratic, 5,427,224.

The vote in the electoral college represented by these States are: Republican, 272; Democratic, 175, or within one vote of the result in 1896, the difference being accounted for by the Bryan vote in California.

What Mr. Bryan must have to win is forty-nine more electoral votes than his party carried last fall. In all probability he must have fifty-eight votes, for Minnesota can scarcely be imagined as a sure Democratic State. As to where these votes would come from in case of Mr. Bryan's election, those interested in the subject may figure out for themselves with the aid of the above maps and the following table, which gives the electoral vote of each State:

Alabama	11	Nebraska	8
Arkansas	8	Nevada	3
California	9	New Hampshire	4
Colorado	4	New Jersey	10
Connecticut	6	New York	36
Delaware	3	North Carolina	11
Florida	4	North Dakota	3
Georgia	13	Ohio	23

AUTOCARS FOR THE MAILS.

Postoffice Department Experiments with Them in Buffalo.

For some time past the Chicago postal authorities have been experimenting with autocars for use in the postal service. Heretofore collection wagons have been hauled by weary horses. In the big down-town district where collections are of hourly happening men on foot do the work. But in the outer districts the contract wagon with its despondent nag is the real thing. But the Government has had its attention called to the fact that it is possible to collect the mails by means of horseless carriages. Experiments so far seem to demonstrate the practicability of the idea. In Buffalo N. Y., the use of such cars has been successful, but it should be borne in mind that Buffalo is a city of asphalt streets and lack of grades. Chicago postal authorities do not believe that they will prove successful in the outlying districts of Chicago, although swifter service is a thing much to be desired.

So long as the project is wholly in the experimental stage no special type of mail car to be operated automatically can be fixed upon as the style of greatest utility. But in the cases where cars have been used a general type has been used. Capacity for the storage of bundles of letters is a prerequisite. The express wagons used have great storage capacity. They are electric cars with storage batteries as motors. In the mail cars the same general plan has so far been carried out.

The wagons are much like those now in use. They have a covered seat, where the operator can sit and manage the machine. They lie low on sturdy trucks of iron, but light in construction. They have the covered body with a door in the rear, which can be locked after the collector has deposited the contents of a mail box. They have thirty-inch wheels with pneumatic tires and are otherwise the same wagons now in use where a bedraggled and melancholy horse is the drawing power.

The principal change to be noted in these wagons is that the rear trucks carry nearly all of the carrying capacity. The gearing will be rigged much like a four-wheeled hose reel of light steel, with a space back of the forward trucks for the placing of the battery or whatever kind of motor is to be used. The vehicle back of this will hang low as the ordinary mail wagon does, thus providing a receptacle for the collections. The machine can be operated by one man, as is the case at present. He will sit in the box seat in front, where the motor and steering gear will come close to the hand. When the vehicle is stopped for any purpose he can dismount and take on or discharge his collections as readily if not more so than he does now while his nag is browsing on the grass plats near the curb.

Strength and lightness are the two essentials in the construction. Recent experiments seem to demonstrate that the automobile can be used on country roads with as much success as the bicycle can.

THE OLD MAIL WAGONS AND THE NEW.

The Fear of Fear.

Some one says the only thing to fear is fear, and that's about right. That doesn't mean that one is to go about in a state of cheerful idiocy, caressing every buzz saw he comes across in the absurd idea that nothing can do him harm. That would be invoking the fool-killer, who does sometimes catch up with such people. It means the practical application of the idea that there are two things one need not worry about—what he can help and what he cannot help. If a thing can be helped, it's help and not worry that it needs, and if it cannot be helped, it is high time that the "incident be closed," as the diplomats say.—Chicago Drovers' Journal.

No Mustaches in Alaska.

Men exposed to the rigors of the Alaska winter never wear mustaches. They wear full beards to protect the throat and face, but keep the upper lips clean shaven. The moisture from the breath congeals so quickly that a mustache becomes embedded in a solid cake of ice and the face is frozen in a short time.

NATURE'S WAR PAINT.

Dark Backs and Light Breasts Make Birds Almost Invisible.

Passing through the Natural History Museum a day or two ago, my eye was arrested by a case which apparently contained a gray, duck-like bird facing its own ghost. The "no passage" barrier precluded closer inspection, and for five minutes I stood staring at the case, unable to make out what that wraith-like, almost invisible bird-form might be.

I had given it up, when the descriptive tablet, which had been pushed aside, came to my assistance. The exhibit is designed by a clever American naturalist to show why Nature has colored most wild beasts and birds dark above and light below.

The visible bird was a model clad in flannel of dingy gray, and against a background of similar hue it showed up distinctly, thanks to the light on its back and its own shade.

Its ghost-like companion, clad in the same way, owed its invisibility to the application of a little dark paint on its back and a little white paint underneath after the fashion affected by scores of birds.

It seems incredible that such painting could make the difference, but so it is.

AN EXILED MONUMENT.

Germany Would Not Permit Its Erection—New York Dedicates It.

In Bronx borough, New York, has been unveiled a monument with a unique and romantic history. It is a sculptured exile driven from Germany because of the bitter feeling that still exists against the man whom it commemorates.

The monument is a fountain, representing the Lorelei, famous in German song and legend, and commemorating Heine, the poet, whose verses of German legend—and particularly of the Lorelei—are familiar in every German household, but whose advocacy of liberty made him detestable to German royalty. Heine has been dead years, but his memory is as much an object of hatred in governmental circles as he was himself.

The monument was designed by Prof. Herter, one of Germany's foremost artists. Surmounting the whole is a female figure of the Lorelei—the legendary siren who dwelt in a cave on the River Rhine and lured men to destruction in the whirlpool. The work was admired by all Germans, but when its erection was attempted at Frankfort the authorities forbade the work to go on. Then it was taken to Dusseldorf, Hamburg and other cities, with similar results. Finally a number of wealthy New Yorkers agreed to buy it and put it up in New York. Here again there was an objection. It was said that Heine was not an American and had nothing to do with this country. After a long struggle the objection was overcome and now the memorial is in place in the northern end of the city. The sculptured merman and mermaids at the fountain's base will lead to a better knowledge of the delightful legends of the Rhine.

THE HEINE FOUNTAIN.

BEFORE THE ALMIGHTY.

Boers Solemnly Swore to Defend Their Beloved Country.

The accompanying illustrations refer to the Boer meeting recently held at Paardekraal, South Africa, the scene of the declaration of independence in 1880. About 5,000 Boers were present and were addressed by Gen. Joubert and other speakers. The tone of the meeting was that not another hair would be conceded, and Gen. Joubert called on all present to remember the solemn oath taken by them in 1880, when each Boer, holding a stone in his hand, took an oath before the Almighty that they would shed their last drop of blood, if needs be, for their beloved country. These stones were then cast into one great heap, over which the historic monument of Paardekraal was raised.

BOERS DISCUSSING THE SITUATION BESIDE THE HISTORICAL HEAP OF STONES.

INYO INDEPENDENT.

FRY. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, OCTOBER 20 1899

The summer has broken; the soil is moistened and will soon be turned. Ahead is the prospect of a rainy season of unusual length and fall. The rain on the plains and foothills and the snow in the mountains will be abundant, and many will forget the time of lack and the fallow fields and withered orchards that it caused. There are many, however, who, remembering the drought and remembering the certainty that such years will come again, will persist in measures that will avert their consequences and make every year fruitful. To these men the promise of abundant rain in the coming season is a promise of drought averted in the future if the great fall of flood water could be stored for use when needed. In the rains expected between now and next May there will be waste. The waste waters, vagrant and merciless, will wander at will and destroy as they go. They will wash away the soil and carry it into the rivers, filling their channels to the destruction of navigation, and will inflict injury upon production and transportation, the two first in the State's trinity of wealth-producing factors.

If the State were prepared now to hold the flood waters in the foot hills in reservoirs at such an altitude that the loose soil is not carried with them and from which their distribution may reach every part of the valleys below, the rain now hailed with enthusiasm would have a more than double significance. Now, it is received gratefully for what land it makes fruitful, and with misgivings for what its floods may destroy. Then, it would be saluted as a blessing unalloyed by loss. It would mean permanent provision against drought; unimpaired and permanent navigability of our meandered rivers; a constant supply for mining every day in the year and every year; a quadruplication of our grain and fruit and forage producing area; and such an assurance of the permanence of the agriculture and horticulture as would add immensely to our population of that desirable class of small land-owners who are the true expression of the might and majesty of the State. With such a reservoir system, assuring the permanency of water and its use at a reasonable charge, a family can prosper here on the product of twenty or forty acres, an area within its own capacity to cultivate.

The convention called in this city for the 14th of next month may come here under umbrellas and in gum boots. It may meet in the rain, and the windows of heaven may be opened throughout its session, but nevertheless it must meet, and the ranchers, miners, lumbermen, bankers, shippers and business men of this State must so realize its importance as to make it impressive. The rain that falls while it deliberates means a fat year to come, but still, ahead, famine-stricken dry and fruitless, lurks and waits a lean year to devour its substance. That convention can make California entirely safe from loss by drought or flood. The engineering problem is simple, the construction cheaper than anywhere else in the world, the line of distribution shorter. The water that has been released from one of these reservoirs under a head and pressure that make electric power to run many mines, passes from the turbine or Pelton wheel it has actuated to make grain, grass and fruit grow within a few miles of the spot where it generated power to mill and dig gold. Why not harness all this wasted power and fertility so that such a rainy season as is coming will represent all gain and no loss? —*S. F. Call*

For several years past the political troubles between England and the Transvaal have been growing more and more difficult of solution. Within the past few months these difficulties have multiplied and have taken more definite shape. Recently rumors of war have been frequently circulated, but through it all there was a faint hope that some means of a peaceful settlement of these difficulties might be found, but the latest war dispatches indicate that war has actually commenced. The general impression appears to be that England will overwhelm the Dutch Republic, though at a heavy sacrifice of life and money. An American mining engineer, recently discussing these troubles, said: "Morally, the Boers are in the right, but the existing situation isn't business." This appears to be the actuating sentiment on the part of Great Britain, and it is not improbable that as an outcome of the trouble Cecil Rhodes' idea—"from the Cape to Cairo"—may materialize.

Admiral Dewey appears to have valued more the spontaneous outburst of welcome he received at Boston than all the grand parades and ceremonies that were prepared for him in New York. In the course of his speech at Boston he said: "The ovation which was given me last night I believe has never been equaled in the life time of any of us. At any event I never saw the equal of it."

A large number of oil companies are being incorporated in California, the greater number being on a purely speculative basis. The outcome will result in the average number of successes and a large percentage of failures. Prospecting for oil is not more certain in its results than mining for metals, and until oil lines have been established by geological investigation, some of these new ventures are "wild-cats."

A New York newspaper prints a table of figures showing that the amount of money expended on the reception of Admiral Dewey at New York was, approximately, $20,000,000.

FARM AND GARDEN

A HOMEMADE SUBSOILER.

An Implement to Follow the Breaking Plow in Clay Subsoil.

A Rural New Yorker correspondent sends to that journal a plan for making an excellent little single horse subsoiler that works to perfection and need not cost more than $2.50. He worked the implement out thus in his home shop:

I first made a model, this being cut from thin wood, and, as good fortune favored me, I secured just the right shape the first trial. The beam and standard are formed of one bar of wrought iron 6 feet long and five-eighths by 2¼ inches in size, which is strong

HOMEMADE SUBSOIL PLOW.

enough for a draft horse. The share, or point, is of a peculiar shape, and is made of a new, large, steel "bull tongue" cultivator "shovel" three inches wide. The "bull tongue" is cut as shown in the figure, leaving a long, piercing, wedgelike point. The three-fourth inch incisions at a a, allow the upper half of the blade to be bent or rolled backward, forming a long, deep groove that clamps very securely around the standard of the plow, where it is firmly bolted. The long, tapering point, when the wheel is adjusted for subsoiling to the desired depth, lies perfectly flat in its course through the soil—the curvature of the upper half of the blade being quite sufficient to lift, "ground mole fashion," the entire bottom of the furrow, while the passage of the standard, through the midst of this upheaval, breaks and pulverizes the hitherto hard, compact subsoil in a very thorough and satisfactory manner. The handles are those of an ordinary cultivator, and the wheel, seven inches in diameter, was purchased from a scrap iron man for 15 cents. There being some quite heavy forging upon the beam in bending it to the desired shape and in cutting the share down to the proper form, it will be necessary to call upon the blacksmith for that part of the operation.

To those unfamiliar with the practice of subsoiling it may be well to say that this implement is planned to follow the breaking plow, tearing up and mellowing the bottom of the furrow to the depth of about eight inches. Thus it will be plain that, if the breaking plow be turning to the depth of eight inches, the subsoiler stirs up another eight inches deeper, leaving the plant or seed bed pulverized to the depth of 16 inches.

A Potato of Good Yield and Quality.

The Joseph potato has received favorable mention from some of the New England potato growers. American Cultivator illustrates it from an ex-

THE JOSEPH POTATO.

cellent photograph of the potato as raised by a Vermont farmer and says:

It is well to notice the size, shape and general appearance of the potato. The color of the skin is a light pink, and the flesh is white. The tuber is invariably free from core. It never has shown an inclination to grow hubbly or unshapely. It yields well, is of wonderful vigor and is of excellent quality for a table potato.

Protection Against Grasshoppers.

Apropos of recently reported damage from locusts or grasshoppers in various sections of the country Professor Lawrence Bruner of Nebraska suggests, first of all, that native birds be protected, since nearly all of them are especially fond of locusts as a diet during the summer months. He says: "When our prairie chickens and other grouse were still numerous, no harm whatever was reported as coming from 'native grasshoppers.' Quails, plovers, blackbirds, sparrows, hawks and even ducks are known to feed largely upon these insects. A single bird of any of these species will destroy thousands of them. Where the birds are destroyed the extra thousands of locusts soon increase beyond the normal and injury results. Year after year the gap is made wider and the possibility for harm increases. Even frogs, lizards, snakes and other animals that come under our ban destroy many of these destructive locusts, and every time we thoughtlessly kill one of them we make it possible for their natural food to do us harm."

What He Does When Melons Crack.

I used to have much trouble with melons cracking, especially when the weather was hot and we had an occasional warm shower, until I adopted the plan of taking a sharp knife (nurseryman's budding knife is best), and when muskmelons began to show signs of cracking I would cut the stems over one-half into, and I found this would practically stop it. Caution should be used to cut until the melons begin to ripen, says a correspondent of American Gardening

Losing Fertility of Land.

Where the farmer is not engaged in grass farming and allows his land to lie with nothing growing upon it, he is losing fertility during any kind of rainy weather. Fortunately, the rain starts the weeds, and even the weeds in this sense serve a good purpose. Farmers who are growing small grain and have not sown grass seed can very easily arrest this waste by simply disking or cultivating their fields so as to sprout the shatterings or start the weeds, and this should be done as soon as possible after harvest is over. Apart from saving fertility, there is great advantage in adopting this method. In a dry time they can conserve moisture by giving enough cultivation to form the mulch of dry dust. They start the weeds to growing, which a later plowing will kill, and thus clean their land. Where stubble land is intended for corn the next year, it would be an excellent practice to disk or cultivate the stubble fields when it is practicable, thus starting the weeds, which can be turned under later, and leave the soil in fine condition for corn the next year. This is a point that is not frequently brought to the farmers' attention, and Wallace's Farmer does it as here reproduced.

LEGAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - Plaintiff,
vs.
Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. F. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

(SEAL)

F. H. MACK, Independence, Cal. Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estat , subject to confirmation by said Court, will sell at private sale to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be received at the law office of F. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. G. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased
F. H MACK, Attorney for Administrator.
Dated August 23d, 1899.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Ben. H. Yandell, Attorney for Plaintiff

The people of the State of California send greeting to Susie Troeger, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 8th day of September, A. D. 1899.

D. J. HESSION, Clerk.

[SEAL]

Ben. H. Yandell, Independence, Cal. attorney for plaintiff.

Respectfully submitted,
I. J. WOODIN,
Ex Public Administrator.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

I. J. Woodin, being first duly sworn according to law, deposes and says: That he is the ex-Public Administrator of Inyo County, State of California. That while acting as Public Administrator letters of administration were issued to him in the matter of said estates; and that said letters have not been revoked. That he has read the fore going return and account, and that the matters therein contained are true in substance and in fact.

I. J. WOODIN.

Subscribed and sworn to before me this 19th day of July, 1899.
(SEAL.) D. J. HESSION, Clerk.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

THURSDAY, Oct. 20, 1899.

Frank Winkler admitted to citizenship

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:30 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 11 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

BORN.

HUCKABY—At Bishop, October 7, 1899, to Mr. and Mrs. Geo. W. Huckaby, twin boys.

MARRIED.

ELLIS—McCOSH—At Bishop, October 12, 1899, by Rev. J. M. Wilson, John W. Ellis and Miss Ola M. McCosh.

BOLAND—MEYSAN—At Lone Pine, October 15, 1899, by A. C. Harvey, J. P., Thomas C. Boland and Miss Blanche F. Meysan.

Sheriff Givens went south on Monday's train.

Allie McDonald came down from Big Pine yesterday.

P. H. Mack Esq. is expected back from Darwin to-morrow.

Dr. Middleton and E. H. Ober were down from Big Pine yesterday.

Jerry Mairs has a contract to supply the Court House with fire wood.

Charley Rose has gone to Monache to help his brothers bring their cattle out.

John Strohmeyer got in from Mojave yesterday. He reports heavy rains on the desert.

P. W. Forbes spent several days at Bishop this week. He returned home Wednesday.

Joe Danielson came down from Big Pine Monday and returned Tuesday with Will Sanger.

Arthur Robinson has gone to Los Angeles, where he hopes the change of climate will benefit his health.

Billy Mitchell left here for Long Valley on Saturday. He sold one hundred head of beef cattle to Charley Summers last week.

J. J. Gunn returned last Monday from an extended visit to San Francisco. Mrs. Gunn and her little daughter are still in the city.

Mrs. Ottie Nelson, sister of Mrs. M. H. Church of Citrus, returned to Los Angeles Wednesday after an extended visit in Inyo.

Carl Walter has gone to Los Angeles and will return in a few days with a bride. Carl is one of our best boys, and we congratulate him heartily.

Duck hunting is the favorite pastime with the sporting element now. The boys went out on the sloughs yesterday and brought home a wagon load of Mallards.

Tom Webb was down from Long Valley early in the week. He and Whitmore have rented the Rawson place at Tinnemaha and will feed their beef there.

John S. Gorman returned from San Francisco last Monday, after a three weeks absence during which he attended the annual convocation of the Masonic Grand Lodge.

So far there have been two races sailed for the America Cup and the American yacht, the Columbia, has won them both and it now seems certain that Yankee ingenuity and skill will retain the trophy for which the world has struggled for half a century. There was no race yesterday and no news has been received today.

From Panamint.

A correspondent from Randsburg to the *L. A. Mining Review* states the following:

"The activity prevailing in the Panamint country is best evidenced by the number of loaded teams that leave Johannesburg for that section. During the past two weeks not less than twenty eight-mule or ten- mule or horse teams have pulled out loaded to the guards with machinery and supplies for Harrison & Godsmark, T. N. Stebbins, Weaver & Porter and others. At the camp of the former company ten additional stamps are being added to the mill, and the cyanide plant is being increased to 100 tons capacity. Besides the above many minor properties are starting up, and a number of them promise to become steady though small producers.

The California Borax company at their works forty miles from Johannesburg are preparing to put in a reduction plant of about twenty tons capacity with which to handle the ores of some of their gold claims, of which they own several.

Col. W. R. Woodard and E. A. Stagg, general manager and passsenger agent respectively, of the Randsburg railway are now in the Panamint country. While, of course, no one really knows what took them there, it is generally believed that an extension of the Randsburg road has something to do with it.

Recently, there have been rumors and some talk relative to the formation of a desert county, to be portioned from Kern, San Bernardino, Inyo and Los Angeles counties, and it is now more than probable that a bill will be framed and presented to the next legislature asking for its creation. The new county will take in the Panamint, Argus and Slate ranges, Randsburg, Barstow, Vanderbilt, Needles, and all camps and districts lying contiguous to them. Barstow will likely be selected as the county seat, because of its advantages as a central distributing point. The Santa Fe company is said to favor the propositson and will lend its support in pushing the matter through the legislature. It is said that the railroad company will establish extensive machine shops at the same point within the next ten months."

The Saline Road.

A party consisting of Geo. Montgomery, O. I. Mairs, S. H. Spratt, W. T. Bunney and Thos. Key left here last Tuesday for the purpose of looking over the route for the proposed road to Saline Valley by way of Mazourka Canyon. It was their intention to make a thorough investigation and a practical estimate of the cost. The benefit to Independence of the building of such a road would be inconceivable. It will be the shortest wagon route to the copper mines as well as to the salt and borax fields. A large force of men is now employed in the copper mines, and as soon as proper facilities are secured for housing and taking care of them, more will be added. These consume a large amount of supplies, all of which would come from here. It will be a year at least before any railroad will enter Saline, and the wagon road will be amply paid for before that time. The farmers of this vicinity will be more benefited by building this road than any one else, and the only way to make it a success is by all doing something. If you can't give money, there are others who can. Put on a team and a man; furnish your share in labor. It will be one of the best investments you ever made.

Grand Opening.

On Saturday night young and old turned out to view the display of goods in the Inyo Merchantile Company's new store. The business is under the able management of Bertrand Rhine, and this gentleman, assisted by his worthy wife, received the visitors and treated them royally. A corps of our fairest young ladies in dainty white caps and aprons, served coffee and cream and cake, and those who preferred a stronger beverage sampled the well stocked sideboard. A line of choice confectionary brought joy to the hearts of the little folks, and a free dance at Mairs' Hall wound the evening up in lively style for all hands—and feet.

Our Congressman, Marion Devries, is likely to pay us an informal visit in the near future. By pesronal inspection and inquiry he is endeavoring to ascertain the needs of his district.

John Shepherd has got back from a trip to the Coso Springs and says he was greatly benefited by the visit. Lack of facilities for reaching them alone prevents these springs from being noted the world over.

Miss Elsie Eibeshutz started for San Francisco Tuesday, where she will join her mother, Mrs. A. W. Eibeshutz. The young lady will not return until next summer, and her absence will be sincerely regretted by her many friends here.

A disastrous fire nearly wiped out Mojave last week. The fire started in the freighthouse of the railroad and more than two-thirds of the town and nearly oll the business part was destroyed. W. C. Wilson was one of the heaviest losers. The post-office and contents were also destroyed.

During the recent storm but little snow fell in Long Valley and that soon disappeared. The snowfall in the surrounding mountains, however, was very heavy. About two feet fell at Mammoth. The cattle at Long Valley are in splendid condition and will be held there about two weeks longer.

Superintendent Hoskins of the Reward mine was in town yesterday. A pinion which was broken a few days ago necessitated a shut down. Mr. Hoskins has determined to dispense with the present mode of gearing and put in a system of belts. A new set of shoes, dies, cams etc., will be put in and the mill entirely refitted. This will require about thirty days, and but little mining will be done in the interval.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING SEPTEMBER 30TH, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending September 30th, 1899.

Respectfully submitted,
W. T. BUNNEY, County Treasurer.

NEW ADVERTISEMENTS.

Notice of Sale of Mining Property.

PUBLIC NOTICE IS HEREBY GIVEN THAT the undersigned, administrator of the estate of John F. Ginser, deceased, under the order of the Superior Court of Los Angeles county, will sell at public auction, in front of the postoffice at Ballarat, in the County of Inyo, State of California, on Monday, the 20th day of November, 1899, all the right, title and interest which said John F. Ginser had at the time of his death, and all the interest which his said estate has subsequently acquired, in and to the following described mining property, situate in said Inyo County, to wit: An undivided one-fourth interest in the "AURORA" and "TUBER" mines in the South Park Mining District, (in accordance with location notices duly recorded) together with mill-site located in connection therewith.

Terms of sale Cash, gold coin of the United States: 20 per cent. of the burchase price payable at the time of sale, and the balance upon confirmation of sale by the Superior Court of Los Angeles County.

Dated, October 14, 1899.
FRANK M. KELSEY.
Administrator of the Estate of John F. Ginser, deceased.
FLINT & BARKER, Attorneys for Administrator.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist., Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 28th day of September, 1899 an assessment, No. 33, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.
CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 31, 10th Floor, San Francisco, California.

NOTICE TO CREDITORS.

Estate of Carmen G. C. Carrasco, deceased.

Notice is hereby given by the undersigned, Executor of the estate of Carmen G. C. Carrasco deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said executor at the law office of P. H. Mack, in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

BELLES S. CARRASCO.
Executor of the estate of Carmen G. C. Carrasco, deceased.

Dated at Independence, California, September 22nd, 1899.

P. H. MACK, attorney for Executor.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schen, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roote, W. C. Fitz-Simmons and William H. Patterson, Defendants:

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, [Seal] State of California, this 12th day of August, A. D. 1899.
D. J. HESSION, Clerk.

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als, Plaintiffs, vs. Gilbert J. Roote et als. Defendants. Summons. P. W. FORBES and P. H. MACK, Independence, California, Attorneys for Plaintiffs.

SAVES LIFE IN WATER

RESCUE OF DROWNING PEOPLE BY AN EXPERT.

Methods of His Own—Directions of Great Value in the Bathing Season—Easy to Rescue the Drowning, Provided You Have Self-Control.

"It's an easy matter to save a person from drowning, if you have confidence in yourself and can swim a bit."

This is the assertion of Richard Connell, keeper of the bathing beach at the foot of Wellington avenue, Chicago, who is attaining wide fame as a life-saver, says the Inter-Ocean. Connell has been in control of the Wellington avenue beach for four seasons, and during that time has rescued many people from drowning. It is his modest claim that not a single life has been lost there in these four years, although the beach has been patronized by hundreds of thousands of people, many of whom were poor swimmers and took desperate chances in getting out beyond their depth, in spots where the undertow is dangerously strong.

"I've been called upon many a time to pull drowning people out of the water," said Connell, "and, fortunately, I succeeded every time in getting them safely to land. You see, there's lots of folks who come here that won't listen to reason. They can swim a little and think they know all about it. The undertow on Lake Michigan is pretty strong at times, and bathers must have their wits about them to escape from its clutches.

"The process of rescuing drowning people is pretty much the same in all instances, and it's something worth remembering if you're going into the life-saving business. But let me give you a little advice—don't do it unless you have complete control of yourself and can avoid getting rattled, no matter how serious the situation may seem. The game isn't worth the effort. Why, do you know that chap I fished out Sunday morning never said 'Thank you!' When I got near him I tried to slip my left hand under his right shoulder, with just force enough to support him while I pushed him ahead of me toward the shore. The great danger is in getting too close to a drowning person, as they will invariably clinch with you in their fright, and whenever they do this it's a pretty sure case of two people being drowned instead of one. I thought I could keep this fellow away from me, but, as I say, he was a big, strong chap, and he fooled me. The first thing I knew he had me tight, and the only way I could break his hold was to rap him smartly. Sometimes you can shove a person's head under water and thus make him let go, but in this case I was too tightly held, and had to resort to more violent means. Having broken his hold, I had no further trouble, as all I had to do was to keep him up by the support of one hand under his shoulder, and shove him ahead of me until we got into shallow water.

"This method can be followed in almost every emergency that is likely to arise, with variations to suit the particular conditions of each case. If your arms are free you can escape from the grip of a drowning person by grasping his nose until he chokes and his attention is in this manner diverted from clutching your body. Or you may sometimes force him off by pressing one of your knees sharply on his stomach. In fact, there are a dozen different ways in which to free yourself, but the main points of rescue are as first stated. I was amused the other day in reading in a magazine some directions that presuppose the assistance, to a small degree, of the person you are trying to rescue—or at least his intelligent submission to your efforts. This sort of thing is all rot, because a man who thinks he is drowning has no sense; he is for the time being a raving maniac. He is so paralyzed by fear that he is incapable of assisting in his rescue, and is a menace instead of a help to the rescuer."

HOW TO RESCUE A DROWNING PERSON.

Yet he dodged them all with the utmost self-possession, depending on the quickness of his eye and his agility.

Mr. Chauncey once saw a little native throw a cricket ball 119 yards—beating the English professional record by thirteen yards. He saw another native make a somersault over eleven horses, whereas the ordinary circus man, who bounds from a springboard, turns a somersault over only eight horses.

He also saw the same native leap from the ground, go over a man on horseback, and dip his head, while going over, into a hat placed in an inverted position on the top of the man's head. The native landed on the other side of the horse with the hat fairly on his head.

"The prodigious height of the leap," says Mr. Chauncey, "and the precision with which it was taken so as to enable him to dip his head into the hat, exceeded any feat of the kind I ever beheld." We should think so!

Never Forgot It.

"You must have met a great many queer people in your time," said a friend to an old "elevator man" who, for nearly a quarter of a century, had taken passengers up and down in one of the large buildings in a crowded city.

"Queer people?" replied the old man reflectively. "No. People are all alike—all except one."

His somber face lighted up a little, and he went on:

"I've met just one person in all these years who wasn't like the rest. She was a curly-haired little girl from the country. She had never been in an elevator before. I took her up to the sixth floor, and as I opened the door to let her out she looked at me with the sweetest smile in the world—and thanked me. Only human being I ever met that didn't seem to think an elevator man was a mere machine. I think she must have died years ago. She was too good for this world."

And the old man was silent for a long time.

He Will Do.

A certain wealthy man has set his nephew up in business three times, but the young man lacks something essential to success in the mercantile line and failed with each effort. When he came with the fourth request for financial backing the uncle demurred.

"You must learn to lean on yourself," he said. "I can't carry you all your life. It would be an unkindness in me to keep supplying you with money to carry on enterprises that invariably end in assignment. I'll tell you what I'll do. You owe a good deal as the result of that last failure. Pitch in on your own hook and go it alone till you pay those debts off. When you've done that I'll give you a check for all they amount to. Such an experience would do you more good than all the money I could give you now."

Three months later the nephew walked in with every claim receipted in full and the uncle was delighted as he gave the promised check.

"That's something like it now, and I warrant you feel all the better for the hard training. How did you manage, Tom?"

"Borrowed the money, uncle."

Now the old gentleman is telling about that there is the making of a great financier in his nephew.

A Lucky Younger Son.

The case of a younger son is usually pitied in England, but there was a notable exception in the case of the family of the late Earl of Mansfield, who died worth some $5,700,000. Viscount Stormont, the father of the Earl of Mansfield, the great judge, was one of the poorest lords in Scotland, and "as poor as a Scottish lord" has long been a by-word in England. This younger son, William Murray, born in 1705, one of a family of twelve penniless children, rode off to London on his pony, to attend Westminster school, and never, it is said, saw his native land again, but he left an earldom and a vast fortune to his eldest brother's heir. The Earl who recently died was the fifth of the title, and the sixth Earl is his brother.

A New Gas.

A new Italian gas, said to be 50 per cent. cheaper than acetylene, is composed of ninety parts of quicklime and five each of colophony and calcium carbide, and no heating of water or special burner is needed.

ATONED FOR HIS FATHER'S SIN.

Brave California Boy Who Died Trying to Condone a Crime.

When, five years ago, William Jackson, of Reading, Cal., was sent to prison for embezzling $50,000, his son, then a boy in college, vowed never to rest until he should pay the criminal debt. Last April he paid it—not in money, but with his life. All over California they are talking of the honor and bravery of the boy who gave his life to his country to wipe out the stain of his father's crime.

The elder Jackson was treasurer of Shasta County. He was known as "Honest Bill Jackson." The public confidence in him was so great that citizens all over the county gave him their private money for safekeeping. One day $5,000 of the public money was stolen from him. To cover up his own carelessness he resorted to gambling to make the loss good. From this time "Honest Bill's" descent was appallingly rapid. He became a gambler, a drunkard, and finally a thief. When his son was a sophomore in college he was convicted and sentenced.

The family felt the disgrace with painful keenness, most of all the boy, who bore his father's name. His further work in college was inspired by one idea—to prepare himself for repaying the stolen 50,000. When the war broke out an idea came to him. In the event of his own possible failure as a business man the $50,000 could not be paid. A surer way would be to enter the army. If he should die, he reasoned, the offering of his life would constitute an atonement. If he should live he would have proven that he was not a coward and would be better able to pay the debt that haunted him.

So he became Trooper Jackson, sailed away to Manila, and fell fatally injured at Malolos. Not, however, before he had proven himself a brave man. Those who knew him say the debt was more than paid.—New York World.

Wonderful Feats.

The aboriginal of Australia is an expert in dodging missiles. The quickness of his eye and the accuracy of his judgment are wonderful, and are supplemented by suppleness of limb and muscle. Mr. Chauncey, an officer of the Victorian government, once made a report of personal observations of the aboriginals, which Mark Twain quotes in his book, "Following the Equator."

Mr. Chauncey has seen an aboriginal stand for half an hour as a target for cricket balls thrown with great force at a distance of ten or fifteen yards by professional bowlers, and successfully dodge them, or parry them with his shield. The shield was no broader than a stovepipe, and about the length of a man's arm. One of the balls, properly placed, would have killed him.

BOY'S AMAZING FORTITUDE.

Picked Up His Severed Arm and Carried It Away.

"What do you think of this?" asked a small boy as he entered the office of the Mount Penn Stove works at Reading, Pa., the other afternoon. In his right hand he held his left arm, which had been cut off a few moments previous.

It was Robert Doyle, who had jumped on a freight train with two companions to go swimming, says the Philadelphia Press. When Doyle tried to jump off, he was caught under the wheels and his arm severed.

He waited till the train passed; then picked up his arm and walked to the stove works. He lost quantities of blood. He was taken to the Reading hospital. A brother lost his life on the railroad six years ago.

Would Invite Dreyfus.

Inasmuch as we are to have the greatest celebration the world has ever seen when Admiral Dewey arrives home, there is yet an opportunity for our people to make the Dewey welcome doubly interesting and demonstrate to the world that our interest in justice to man is not confined to our shores. If, as is estimated, the Dreyfus trial ends by Sept. 15, and Dreyfus is acquitted, would it not be an excellent idea for the committee in charge of the Dewey celebration to extend an invitation to Captain Dreyfus to participate in the festivities of the occasion and be the guest of the nation? says the Herkimer Telegram, the suggestion is based upon a big "if"—if the Rennes court martial does its duty, acquits.

Domestic Sarcasm.

He (at breakfast)—My dear, the paper says there was quite a fire in our block early this morning. It is supposed to have been the work of an incendiary.

She—Well, don't let a little thing like that worry you.

He—Why, what do you mean?

She—Nobody will ever accuse you of building it.—Chicago News.

Discovery of Life Plant

So full of vigor that if one of its leaves be pinned to a warm wall another plant will grow. It is these same principles which enable Hostetter's Stomach Bitters to arouse to life and duty the overworked stomach. The sufferer from dyspepsia or any stomach trouble needs it. A private Revenue Stamp covers the neck of the bottle.

A lawn mower may be a good thing in its way, but some men do not care to push it along.

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. I shall recommend Piso's Cure for Consumption far and wide.—Mrs. Mulligan, Plumstead, Kent, England, Nov. 8, 1895.

Misapprehension.

Guest—What have you got?

Waiter—I've got liver, calf's brains, pig's feet.

Guest—I don't want a description of your physical peculiarities. What you have got to eat is what I want to know.—London Tit-Bits.

The House-wife's Burden

Mrs. Ada M. Herr, of 439 N. Charlotte St., Lancaster, Pa., suffered terribly from female disorders. Her nerves became unstrung, she endured intense pain, the slightest labor wearied her and household duties became a burden. Frequent fainting and dizzy spells would come upon her and she would fall prostrate in a swoon. After trying several physicians without success Mrs. Herr began taking Dr. Williams' Pink Pills for Pale People. She says; "The pills brought immediate relief, and after taking six boxes I was cured. Dr. Williams' Pink Pills for Pale People had done what all previous treatment had failed to do." *From the Examiner, Lancaster, Pa.*

Our new book, **Plain Talks to Women,** sent in plain envelope, sealed, on request,

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box, 6 boxes $2.50.

PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION

Headache

Sick headaches! Always trace them to a lazy liver or a sick stomach. Poisonous matter, instead of being thrown out, is reabsorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, awful, throbbing, sickening pain. CASCARETS remove the cause by stimulating the liver, making the poison move on and out, and purifying the blood. The effect is almost instantaneous. Ladies, whose sensitive organisms are especially prone to sick headaches, do not suffer, but find relief in CASCARETS Candy Cathartic.

Look out for Imitations and Counterfeits!

funeral!"—Kansas City Independent.

"Both my wife and myself have been using CASCARETS, and they are the best medicine we have ever had in the house. Last week my wife was frantic with headache for two days; she tried some of your CASCARETS and they relieved the pain in her head almost immediately. We both recommend Cascarets. CHAS. STEDEFORD, Pittsburg Safe & Deposit Co., Pittsburg, Pa.

CASCARETS are absolutely harmless, a purely vegetable compound. No mercurial or other mineral pill-poison in Cascarets. Cascarets promptly, effectively and permanently cure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhœa and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Be sure you get the genuine! Beware of imitations and substitutes! Buy a box of CASCARETS to-day, and if not pleased in every respect, get your money back! Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK. 374

Hard on the Customers.

Guy Duval told the following story to the New York Tribune as an illustration of the irresponsibility of the average Frenchman:

"I was riding one afternoon in the Bois de Boulogne," he said, "when I noticed a tremendous disturbance just ahead of my carriage. Two thoroughly angry tourists were standing in the street rubbing their heads and swearing with an ease and force which convinced me at once that they were Americans. Two empty cabs, which had evidently been occupied by the tourists, were standing near by, and the drivers were hurling indistinguishable jargon at each other, to the delectation of a crowd of onlookers. My driver immediately stopped to join in the excitement. With some difficulty I persuaded him to proceed, and when we were out of sound of the uproar I asked him what the trouble was.

"'Why, monsieur,' he said, 'Jaspard ran into Pierre's cab and scraped some of the paint from the wheel. Pierre was naturally very angry and swore at Jaspard, whereupon Jaspard said, "If you don't shut up, I'll hit your customer on the head with my whip!" and Pierre retorted, "If you hit my customer, I'll hit your customer!" Then Jaspard struck Pierre's customer, and Pierre resented the insult by hitting Jaspard's customer.'"

He Wanted to Talk.

A solemn looking Irishman entered a business house the other day and, walking up to one of the men employed on the lower floor, asked:

"Is dhere anny chanst fer a mon t' get a job av wur'k here?"

"I don't know," answered the man addressed. "You'll have to see Mr. Hobart."

"An pfwere is he?" asked the Irishman.

"Up on the second floor," was the answer.

"Shall Oi walk up an talk t' him?" queried the seeker for employment.

"No need of that," replied the man. "Just whistle in that tube, and he'll speak to you," pointing at the same time to a speaking tube.

The old Irishman walked over to the tube and blew a mighty blast in it. Mr. Hobart heard the whistle, came to the tube and inquired:

"What's wanted down there?"

"Tis Oi, Paddy Flynn!" answered the Irishman. "Ar' ye th' boss?"

"I am," replied Mr. Hobart.

"Well, thin," yelled Flynn, "sthick yer head out av th' second sthory wind dy whoile Oi sthep out on th' solde walk! Oi want to talk t' ye!"—Cincinnati Enquirer.

A Libel on Gotham.

The nearest approach to a system ever yet made by a New York deputy assessor of personal taxes was invented by one who was somewhat of a card player.

He took a pack of cards, gave a value to each card and then drew a card from the pack for each name on his list. A deuce meant $2,000, a tray $3,000, a four $8,000 and so on up to the knave, which was valued at $20,000, the queen at $30,000, the king at $40,000 and the ace at $50,000. If anything less than a five spot was drawn, he erased the name from the list, as it is customary to assess only those who are supposed to possess $5,000 or more of personal estate.

The especially amusing thing about this man's work was that there were fewer objections made to his assessments than to those of any other deputy. He gained a reputation for hard work, and his salary was raised twice in one year.—Buffalo Express.

The Dean in His Nightshirt.

Hugh Pearson always spoke of Dean Stanley as the most absent minded man in the world. He was driving once with him into Palmero. He complained of feeling cold, and as Stanley had his traveling bag with him he advised him to put something extra on. He did so, and both resumed their papers. A loud laugh from some boys suddenly roused Pearson to the realization that Stanley was driving through the streets in his nightshirt, which he had put on over his coat in pure absence of mind.

In Berlin the pawnshop is a royal and philanthropic institution. Any profit that is made is spent on charity.

THE STAY AT HOME.

There's dress an hood to buy f'r Jane,
A pair o' pants f'r John,
A whole outfit f'r Buster Bill,
An winter's comin on.
But baby Nan, the stay at home,
Jis' laughs an never knows
That all on earth she has to wear
Is ole made over clothes.

There's books to to buy f'r them at school—
It makes a pore man sick
To hear 'em holler "joggaty"
An "mental rithmetic."
But, thank the Lord, we stay at home
Is mighty hard to please—
Jis' gits the family almanac
An reads it on her knees.

An writin books an drawin books—
They never seem to think
How much it costs to buy sich truck—
An pencils, pens an ink.
But little Nan, the stay at home,
She knows her daddy's pore—
Jis' gits a charcoal pen an writes
Her lesson on the floor.

There's boots to buy f'r Buster Bill,
An boots to buy f'r John,
An shoes f'r Jane an ma an I,
Till all my money's gone.
So Nan, the last, the stay at home,
Is left to do without—
Jis' wears her homemade moccasins
An crows an crawls about.

'Pears like that all I rake an scrape
Won't hardly satisfy
The pressin needs o' Bill an John
An Jane an ma an I.
But baby Nan, the stay at home,
Is full o' sweet content—
Jis' cuddles up in daddy's arms
An never wants a cent.

—George Weymouth in Century.

Dogs Growing Weaker.

Experts agree that the life of a dog is shortened by close breeding and exhibition and that we are gradually raising dogs that will not be so long lived as the semiwild mongrel types.

Remember that you can buy Jesse Moore A. A. Whiskey for the same price that is paid for ordinary whiskey. For sale by all first-class dealers and druggists.

The Sun Is Blue.

Professor S. P. Langley, secretary of the Smithsonian institution, says:

"If we could rise above the earth's atmosphere, to view it, the sun must have a decidedly bluish tint to the naked eye. The proper color of the sun is blue—not merely bluish, but positively and distinctly blue."

"The Laborer is Worthy of His Hire."

But a wage-earner can earn more if he has vigorous health. The blood is the life-giving and strength-making part of the system. If it is pure, all is well; if not, it should be purified with Hood's Sarsaparilla, which makes the weak strong.

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form. . . . Sold by every druggist in the malarial sections of the United States. . . . . No cure, no pay. . . . Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

ST. LOUIS, MO., Feb. 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898 .889 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous: having sold during the late Cold and Grip season 4,250 dozen.

Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.

KEDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 15, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 11 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,
JAMES D. ROBERTS.

COURAGE.

It is not that they never knew
Weakness or fear who are the brave;
Those are the proud, the knightly few
Whose joy is still to serve and save.

But they who, in the weary night,
Amid the darkness and the stress,
Have struggled with disease and blight
With pitiful world-weariness.

They who have yearns to stand among
The free and mighty of the earth,
Whose sad, aspiring souls are wrung
With starless hope and hollow mirth—

Who die with every day, yet live
Through merciless, unbrightened years,
Whose sweetest right is to forgive
And smile divinely through their tears;

They are the noble, they the strong.
They are the tried, the trusted ones,
And though their way is hard and long—
Straight to the pitying God it runs.
—Harper's Weekly.

LOTTIE'S VACATION

"YOU are still determined to spend your vacation with Grandmother Eton at the old farm," said Mrs. Armstrong to her youngest daughter, who had returned home a few days previous from Vassar. "Yes, mamma, I have given her my promise and I will not disappoint her or aunt Julia." "I am sorry, as I am anxious that you should spend the season with us at Bar Harbor."

"Yes, mamma, but Essie and Nell will be with you, and they will make up for my loss."

"But, my dear, what will Mr. Roylston say, or what will he think of you? We gave him to understand that you would surely go, and it will be a great disappointment to him."

"Never mind, mamma, Mr. Roylston will succeed in getting some one to amuse him as well as I possibly could." "Why, Lottie, how can you talk so when you know he adores you? There are few young ladies that would throw away the opportunity that you are now doing. Robert Royston is rich, handsome, and comes of a good family," said Mrs. Armstrong. "Yes, and considers that he can take any girl's heart and kick it "about like a football," added Lottie.

Mrs. Armstrong was horrified, but she knew it would be useless to attempt to change her self-willed child, so it was settled that Lottie would spend her vacation on the old farm.

It was not Robert Roylston's fault that he heard the above conversation, as he sat on the piazza near the room where the mother and daughter were talking, it being impossible for him to get away without letting them know that he heard at least part of their conversation. "So I take young girls' hearts and kick them round like a football? Eh, that's what my little spitfire thinks of me." Half an hour after Bob Roylston left the Armstrong cottage smoking a cigar and in a meditative mood.

"This way, if you please, miss, I will get your traps aboard." Lottie jumped into a comfortable two-seated carryall, and the hired man, after stowing away the satchels and bags, jumped in and turned the horses' heads towards the Eton farmhouse, a journey of five miles over the mountains.

Miss Lottie, sitting in the rear seat, had ample opportunity to study Grandmother Eton's hired man. He had but little to say, Lottie doing the most of the talking during the drive over the mountains.

It was a warm and hearty welcome Lottie received from grandmother and Aunt Julia. But later on, when the latter accompanied her to her room and assisted her in removing her wraps, it was evident that her mind was still on the "hired man."

"Who is he, Aunt Julia? Where did he come from? What is his name?" and fifty other questions in as many seconds were asked by Lottie. Aunt Julia replied that he was a poor student, and came up to the Profile House, where he expected to work, but was disappointed. "He asked us to take him for his board and give him any wages that we saw fit. He said his name was Edmund Roberts and he came from Plymouth, only he is the best hired man we ever hand."

Pretty as a picture was Lottie Armstrong as she entered the dining room of the old farmhouse that day. She barely noticed that the hired man was seated at the table, but was sensitive of the fact that his eyes were continually upon her.

She scarcely looked up during the meal, but when she did she felt that his eyes were looking through her. After dessert Mr. Roberts made a simple excuse about attending to business, and left the ladies to themselves, much to Lottie's relief.

"How far is the Profile House from here, grandma?"

"About five miles," said Mrs. Eton.

"Would you have any objection to Mr. Roberts driving me over there this afternoon?"

"Certainly not; order him to do anything you want done. Do not be timid in asking him; he is accommodating."

It did not take him long to get old Dobbin hitched up, and the look he gave Miss Lottie when she asked him kept her thinking where she saw Mr. Roberts before, but the heavy dark beard deceived her.

Nearly every day some of the many places of interest in the New Hampshire hills were visited. So much time did Lottie take of the hired man that another hand was employed to do the rough work.

One afternoon they started off on a huckleberry expedition. They were warned by Grandma Eton that there was a storm in the air, and to be careful. But the sun shone so brightly that no heed was taken of her warning.

'Twas late in the afternoon when a little speck appeared in the sky, but it grew wonderfully fast and black. Little drops of rain commenced to fall, sharp flashes of lightning made the sky vivid, while the roll of thunder made them think heaven's artillery was let loose. Peal upon peal followed one after the other, and the rain fell in torrents.

The berrypickers ran at the first sign of the storm, but when they arrived at the place where they had left their team the storm was at its height. To make matters worse, old Dobbin had broken his halter and started for home.

"What shall we do; O, what shall we do?" cried Lottie. "O, Robert; O, I mean Mr. Roberts; no, I mean Mr. Roylston. O, Robert, Bob, what shall we do?" and then, womanlike, fell in his arms in a faint.

He lifted her in his arms to a nook on the side of the mountain road, which sheltered them from the heavy rain, and when she recovered she found his bushy beard against her face and his great blue eyes looking down at her.

She could not help smiling when Bob Roylston told her that he knew that she recognized him almost from the first day, but it took lightning and thunder from a clear sky to make her acknowledge it.

But, of course, the clouds cleared away and the sun smiled down upon the lovers. Explanations followed. Lottie said the reason she wouldn't go to Bar Harbor was on account of a little flirtation that occurred between Robert and Aggie Larkin. He said the reason he did not go to Bar Harbor was that he did not want to make a "foot-ball out of the girls' hearts" to kick about as he pleased.

But the fact that Grandmother Eton had to get a new "hired man," and that wedding cards had been sent to the elite at Bar Harbor, the names of Miss Lottie Armstrong and Mr. Robert Roylston being prominently mentioned therein, showed that a happy reconciliation had taken place.—Boston Post.

OKLAHOMA HARVESTERS RUN BY MAN POWER.

The farmers of Oklahoma have decided to do away with horses to pull their binders and reapers. At this day the machines can be drawn so easily and horseflesh is at such a high price that it is cheaper to advertise for a gang of tramps and hire them to pull the machines during the harvest. The first work of this kind was done on the big "101" ranch, in the northern part of the Cherokee strip. "Joe" Miller, the man who owns the ranch, says that he has hired teams from the neighbors to help him in his harvest for many years, and that this year he hired twenty tramps, and the work was done at just half the cost. In Oklahoma the ranches are so large that no one man owns enough horses to do the work, and in harvest time a horse is a scarce article and costs a great price.

WRECK OF THE FAST MAIL.

PICTURES OF A WRECK.

Smashup Near Boone, Iowa, the Most Complete on Record.

Louis L. Troy, of Chicago, superintendent of the sixth division, railway mail service, has photographs of what is said to be the most complete wreck in the history of the service. The smash-up is that which overtook the Chicago and Northwestern fast mail train on Molugona hill, near Boone, Iowa, the morning of Aug. 1. In this wreck four men were killed and six injured.

The train consisted of an engine, two express cars, and four mail cars. It was running about sixty miles an hour and was on what is known as "Kate Shelley" curve, a half-circle at the foot of a fifteen-foot grade. For a considerable time workmen had been at work reducing the grade and the curve, and it was nearly completed when the accident occurred.

The engine jumped the track and the train tore over and past it, stripping it clean. The express cars were wiped out, their fragments lying under the first mail car. The third mail car was nothing but a mass of kindling when it came to a rest at the edge of a cornfield. The roof was lifted off and thrown twenty feet from the body of the car, turning upside down in its flight. One of the most remarkable things about this part of the wreck was the fact that five gas lamps which were suspended beneath the roof were not injured. As can be seen by the accompanying picture, one end and a few feet of the sides were all that was left of the car.

"Kate Shelley" curve is just west of Boone and east of the Des Moines river. It is named for Kate Shelley. Several years ago this girl crossed the Des Moines river in a raging storm on the girders of the railway bridge, that had been demolished by a freshet, and stopped a fast passenger train in time to avert a terrible accident. The girl was a national heroine, and was splendidly rewarded by the railroad company and the passengers on the train.

The curve is a dangerous one, and for twenty years the company has watched it night and day to guard against wrecks. Trainmen lay stress upon the singular fact that after twenty years without an accident at that spot, and only twenty-four hours before the curve and grade would have been greatly reduced, a catastrophe should have occurred to the fast mail and four lives lost.

When the express and mail cars went tearing into the engine the engineer and fireman were instantly killed. Practically nothing was left of the locomotive except the boiler. The cab was cleaned off the frame and the driving wheels twisted under the boiler. The front truck was found in the corn field, 150 feet from the track. The engine remained well up on the embankment. One of the trucks of an express car, by one of those curious tricks which appear in nearly all great catastrophes, remained firmly on the track, and ran, under its own momentum, as far as the bridge over the river.

Om nous.

When Julia, Mrs. Blank's maid of all work, came to her mistress and "gave notice" because she was going to be married, Mrs. Blank said:

"You know, Julia, that marriage is a pretty serious thing."

"Yes'm," replied Julia, "but not gittin' married is a more serlouser thing sometimes, don't you think? Anyhow, it'll be as serious for him as for me if we don't git along all right. But then, as you say, gittin' married is about the serlousest piece of bizness a body can ingage in, an' mebbe I am a fool an' mebbe he's a bigger one. There's no tellin'. It's a turrible solemn thing, as I reckon you've found out by this time. Like enough I'll sip sorrow, but so will he, that's one comfort."—Detroit Free Press.

Wanted the Letter.

She confronted him at the breakfast table.

"George, I want that letter in your pocketbook. Please give it to me. Don't refuse."

A guilty look swept over his face, and he answers hoarsely: "W-what letter, my dear?"

"Why, a V; but if you could make it an X it would do just as well. I've got some shopping to do."

And he is so grateful at the hairbreadth escape that he makes it a XX.—Chicago News.

He Rebelled.

"They say Buxton and his wife have separated."

"Yes. They expect to be divorced in a little while."

"What's the trouble?"

"Oh, they quarreled because she refused to go away for the summer unless he went along."—Chicago Times-Herald.

Austria's Polyglot People.

There are so many languages spoken in the provinces of Austria-Hungary that interpreters are employed in the various parliaments to interpret the speeches of the delegates and make them intelligible to all the members.

OUR BOYS AND GIRLS.

THIS IS THEIR DEPARTMENT OF THE PAPER.

Quaint Sayings and Cute Doings of the Little Folks Everywhere, Gathered and Printed Here for All Other Little Ones to Read.

Peabody Endicott Winthrop Browne
Lived in Beacon street, in Boston towne,
With a lineage almost as long as your arm,
An ancestry rich with colonial charm.
And in face of all this we are quite at a loss
To account for his being so dreadfully cross.

But wrong foot first out of bed each morn,
I privately think that's the way he was born.
This boy would come with a scowling face
And begin to find fault at his usual pace.
His bath was too hot or the room too cold,
And all through his dressing he'd fume and scold.

To the dining room with a frown he came,
And that nothing could suit him was very plain,
For his oatmeal was dry, or the milk too cold,
The butter too hard or the bread too old,
Till his pictured ancestors looked stonily down
On this hopeful scion of the house of Browne.

And when he went out, I tell it with shame,
He spoke very rudely to Nurse Mary Jane,
He splashed in the water and kicked up the snow,
And walked rough shod over high and low,
And the frown on his face was a sight to see;
In fact, he behaved most shockingly.

Of children to play with he found but few,
Though he walked the length of the avenue.
For the little ones all, with a stare and frown,
Said, "Let's run away from that cross-patch Browne,"
Till, his nurse losing patience, home they went,
And to papa's study Peabody was sent.

And his father very gravely said,
"Boys that won't be pleasant must go to bed."
So he had spoiled his pleasure and lost his play,
And ended his day in this shameful way.

O, the sorriest boy in Boston towne
Was Peabody Endicott Winthrop Browne,
And now, my dear, when you count the loss,
Does it ever pay for being cross?
—Atlanta Constitution.

Old Maggie.

A group of young folks from the high school stood on the corner, giggling at old Maggie, the brown mare who, hitched to a post near by, stood patiently switching away at the flies. The young folks laughed at her rough hide, her stumpy tail and clumsy feet. They called her "Nancy Hanks," "Gunpowder" and "Bucephalus."

The next morning, when the gigglers filed into the schoolroom, they saw on the blackboard this:

THE FAITHFUL HORSE.

"I am only an old horse, but when I was young I was handsome, and I took a pride in letting no one pass me. Now I can do little, but I try to do that well. I take invalids and timid old ladies out driving. I let little children drive me, and they can slap the lines, rattle the whip and shout as loudly as they wish; it doesn't try my nerves. Sometimes they climb my back for a ride. I step very carefully, so they won't fall off. So I do when the baby toddles around and I am cropping grass on the lawn.

"I am always ready to carry picnic parties to the woods; I go for the doctor; I take guests to the train. I never shy at tooting engines, bicycles, baby carriages or wheelbarrows. I take grandma to the weekly prayer-meeting and sewing society. I don't remember ever playing a mean trick in my life. Sometimes in the future you may be old, poor and slow; how would you like to be laughed at?"

The scholars read the words, looked at one another, giggled a little—very feeble giggles!—then, with flushed faces, bent over their books.

But they were thinking!—Youth's Companion.

What Made Virginia Laugh.

"Well, did you do it, 'Lexander Knox?"

"No, I never—she just looked soberer than ever!"

"That's poetry!" laugher Phoebe. It was easy enough to make Phoebe laugh.

Alexander plunged both grimy little hands into his pockets and looked gloomy.

"I stood on my head three times a runin'——"

"Oh, my, I couldn't do that!" cried Phoebe, mischievously.

"An' I turned three somersaults a-runnin'," continued 'Lexander, severely, "and she never laughed one little smile, no, she never! I don't know what to do next."

"I couldn't make her, either," said Phoebe. "I tried and tried. Everybody else laughed; grandma did, and nurse, and everybody but just Virginia. I guess we might's well give it up, 'Lexander."

It looked that way. Everybody in the house had been trying to make solemn-faced little Virginia laugh. If they could just make her do it once, the backbone of the storm would be broken, grandma said, and the sun would have a chance to come out "for good."

It was quite a serious case. Virginia had really a good cause for being sorrowful. When one is only four years old and has had the croup and can't go to the next-door baby's birthday party—well, what is there to laugh at?

Virginia pressed her tip-tilted little nose flat against the window pane and cried quiet little rain drops that twinkled in the sun. And everybody was so sorry for Virginia—why, even the chickens outside seemed sorry! There was one lanky, half-grown little fellow in a yellow coat half feathers and half down and half bare skin (but that's too many halves!) who seemed especially sorry for Virginia. He cocked his ridiculous little head at her and blinked one bright eye.

"That little girl ought not to be crying—dear me, no!" he seemed to be thinking to himself. "Somebody ought to put a stop to it at once. The idea of crying when there's just been a rain and the angleworms are so plenty! Somebody ought to entertain that little girl. I have it!"

And then Little Lanky Fellow strutted away importantly. Just the thing! If anything would comfort the little girl, that would. He fluttered up on to the wheelbarrow that stood just under Virginia's window and flapped his funny, bare wings and—crowed! It was a coarse, cracked little baby crow, but he stretched his long neck and opened his mouth to a frightful extent—and crowed and crowed and crowed. He was so very important and proud of himself, and the crow was so very hoarse and off the key!

Then Virginia laughed.—Youth's Companion.

Their Sin Is Named.

"Now, children," said the young lady who was instructing a class of small boys in the Sunday school, "which of you can tell me of what particular sin Joseph's brethren were guilty when they sold him into bondage?" "Please, ma'am, I can," answered one bright little fellow. "Very well; what was it?" she inquired. "They sold him too cheap," was the somewhat unexpected reply.

A Joke on the Angels.

Willie, aged 4, noticed the moon in the western sky one morning after sunrise. Having never before seen both orbs at once he was deeply impressed and, running into the house, exclaimed: "Oh, mamma, I've got a good joke on the angels!" "Why, Willie, what do you mean?" asked the astonished mother. "They forgot to take the moon in," answered the little fellow.

Where Does It Go?

"I want to ask you one more question, mamma," said small Freddie, as he was being put to bed. "Well, what is it?" asked the tired mother in a tone of resignation. "When a hole comes in my stocking," said he, "what becomes of the piece of stocking that was there before the hole came?"

All Barefooted.

Little 4-year-old Flossie had been spending the day with a playmate during house-cleaning and upon her return home she found the carpets had been removed from the hall and stairs. "Oh, mamma," she exclaimed, "the hall and stair steps are all barefooted."

Result of the War.

"Tommy," said the teacher to a pupil in the juvenile class, "what is your idea of the result of our war with Spain?"

"It made geography lessons a heap sight harder," was the logical reply.

Find Health in Occupation.

While the health of workingmen is no doubt undermined by their occupations, such, for instance, as matchmaking, and the various trades in which lead is used, there are other trades that tend to prolong life. It has often been remarked that the men who lay the asphalt in the streets seldom have a day's illness, and those employed in electric light works and places where large quantities of electricity are generated enjoy quite an extraordinary amount of vitality. A visit to the gas works, too, is quite frequently prescribed by doctors for chest ailments. The workers in salt mines, also, enjoy an absolute immunity from rheumatism.

Perhaps the healthiest occupation is that at the petroleum tanks that abound in Chicago. The men employed in these never suffer from sore throats, diphtheria, quinsy or kidney ailments. The marvelous curative effects of the petroleum fumes is such that it is now quite a common thing for sufferers from throat affections to visit the petroleum tanks, much as people used to drink the waters at Bath.

A celebrated and wealthy operatic tenor who had developed a throat weakness has for several months past been working as an ordinary employe, but gratis, in one of the petroleum warehouses, deriving from the inhaling of the fumes a cure that scores of physicians and several ocean voyages failed in establishing.

An Armless Bride.

A woman without arms has been married at Christ Church, New Zealand. The ring was placed upon the fourth toe of her left foot. A similar marriage to this was performed at St James Church in 1832

THE MAKING OF A HAT

VARIOUS PROCESSES TO WHICH IT IS SUBJECTED.

The Boilings, Bakings, Singeings and Other Miseries Through Which a Piece of Headgear Passes Ere It Comes to the Wearer.

All men wear hats, but all men do not know that the manufacture of these indispensable articles of dress is one of the most curious in the whole line of industrial employment. The process of hatmaking begins with the trapper of the Hudson Bay region, with the hunter of Alaska, with the fur trader of Siberia, even with the small boy of our rural districts, who, with shotgun, sallies out directly after the falling of the first snow to hunt the festive and prolific rabbit, for the sine qua non of the modern felt hat is fur. No fur, no hat, is the rule in every factory, for, without fur, hats cannot be made except wool hats, straw hats and stovepipes.

Beneath the long hairs which give character and color to every kind of peltry there grows a fine, soft fur, varying in length from a quarter to a third of an inch, which forms the real protection of every animal from the cold, and this, the "underwear" of all fur-bearing animals, heavy in winter, light in summer, is the basis of every felt hat. Complicated machinery shears it from the skin, performing this operation as dainttily and almost as closely as the well-trained barber shaves the face of a customer particular about his personal appearance.

The sheared fur is thrown into a machine which, by a complicated system of rollers and traveling belts, completely separates every long hair, every particle of dust or other impurity from the fur and passes on the latter perfectly clean, a soft, fleecy, almost impalpable mass, ready for the hatter's use.

When ready to serve as the basis of a "title," it is weighed, two to four ounces being allotted to a hat, each portion being placed in a little box, and large trays, containing a number of boxes, are carried to the room where the hat making begins. Before each machine sits a young woman who, with her fingers, feeds into an orifice in the top of the mechanism the fur allotted for one hat. It disappears from view and what happens to it then is this: Just below the orifice through which the fur passes there is a toothed cylinder, known in hat-maker's slang as "the devil." Turning at a rate of over 3,000 revolutions per minute, it seizes the fur, scatters it throughout the interior of a large chamber and permits it to fall evenly on a perforated cone below, to which it adheres, being drawn partly into the tiny orifices by a strong suction current. When the fur for one hat is thus distributed, the machine is opened, a brass cover is slipped over the cone and its felty covering, the machine readjusted, and the cone removed and plunged in a tank of hot water. Here it remains for a few moments, and on being removed, the perforated cone is readily withdrawn and the workman lifts out a conical bag apparently almost as thin as tissue paper, about four feet in length and between two or three in diameter at the top. This is the future hat, which, however, bears very faint resemblance to the form it is finally to assume, for many hands must put it through almost innumerable processes ere it is ready for the wearer.

POLISHING A SILK TILE.

The first thing to be done is to reduce the size, for a hat three feet in diameter is too large even for the swollen caput of a spring poet, so the bag is passed on to "felters," who are to lessen its dimensions. Round a circular tank of hot water are arranged inclined planes, and at each stands a man who, dipping the long bag from time to time in the water, works it, kneads it, presses it, with several different kinds of manipulation, until finally the gauzy bag, still retaining its original shape, is reduced to about one third of its former size, becomes a thick felt and exactly the shape and appearance of the hats worn by circus clowns.

Now, the troubles of the hat fairly begin. They are dyed, and still further reduced in size by this process; they are stiffened with a composition of rosin and shellac, then allowed to dry; again dampened, they are blocked, when, for the first time, they begin to approximate the shape of a fashionable tile. Being fixed in permanent form, it is now recognizable as a hat, in posse rather than esse, being rough, and with a weary looking brim which sags down here and there.

It has a right to look weary, for whether the blocking is done by hand, a workman with the arms of a prize-fighter, seizing the brim and drawing it down over the block, or whether the iron fingers of a machine stretch and draw it into position, the result is the same, the brim always looks as though it had spent a hard winter in the open air or the rainy season at Manila. It passes on, disreputable brim and all, to workmen who, with knives as keen as razors, shave off all projecting hairs, reduce every inequality of the surface and make it apparently as smooth as velvet. In some factories this process is performed by a machine, which accomplishes the result desired by revolving the hat very rapidly while the polishing is done by emery paper. The hat is now smooth, but by no means sufficiently so to satisfy the critical eyes of foreman, proprietor and purchaser, for the public has become fastidious in the matter of its headgear, and demands a gloss on the derby little inferior to that on the regulation "stovepipe." So the hat must pass through several severe ordeals before it is ready for sale, for, after it has been blocked and shaved and polished, it goes on to the finisher, who jams it down on his block with a turn of his wrist, sets the machine in motion, and the hat whirring.

IRONING A BRIM.

He sandpapers it, bringing off at every revolution a quantity of fine black dust; he turns up a gas jet until a flaring flame a foot high spurts forth, then passes the hat through the blaze as the easiest method of disposing of the projecting hairs. It emerges brown and singed with the flame, and is again treated to a dose of emery paper, this process being called in the technical language of the craft "flouring," a hat maker's contraction of "velouring" or "velveting." When partially loured, the hat is passed on to the curlers, who impart to the brim the shape and curve dictated by fashion for the season. The curling is done by small irons, having grooves cut in the under surface, which take up the moistened felt, give it the requisite shape which, after drying, it retains. It is now ready for the binders. In some factories the bindings are sewed on by machines designed especially with reference for this work, but in the greater portion this operation is performed by girls and women who sew on the bindings, put in the linings and paste in the London and Paris labels which, no matter where the hat was made, are to the mind of the purchaser proof positive that it is strictly au fait, en regle, or whatever else he is accustomed to say as indicative of the regularity of his headgear.

The Humor of Negotiating a Loan

A young Irishman, in want of a $5 note, wrote to his uncle as follows:

"Dear Uncle: If you could see how I blush for shame while I am writing, you would pity me. Do you know why? Because I have to ask you for a few dollars, and do not know how to express myself. It is impossible for me to tell you. I prefer to die. I send you this by messenger, who will wait for an answer. Believe me, my dearest uncle, your most obedient and affectionate nephew, JACK.

"P. S.—Overcome with shame for what I have written, I have been running after the messenger in order to take the letter from him, but I cannot catch him up. Heaven grant that something may happen to stop him, or that my letter may get lost."

The uncle was naturally touched, but was equal to the emergency. He replied as follows:

"My Dear Jack: Console yourself, and blush no longer. Providence has heard your prayers. The messenger lost your letter.

"Your affectionate uncle, ——."

Library Books

"I could stock a museum with the quer things I have found in our books," said a librarian. "These articles include all kinds of bills—grocery bills, gas bills and every variety of bill under the sun; hairpins and hair ornaments of every design, and material; love letters galore, locks of hair, bits of lace, dress samples and watch-chain charms; pen and ink, pencil, crayon and water color sketches; money orders and postage stamps, and I have also a dried human ear, which I found in a book on surgery, borrowed by a medical student probably, as they carry all sorts of uncanny things about with them. Photographs, too, figure largely in my collection. I once found an insurance policy in a book, but it was quickly claimed. The hustling advertiser cannot let even library books alone. Somebody is an agent for a certain patent medicine. He takes out half a dozen books, not to read them, but simply to insert a circular."

Upset the Actors' Gravity.

A funny incident happened during a performance of "Macbeth" in Dublin. In the sleep-walking scene, when the nurse and the doctor appear on the stage together and confabulate with one another, a loud voice suddenly called out from the gallery, causing a roar of laughter in the middle of a most serious scene: "Well, doctor, is it a boy or a girl?"

INYO INDEPENDENT.

JNO. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, OCTOBER 27.....1899

THE RAILWAY NORTH FROM JOHANNESBURG.

The fact that plans for a new railway in our direction are assuming definite shape is evident from the following:

RANDSBURG, Oct. 19.—Eleven surveyors arrived at Johannesburg this evening, the first advance guard for the proposed extension of the Randsburg railway to Ballarat. Another party will arrive before November 1. This is the result of the many new mines opened in the Panamint country.—*S. F. Call.*

That section of country between the Colorado river on the east and the Sierra Nevada range of mountains on the west, which is commonly called in the southern part the Colorado desert and in the more northerly portion the Mojave desert, has during the past two years attracted the attention of prospectors and miners to such an extent that their efforts in the line of new discoveries now warrant the construction of railway lines through these so-called deserts, but still rich mineral districts. It is true that a short line has been built from Kramer to Johannesburg, but recent developments in the country north of the Randsburg district necessitate the continuation of that line to join the line of the Carson and Colorado Railway at Keeler in Inyo county.

Surveying parties were in the field last winter for a line which would run from southern Nevada in a Southwest direction and about half way between the line already mentioned and the Colorado river. Such a railroad is required to connect the coal fields of Utah with Southern California. In the Ivanpah, Cal., and Searchlight, Nev., districts recent mining developments of a substantial nature warrant the building of a branch line to supply existing demands for carrying ore and supplies and open up a rich new mining territory by extending the branch line from Blake or Manvel on the Santa Fe. The large established trade of Arizona in mineral products warrants the construction of a railway line from San Diego, Cal., via Escondido and San Luis Rey river to Warner's ranch and Yuma, and westward to connect with existing lines. The construction of a new railway lin makes traffic under ordinary circumstances, but in the rich mineral section of Southern California between the mountains and the Colorado river northerly and southerly lines are required to connect the at present isolated camps with the seaboard and base of supplies and to make accessible the great variety of minerals which require railway transportation to bring them to market and to give them value. —*Los Angeles M. & M. Journal.*

A surveying party is in the field, presumably surveying a line of railroad between Johannesburg and Keeler via Ballarat. There are eleven of the party and they arrived at Johannesburg Wednesday evening and began work Thursday morning They are in charge of J. M. Vanderworker, of Los Angeles.

The line will probably run somewhat to the east of Garden Station, skirt the Slate Range to the south, running between that and Granite Wells, passing near Lone Willow and into the south end of Panamint Valley, whence it will be a natural grade clear to Ballarat and beyond. From that point they will strike the most feasible route across to Keeler. This part will be the most difficult, as the grades will be heavier than between Johannesburg and Ballarat.

Nothing could be learned from any of the parties interested, nor from the railroad officials, but these men are not working for fun and it has been known for some time that the growing importance of the mining interests to the north would necessarily be the means of extending the Randsburg Railway, which is now one of the best paying short lines in the State.—*Randsburg Miner.*

Exaggerated statements concerning mine development, ore in sight, production and possibilities, are in these days taken with much allowance. Twenty or thirty years ago less attention was given to the facts than now. A mine with half a million in sight would readily sell then for double that amount. Now the cost of equipment and production is charged against the half million and a reasonable allowance made for ore not blocked out, for experience has proven that ore bodies are erratic; they often fail to "go down," or, going down, have been known to decrease materially in value. There are some who cannot understand why this is so. They were well known in the "good old days" when everything was taken for granted, and they can see no reason why the same conditions should not obtain now. Then all mining was looked upon as a gamble and investors had to take a gambler's chance. Now mining is a legitimate business and it is yearly growing more conservative. Capital is ready for investment, but it must see something tangible, and where this is possible it is not more timid than in ventures in other lines. Mining experts are not now solicited to give opinions as to what can not be seen, but to state the facts concerning a mining property as determined by development. They must also advise as to treatment of ores, equipment, transportation of product, etc. The palmy days of the speculative miner and investor are gone, and instead is found a demand for facts.

Sir Thomas Lipton is going right home to build a yacht after a Yankee pattern. He expects to complete it by 1901, and will bring it over to beat us. If he will ship an American skipper and a Yankee crew, with a craft built on United States lines, he might be in it.

Liquid air is about to be put to practical use in California. A large fruit-growing concern is pre paring to install a plant for its manufacture, to be used in the transportation of fresh fruits across the continent. The enterprise will include special cars, as well as batteries for the storage of the fluid. Liquid air is thus to be used without delay as a substitute for ice in the refrigeration of railway cars. The innovation is prompted of course by economy, not only in the use of material but in the use of space also One-third of the cubic area in the refrigerator cars now used in the transportation of California fruits to Eastern markets is occupied by ice chambers, which require refilling several times on the trip, as ice melts quickly in the warm valleys and hot deserts and plains traversed. The enterprising fruit-grower who intends experimenting with liquid air for refrigeration next year expects to cut down the ice bill and save the time now lost in refilling the ice chambers. The volumn of liquid air which will be needed to perform the same function ice is now performing will be so small that most of the car area occupied by ice chambers will be available for the carriage of fruit. Another advantage will lie, it is believed, in the perfect control which the car tender will have upon the temperature of the car. The new refrigerating agent will be inclosed in a vessel possibly no larger than an ordinary bucket—on tap as it were—and it may be turned off or on at pleasure, the volumn released being regulated by the temperature of the car. If the experiment to be undertaken with liquid air is successful it will no doubt revolutionize the business of fruit shipping to Eastern markets. It may work some injury to the ice-farmers of the Truckee river, as it will force them to find a new use for the 200,000 or 300,000 tons of ice which they are now harvesting every winter for use on the east-bound fruit trains every summer. But the injury will be greatly over-balanced by the benefit which the multitude engaged in fruit culture ought to derive from the change.

A State Convention is to be held in San Francisco on the 14th of November next to consider the subject of the storage of flood waters. The call has been issued by a committee representing the State Board of Trade and other bodies, and the delegates will be members of the press, legislators and representatives of all commercial organizations, Supervisors, representatives of irrigation systems, etc, and fifty delegates at large, to be appointed by the Governor, along with members of the original committee. These will compose an intelligent and respectable body, the discussions and conclusions of which should be of much interest. The convention is not called specifically for the purpose of promoting a Government scheme, a State scheme, nor a private scheme for the storage of water. The object of the promoters is to call into convention the people of the State for the purpose of deliberating upon the whole subject and of inaugurating a movement which shall eventually devise the best plans, and if the advocates of the storage of water through governmental policy are able to convince the convention that that is wise, the movement itself may become one in the direction of promoting the inauguration of such a policy.

If Sir Thomas Lipton sticks to his expressed determination to return to the contest for the America's cup until he wins it he will probably spend a good part of the remainder of his life with us.

NEW ADVERTISEMENTS.

Certificate of Co-Partnership.

STATE OF CALIFORNIA, } ss.
County of Inyo.

WE, THE UNDERSIGNED, do hereby certify that we are partners transacting general mercantile business in the town of Ballarat, County of Inyo, State of California, under the firm name and style of WEAVER & PORTER BROS.; that the names in full of all the members of such partnership are Charles A. Weaver, Hiram D. Porter and Lyman D. Porter, and that the places of our respective residences are set opposite our respective names hereto subscribed.

In Witness Whereof, we have hereunto set our hands and seals this — — ———, 1899.

Name.	Residence.
HIRAM D. PORTER,	Ballarat, Inyo County.
CHARLES A. WEAVER,	" " "
LYMAN D. PORTER,	" " "

STATE OF CALIFORNIA, } ss.
County of Inyo.

On this 13th day of October in the year of our Lord one thousand eight hundred and ninety-nine, before me, White Smith, a Notary Public in and for said County and State, residing therein, duly commissioned and sworn, personally appeared Hiram D. Porter, known to me to be the person whose name is subscribed to the within instrument, and acknowledged that he executed the same.

In Witness Whereof, I have hereunto set my hand and affixed my official seal, the day and year in this certificate first above written.

[Seal] WHITE SMITH,
Notary Public in and for the County of Inyo, State of California.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - Plaintiff,
vs.
Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

[SEAL]
P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale, to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit.

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be receive' at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased.
P. H. MACK, Attorney for Administrator.
Dated August 23d, 1899.

Notice of Sale of Mining Property.

PUBLIC NOTICE IS HEREBY GIVEN THAT the undersigned, administrator of the estate of John F. Ginser, deceased, under the order of the Superior Court of Los Angeles county, will sell at public auction, in front of the postoffice at Ballarat, in the County of Inyo, State of California, on Monday, the 20th day of November, 1899, all the right, title and interest which said John F. Ginser had at the time of his death, and all the interest which his said estate has subsequently acquired, in and to the following described mining property, situate in said Inyo County, to wit: An undivided one-fourth interest in the "AURORA" and "TUBER" mines in the South Park Mining District, (in accordance with location notices duly recorded) together with mill-site located in connection therewith.

Terms of sale. Cash, gold coin of the United States; 20 per cent. of the purchase price payable at the time of sale, and the balance upon confirmation of sale by the Superior Court of Los Angeles County.

Dated, October 14, 1899.

FRANK M. KELSEY,
Administrator of the Estate of John F. Ginser, deceased.
FLINT & BARKER, Attorneys for Administrator.

NOTICE TO CREDITORS.

Estate of Carmen G. C. Carrasco, deceased.

Notice is hereby given by the undersigned, Executor of the estate of Carmen G. C. Carrasco deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said executor at the law office of P. H. Mack, in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

Respectfully submitted,
I. J. WOODIN,
Ex Public Administrator.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO, }

I. J. Woodin, being first duly sworn according to law, deposes and says: That he is the ex-Public Administrator of Inyo County, State of California. That while acting as Public Administrator letters of administration were issued to him in the matter of said estates; and that said letters have not been revoked. That he has read the foregoing return and account, and that the matters therein contained are true in substance and in fact.

I. J. WOODIN.

Subscribed and sworn to before me this 19th day of July, 1899.
(SEAL.) D. J. HESSION, Clerk.

A. W. EIBESHUTZ.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS

Hon. Walter A. Lamar, Judge.

TUESDAY, Oct. 24, 1899.

People vs. Chin Lee—Defendant arraigned.

T. Williams vs. Fritz Meyer—Defendant allowed to file amended answer and cross complaint.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:30 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 11 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

DIED.

DODGE—At Lone Pine, Oct. 24, 1899, Josiah G. Dodge, a native of Tennessee, aged 69 years.

Real Estate Transfers.

The following deeds have been recorded since September 28, 1899:

Juliet Garretson to Thos. Williams; Sept. 23, 1899; 160 acres near Bishop—$1000.

J. V. Baker to A. N. Bell, Oct. 9, 1899; ½ interest in 160 acres land near Big Pine—$1.

Inman Tucker to I. H. Mulholland, Oct. 7, 1899; 160 acres near Independence—$500.

Silas Reynolds to I. J. Woodin, administrator Treglown Estate, Oct. 9, 1899; 161 acres near Francis—$5.

J. B. Clarke to J. B. Todderdell, Aug 30, 1899; tract near Bishop—$150.

J. B. Totterdell to Mary E. Ives, Oct. 16, 1898; same—$150.

Sophronia A. Smith to J. T. Anderson, Oct. 11, 1899; 160 acres near Bishop—$10.

A. F. McNulty to Radcliffe Con. M. Co., Oct. 2 1899; water right in Pleasan Canyon—$10.

Godsmark & Harrison to Radcliffe M. Co., Oct. 10 1899; water right—$10.

J. B. Clarke to C. H. Parsons and Jesse P. Andrews, Oct. 17, 1899—Tract of land near town of Bishop—$1000.

John Clarke and wife to Maymie A. Clarke, Oct. 16, 1899; 2 acres in town of Bishop—$80.

M. Megianis to E. Chiafovich, May 23, 1899; Gold Cap mine, White mountains—$10.

Frederick Conn, Carrie M. Conn and Edward Trudo to Conn & Trudo Company, Oct. 20, 1899; borate lands in Saline Valley—$10.

Conn & Trudo to Western Borax Co., Sept. 11, 1899; borate properties—$10.

H. P. Dover to Radcliffe M. Co., Aug 26, 1899; water right, $300.

A. F. McNulty to Radcliffe M. Co., Aug. 31 1899; water right—$300.

United States to R. H. Blake—Patent for timber culture near Big Pine.

The *Mining Reporter*, of Denver, has the following: "Great bodies of ore have been uncovered on the property of the Scottish Baron Mining Company, in Inyo County California, and the company proposes to build railroads, construct a smelter and an electrical plant and make such other improvements as will be necessary for handling an immense tonnage most economically, Mr. H. S. Mackay of Salt Lake being manager. If success crowns these efforts it will be a great thing for Inyo County."

Mr. Lunt, father of Samuel Lunt who has been with us all summer, arrived at Independence Monday evening. In company with his son, Mr. Sub. Johnson and Mr. Frank Carson, the gentleman went up to the Kearsarge group of mines, where he will spend the week in looking over the ground.

It will be impossible for me to be at Independence until the 8th of October, because of delay in the arrival of my goods. My office will be at Levy's Hotel.

M. GOLDBERG.

All Pull Together.

In looking over the ground for a new road to Saline Valley, Treasurer Bunney has discovered what he believes to be a feasible route and a cheaper one to build than either one mentioned in last week's issue. It will require the building of about 17 miles of new road, and will make the total distance from Independence to the copper camp, or borax works, about 54 miles. The Western Borax Company, now in control of the Conn & Trudo property, is anxious to see the new road built, and is willing to assist to that end. Every report confirms confidence in the permanency of these copper fields, and the building of this road will be of incalculable advantage to all of us in this vicinity. Let each one subscribe what he can, be it great or small, and let him remember that it does not come under the head of Charities or Lotteries, but of sure return Investments.

Messrs. Geraux, Phyler and Stewart, representing Pennsylvania capital, have made an arrangement with Messrs. Barnes & Anderson for the purchase of their gold mine near Citrus. The terms of the agreement are as follows: Each owner is to receive $100 a month for a year and $60,000 or the mine, with improvement, at the expiration of the year. If the Los Angeles parties who are interested do not buy the Hirsch mine, it is probable that the above mentioned gentlemen will purchase it also.

W. L. Hunter arrived in town from his copper claims at Ubehebe last Tuesday. He expects to leave for his Beveridge mines soon. Mr. Hunter brought with him a beautiful specimen of desert flora, consisting of a delicate blue, silky fibred moss, which he plucked from a rocky cliff while on his way in. The plant doesn't appear to belong to the cactus family and Mr. Hunter is endeavoring to find somebody who can classify it properly.

A sheepherder brought his flock down out of the Sierras last week, skirted along the foothills north, and finished up the feed on the Reserve completely. The red tape required to tie the wily Basque is yards long; meanwhile he and his herd go on their way rejoicing, and the good feed from Pinyon creek north is transformed into good mutton.

The passing of the late Josiah G. Dodge leaves another sad vacancy in the ranks of old-time Inyoites. For more than a century's quarter he has been a prominent citizen of Lone Pine, one highly respected throughout the county. "Old Sip" will be remembered long in the land as a man of peace and probity.

P. H. Mack is having a portion of his residence moved onto the vacant lot across the street, where he will utilize it as a law office. J. D. Lewis is superintending the moving and has received no end of suggestions and advice from nearly every man and small boy in the town.

An invitation was received by the INDEPENDENT to attend the inauguration of Benjamin Ide Wheeler at Berkely last Wednesday as President of the University of California. Prof. Wheeler's reception by the students and the people at large has been most cordial.

Sam Spratt, who has been in the Inyo range making estimates on the cost of the road to Saline, received word on Monday that his wife was seriously ill. He left for Big Pine at once, but returned last night with the news that she was much better.

In the recent fire at Mojave Mr. J. H. Underhill lost heavily. He had only $1,000 insurance and lost ten times that much. He will begin building again next week and will build of brick this time, first on the corner opposite the depot.

Mrs. Dora Holland left town last Monday for an extended visit to her sisters at Bakersfield and San Francisco. Dave Holland accompanied his wife to Keeler and returned Tuesday morning to his cyaniding work near Bishop.

J. J. Gunn has returned to the Minnietta, after spending the summer in Independence and San Francisco. It is hoped that the mine pays as well this winter as it did last winter.

John R. Gentry won the big pace at Los Angeles last Saturday in two straight heats. Time, 2:04. Searchlight came in second and Joe Patchen third. Purse, $8,000.

Mr. Joe Danielson came down from Big Pine Wednesday and returned to-day He reports that Mrs. J. B. Stewart is very ill with typhoid fever.

Raymond, the eldest son of Charley Collins, underwent a critical operation last week for bowel trouble at the California Hospital, Los Angeles.

Mr. John Hund, of Los Angeles, is in town. He is looking through the Valley for salable horses.

Irv. H. Mulholland and his daughter Ruth have gone to Los Angeles to the Annual Fair.

Ad. Smith and wife and Henry Giles are among the Inyoites at the Los Angeles Fair.

Edward Lynch, an attorney of San Francisco, is in town on legal business.

Don't overlook the new ad of the Inyo Mercantile Co.

The reporting of the international yacht race near New York City by wireless telegraphy was done from the deck of an accompanying steamship by Signor Marconi, the discoverer of the system. A vertical wire, 140 feet above the level of the water, was attached to the vessel's foremost. Messages were correctly transmitted fifteen miles at the rate of sixteen words per minute and immediately transmitted by cable and land wire so that New York, London and other places simultaneously received the dispatch.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING SEPTEMBER 30TH, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending September 30th, 1899.

Respectfully submitted,
W. T. BUNNEY, County Treasurer.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Manuva Mining Dist., Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 28th day of September, 1899 an assessment, No. 33, of 5 cents per share, was levied upon the Capital stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899 to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.

CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 31, 10th Floor, San Francisco, California.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

Gustav Sanger, William A. Sanger and Charles H. Schen, Plaintiffs, vs. Gilbert J. Roote, W. C. Fitz Simmons and William H. Patterson, Defendants.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. W. Forbes and P. H. Mack, Attorneys for Plaintiffs.

The People of the State of California send Greeting to Gilbert J. Roote, W. C. Fitz-Simmons and William H. Patterson, Defendants:

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiffs will take judgment for any money or damages demanded in the complaint, as arising upon contract, or they will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, [Seal] State of California, this 12th day of August, A. D. 1899.

D. J. HESSION, Clerk

(Endorsed) No. 748. Superior Court, County of Inyo. Gustav Sanger et als, Plaintiffs, vs. Gilbert J. Roote et als, Defendants. Summons. P. W. FORBES and P. H. MACK, Independence, California, Attorneys for Plaintiffs.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN:

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

Lodge 221, F. & A. M.

Regular meetings of Lodge No. 221, F. & A. M., for the year 1898, will be held at the Lodge room at Independence as follows:

SUFFERED 25 YEARS.

Congressman Botkin, of Winfield, Kansas.

In a recent letter to Dr. Hartman, Congressman Botkin says:

"My Dear Doctor—It gives me pleasure to certify to the excellent curative qualities of your medicines—Pe-ru-na and Man-a-lin. I have been afflicted more or less for a quarter of a century with catarrh of the stomach and constipation. A residence in Washington has increased these troubles. A few bottles of your medicine have given me a most complete relief, and I am sure that a continuation of them will effect a permanent cure. Pe-ru-na is surely a wonderful remedy for catarrhal affections." J. D. Botkin.

The most common form of summer catarrh is catarrh of the stomach. This is generally known as dyspepsia. Congressman Botkin was a victim of this disease twenty-five years. Pe-ru-na cures these cases like magic. Address Dr. Hartman, Columbus, O., for a free book.

The microbes that cause chills and fever and malaria enter the system through mucous membranes made porous by catarrh. Pe-ru-na heals the mucous membranes and prevents the entrance of malarial germs, thus preventing and curing these affections.

Two Big Necks.

"Once, when I was in New York some years ago," said A. W. Whelpley, "I found myself one afternoon standing before a counter in one of that city's largest dry goods houses selecting some collars.

"A good many men sallied up while I was there and ordered collars of various sizes, from 13 to 18.

"I heard a full, rather hoarse voice, ask for 'turn down, 20.'

"I turned to note the man with the thick neck and beheld Grover Cleveland beside me. I knew him by his resemblance to the fellow on the cigar boxes.

"I had been given my change and a small packet of wares by the auburn haired goddess of the counter, and with one more glance at the generous proportions of the man of destiny I was moving away when, strangely enough, the autocrat of the house of congress, Tom Reed, came steaming up to the counter.

"There they stood, neither evidently knowing the proximity of the other.

"And bless me if he didn't ask for collars, 'second medium, welt band, turned front, 21.'

"I wondered if he thought the store provided a surveyor for such monstrous measures, but the goddess was equal to the occasion and handed out the desired size." Cincinnati Enquirer.

Why Cannibals Eat Men.

Some grewsome information has been collected by a member of the European medical fraternity in relation to tribes that eat men. A Frenchman figures that 20 per cent of all cannibals eat the dead in order to glorify them; 20 per cent eat great warriors in order that they may inherit their courage and eat dead children in order to renew their youth; 10 per cent partake of their near relatives from religious motives, either in connection with initiatory rites or to glorify deities, and 5 per cent feast in order to avenge themselves upon their enemies. Those who devour human flesh because of famine are reckoned as 18 per cent.

In short, deducting all these there remains only a portion of 24 per cent who partake of human flesh because they prefer it to other means of alimentation.

In the heart of Africa man eating is continued to this day, and to such an extent that in certain villages ribs and quarters of man meat can be bought. It is easier for the native there to kill men when they desire flesh than to go to the exertion of hunting game.—St. Louis Post-Dispatch.

A Man of Nerve.

The most curious feature in the case of a miner imprisoned for nearly 70 hours in the Gaylord coal mine at Plymouth, Pa., was his peacefully falling asleep in his tomb as soon as he realized that he was likely to be rescued. It would be difficult to imagine a more serene nervous system. There were plenty of chances, too, that the miners might not get the poor fellow out alive. When finally he did emerge, he behaved himself as a hero ought to behave—quietly, with less thought of himself than of his distracted mother, who at the moment was at home praying for him.—Collier's Weekly.

His Complaint.

"There's only one thing that I object to," said the patient man with a last year's hat. "Pianos must be played on. That's what they were made for."

"You disapprove of some of the selections?"

"No, I don't. All I resent is having my daughter call that piece with which she wakens the house every night a 'slumber song.'"—Washington Star.

Occasionally.

"Ever have your hair singed?" asked the barber of the man who has a thin thatching upon the top of his head.

"Occasionally. Once the furnace blew out on me, once I mistook gasoline for kerosene, and once the gas range exploded while I was investigating a leak."—Detroit Free Press.

More than half a million sewing machines are made every year in the United States, being nine-tenths of all those made on the globe. About 200,000 persons are employed in this industry.

LONG-DISTANCE RIDE.

M. Cottu Covers 785 Miles in Twelve Days Fourteen Hours.

A very remarkable feat of horsemanship has been accomplished by a young Frenchman, M. Charlie Cottu. He rode the whole of the way from Vienna, to Paris, 785 miles, in 12 days and 14 hours, using only one horse, and, what is still more noteworthy, brought his mount into Paris in thoroughly good condition. As every one knows, 62 miles is a good deal more than the average horse can be expected to accomplish in a day, and to keep up this

M. COTTU AND IRISH LASS.

average for 13 days at a stretch, with 188 pounds weight on the animal's back, implies not only the great stamina of the steed, but altogether exceptional care and management on the part of the rider. M. Cottu began to train his mount—a half-breed Irish mare, Irish Lass, seven years old, standing just under 15 hands—on Easter Monday, beginning with a gentle ride of 15 miles or so, and gradually increasing the daily distance up to 40 miles.

In conversation with a Paris correspondent Mr. Cottu explained that the great secret of success on long-distance rides is to avoid overheating your mount. "I never," he said, "kept Irish Lass at the trot for more than one and a quarter miles. I always dismounted when we came to a hill and led her up it. Some days I walked at least 20 miles. When we came to our stopping place I let her stand a few minutes to cool, and then unsaddled her and gently rubbed her back with the bare hand to restore circulation in the parts weighed upon by the saddle. Then I groomed her carefully, took her into her stable, and gave her her food. As soon as she had taken it she used to lie right down at once, but she was always ready for the road again. I gave her between 20 and 24 quarts of oats and between 15 and 16 quarts of milk every day, with a fair amounted of water when she wanted it, provided the water was not too cold. I gave her from four to six hours' rest in the middle of the day, so as to escape the heat, only about two hours at night. I always slept in the saddle with her, and did not take off my clothes after leaving Vienna to arriving at Paris. There was no time for baths or anything of that sort. As we never did more than six and a half miles an hour, even over level country, we had to spend a good many hours a day on the road."

MUST REPORT TO HER.

A Young Woman Has Charge of Omaha's Firemen and Policemen.

Over every telephone in Omaha, probably, is posted this notice: "In case of fire call up 37," but few people, even those who are in the habit of calling up "37" in every case to learn where it is, really understand what the young woman who represents that number is doing all the time. She is really a sort of supervisor of fire and police, before whom the fire and police commissioners pale into insignificance. She has a long table off by herself in the east end of the exchange room and there presides over the destinies of the city and keeps tab on the policemen. On this table are several "tickers" in glass cases, for all the world like those found in boards of trade, and on these the patrolmen make their mark every hour when they turn in their number at the patrol box. There is a whirring noise in the glass case whenever they do, and if the proper time passes and the report is not made "37" makes a note of it.

It is at such times that she issues her orders to the police.

It is this mysterious young woman who is also responsible for the startling sound of the gong, which rings out like a death knell in every fire station in the city when a shanty down in the bottoms catches fire. When a fire is "rung in" she reaches over and touches a black button, somewhat after the similitude of a telegrapher's key, and at once a gong sounds in every station and every office where a fire gong is located. The same touch of the button drops the chain from the front of horses in the fire department, and they jump under the swinging harness. Then, while the men are hitching, the foreman goes to the 'phone. By this time "37" has connected all the telephones in the station in a bunch and as the foreman at each stands with his ear to the receiver she informs them individually and collectively where the fire is located. Then those who are far away unhitch their horses and turn them back into their stalls, while the girl who has made all the fuss puts her lips to the transmitter and begins telling over and over again to reporters and other inquisitive people where the blaze is located.—Omaha Bee.

Telegraphic Discovery.

A Vienna engineer named Pollak has made a discovery which seems to have solved the question of the rapid transmission of telegraphic messages. By a process only requiring the use of a simple apparatus Herr Pollak is able on the same telegraphic line to wire 60,000 words an hour. The details of this remarkable invention have been bought up by a stock company, which states that up to the present they have met with great success.

If a child is taken with a contagious disease, its father misses an opportunity if he doesn't trace the origin of the disease back to a time when the family went visiting.

When you predict that a man can't do a thing and he does it, how wise he looks!

"They says" are usually liars.

WON A CIRCUS SHAKING DICE

Soldier Profited by Introduction of Craps in the Philippines.

Private C. W. Freeman of Company A of the returned Colorado regiment introduced the diverting game of "craps" in the Philippines and incidentally won a circus thereby. He is also reputed to have brought with him $9,000 which he secured in his operations. He told this story the other day at San Francisco, says the Chicago Times-Herald:

"While Warner's circus was in Manila I had a pair of ordinary dice with me and would toss 'em about with the show hands just for fun. The proprietor came along, and I happened to flash a $50 note.

"'I'll shoot you $50,' says the boss.

"'Never shot that much, partner,' says I, 'but I'll go you one just for luck.'

"He won $250 that night, and then I excused myself to get some coin from my brother, and I got some 'bones' that I knew how to throw. I won $700 from him and his whole circus except two monkeys that I didn't want. I kind of felt sorry for the boss, because he was old, so I gave him back his show."

Yankee Pine For Cecil Rhodes.

An order for 500,000,000 feet of southern yellow pine, the largest single order in the history of the lumber trade, for use in the construction of Cecil Rhodes' proposed Cape to Cairo road in Africa, is said to have been consummated, says a Kansas City dispatch to the New York Journal. Twenty mills along several Texas and Louisiana railroads are under contract to fill the order.

Both Name and Reputation Bad.

According to Professor Howard, the evil work ascribed to the alleged "kissing bug" was done either by the melanolestes picipes, the opsicoelestus personatus, the cannibal bug, the coriseus subcoloratus, the spotted corsair, the blood sucking conenose or the rhasalus thoracius, says the Boston Globe. It is easy to believe that bugs with names like those would be capable of anything.

Still More Counterfeiting.

The Secret Service has just unearthed another band of counterfeiters and secured a quantity of bogus bills, which are very cleverly executed. Things of great value are always selected for imitation, notably Hostetter's Stomach Bitters, which has many imitators but no equals for disorders like indigestion, dyspepsia and constipation.

Bulwer Lytton: Enthusiasm is the genius of sincerity and truth accomplishes no victories without it.

Utica Cleansing Compound, Utica Compound Paste, Utica Toilet Compound, Utica Liquid Compound in packages for family use, ask for it.

HOW'S THIS?

Utica Toilet Compound for the hands and skin. Salt or fresh water baths, shampooing poison oak, bites, cuts, sores, burns etc.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for FREE $2.00 trial bottle and treatise. DR. R. H. KLINE Ltd. 931 Arch St. Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

I believe Piso's Cure is the only medicine that will cure consumption.—Anna M. Ross, Williamsport, Pa., Nov. 12, '95.

Ask your grocer for Utica Cleansing Compound for washing clothes, blankets, flannels, silks, carpets, and for general household use.

Big Welcome to Four Soldiers.

Four young men who returned from honorable service in the Philippines were given a splendid reception at Harrisburg recently. They are Jesse and Frank Wall, Charles Pastor and Charles Delaney of the Tenth Pennsylvania. Almost the entire city took part in the reception to the heroes, says the New York Journal. They were escorted to the Grand hotel for supper. Afterward there was an address of welcome by the mayor and speeches. All the militia and secret and civic societies in the city paraded, and there was a grand display of fireworks.

No Luck In a Horseshoe.

"Do yer belave there's luck in a horseshoe, Dennis?"

"Not a bit, Norah; hung wan over the childer's cradle an it fell an bruk his nose."—Boston Commercial Bulletin.

The Man Who Lost Hope

Mr. H. N. Warner, of Minden, Neb., said:

"In 1891 I was attacked with paralysis in my left side. You might stick a pin to the head into my left hip and I would not feel it. I was unable to do any kind of work and had to be turned in bed. I made up my mind that I could not be cured as I had used all kinds of medicine and had tried many doctors. I was advised to try Dr. Williams' Pink Pills for Pale People, and commenced their use last September. Before I had finished my first box I felt better, and by time I had used six boxes the disease had entirely disappeared, and I have not been so free from pain since I was a boy. The paralysis also disappeared, and although two months have passed since I finished my last box, there has been no recurrence of the disease." *From the Gazette, Minden, Neb.*

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box. 6 boxes $2.50

Sour Stomach

Back up a sewer, and you poison the whole neighborhood. Clog up liver and bowels, and your stomach is full of undigested food, which sours and ferments, like garbage in a swill-barrel. That's the first step to untold misery—indigestion, foul gases, headache, furred tongue, bad breath, yellow skin, mental fears, everything that is horrible and nauseating. CASCARETS quietly, positively stop fermentation in the stomach, make the liver lively, tone up the bowels, set the whole machinery going and keep it in order.

Don't hesitate! Take Cascarets to-day and be saved from suffering!

"After I was induced to try CASCARETS, I will never be without them in the house. My liver was in a very bad shape, and my head ached and I had stomach trouble. Now, since taking Cascarets, I feel fine. My wife has also used them with beneficial results for sour stomach."
JOS. KOEHLING,
1921 Congress St., St. Louis, Mo.

Cascarets

DRUGGISTS

CASCARETS are absolutely harmless, a purely vegetable compound. No mercurial or other mineral pill-poison in Cascarets. Cascarets promptly, effectively and permanently cure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhœa and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Be sure you get the genuine! Beware of imitations and substitutes! Buy a box of CASCARETS to-day, and if not pleased in every respect, get your money back! Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK.

A Mortgaged Bride.

When a Chinaman falls in love, he can be just as sharp and full of guile as the "Melican man." Chow Sam Lung, therefore, when he looked upon little Ah Moy and saw that she was beautiful and young, at once fell down and worshiped, figuratively speaking, and began to investigate as to his chances of making her his wife.

Now, Chow Sam Lung was young himself and a very successful gambler by profession, being the keeper of a gambling house in San Francisco. But the cruel parents of Ah Moy had promised her to old man Low How for his fourth wife and would not retract their promise. Did Chow Sam Lung sit down and bewail his lot? Not at all. He at once made her father's acquaintance, and, beguiling him into his gambling place, proceeded to let him play and win. Then he played and lost. And Chow Sam Lung said: "No matter, you me my friend. I will trust you."

After awhile the old man owed Chow Sam Lung $1,400. Now, old man Low How was to give Ah Moy's father $1,000 on her wedding day, but when New Year's came, and every Chinaman must pay his debts before he can paste his prayer in the josshouse, Ah Moy's dad was short and failed to raise the $1,400. So Chow Sam Lung, who had previously taken a mortgage on the girl, promptly foreclosed it and took her to his home in the very face of old man Low How. And that's what happened in San Francisco Chinatown. And Ah Moy was very muchee happy.—San Francisco Call.

Paid It In a Hurry.

Some years ago a woman was returning late at night from a social function down at the lower end of the Old Colony railroad. She took to the track as the shortest way home, but in crossing a small trestle above the country road she made a misstep and in falling broke her neck. The next day her husband called on the superintendent, and while not appearing to be very deeply grieved over his loss, yet he felt that he was entitled to some compensation for the untimely ending of his wife.

"She was trespassing," replied the superintendent, "which relieves the company from all responsibility."

"I know it," replied the man, "but she was a good woman about the house, and I hardly know what I am going to do without her."

"Well, on what basis will you settle?"

"She fell how many feet?"

"About 12 I should say."

"Do you think a dollar a foot is too much?"

The superintendent nearly fell from his seat. Upon recovering he paid the man $12, which he charged to his own account, as he felt that the experience was well worth the price.—Boston Globe.

Gold and Silver Signs.

Nearly $100,000 worth of gold and over $200,000 worth of silver are left out of doors, unguarded, every night the year round in Greater New York.

No one ever thinks of stealing it, and indeed, until some inventive thief comes along the owners need have no fear, because the wealth is securely glued down and generally from ten to 100 feet above the sidewalk.

It is on the signs of the city. Gold and silver leaf, far purer than the metal which Uncle Sam uses for his coins, amounting in value to over $200,000 a year, is used on the signs of this city. One brewery alone spends $50,000 annually for gold and silver leaf. Next to the brewers the cigar manufacturers go in most extensively for gold and silver signs, while a good authority has estimated that on the windows and above the doors of New York's drug stores there is enough gold to tempt any number of thieves.—New York World.

Also Anxious About It.

"I would like to know," said the gruff old father to the young man who had been calling with considerable frequency, "whether you are going to marry my daughter?"

"So would I," answered the diffident young man. "Would you mind asking her?"—Chicago Post.

Accounting For the Shortage.

"Brimble seems to have a good deal more money than brains."

"Yes. All he inherited from his father was the money."

PRETTY CLEVER HORSE.

Never Tied by Its Master Because It Knew So Much.

"You see that little horse over there," said Major Tom Williams, standing on the edge of the sidewalk viewing a small black pony. "That horse has more of the traditional horse sense than his size would show for." He continued, "Watch him."

The major whistled a few times, and the little horse, which was nibbling from a bale of hay on the sidewalk, raised his head and crossed the street. He brought the cart to which he was attached at a standstill just in front of the major.

"You see," said Major Williams, "that horse has an eye for distance. I couldn't have driven him better than that. That horse, too, is a natural scavenger. He will pick up anything he sees on the street, if he wants to eat it. I never hitch him when I get out of the team, and he goes the length of the block picking up banana peelings, eating hay, corn or anything he takes a fancy to. When I want him, I only need to whistle."

At this point a large, white dog brushed against the major with a friendly wag of the tail.

"You never saw that dog kiss the pony, did you? Well, watch him."

Major Williams climbed into his cart, and, calling the dog, said, "Kiss him." Without a moment's hesitation the dog ran to the head of the horse, and, jumping several feet off the ground, "kissed" the pony several times.—New York Mail and Express.

Looking For It.

There is a patent lawyer in town who has a number of very bright children, so bright, indeed, that their fun loving "dad" is invariably forgiven for telling "what my boy said" to the men in his office. Here is the latest:

"I've got a tool chest out at my house that would make a carpenter sick with envy. I've been buying tools for it for 20 years. Of course I never let the youngsters touch it.

"The other day my wife went up stairs and found 'Bookie,' my youngest, 2½ years old, monkeying with that chest. He had the lid up and his head thrust in under it.

"'Bookie,' said my wife, 'what are you looking for?'

"And the youngster, knowing he had been caught, looked up and with a twinkle in his eye said:

"'Lookin for twoouble?'"—Chicago News.

Paradoxical.

"Doctor," said the patient who runs to useless philosophical contemplations, "ague, it appears to me, is one of nature's contradictions."

"How so?"

"It gives you the shake and yet it stays right with you."—Detroit Free Press.

Out of His Sight.

"Get out!" commanded her father. "Don't let me ever see you here again."

"Very well," replied the confident young man. "Your daughter can tell you the nights I am to call, and you can arrange to be out until I leave."—Philadelphia North American.

The Tibetan highlands of Asia have an area of 770,000 square miles, and range from 13,000 to 15,000 above the sea.

Some men don't appear to be crooked until they are in straitened circumstances.—Cleveland Leader.

"For the Sake of Fun Mischief is Done."

A vast amount of mischief is done, too, because people neglect to keep their blood pure. It appears in eruptions, dyspepsia, indigestion, nervousness, kidney diseases, and other ailments. Hood's Sarsaparilla cures all diseases promoted by impure blood or low state of the system.

He Took the Hint.

General Harrison, in 1889, sent Dr. Bedloe of Philadelphia to Canton as consul. During his term the doctor was spending a month or two in Washington and was largely in evidence in social and political circles. About this time the Gridiron club gave a dinner and both gentlemen were guests. The doctor told a few stories early in the evening, and later on the president made a speech.

"I was charmed," he said in his soft, graceful way, "to hear the clever anecdotes from our distinguished consul to—I mean from Amoy." Then he passed on to other topics, but the doctor took the hint, and the next steamer carried him back to his post.

It was not the first time that Dr. Bedloe had experience with presidents at club dinners. Once President Cleveland was a guest at the celebrated Clover club in Philadelphia, of which the doctor is a famous wit. The Cloverites always interrupt their guests when they rise to speak. Knowing this, Mr. Cleveland began:

"Go on, gentlemen; I am prepared for the worst."

There came an instant's pause, and the doctor cackled shrilly:

"So are we."—Philadelphia Post.

Music and Matrimony.

Captain Becker, an official of the Kongo Free State, won the affection of many of the natives in a very curious way. He bought a good loud playing barrel organ and allowed the natives to turn the handle. The captain was very anxious that the people should be married in accordance with the Christian religion, and when it was known the organ would be played at all such marriages the increase in the number of Christian weddings was remarkable. Things were generally arranged so that one wedding took place each day, in order that the organ might be heard regularly. It turned out afterward that several couples had been married twice, in order that the organ might be played at their nuptials.—Sussex News.

Fatal Hesitation.

"It appears that Charlie asked her to marry him."

"Yes."

"And she hesitated before she said 'yes.' Then Charlie said, 'Take a little time to think it over.'"

"Well?"

"And Charlie has never said anything more about it."—Cleveland Plain Dealer.

Didn't Like the Taste.

"When Colonel Richard I. Dodge," says the Kansas City Journal, "was in command of one of the southern Kansas forts many years ago, he was astonished one day to receive a delegation of Indians who complained to him of the quality of the soap issued to them by the government.

"Thinking it would be impossible to make soap too bad for an Indian, Dodge investigated, with the result of finding that the tribe had been eating their soap allowance and didn't like the taste."

A LITTLE WOMAN.

Perhaps you never knew her? She
Was only known to those who love her
And still revere her memory,
Pure as the stars that shine above her.

By God's strange providence bereft
Of father, sister, friends and brothers,
And homeless, joyless ever left
She freely gave her life for others.

If grief she had she did not tell;
We dared not ask—we never knew it;
Her heart was like a hidden well,
Deep—sealed—and only God saw through it.

On errands sweet with mercy, swift
She moved—her smile of joy the token;
Her willing hands the weight would lift
From many a heart, despairing—broken!

And many a life bowed down with shame
Beneath her tender touch grew human;
And lips that prayed not breathed her name
And said: "God bless that little woman!"

The day she died they came to me
And said: "No boon would we deny her;
Some word above her grave must be,
Now that the Lord has called her higher."

I wept—but did not weep alone,
Because my grief was theirs in common;
Said I: "Place nothing on the stone
Save this: 'Here lies a Little Woman!'"

HER FAITH.

"I can't stay, an' wont. 'Tain't in human natur'," muttered Ann Friend. "Always the same! Sunshine for others, shadows for me!"

"Where's the slate, honey? Where's the slate?" piped a quivering voice, as Ann stepped into the dim kitchen and began to bustle about energetically. "We mun cross it off, honey; we mun cross it off. 'Tis the 21st to-day, and the boy comes home on the 26th, bless the Lord!"

"Here, 'tis, mother-in-law. Bide quiet a bit while I sets the kettle on the hob."

"Five days, five days," echoed the old woman. "We mun be busy, honey, and get the place set clean, and the sheets aired; and I'm thinking, Ann, if you was to put the things ready for me I might make the ginger cake he used to set such store by, eh?"

"Now, mother-in-law, I'll not have you messing around and making yourself ill." Ann spoke with decision. "What's good enough for us is good enough for him."

"But, Ann—'tis my son John—'tis your own man, Ann!"

Ann's face grew harder and harder as she left the kitchen and went upstairs to her bedroom.

"I can't stay, nor I won't!" said Ann Friend, suddenly, as she stood looking out of the window. "Nobody could expect me to stay. She won't care so long as she's got him, and he won't care so long as he's got his liberty and a roof over his head."

Bending down she drew a box from under the bed and began to pack into it the contents of the one chest of drawers that stood in the room.

At the bottom of the last drawer she came upon a little bundle of baby's clothes, and for a moment the hardness of her face softened while she unfolded each tiny garment and examined it carefully. Then the cloud returned, and the clothes were once more tied into a bundle and returned to the now empty drawer.

"'Tis well she died," she thought to herself. "'Tis well she can't be ashamed of her father. I'll leave them there; he'll like maybe to see how tall she grew."

Four years ago Ann Friend would have told you that she was one of the happiest women in the whole village, and the village itself would not have have disputed the fact. Yet in two short years the happiness fled, the husband was a disgraced man, and Ann, whose good temper was proverbial, knew herself to have changed into a soured, hard woman.

The inhabitants of the little village where Ann had been born and bred said among themselves that Mrs. Friend was a rare good woman and had borne the disgrace of her husband's imprisonment as few women would have borne it.

They never knew the rage that took possession of proud Ann Friend when the shadow of disgrace fell upon her home. They never knew the bitter contempt that filled her heart when she thought of the father of her child working out his sentence in the neighboring prison.

"If you are innocent, prove it," was his wife's thought, but the thought was never put into words, for Ann was one of those strange characters whose thoughts are worse than their actions.

The mother believed in her son's word and counted the days for his return; the wife allowed her to believe that she did likewise. Some of the neighbors believed also in John's innocence; the wife held her peace, and they accounted her loyal.

Every day Ann determined to break down her long reserve—to tell the old woman that she, John's wife, would rather die than be there in person to welcome him home, yet each day saw the momentous words unspoken.

At last the morning of the 26th arrived. The explanatory letter was written and pinned on the pincushion; the box, corded and addressed, stood in the outhouse on the handcart she intended wheeling to the nearest station; the old mother had been dressed in her best Sunday gown and cap; the coffee stood ready on the hob, and still the silence of two years had not been broken.

"I may as well see how prison's agreed with him," thought Ann, as she looked at the clock and saw it was just about 7:30, and then felt irritated with the consciousness that this thought had been behind all her actions for the last two hours.

With a sullen face Ann left the cottage and took a short cut through the fields to where, standing on a low, fir-clad hill, she could look down unperceived on the roads below. There were two roads—the broad white road from the distant town that held the prison, and which wound its way onward to the next large town, and the curved, narrow lane that met it and struck downward on the left to the little village of Frant, passing the Friends' cottage on its way.

Ann knew that prisoners were released from Newham jail at 8 o'clock in the morning. She knew that John must come to where the roads crossed. After one look at the disgraced man she would have time to run home and start with her box in the opposite direction before he sould reach the cottage, so she stood there and waited, and was angry with herself for waiting—angry because the minutes went so slowly, then angry because they had gone so fast, when a solitary figure appeared walking in the center of the road, make it suddenly seem broad, white and cheerless.

The man, for it was a man, walked slowly, hesitatingly. He felt his way with a stick, as if he was blind.

Yes, it was John; but why did he walk like that, instead of swinging along in his old hearty manner? Perhaps he felt ashamed. Serve him right if he did.

He came nearer and nearer, and, as she saw that he had a green shade over his eyes, the color left her cheeks, and, forgetting to hide herself as hitherto, she went to the extreme edge of the little hillock and looked down intently.

When the man came to the cross-roads he stopped and stood facing down the narrow lane for full five minutes.

It was a poor, pitiful sight upon which the sunshine shone—the poor, maimed face, with lurid smallpox marks and swollen features. To some it would have been a repulsive sight; it brought but a hungry, yearning look into the eyes looking down upon it.

And then, slowly, deliberately, the man turned away from the lane, stepped again into the center of the road, and continued his way.

"My God! he is going away—he is not coming home!" gasped Ann; and, forgetful alike of her wrongs, her resolutions, she tore down the steep bank, rushed after the stumbling figure, caught the man by the arm, and cried:

"John, John, you have taken the wrong turning! This is the way home, dear!"

"You see, my lass," said John Friend, leaning on his wife's strong arm, "the doctor told me I was a sad sight, and I thought perhaps you would not know when I was a-coming out, and I'd go into Gorrick for a spell, till my hair had grown and my eyes and face were a bit better; but you was always a good wife, lass; and how I should have got through these two years without knowing as you believed I hadn't done it, I don't know. You was always a good home."

And the innocence Ann failed to believe in when John Friend was hale and hearty she believes in now that he is helpless and disfigured.—London Telegraph.

SCIENTIFIC FROG FARMING.

Increased Demand in Cities Has Given the Business an Impetus.

Bull frog farming is becoming a recognized industry in Indiana. Within the last few weeks the new branch of culture has been established in many sections of the State on most extensive basis. Farmers have found that the frog is commanding a ready market and brings prices that cause the farmer to open his eyes.

Frog farming is being reduced to a scientific basis. The farmers have already found that not every frog that croaks during the hours of the night has a commercial value. It is only the American bullfrog, whose croak comes at long-measured intervals and sounds like a grand "amen" above all of the other croakings that has a commercial value.

The new farmer has also acquired a scientific knowledge on bagging his crop. Any man who has attempted to catch a frog knows that it is not the easiest thing in the world. Science, however, has solved the problem and the farmer goes up and picks his frog off his perch just as though he was an ear of corn on a stalk.

The growing demand in cities for frog hams has created this industry in a marvelously short time. In all first-class restaurants in cities frog hams have become as fixed a delicacy for the menu as any other of the food stuffs. For a long time this demand was filled by boys and young men, who went out and gathered the frogs, toads and everything they could get hold of. Now there are many frog farms scattered over Indiana. Farmers have found that their swamp lands, which have been considered worthless, have great value if they are sown in bullfrogs in the fall. Streams running through their lands are even better for the cultivation of the frog, and if that stream has marshes on each side and reeds and a mill dam and some picturesque points it seems to have a decided additional value.

Frogs of the best grade—big American bullfrogs—now command all the way from 60 cents to $1 a dozen, according to the market where they are offered for sale. The frog farmer should be able to catch all the way from 100 to 200 a night, or 1,000 a week, and put them on the market. There are some Indiana farms turning out such crops. This represents a big amount of money. The farmer is at practically no expense after he gets his farm well stocked.

The scientific method of bagging the crop is the result of an Indiana man's ingenuity. He is Thomas Farrer, of Shelbyville, who perhaps knows more on the subject of practical frogology than does any other man in the Mississippi valley. For some years Farrer was in the habit of going to the wilds of Arkansas annually on hunting and fishing expeditions. He discovered, while out at night carrying a blazing pine knot, that the frogs would cease croaking as the light passed, but would not jump into the water. The thought occurred to him that perhaps they were charmed or delighted with the light, as seals are said to be with music. The thought of trying to catch one of the big frogs that abound in that section was carried into execution, the result being that with the aid of a light he had no great trouble in picking them up. He found that the brighter the light the easier his task was and the more deeply hypnotized was the frog.

This began the evolution of the present calcium light effect which he gets by taking an ordinary new tin bucket, shifting the handle to the side and putting a lantern inside of it. The bottom and sides act as a reflector, and with the shifted handle it is easily carried and the light thrown full glare on the frog. When it hits his eyes he is asleep and he knows nothing more until he is safely inside of a bag which the hunter swings around his neck.

CATCHING FROGS AT NIGHT.

Curious Calvary Clover Bulb.

A most remarkable little plant, which is exciting not a little attention among plant lovers, is the calvary clover (medicago echinus). Though generally supposed to be a native of Palestine, this pretty and curious little plant will live and grow freely in the somewhat smoky atmosphere of Chicago.

Admirers of this plant say that to produce healthy and thriving plants it is necessary to sow the seed on Good Friday, while the more unimaginative say that some time during the spring will do just as well.

When the little leaves of the calvary clover first appear above ground each division of the leaf has a deep red spot like freshly spilt blood upon it, which lasts for some weeks and finally fades away.

The three leaflets composing each leaf stand erect during the day in the form of a cross, with the head in position and arms extended, but as the sun begins to set and evening to draw on the tiny arm leaflets are brought together and the top leaflet, or head, is bowed over them.

A man thinks himself superior to a hen, yet a hen can sit on an egg without getting mad.

You can make yourself happier by letting some one else do the kicking.

SOME CURIOUS WILLS.

MAKERS OF TESTAMENTS SHOW PECULIARITIES.

Several Cases in Which Testators Have Made Most Unusual Disposition of Property—One Wished to Pay Off England's National Debt.

A testator, who evidently intended to thwart his relatives and be a benefactor to the lawyers, gave to certain persons "as many acres of land as shall be found equal to the area inclosed by the track of the center of oscillation of the earth in a revolution round the sun, supposing the mean distance of the sun 21,600 semi-diameters of the earth from it."

Sir Joseph Jekyll left his fortune to pay off the national debt. When Lord Mansfield heard of this he said: "Sir Joseph was a good man and a good lawyer, but his bequest was a foolish one; he might as well have attempted to stop the middle arch of Blackfriars bridge with his full-bottomed wig!"

Lord Pembroke gave "nothing to Lord Say, which legacy I give him because I know he will bestow it upon the poor;" and then, after giving other equally peculiar legacies, he finished with: "Item, I give up the ghost."

Dean Swift's character was exemplified in his will. Among other things, he bequeathed to John Gratton, of Clonmethan a silver match box, "in which I desire the said John to keep the tobacco he usually cheweth, called pigtail."

In an interesting book called "Curiosities of the Search Room," published by Chapman & Hall some eighteen years or so ago, will be found the following remarkable bequest made by a Jonathan Jackson, of Columbus, Ohio. In his will he left orders to his executors to erect a cat's home, the plans and elevation of which he had drawn out with great care and thought. The building was to contain dormitories, a refectory, areas for conversation, grounds for exercise, and gently sloping roofs for climbing, with rat holes for sport, and an "auditorium," within which the inmates were to be assembled daily to listen to an accordion, which was to be played an hour each day by an attendant, that instrument being the nearest approach to their natural voices.

An infirmary, to which were attached a surgeon and three or four professional nurses, was to adjoin the establishment. No mention seems to have been made of a chapel or a chaplain! The testator gave as his reason for thus disposing of his property that "it is man's duty as lord of animals to watch over and protect the lesser and feebler, even as God watches over and protects man."

In cases of emergency there is sometimes no time to call in a solicitor, so you must either make your own will or die intestate. There was a case once where a gentleman went out shooting, and in getting over a hedge the contents of his gun were lodged in his body. A friend and gamekeeper immediately ran to his assistance, but the unfortunate man found he was sinking fast and had but a few minutes to live. He asked for a pencil and paper, and, his friend bringing out his pocketbook, the wounded man wrote on one of the blank leaves: "My will—I leave all to Peggy." He then signed it, his friend and the gamekeeper doing the same, and a few minutes later the poor fellow died, with his wife's name on his lips. By this will, which was perfectly valid, the wife, to whom he was fondly devoted, was properly provided for. Without it she would have starved, as her husband's property would have gone to his heir-at-law, who was a reprobate cousin.—Ally Sloper.

TOPICS OF TIMES

In Belgium a new fuel has been invented called "vesuve," made of peat and rosin.

It is a popular belief that a holly bush planted near a dwelling protects the house from lightning.

There are in New York city about 100,000 who are exempt by law or circumstances from jury service.

New York leads all the states in the production of paper, Massachusetts is second and Pennsylvania fifth.

The Roman Catholic Bishop of Maitland, Australia, has forbidden the use of flowers at funerals in his diocese.

Two streets in Pinar del Rio, Cuba, which have heretofore borne the names of two saints, will hereafter be called Gomez and McKinley.

The results of recent drillings in Borneo have caused many persons to think that Borneo will prove to be the richest petroleum field in the world.

The largest insect known to entomologists is a Central American moth called the erebus strix, which expands its wings from eleven to eighteen inches.

The horse has a smaller stomach proportionately than other animals, because the horse was created for speed. Had he the ruminating stomach of the ox he would be quite unfitted for the labor which he now performs.

The ports of New South Wales are the freest on the globe, and in none of the Australian colonies are there any discriminating or differential duties.

Vanderbilt University, in Tennessee, is to have a new dormitory, to cost $125,000. It is to be called Kissam Hall, and is named after Mr. Vanderbilt's mother.

Charcoal is the great Italian fuel, Naples alone consuming 40,000 tons of wood charcoal, at a cost of from $16 to $20 a ton, the national consumption being 700,000 tons.

Out of 124 law students called to the London bar in one day not long ago (which establishes almost a new record in London) as many as nineteen have oriental names.

On the electric railways of Milan, Italy, the general fare is 2 cents, but for the benefit of the working people the fare is 1 cent before 8 a. m. in the summer and before 9 a. m. in the winter.

The wild horses of Arabia will not admit a tame horse among them, while the wild horses of South America endeavor to decoy domesticated horses from their masters and seem eager to welcome them.

The Kansas Bureau of Labor reports that six of the street railways of the State cost $842,729 and are assessed at $76,000, or 9 per cent. of the cost. The telephone plants of the State are assessed at 13 per cent. of their cost.

Something like $65,000,000 of insolvent indebtedness is said to have been wiped out or discharged since the federal bankruptcy act went into effect. Most of the indebtedness was of long standing and practically uncollectable.

Among the small islands which came into the possession of the United States with Porto Rico is the barren peak of rocks which the Spaniards call La Mona. On this island, tradition says, the old buccaneers deposited great treasure. In 1889 an American company was formed to seek the hidden riches. No jewels were found, however, though the deposit of guano made the venture a financial success.

It is claimed that the pressed steel freight car is a demonstrated success and that its use is increasing very rapidly. A Pittsburg company, with a capital of $25,000,000, is manufacturing cars of this kind, and has untilled orders for $14,000,000 worth of them. The factories of the company employ 6,000 men and are being run day and night. An additional plant to employ 4,000 men will soon be completed.

Among the souvenirs which are being treasured by a lot of Kansas mothers are letters from their soldier boys written on pieces of cartridge boxes with pencils made of sharpened bullets. Such a letter was received from her son by Mrs. Johnson, wife of the Supreme Court Justice, the other day, and in it the young man said he had suffered no other injury except an arm which was black and blue from the elbow to the shoulder from the kicking of his gun.

When William Reed, a farmer of Villa Park, N. J., after advertisement and correspondence, found a "young woman" of Long Branch who was willing to become his wife, he set the day for the ceremony and prepared a great wedding feast in celebration of the event. The "bride" appeared on time, but while a large number of uninvited friends were partaking of the banquet she mounted a bicycle and rode away. It turns out that "she" was a beardless boy who, with some friends, had put up a joke on the farmer.

Indian Names.

Poor Lo! He has all but passed away. Tepee City, Squaw Valley and Sachem's Head show that he was once among us, as do also Indianola and Indianapolis, Indian Bay, and Indian Bayou, Indian Bottom, Camp, and Creek, Indian Diggings, Falls, Gap, Gulch, and Head, Indian mouth, neck, ridge, and river, Indian rock, run, springs, and town, Indian trail, and Indian valley. He has left behind him his kinnikinnick that he used to smoke, his moccasins that he used to wear, Medicine Lodge that he used to visit, and the wampum for which he bartered his pony or his beaver skins. He has left behind him also the Indian names of many familiar objects, though the memory of these meanings have all but been forgotten. Mondamin means corn, Wawa, wild goose; Opeechee, the robin; Dahinda, the frog; Roanoke, a sea shell; Chicago, the wild onion; Omeenee, a pigeon; Wawbeek, a rock, etc.

The Indian has left behind him hundreds of musical alliterative names, in which the consonant or vowel sounds are doubled. Good examples are Wawaka and Wawasee, Kankakee and Kennekuk, Tuscaloosa and Tallahassee, Ocklocknee, Ohoopee and Oshkosh, Minnetonka and Massabesic, Contoocook, Loogootee and Hatchechubbee. We like to roll his Kennebunk and Cuttyhunk, his Nantucket and Wachusett, his Kickapoo and Tetonka over our tongues, for the mountain breezes and breath of the prairie are in them, and ill indeed could we spare them.—Self-Culture.

Out of Pocket.

The chief employment of the Shetlanders is fishing, and they evidently can not understand any one fishing for amusement.

I was having a little fishing in a lake in one of the Shetland Islands one summer, and had been at it all day, but had only caught one small trout.

An old man, who had been eagerly watching me the whole time, came close up to my side and asked:

"However much have you to pay for that thing?" pointing to my fishing rod.

"About a sovereign," I replied.

"And how much for that, and that?" he asked, pointing to my various flies, minnows (artificial) and other fishing tackle.

I told him. After gazing at me for some time as if in doubt, he at last exclaimed:

"Man, you must be terribly out of pocket with the day's work."—London Spare Moments.

The woman who has the knack of bossing her husband never travels about the country howling for her rights

QUEER POISON PLOT.

GIRL'S SCHEME FOR GETTING RID OF A RIVAL.

In Love with the Latter's Husband, She Mailed Herself Poisoned Fruit to Have the Guilt Fixed on the Innocent Wife.

Miss Florence M. Campbell, of San Francisco, was infatuated with John Rathom, a married man. She got the idea into her head that if she could get rid of Mrs. Rathom by bringing about a divorce Rathom would marry her. This was the sole purpose of a plot that would have done credit to Lucretia Borgia. It is admitted by the girl, and her confession has been sustained by the investigations of detectives. Miss Campbell did not wish to kill the woman who stood in her way. She merely wished to blacken her character with a false charge which would land her in prison and give Rathom an excuse for obtaining a divorce.

Mrs. Rathom and Miss Campbell were at one time close friends and had carried on a correspondence. The latter had several of Mrs. Rathom's letters in her possession, and one day a devilish scheme came into her head. She would mail a box of poisoned fruit to herself; the address on the cover would be apparently written by Mrs. Rathom, and this would afford the desired means of prosecuting the woman into prison.

Miss Campbell bought some candied cherries and loaded them with arsenic. Then, taking one of Mrs. Rathom's letters addressed to herself, she trimmed down the envelope so as to get rid of the old postmark and pasted it on the box. Her next move was to mail the

FLORENCE M. CAMPBELL.

package. This done, she later called up by telephone the residence of Mrs. Scheib, where she boarded, and, imitating the voice of Mrs. Rathom as closely as possible, inquired whether Miss Campbell had received a package by mail. This was another move to fasten guilt on Mrs. Rathom, as Mrs. Scheib, when questioned by the police, said it was undoubtedly the latter who had talked over the telephone.

In preparing the box of poisoned fruit Miss Campbell had been careful to leave the top layer of cherries undoctored. She did this for the reason that she would have to pass the box around among the members of the Scheib family when she received it, and, as she did not wish to poison anybody, the top layer could be eaten without danger. Later she would make the discovery that the rest of the contents were poisoned, give the affair into the hands of the police, and the running down of Mrs. Rathom would be easy.

As luck would have it, after sampling the contents of the box the afternoon it was received Mrs. Scheib complained of not feeling well, and innocently said she thought the cherries had made her sick. Miss Campbell, her nervous system overwrought by excitement, at once imagined a horrible condition of affairs. "What," she argued to herself, "if I have made a mistake and put some of the poisoned fruit in the top layer?" The more she thought of it the more nervous and apprehensive she became, and finally she imagined she also felt queer pains in her stomach. Then she was sure both she and Mrs. Scheib had eaten the poisoned fruit and were going to die. She rushed to a drug store and got an antidote, consisting of mustard and soap, swallowed a lot herself, and hastened back home to the relief of Mrs. Scheib.

In the meantime the druggist had informed the police of the poisoning case. Detectives called at the Scheib home and took possession of the box of fruit. Chemists analyzed the cherries and said they contained arsenic enough to kill a herd of cows. Experts examined the address, and, prompted by the information given by Miss Campbell, found it was in the handwriting of Mrs. Rathom. Thus far the plot had worked well, with one exception. Mrs. Rathom was implicated, all right, but Miss Campbell was afraid that both herself and Mrs. Scheib were going to die. She said things in terror that the police remembered, and when they ran against a snarl one day that they could not unravel they came back to Miss Campbell for explanations.

Neither Miss Campbell nor Mrs. Scheib had really partaken of the poisoned fruit. The illness of the latter was caused by some slight trouble, while the girl suffered solely from a guilty conscience and high nervous tension. They both recovered speedily. For nearly a month the police worked on the mystery. It was soon settled, despite the incriminating address, that Mrs. Rathom could not have sent the package. Detectives ascertained that a young woman answering the description of Miss Campbell had bought cherries at one place and arsenic at another, and had been noticed by the postal clerks when mailing the package. Gently it was intimated to Miss Campbell that she might have sent the box herself. She repelled the charge indignantly. Then the officers asked her to explain some of the odd things she had said when she thought she was dying. She tried to do so and made a sorry mess of it. Little by little they tangled her in a web of contradictions, and at last she broke down and told the story virtually as given in this article.

Miss Campbell is an attractive woman of good family. She is the daughter of Hon. John A. Campbell, of Cumberland, W. Va., and a graduate of Hiram College, Ohio. She went to California with letters of introduction to Senator Perkins and other prominent people, and has been well received in society there.

MEN AS CUSTOMERS.

Clerks Find Them Much Easier to Wait Upon than Women.

A saleswoman sees phases of human nature that are seldom revealed under other conditions, and there is enough of truth in this sketch—from the Philadelphia Times—to make it interesting to both sexes.

The saleswoman whose duty it is to wait upon men was not thus engaged. She had gone to serve a woman, who proved to be an extremely hard customer to suit, calling for one style after another. The clerk was becoming discouraged, and beginning to feel as if she didn't care whether a sale was made.

At this point another saleswoman said to her, "Maud, there's a man," and came to relieve her of the uncomfortable customer.

"Thank goodness!" exclaimed Maud, as she started toward the counter where men's gloves were sold.

"What would you like to see, sir?" she asked of the man who was waiting.

"I want a medium shade of brown, with wide stitch on the back, and fastened with a button instead of a clasp."

The saleswoman placed a varied assortment before him. Quickly selecting a pair, he exclaimed, "Just what I want!" and had one glove fitted. It suited him exactly, and having paid for his purchase, he left the store.

Now what sort of gloves does the reader think this man purchased? They were a dark shade of brown, not medium; they had a narrow stitch on the back, not wide; they were fastened with a clasp, not with buttons.

Perhaps some man can answer this question: Why do women like to wait on men better than on their own sex—because men are so easily pleased, or because they do not really know what they want?

Against Licking Postage Stamps.

In connection with the practice of stamp licking, a medical contemporary says: What layman would suspect that the unassuming postage stamp could become an active vehicle for the spread of deadly ailments? Yet so it is, and the name of "stamp licker's tongue" has recently been brought to our notice by two distinguished medical men. It is known to few that the common postage stamp owes its adhesiveness to the serum of the horse. It follows that the film drawn from such a source may, or even must, at times be charged with microbes of a more or less hurtful nature. If a man licked a large number of stamps daily over a sufficiently long period of time, the chances are he would set up cancer of that much abused member. The danger has long been recognized by the postal authorities of this country, who have placed dampers on the counters of the postoffice.

She Knew His Footsteps.

His enemies may have originated, but his friends do not hesitate to repeat, a story about a rising young politician, who, says the New York Tribune, has large feet, as well as a capacious head.

The politician's mother, a lovable old woman, is unfortunately very deaf. She lives in a flat in the neighborhood of Grant's tomb, and is always delighted by a visit from her son.

When the United States cruiser Brooklyn, which was anchored in the Hudson, off the tomb, on Memorial day, fired a salute of twenty-one guns the old lady was observed to start, fix her cap, and smooth down her apron.

Then she said, with a sweet smile "George is coming. I hear his footsteps on the stairs."

And He Did.

Angler—Hush! Keep back! Keep back! I had a beautiful rise just then. I shall get another directly.—Punch.

Pronounce When Sober.

The latest test for sobriety is a word of twenty-three letters. It is electro-photomicrography, and the meaning as there given is "photographing by electric light objects magnified by the microscope."

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, NOVEMBER 3.....1899

The *Escondido Times*, organ of Federal irrigation, has discovered "a literary bureau" in San Francisco which fulminates in opposition to its views on water storage. It has also nominated and elected Mr. John P. Irish the leader of that opposition and proceeds to souse him in flood waters, in a baptism that ought to drown him or make him stay good. The men who know that our flood waters belong to the State of California are not particularly in need of the leadership of anybody. They have called a convention for Nov. 14 to consult upon the best way to secure the use of this property which is now running to waste. It is an existing property; it belongs to the State and only the State can dispose of it. It is assumed at the outset that the Irrigation Congress at Missoula has the right to dispose of this property, and that its conclusions of policy are proper and indisputable. It is admitted to be a very able body and very representative, but it is a voluntary organization, has no statutory existence, is not a legal entity. It can consult and advise and use its American right to pass resolutions, but it cannot pass laws nor alienate the property of a State without the State's consent. The *Times* mistakenly says that the "promoters of the State scheme seem to start out with the idea that the first thing necessary to be done is to kill off the national moven.ent." This is a misapprehension entirely. The promoters of this convention don't wish to kill anything but to make all alive. If the national irrigationists would cease their uneasy and tormenting suspicions, which impeach the motives of people who are hand in hand with them in pursuit of the same object, and, dismounting from their national high horse would sit down and talk it over like reasonable men, the situation would lose the friction for which they alone are responsible. The situation is that millions of dollars worth of property belonging to the State are running to waste every year. We all want to know how best and quickest to save it. By getting together in the coming convention a way may be found to that end.

War on Governor Gage has broken out from another source. At the meeting of the National Woman's Christian Temperance Union, now in session at Seattle, Mrs. B. Sturtevant Peet, president of the northern California delegation, in an address declared that California had the "weakest and smallest governor on earth." Warming up to her subject, Mrs. Peet continued: "I mean what I say. Governor Gage of California from almost the day of his inauguration, has been the friend of the hoodlum element of the State. He restored prize fighting, he stands for Sunday sports by his vetoes and his signing of bills; he has been against morality and for all that we have fought." They passed resolutions against the canteen in the army and then added the following: "We deeply deplore the attitude taken by our nation with respect to the Philippine Islands, and since governments can derive their just powers only from the consent of the governed, we protest both against the policy which would compel a foreign people to submit to the rule of the United States and against the war through which the administration is striving to enforce its policy." Whatever may be said of the W. C. T. U., however much one may disagree with its members on certain points, the fact that it is a great moral force cannot be denied. When the moral instincts of these women revolt at anything it is almost a certainty that that thing is wrong in the abstract. The expediency of a move may be denied, but no one can dispute with them the moral side.

President Patton of Princeton told his graduating class the other day that the principal business of the college and university was to make men—not to develop scholars and philosophers. Learning that absorbs the man and his manhood and makes of him a mere walking encyclopedia is of small value in this work-a-day world. The intellect is to be trained and broadened, the mind is to be stored and the faculties strengthened, but above all manhood in all that the word implies is what we want in this and future generations. We are not surprised, therefore, that Dr. Patton spoke at length on ethical development in the realm of athletics, dwelling especially on the fact that therein men learn to win, but at the same time they are to be taught and trained to stand off the tyranny of indulgence, and learn how to keep the body under. It is the happy mean between extravagance in athletics and extravagance in scholarship which we need to attain. For neither physical training nor scholarly acquirement should be sacrificed. We can have both men and scholars at the same time.

The use of the automobile in the German army is said to have been a brilliant success. Those tried were very small with two seats, for officer and driver. They carried dispatches or elderly staff officers quickly from one position to another, and sometimes attained and kept up a speed of forty miles an hour. There were several accidents, mostly at night, from reckless driving. Further experiments, it is said, are going to be made in this direction, especially with regard to motor cars as luggage wagons.

In South Africa the English signal corps are to try wireless telegraphy in instances where the wires have been cut by the Boers. If this can be accomplished successfully it will practically render the cutting of telegraph wires on land useless.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - - Plaintiff,
vs.
Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

(SEAL)
P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estate, subject to confirmation by said Court, will sell at private sale, to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven, in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be received at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS,
Administrator of the Estate of Jedediah S. Collins, deceased.
P. H MACK, Attorney for Administrator.
Dated August 23d, 1899.

Notice of Sale of Mining Property.

PUBLIC NOTICE IS HEREBY GIVEN THAT the undersigned, administrator of the estate of John F Ginser, deceased, under the order of the Superior Court of Los Angeles county, will sell at public auction, in front of the postoffice at Ballarat, in the County of Inyo, State of California, on Monday, the 20th day of November, 1899, all the right, title and interest which said John F. Ginser had at the time of his death, and all the interest which his said estate has subsequently acquired, in and to the following described mining property, situate in said Inyo County, to wit: An undivided one-fourth interest in the "AURORA" and "TUBER" mines in the South Park Mining District, (in accordance with location notices duly recorded) together with mill-site located in connection therewith.

Terms of sale: Cash, gold coin of the United States; 20 per cent. of the purchase price payable at the time of sale, and the balance upon confirmation of sale by the Superior Court of Los Angeles County.

Dated, October 14, 1899.

FRANK M. KELSEY,
Administrator of the Estate of John F. Ginser, deceased.
FLINT & BARKER, Attorneys for Administrator.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

WEDNESDAY, Nov. 1, 1899.

Estate of W. R. Tibbetts, deceased—Settlement of account.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:30 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 11 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

BORN.

LAWRENCE—At Independence, Cal., Oct. 21, 1899, to Mr. and Mrs. Frank Lawrence, a daughter.

LABERGE—At Lone Pine, October 29, 1899, to Mr. and Mrs. P. M. Laberge, a son

A. W. D. Carroll was a visitor in town yesterday.

See the assaying card of J. Sub Johnson in this issue.

Mr. and Mrs. Carl Walter arrived from San Francisco on Wednesday's train.

Geo. Montgomery has gone to Los Angelus and will return by way of Ballarat.

H. Giles is expected to arrive to-morrow from a three weeks visit to Los Angeles.

P. H. Mack Esq. left for Los Angeles last Monday and will visit San Francisco before returning.

Mrs. A. W. Eibeshutz arrived home Wednesday evening from a three months visit to San Francisco.

There will be a donation party at the M. E. Church a week from next Tuesday to which all are cordially invited.

Frank Hutchinson, an old time Invoite returned to the County last Monday and was kept busy shaking hands with his friends.

J. J. Gunn got back Wednesday from a trip to Minnietta. He has three men at work and intends increasing his force right away.

D. R. McLaren of Bishop spent several days in town this week on business connected with the settling up of the Tibbetts estate.

Mr. and Mrs. R. J. Laws and Mrs. John Forbes and her little daughter went to Keeler last Monday, returning to Hawthorne yesterday.

Frank Dodge came up from Randsburg on last Monday's stage. He was telegraphed for on the death of his father but did not receive the message for several days.

L. Wood, accompanied by his daughter, Miss Etta Wood, arrived home Wednesday evening last from San Francisco, where they have been visiting for several months past.

Walter Young and George Clarke of Bishop passed through town yesterday on their way to Los Angeles. After a short stay there they will go to Santa Cruz and take a course in a business college.

O. I. Mairs came down from Bishop yesterday with thirteen head of fine large mares which he bought for the Cudahy Packing Company. The average price paid for the lot was $93 a head.

Allie McGee got down last week with the Rickey cattle and has gone back to Long Valley to gather up what may be left. They are in fine condition and there is an abundance of feed on the Blackrock ranch.

The residence of Mrs. A. M. Lubken at Lone Pine was entirely destroyed by fire last Tuesday night. The alarm was given about 11 o,clock but entirely too late to save the building. The fire started outside the house and is supposed to be the work of an incendiary.

THE SALINE ROAD.

The Subject Fully Discussed.

In response to a public call a large and enthusiastic gathering of people met at the Court house last evening for the purpose of discussing ways and means for building a wagon road to connect with present roads between Independence and Saline Valley. The meeting was regularly organized by the selection of P. W. Forbes Esq. as Chairman and Ernest Laird as Secretary. In brief and well chosen words Mr. Forbes stated the purpose of the meeting, enlarging upon the necessity of prompt action, and called for an expression of opinions of those present. A. W. Eibeshutz spoke as follows:

I know that you have come here prepared for the expressions I may make, but nevertheless I know that you expect to hear something of what has been done, and what will be done in this new territory. Now, of my own knowledge I know but little, but from hearsay I know considerable, and I have met a number of people who are thoroughly conversant with this country, and I speak from what they say. I have so much faith in what they say that I am going to tell it to you and let you judge whether or not it will be feasible for us to build a road over here. In the first place I will detail to you what has been done up to the present time. First, a committee of two, Messrs. Cartier and Robinson, went up into this country to find out whether a road could be constructed and the probable cost. Three weeks ago another party went out composed of Messrs. Montgomery, Mairs, Dixon, Spratt, Fuller and Key. I have given the names of all that committee, and I desire to give them all credit, because they volunteered their services and did noble work. These men represent the various interests we have here, mercantile, farming, engineering, and a sawmill man. They came back after a very tedious and hard trip and reported that a road could be built across Lead Canyon, which would in their opinion prove a feasible and economical route. I omitted Mr. Bunney's name as one of this committee. Mr. Bunney went over another route which he reported feasible, and another committee was started out to make an investigation, composed of Messrs. Bunney, Spratt, Irwin and Danielson. They decided the Lead Canyon route to be the most feasible. Among the advantages of having a road through Lead Canyon is the fact that there are not less than thirty or forty mining locations there at precent, most of which could be profitably worked if they had the facilities for getting the ore out at a reasonable cost. On leaving Lead Canyon and coming to Saline Valley we find the following among the inducements for constructing the road: There is a Borax Company there which has increased its plant so that it can now produce one hundred tons of borax per month; and a liberal subscription would be offered by this Company for the construction of the proposed road. The Copper Camp at Saline Valley now in progress of development shows indications of being one of the largest deposits in the United States, and this camp will necessarily receive most of its supplies from Owens Valley, if we had a convenient method of transporting our products there. In the country through which the road is to be constructed the most excellent timber can be had. The timbers from that region can be utilized in the mines at Lead Canyon and at the copper camp, and the farmers when hauling supplies over there can return loaded with wood and lumber.

He was warmly applauded and W. T. Bunney was called to the platform. Mr. Bunney was one of the party who examined the route, had gone into the matter thoroughly, and gave a clear and lucid explanation of the situation. The following are the most important facts:

I was one of the parties who went to look over the road and as to cost there was but one person who went with a view of taking a contract; that was Mr. Spratt. He estimated that the road could be built from a point on the present road in Mazourka Canyon to the Farrington road in Saline Valley for $4,000, by way of Lead Canyon. I have never heard any other estimate. The new road will be about fourteen miles long; six miles on the west slope and eight miles down Lead Canyon. The first two miles from the summit east is a 20 percent grade. It is a lime formation and the road-bed would be solid all the way, with no sand. There would be very little sidehill grading. The canyon bottom would be used for a road-bed all the way down.

Q. How much road did Mr. Lawrence build on the line of the proposed road?

A. Three miles.

Q. How does it compare with the remaining portion to be built as to cost?

A. The cost will be about the same.

Mr. Lawrence was present and stated that the three miles of road built by him cost $500 and that it would cost $200 additional to put it in a good condition for a 16 animal team.

J. C. Irwin, who was also with the party, corroborated Mr. Bunney. He also stated that no part of the proposed road would be as steep as places on the road from Keeler to Cerro Gordo. After a lengthy general discussion a committee of five was appointed to solicit subscriptions, composed of the following named gentlemen: A. W. Eibeshutz, Chairman, J. S. Gorman, E. Robinson, W. L. Hunter, and P. H. Mack. A committee of three was appointed to report upon the route, composed of E. Robinson, W. T. Bunney and J. C. Irwin, who are to report to the subscription committee. The meeting then adjourned, subject to call by the Chair. The Court Room was filled to overflowing with representative people of the vicinity. Upon putting the question by rising vote they were unanimous in the desire for constructing the road. If they will subscribe as liberally in the same spirit, the success of the project is assured.

Real Estate Transfers.

The following deeds have been recorded since October 29, 1899:

Thomas Dixon to B. L. Smith—Oct. 4, 1899. Und ½ int in Tipton mine, Round Valley, $100.

W. H. Fales et als. to J. M. Thomas et als.—Sept. 29, 1899. 18 placer claims at Amargosa; $1.

C. H. Rietsch to A. M. Millspaugh—Sept. 7, 1899. Und ⅔ int in Admiral Dewey mine, Darwin Mt.; $1.

W. E. Harrison to Radcliffe Con. Mining Co.—Sept. 27, 1899. Big Brown Lode South Park Dist.; $10.

F. C. Kennedy to James McDonald—Oct. 18, 1899. Lead Belt mine, Wild Rose Dist.; $5.

E. Robinson to Trustees Inyo Lodge No. 301, I. O. O. F.—Chenot property at Independence; $700.

J. E. Shepherd and W. L. Hunter, executors, to E. Robinson—Aug. 31, 1899; Chenot property, Independence; $700.

Mariana King et als. to J. M. Thomas et als.—July 17, 1899. 18 placer claims at Amargosa; $1.

R. F. Harrison to Radcliffe Con. Mining Co.—Sept. 12, 1899. Cleveland millsite, South Park Dist.; $1.

J. C. Stewart and wife to Henry S. Mackay—July 20, 1899. Copper Button and other claims, Saline Valley; $1.

Better Times for Breeders

The long expected turn in the values of horses has arrived, the demand for good work stock being active. The recent wars have contributed to bring this state of affairs about earlier than it otherwise would have occurred. Well broken mules weighing 1200 pounds and over are eagerly sought for by dealers and bring $250 per span. Those weighing 1000 to 1200 bring from $150 to $250, while those weighing 900 to 1000 find a ready sale at $100 a pair. Draft horses 1400 pounds and over bring $100 to $150 a head. Chunks 1100 to 1400 from $50 to $100 a head, while smaller horses are not salable at any price. Handsome coachers, 16 hands high and weighing 1200 pounds bring ready sale at from $300 to $600 a pair. These are San Francisco prices and ready sale. One firm there has an order for 500 head of mares and geldings, 1100 to 1300 pounds, for shipment to Honolulu. These prices are for broke animals; wild and unbroken cannot be sold at any price.

The locomotive Tybo, which has been in use on the Bodie wood road, was brought to Hawthorne last week. It will be taken to Keeler and used by the soda company to haul soda from the marsh to the roaster, and do switching for the C. & C.

Charlie Mulholland has gone to Los Angeles on a visit.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist, Inyo County, California, and from J. H Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby give that at a meeting of the Board of Directors, held on the 28th day of September, 1899 an assessment, No. 33, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.
CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 31, 10th Floor, San Francisco, California.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNty of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Ben. H. Yandell, Attorney for Plaintiff.

The people of the State of California send greeting to Susie Troeger, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 5th day of September, A. D. 1899.
D. J. HESSION,
[SEAL] Clerk.
Ben. H. Yandell, Independence, Cal. attorney for plaintiff.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

88 Dated March 3, 1899.

Lodge 221, F. & A. M.

Hall's Family Pills are the best.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for FREE $2.00 trial bottle and treatise. DR. R. H. KLINE LTD., 931 Arch St., Philadelphia, Pa.

I never used so quick a cure as Piso's Cure for Consumption. — J. B. Palmer, Box 1171, Seattle, Wash., Nov. 25, 1895.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Wholly Discouraged.

"No, ma'am. I don't like 'em," said Mr. Cumrox with emphasis. "I'm free to say these dialect stories makes me tired. Half the words in 'em ain't in the dictionary."

"But you might cultivate a liking for them," said his wife's sister. "It is something like music. You may not have much of an ear for it at first, but if you keep at it you will soon appreciate it."

"Well, maybe I will some day, but I'd rather have something solid. I'd like to begin on some of my youngest girl's school books and go right through 'em. That's the sort of reading that I'd enjoy spending time on."

He picked up one of his daughter's books which happened to be lying near. It was a copy of Virgil, which his daughter had been translating into English. He stared solemnly at the first page of the Latin epic for awhile and then slowly turned the leaf. When his eyes had got down to the middle of the next page, he laid the volume down with a sigh.

"It's no use," he exclaimed regretfully.

"What is of no use?"

"My trying to read dialect. And I must say that this thing of teachin it in the public schools strikes me as plaguy foolishness."—Washington Star.

Champion Trouble Borrower.

"I have known a good many borrowers of trouble," said the man with the glasses, "but the worst case, I think, is that of a friend of mine who has picked out his own pallbearers and made them all promise that they will insist upon having probes stuck into him before he is buried, so as to be sure that he is really dead."

"That is an aggravated case," replied his companion, "but I know of one that beats it. The wife of a poet of my acquaintance is worrying because he may get rich and go out in society where they will flatter and spoil him."—Chicago Times-Herald.

Virtue's Reward.

"Tonight," said Mr. Perkins at the table, "as I came up on the car the fellow next to me had a nickel out and was handling it. The conductor came along and, thinking it was a quarter, gave him back four nickels. The fellow took them and then said to me, 'That was pretty slick, wasn't it?' 'Well, it would be,' I said, 'if you were beating a big company like the street car company, which could stand it. But that conductor will have to pay that out of his own pocket. He only gets so much an hour, and 20 cents is quite a per cent of his day's wages. It's tough on him.'"

"What did the awful man do?" asked Mrs. Perkins sympathetically.

"Leaned up against me and went sound asleep and then woke up when I got off and cursed me for letting him go past his street," said Mr. Perkins.—Rochester Democrat.

The Largest Natural Bridge.

Down on Pine creek, near Camp Verde, A. T., is a natural bridge that is probably greater than any other in the world. It is nearly five times the size of the natural bridge of Virginia and has a span of more than 500 feet across Pine creek, which is dry 300 days in the year. The height of the bridge is about 80 feet, and it is about 600 feet wide.—Chicago Record.

Victorian Era Explained.

"Why is it," asked Miss Bookwise, "that literature always flourishes when a queen comes to the throne?"

"Because, I suppose," answered Mr. Knowlines, "if one wants to be poet laureate he has to write to the queen's taste."—New York Commercial Advertiser.

In Luck.

"You think you know all about women, don't you?" asked the newly married boarder.

"No," replied the savage bachelor, "and I am mighty glad I don't."

"You May Bend the Sapling But Not the Tree."

When disease has become chronic and deep seated it is often difficult to cure it. That is the reason why it is best to take Hood's Sarsaparilla when disease first shows itself. In long-seated, tenacious cases, Hood's Sarsaparilla is also wonderfully successful.

Hood's Sarsaparilla
Never Disappoints

WARFARE NOVELTY.

SEA FIGHTING MAY NOW BE REVOLUTIONIZED.

New Battleship Which Is So Constructed as to Be Practically Shot-Proof—Submerged Earthworks to Render Harbors Impregnable.

Whether or not the art of battle-ship construction is destined to be revolutioned by the newly patented invention of William Weegar, of New York City, remains to be found out, but his idea is unquestionably striking. He proposes to uplift from the hull of his vessel, by means of towers, a huge armored chamber running from bow to stern and holding a battery of rapid-fire guns arranged in broadside. Two of the towers, one at each end, will be conning towers, but the other two, of large size, will be surmounted by turrets containing pairs of 12-inch breech-loading rifles. There will also be four 8-inch rifles, forward and aft, so that, with forty quick-fires in all, the armament will be most formidable.

Perhaps the most notable point about this novel fighting craft is its invulnerability. It is practically shot-proof, its construction being such that a shell striking any part of it must meet a slant and so glance off. In order to accomplish this end, the armored chamber is made polygonal in section, while the towers are cylindrical. The deck is a whaleback, its upper part barely rising above the sea, and all the machinery and ammunition are below water level, so as to be safe from injury. Staircases and ammunition hoists run up inside of the towers, and the waves may wash freely across the body of the ship without entering the gun ports or interfering with the operation of the fighting apparatus above.

IS THIS THE COMING TYPE OF BATTLESHIP?

Not less notable than the foregoing is a method newly invented by a Cincinnati man, Andrew Van Bibber, for rendering harbors impregnable against attack by sea. It is guaranteed to accomplish the purpose with the use of a comparatively small force of men and without the aid of war ships, thus being equivalent to an increase of the navy, inasmuch as it relieves fleets to a great extent from the duty of defending the coast. Of this latter point the importance was illustrated in the recent war with Spain, during which the operations of our maritime forces were seriously hampered by the ever-present necessity of looking out for the protection of the cities along the Atlantic seaboard.

As the inventor says: "The greatly-increased range of naval guns demands that defensive works be more remote from the place defended than formerly—else the defended city may be ruined while the attack is being repulsed. A city, of course, affords a very large target, and its protection is proportionately difficult, especially in these days of high-power cannon. Besides, the fleet urgently needed for its defense may not arrive in time."

The Van Bibber system consists in extending from the harbor mouth seaward two lines of embankments built of concrete and so arranged as to form an artificial entrance to the port. On these embankments are placed bomb-proof forts, consisting substantially of revolving turrets containing high-power guns. The tops of the embankments are slightly below low-water mark, but submarine chambers are provided for magazines and other uses. The forts themselves, as a matter of course, ought to be protected by armor thick enough to be practically impenetrable by shell.

From this brief description it will be understood that a hostile war ship approaching a city thus defended, could get into the harbor only by passing through the artificial channel referred to, and in doing so it would be exposed to murderous attack at short range by the forts on the flanking embankments. Meanwhile, another fort, situated at the landward end of the entrance, would rake the latter from end to end with a storm of projectiles. Under such circumstances it would be impossible for the enemy's vessels to maneuver freely, and being confined in a narrow gut, they would face almost certain destruction by mines, while held at a distance from the city by guns much heavier than their own and capable of smashing to pieces their armor plates. The channel may be 200 yards or half a mile in width, but the longer it is the more efficient it will be for defensive purposes.

JACKKNIFE SAVED HIS LIFE.

Narrow Escape of a Railroad Man from Death.

The bald-headed railroad man who frequents the rotunda of the Great Northern Hotel these evenings is usually the center of quite a group of loungers, for he has many interesting incidents of adventure to relate.

"When I was a section boss down in Texas," he said the other evening, "I had the crookedest piece of track in the State—couldn't see two telegraph poles at one time at any point on my section. Right where the tool house was there was a curve and at one end of the curve there was a switch for a passing track. I had my men working one day around the curve, near the tool house, and while they were filling in a piece of track I moseyed down to take a look at the switch at the other end of the curve. The men were about a quarter of a mile from the switch, but out of view around the curve. In those days we didn't take the precaution to put blocks of wood in the chinks of the frogs and at the end of the guard rails as they do now to keep brakemen from getting their feet fast. If we had I would not have been telling this story, because it wouldn't have happened.

"As I was poking around the frog I got one of my heels wedged in one of the numerous openings and could not get myself away. I tugged away and swore a little under my breath, but a machinists' vise could not have held that heel tighter than the frog did. You can easily judge the extent of my alarm when I heard a train whistle for a crossing which I knew to be a mile and a half from the point where I was fastened; I looked at my watch; it was the 4 o'clock 'cannon ball' from the west and I knew that it would bear down upon me in three minutes unless I succeeded in wrenching the heel off my shoe, which appeared a hopeless task. The train would shoot around the curve, the engineer would not have time even to slow down in response to my signal, and I would be ground beneath the wheels. The train was approaching from the direction of my men and I shouted, hoping they might hear me and flag it, but it was a vain hope, and I heard the train roar across a bridge less than a mile away. I was beginning to despair, but cast a glance around to see if help was coming from any other quarter, when I saw a small tow-headed boy standing in the middle of the track behind me.

"'Run up there,' I yelled, pointing toward the tool house, 'and flag the cannon ball.'

"The boy looked at me, but did not budge.

"'Run, run,' I whooped again, 'or I'll be killed! Don't you see my foot's fast and I can't get off the track?'

"The boy said nothing, but put his hand in his pocket and pulled out his jackknife. I thought he would look for a stick next, so he could whittle while he discussed my proposition, as they do down in Texas. I could hear the engine bell ringing to warn my men to clear the track, and I knew that there remained but a few seconds between myself and death, as the boy had stood inactive too long to get any distance away and signal the engineer.

"But the boy was not as stupid as I had thought him to be; indeed, he was not half as stupid as myself. He didn't look for a stick, but he stepped up beside me, stooped down, ran the keen blade of the knife over my shoestring, straightened up, grinned and said:

"'Yank yer foot out, mister; here she comes.'

"I roll off the track and the train swept past, and the boy sauntered away down the track just as if nothing at all had happened."—Chicago Chronicle.

A Sagacious Pig.

Pigs that have amazed vast crowds at the circus by their performances are not to be mentioned in the same breath with the young porker, the following account of which has been sent to the Record by a person who has heretofore been considered thoroughly reliable and truthful:

"One of the big drays going down Tenth street on Thursday, having to stop at the corner of Carpenter street, the boys who were utilizing the rear end for rides were surprised and delighted to see a pig try to scramble up beside them. Kindly hands helped him and he sat content among the free riders until a small street below Morris was reached, when he intimated by grunts and scrambling that he wanted to get off the dray. He was assisted to the street and immediately made his way to a doorstep, where he was at home, as he was soon admitted to the house.

"He is a pet pig owned by a dermatologist, who is making experiments upon him with newly invented hair tonics. Every few days piggy appears on the doorstep with bristles of a different color, and it is said his hairs really begin to curl, owing to the application of castor oil and quinine. Recently, having been treated with peroxide of hydrogen, he has been of a most beautiful gold color. Piggy is bathed every day, has his teeth brushed with listerine, and sits on the front steps with the children, ocasionally strolling a square or two with them. The fact that he knew his way home and preferred to ride there has made him quite a hero in the neighborhood."—Philadelphia Record.

Two Happy Thoughts.

From far-away Ceylon comes a funny little story. A tea planter who had a glass eye was desirous of going away for a day's shooting with a friend, but he knew that as soon as the natives who were at work on the plantation heard that he was gone they would not do a stroke of work. How was he to get off? That was the question. After much thought an idea struck him. Going up to the men he addressed them thus:

"Although I myself will be absent, yet I shall leave one of my eyes to see that you do your work." And much to the surprise and bewilderment of the natives, he took out the glass eye and placed it on the stump of a tree and left. For some time the men worked industriously; but at last one of them, seizing his tin, in which he carried his food, approached the tree, and gently placed it over the eye. This done, they all lay down and slept sweetly until sunset.

A woman likes to be told how pretty she is and how homely some other women are.

Some women never sew except at a thimble party.

The only thing as common as good advice, is trouble.

Dyspepsia

Most people eat more than is good for them. The stomach tries to digest all that's put into it, but if repeatedly overloaded, it goes on a strike. That's indigestion. Rich, over-sweet, indigestible food weakens the stomach and makes it unable to take care of the material put into it. More food taken into a weakened stomach than the stomach can digest, stays there, forms gases and rots, bringing on all the horrors of dyspepsia. The only way to cure dyspepsia is to clean out the digestive canal with CASCARETS. Keep it clean with Cascarets, eat light food sparingly, and give the stomach a chance to rest up and get strong again.

Be sure you get the genuine CASCARETS!

when he is proposing to a heiress, do you?—Indianapolis Journal.

"For six years I was a victim of dyspepsia in its worst form. I could eat nothing but milk toast, and at times my stomach would not retain and digest even that. Last March I began taking CASCARETS and since then I have steadily improved, until I am as well as I ever was in my life."
DAVID H. MURPHY, Newark, O.

The discovery by the neighbors that a

CASCARETS are absolutely harmless, a purely vegetable compound. No mercurial or other mineral pill-poison in Cascarets. Cascarets promptly, effectively and permanently cure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhœa and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Be sure you get the genuine! Beware of imitations and substitutes! Buy a box of CASCARETS to-day, and if not pleased in every respect, get your money back! Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK. 376

The Tide Ran Away.

The humorist had been tied hand and foot and lashed to a pile that projected a dozen or more feet above the water at low tide.

He had dared to perpetrate an original joke, and the Paragraphers' Amalgamated union had decreed his death.

In vain he wriggled.

The cruel waters were rising beneath him. The tide was coming in.

"I'm afraid," he murmured as he looked down and noticed that the little waves were lapping at his shoe—"I'm afraid that one tied will not affect the other." And he laughed harshly. "Anyway," he added a moment later, "I'll stick to my post."

The tide rose faster. It was at his knee, his waist, his elbow, his neck!

Just as it reached his chin he gave one final glance across the sparkling waves and muttered:

"Well, it seems to be up to me now."

Whereupon the tide turned and ran out.

He was saved.—Cleveland Plain Dealer.

Walking Correctly.

Many children are taught at home and at school to walk on their toes. This will do in a sick room when one has squeaking shoes, but it is not natural or elegant. Put the heels down lightly at first and the toes last; this keeps the body erect, instead of bending the body forward, as a person must who walks on his toes. Walking should be more thoroughly taught in our gymnastic schools. It costs little to learn to walk correctly, and it is well worth while to spend a little time to acquire the art.—New York Telegram.

That's the Way It Feels.

A wee maiden had the misfortune to fall down stairs the other day, and that part of the anatomy commonly denominated the "funny bone" came in contact with the wall. On being picked up and asked if she was hurt, she rubbed her arm for a moment and said, "No, but my elbow is awful dizzy."—Union Signal.

A Hasty Reply.

"What'll I do with this lot of raw recruits?" asked the Pacific islander.

"Raw recruits?" echoed the chief absentmindedly. "What's the use of bothering me with such foolish questions? Turn 'em over to the cook."—Washington Star.

Creeping Numbness is a Danger Signal

Mr. G. H. Snyder, a well known citizen of Lawrence, Kan., said: "I am now seventy years of age. About three years ago I experienced a coldness or numbness in the feet, then creeping up my legs, until it reached my body. I grew very thin in flesh, appetite poor and I did not relish my food. At last I became unable to move about. I consulted several distinguished physicians, one telling me I had locomotor ataxia, another that I had creeping paralysis. I took their medicines but continued to grow worse. Almost a year ago a friend advised me to try Dr. Williams' Pink Pills for Pale People. Before I had finished my first box I found they were benefiting me. I used twelve boxes in all, and was perfectly cured. Although it is six months since I used my last pill there has been no recurrence of the disease."—*From Lawrence Journal.*

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box. 6 boxes $2.50.

FISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION

A Fallacy About Cheese.

"Cheese," said some wiseacre long ago, "digests everything but itself." Never was there a greater error perpetuated by a popular proverb. It aids in the digestion of nothing, and, being almost totally indigestible, simply adds another burden to an already overburdened digestive system. The feeling of comfort produced in a person of robust digestive faculties by partaking of a little—a very little—cheese is due entirely to the excitation of the flow of digestive fluid provoked by the ingestion of a completely indigestible substance.—National Druggist.

"Two Politicians."

One of the first things done by a stranger visiting Albany, says the Philadelphia Call, is to pay 25 cents and put himself at the mercy of a capitol guide.

The guide makes a profound and obsequious bow, like a prestidigitator about to charm an audience, and proceeds to lift the veil which hides the mysteries of the great building.

On a recent occasion the guide led a stranger regretfully past "McGinty's" empty frame and proceeded to identify the heads of notables that decorate the stairway. He did fairly well until the stranger pointed out Shakespeare and Homer and asked who they were.

"Them," replied the guide, undaunted, "are the heads of two politicians whose names I disremember."

Newspaper Obituaries.

By this time, one would think, nearly everybody has ceased to wonder at the way in which newspapers can come out with column after column of biography the very morning after some eminent person has passed away, and it is an open secret that a carefully written "life" has been pigeonholed in the office for months—nay, years—before.

Biographies, interviews, personal paragraphs, all yield their quota to the compiling of an obituary, but in some cases the subject has the grewsome experience of being waited upon while yet living to furnish materials for the notice.—Cincinnati Enquirer.

DR. GUNN'S IMPROVED LIVER PILLS

ONE FOR A DOSE. Cure Sick Headache and Dyspepsia, Remove Pimples and Purify the Blood, Aid Digestion and Prevent Biliousness. Do not Gripe or Sicken. To convince you we will mail sample free, or full box for 25c. DR. BOSANKO CO., Philada., Penna. Sold by Druggists.

Without Good Health

The pleasures and successes of life are almost impossible. Upon the health depends the future. Thousands have built up their systems with

SURE CURE FOR PILES

ITCHING Piles produce moisture and cause itching. This form, as well as Blind, Bleeding or Protruding Piles are cured by Dr. Bosanko's Pile Remedy. Stops Itching and bleeding. Absorbs tumors. 50c a Jar at druggists or sent by mail. Treatise free. Write me about your case. DR. BOSANKO, Philada., Pa.

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form. . . . Sold by every druggist in the malarial sections of the United States. . . . . No cure, no pay. . . . Price, 50c.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonic are imitations. Ask any druggist about this who is not PUSHING an imitation.

They All Recommend Grove's.

WHOLESALER.

ST. LOUIS, MO., Feb, 6, 1899.
PARIS MEDICINE CO., City.
Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2600 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.
Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO
Per Schell.

RETAILER.

KEDRON, ILLS.
PARIS MEDICINE CO.,
Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.
Respectfully,
JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 12, 1898.
PARIS MEDICINE CO., St. Louis, Mo.
Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.
Yours truly,
JAMES D. ROBERTS.

BOER MILITARY TYPES.

THE Boers have no regular army, with the exception of a small force of artillery known as the State Artillery. This force, until after the Jameson raid, consisted of 32 officers, 79 non-commissioned officers and 289 men, and a telegraph corps of one officer and fifteen men. On Jan. 13, 1896, the Volksraad authorized the Government to increase the corps by enrolling another 400 men. In the event of war, however, all citizens capable of bearing arms, between the ages of sixteen and sixty, are liable to be called upon for military service, and so, too, are all the blacks living in the Transvaal. In the war against England in 1881, the Boers put some 6,000 men into the field, but this number does not, of course, represent the total available force at the disposal of the Transvaal Government. According to the census taken in 1894, some 22,300 men are liable for service in the time of war. And these might be joined by Boers from Cape Colony, Natal and the Orange Free State. Every citizen liable for service must, when summoned to do so, present himself at the place to which he is ordered, with a horse, a rifle and a hundred rounds of ammunition. The State Artillery was originally organized by an Austrian, and the caps of the regiment are to this day of the Austrian pattern. The officers are for the most part members of the wealthy Transvaal families. The guns are drawn by mules, which are driven in the manner customary in South Africa—that is to say, two men sit on the limber box, one to drive and the other to use a long bamboo-handled whip. The gunners, it should be stated, are all mounted. Besides the State Artillery, which represents the regular army, there are three foot and six mounted volunteer corps in the Transvaal. These corps furnish some 2,000 men, who are for the most part drawn from officials and people employed by the Government, and consist of men of various nationalities. The Pretoria Cavalry, which is the smartest of these corps, is composed entirely of officials and sons of well-to-do Boers. The Volunteer Corps are not intended to take the field against a European power, but to garrison towns.

QUEER CANADIAN INDIANS.

The Kwakiutls of British Columbia—Their Skull-Deforming Custom.

Most people probably imagine that the North-American Indian of to-day—what there is left of him—is a fairly civilized being in his general mode of life; that though he may not take with any special kindness to the plough and the pruning hook he at least no longer wields the scalping knife or worships idols. The researches of Dr. Franz Boas, under the auspices of the American Museum of Natural History, among the Kwakiutls, of British Columbia, however, as published in the reports of that body, contain some reading matter that will be surprising to many.

The Kwakiutls belong chiefly be-

KWAKIUTL INDIANS.

tween Rivers Inlet and Cape Mudge, in British Columbia. They are a tribe of light-colored Indians, whose faces and expressions readily recall those of the lower class Japanese and Koreans across the Pacific. They differ from the other Coast Indians by having very high bridged, often hooked, noses, and very long faces. The shape of their heads is artificial. Like the Flatheads and some tribes in Mexico and South America, they deform the head in infancy, so that the upper forehead, which we consider a sign of intellect, is depressed perhaps in order to obtain an approach to the skull of a beast or bird. What the object of this intentional malformation is forms one of those problems that appeal to the imagination of the archaeologist.

A collector of antiquities in Mexico has made a specialty of these deformed skulls, and is said to argue that they are attempts to produce a head like some four-footed beast, the coyote or raccoon, for which the ancestors of the tribes in question had a special reverence, perhaps in the nature of totem worship.

The Kwakiutls and other tribes of the northwest coast are tremendous sticklers for family pedigree, and some of them hang their coats of arms or the insignia of their ancestry on the outer wall in a way that seems to obtain nowhere else in quite so spectacular a fashion. The ancestor is represented by his totem, while other beasts, monsters, and figures represent the tribe, and hence arises a chain of totems to represent the family tree. The illustrations give a totem pole in place before Indian houses at Rivers Inlet, British Columbia. They are carved from the trunk of a tree, elaborately painted, and set up in proof of the standing of the chief who owns them. What is very odd, and certainly not without analogies in European heraldry, a chief can buy the right to use a totem from another tribe, and also the patent to sing certain songs belonging to that tribe. The seller may never use totem or song again. If he does, that constitutes a grievance which is apt to result in bloodshed.

What is chiefly notable in these representations of demons, men, monsters and birds, beasts, and fish is the pronounced taste for a conventional image. These Northwest Indians are perfectly capable of imitating creatures exactly with the means at their command, wood of various colors, bark, grasses, seaweed, furs, and feathers; but from this they carefully abstain in their carved work.

The earliest travelers who describe their dances mention the exactness with which they imitated birds and beasts, having dressed for the part. Thus they appear as crows and imitate the gait and other movements of the bird exactly; and so of wolves and bears. But when it comes to carvings for permanent embellishment of the house like the totem-posts, or for occasional use in dances and other rites like the complicated masks representing deities of the air, earth, and ocean, only the strongest characteristic of each is seized. The long bill of raven or heron, the eagle and owl, with their curve beaks, are recognizable at once. But the bear is changed from its natural look, the wolf's jaws are tremendously lengthened, while creatures like the thrasher shark or "killer whale" and giant squid have still greater liberties taken with them.

What is often a very disgusting ceremony is the initiation of a new member into a cannibal society. The novice returns emaciated and in a state of frantic ecstasy from the woods, bringing pieces of old corpses, skulls, or bones, which he chews in order to strike awe into the hearts of the spectators. The purpose seems to be to frighten the unsophisticated by showing a daring in the handling of disgusting objects which proves the superiority of the profession and the power of his or her guardian spirits to protect the shaman or medicine man from what would be injurious to the ordinary person.

The Kwakiutls have a great fear of images as embodiments of what they

TOTEM POLE, RIVERS INLET.

represent. Thus a chief will have a post carved to represent a rival and submit the effigy to some ignominious treatment in the belief that the pride and rank of the enemy will suffer. This is the Kwakiutl way of "turning the portrait to the wall."

ORIGIN OF LABOR DAY.

A Holiday Now Observed Generally in All but Nine States.

Labor day is almost generally observed in America, being celebrated in all of the States except Arkansas, Arizona, Kentucky, Louisiana, Mississippi, North Dakota, North Carolina, Nevada and Vermont, and even in these States there are certain cities that observe it.

The origin of Labor day dates back seventeen years ago, when, on Sept. 5, 1882, the General Assembly of the Order of the Knights of Labor convened in New York City. The various labor organizations of the city and vicinity paraded that day and afterward held a picnic, at which addresses were delivered. The Knights of Labor of New York were not working openly at that time, the name of the order was kept secret, and such public expressions of the sentiments of the members as went out to the world went under other names than those selected to designate the local assemblies. Under different names the local assemblies were represented in the Central Labor Union, and the coming of the General Assembly to New York was a subject for discussion at several meetings previous to the opening of the convention.

When the General Assembly was opened, on Sept. 5, a communication was read from the secretary of the New York Central Labor Union, Matthew Maguire, inviting the members of that body to review the great parade from the grand stand at Union Square. A recess was taken in order to comply with the request of the Central Labor Union, and the members of the General Assembly witnessed the first Labor day parade.

During the time that the various organizations were passing the grand stand at Union Square Robert Price, of Lonaconing, Md., turned to the general worthy foreman of the Knights of Labor, Richard Griffiths, and said: "This is Labor day in earnest, Uncle Dick."

Whether that was the first time the term had been used is not known, but the event was afterward referred to as the Labor day parade. In 1883 the organizations of New York paraded on the first Monday in September. When in 1884 the Central Labor Union of New York had the question of parading up for discussion, George K. Lloyd, a Knight of Labor, offered a resolution declaring the first Monday in September to be Labor day. The resolution was adopted and steps were at once taken to have the Legislature enact a law making the first Monday in September a legal holiday, to be known as Labor day. The agitation rapidly extended to other States, with the result that Congress eventually made the day nearly a national holiday.—Pittsburg Dispatch.

Applause by Machinery.

A Vienna journal describes a curious contrivance which will render the "claque" in theaters superfluous, and substitute for it a machine performing the same duties. The inventor, Herr Zimmerman, has ascertained that two leather sacks filled with air, when brought violently together, make a noise precisely like that produced by the clapping of hands. He placed pairs of leather sacks in hidden places throughout a theater, and then connected them by wires with the wings, so that they could be set in motion by electricity on a button being pressed. The regisseur in the wings controls the apparatus in all parts of the house, and can produce applause from the gallery, the pit, or the stalls at will. Herr Zimmermann claims that this invention is now in use in several theaters in Paris and Berlin.

Dinnis McGuir 's Whisky.

Meagher was full of anecdotes of his famous brigade. One story is too good to be lost. He said he was leading his men to the front in one of the seven days' battles when an aid rode by and announced the news that our army had carried a certain strategic point and several colors. "D'ye hear that, boys?" shouted Meagher. "Our men have won the day and captured the enemy's colors!" "Just as I said that," remarked the general, "a private who was plunging along out of one muddy hole into another looked up at me and said: 'Ah, Ginral, I'd rather have a pint of Dinnis McGuire's whisky now than all the colors of the rainbow."—Donahue's Magazine.

No Skull for an Irish Fair.

In Ireland recently a quarrel had taken place at a fair and a culprit was being sentenced for manslaughter. The doctor, however, had given evidence to show that the victim's skull was abnormally thin. The prisoner, on being asked if he had anything to say for himself, replied: "No, yer honor, but I would ask was that a skull for a man to go to a fair wid?"

What has become of the old fashioned woman who made the children stay out of the house and walk on tip toes in the yard whenever she had a cake in the oven?

A girl's idea of taking care of her brothers is to tell on them whenever they do anything a girl wouldn't do.

A FAMOUS BEAUTY.

DAUGHTER OF A GOVERNOR AND WIFE OF ONE.

Mrs. Kate Chase Sprague, Once the Social and Political Queen in Washington, Died in Obscurity—Incidents of Her Interesting Career.

The death of Mrs. Kate Chase Sprague, wife of a former Governor of Rhode Island and daughter of the late Salmon P. Chase, at one time Governor of Ohio, Secretary of the Treasury and chief justice of the United States Supreme Court, which occurred at Edgewood, near Washington, not long ago, closed a highly dramatic career.

She was born in 1840, the only daughter of Salmon P. Chase, and owing to the death of her mother she early became mistress of her father's household. Her father, the most famous member of a family whose scions had already gained fame at the bar, on the bench and in the Protestant episcopate, was already one of the leading lawyers in Cincinnati, when, in 1849, a coalition of Free Soilers and Democrats sent him to the United States Senate. At the expiration of his term, in 1855, a somewhat similar coalition elected him Governor of Ohio. In 1857 the Republican party returned him to the gubernatorial seat.

How much of his advancement he owed to the personal popularity of his daughter Kate cannot be estimated. It is certain that before she had passed out of her teens she was spoken of not only as the leading belle of Cincinnati, but as one of the most astute politicians in Ohio. Between her and her father there existed a love that was little short of mutual adoration. All the little girl's ambitions seemed to center in him.

Just as she was reaching the maturity of her charms her father became a great figure in national politics as candidate for the Republican Presidential nomination, in 1860, and Secretary of the Treasury in Lincoln's cabinet a year later. In the latter position he won a reputation second only to that of Alexander Hamilton. At the height of his power he established his home at Edgewood, where his daughter has just died. Here the most illustrious men of the nation, the most distinguished visitors from abroad, were always welcomed. And here Kate Chase ruled supreme over a crowd of admirers.

A little prior to this time she had met William Sprague, the man who was to become her husband. Sprague was

KATE CHASE SPRAGUE.

born in Rhode Island, in 1830. In 1856 he had succeeded to the management of the print works, established by his grandfather, and continued by his father and uncle. In 1860 he had been elected Governor of his State. In September of that year he had headed a deputation from Rhode Island to the dedication of the statue of Commodore Perry in Cleveland. It was then that he first met Miss Chase. It was a case of love at first sight, and on Nov. 12, 1863, they were married, all fashionable and official Washington being represented at the wedding. Mr. Sprague had just been elected United States Senator from Rhode Island.

The honeymoon was spent in Providence. Mrs. Sprague cast her eyes over her husband's broad ancestral acres in that town, renamed the spot Canonchet, and proceeded to replace the old mansion with a splendid new palace. It still remains an unfinished Aladdin's palace.

Possibly it was the headlong extravagance of the wife in this and other matters which made the first rift in the matrimonial lute, but, in fact, the two were utterly dissimilar in taste, in character, in ambitions. Mrs. Sprague took far more interest in her father's political future than in her husband's. She devoted herself to the former with even more assiduity than before her marriage. With the wealth at her command, with her brilliancy, her tact, her unfailing charm of manner, she easily remained the center of attraction in Washington society. All these gifts of fortune were utilized in the effort to make Salmon P. Chase President of the United States.

Chase, who had left the Democratic party on the slavery issue, was willing to become a candidate of a reconstructed Democracy, and in 1868, when the national convention was held in New York Mrs. Sprague opened up quarters there in the interests of her father. Every effort was made to bring the man and the platform into harmonious relations, but failed. The convention would not go far enough to suit Mr. Chase and the latter was unbending. He did not long survive his disappointment. In 1870 he suffered a paralytic stroke and in 1873 he died.

His death precipitated a rupture between Mrs. Sprague and her husband. After that event she became less circumspect in her conduct, less reticent

MISS KATE CHASE AT THE TIME OF HER MARRIAGE.

about her domestic troubles, more extravagant in her expenses.

Finally the husband's remonstrances culminated in a request that she should name some friend in whom she had confidence and whom he might take into his. She suggested Roscoe Conkling. The husband was staggered. Conkling was his enemy, politically as well as personally. Moreover, it was Conkling's name that was linked with Mrs. Sprague's in the gossip of the capital.

Nevertheless, so desperate were his straits—for even then the shadow of financial ruin was impending—that he consented to unbosom himself and lay bare all his private affairs to his foe.

On Aug. 10, 1879, occurred the sensational episode which was the first blow to the political prestige of the New York Senator. Mr. Sprague, returning home to Canonchet unexpectedly from an interrupted journey, surprised Conkling breakfasting with his wife. He gave him half an hour to leave the house under pain of death. Mrs. Sprague, with her accustomed audacity, laughed at "Willie's threats" and heartened the Senator to remain, but the return of Mr. Sprague with a shotgun made the Senator beat a precipitate and inglorious retreat, the shotgun in his rear.

The flight of the wife from Canonchet followed on Aug. 31. Then came divorce suits, brought by the wife against the husband and by the husband against the wife. Finally an amicable arrangement was reached, and on May 27, 1882, a decree of divorce was granted. Mr. Sprague retained the son, William Sprague Jr., and Mrs. Sprague the three daughters. Sprague afterward married the daughter of a Virginia farmer.

While the Governor spent his time in litigation, trying to save something out of the wreck, Kate Chase retired to Edgewood, the small property left by her father in the suburbs of Washington. There she lived during the last fifteen years, with steadily dwindling fortunes, until a few months ago she was offered by Secretary Gage a clerk's position in the Treasury Department, over which her father had once presided. She declined the place, and only a few weeks ago, Edgewood, covered with mortgages, was ordered to be sold.

Of her children the son committed suicide in Seattle in 1899, but her three daughters survive her. The eldest, Ethel, went on the stage, but a short time ago she married and retired from public view.

Easy Bicycling.

The Sultan of Morocco has a somewhat imperial method of amusing himself with cycling. A couch is rigged up between the wheels, and on this the monarch reclines, studying the cyclometer and the compass, while his attendants pedal for him.

Dull children are more agreeable than those who are impudently smart, and do better in life.

HOW THE WORLD'S IMPORTS AND EXPORTS COMPARE.

Of the four greatest commercial nations the imports and exports of France are the nearest equal. Each year France sells abroad goods to the amount of $700,000,000 and imports goods to the amount of $800,000,000. Germany imports $250,000,000 worth more than it exports, while Great Britain actually buys twice as much each year as it sells. The United States, on the other hand, is the greatest merchant among the nations. What with wheat and other foodstuffs and manufactured articles it sells abroad nearly three times as much as is brought in from foreign countries.

AN IMPORTANT FOOD LAW.

Heavy Penalties for Selling Articles of Food Containing Unhealthy Ingredients.

The following law was passed at the last session of the Missouri Legislature, taking effect August 20, 1899:

Section 1. That it shall be unlawful for any person or corporation doing business in this State to manufacture, sell or offer to sell any article, compound or preparation for the purpose of being used or which is intended to be used in the preparation of food, in which article, compound or preparation there is any arsenic, calomel, bismuth, ammonia or alum.

Sec. 2. Any person or corporation violating the provisions of this act shall be deemed guilty of a misdemeanor and shall, upon conviction, be fined no less than one hundred dollars, which shall be paid into and become a part of the road fund of the county in which such fine is collected.

The operation of this law will be mainly against alum baking powders. But the manufacture or sale of any article of food or article intended to be used in food which contains any of the substances classed by the law as unhealthful—from Arsenic to Alum—is absolutely prohibited.

She Upheld Her Dignity.

Some of the colored folks are bound to maintain their dignity. One of these ladies was employed by a wealthy Louisvillian who swore by the wholesale. Economy was no object to him when it came to cuss words, and he scattered these pearls of speech over all subjects. The cook was a past grand mistress of her art. She knew what she knew and could turn out dreams from the skillet and oven, but she had ideas of her own dignity.

"One mawnin," said she, "I done rook a elegant brekfuss. Dere wuz chickin an 'taters an beat biskit an coffey an muff'ns, an dat man he come down stairs, an he do talk scand'lous. I lissen an I lissen. He cuss dis an he cuss dat, an he mumb'l' to hisself, an I jes' couldn' stan' hit. I marches out, an I says, 'Sah, ef you don't lik' dis hyar cookin, say so, an I goes, but I ain't gwine hear you cuss me an my wuk.'

"'Hyar, gal,' says he. 'I likes dis cookin. Wot you mean bossin me when I cusses to my own wife?'

"'Dat's all ri't,' I says mi'ty brash, 'but you don't cuss me er I goes.'

"An sence den," declared the colored upholder of her rights and dignity, "ole marse jes' stuck on my cookin, an I'se de only pusson on de lot he neber cusses."

The old man is right. When you get a good cook, grapple her to you with hooks of steel, even if you have to leave off swearing.—Louisville Times.

He Didn't Bite.

"I never can tell a story and have it come out all right," said a little woman plaintively the other day. "I thought I had such a good one not long ago. I was walking along and heard one street boy say to another, 'Oh, you go buy 10 cents' worth of potash.' 'What for?' says No. 2. 'For 10 cents,' yelled the other, and ran off giggling.

"I thought it was pretty good, and I'd try it on Charlie at supper. But when I told him to go buy 10 cents' worth of potash he never said a word, and I knew another joke had fallen flat and kept still. But the worst was later. He put on his hat and vanished after supper, coming back in a minute with a little parcel that he handed to me.

"'What's that?' asked I.

"'Why, the potash you said you wanted,' answered he, and I nearly had hysterics on the spot. Did you ever hear anything so perfectly awful? I won't ever try to get off anything funny again."

And the little woman sighed as she walked away.—Cleveland Plain Dealer.

Tells Its Own Story.

In a pretty Wisconsin town not far from Milwaukee there is a "spite fence" which tells its own story to all the world. It is a high and tight board affair and cuts off a view across a number of beautiful lawns. The man who lives on one side of it evidently feared that the fence would bring down on his head the condemnation of his neighbors. Not wishing to be unjustly blamed, he has therefore painted on his side of the fence in letters that can be read a block away these words:

"He built this fence. I didn't do it."

The man on the other side also had no idea of letting a false impression get out. Accordingly he has painted on the other side of the high barrier:

"I had to do it."

Sharpness of Lunatics.

Having an appointment to preach at an insane asylum for the first time, the editor of The Christian Register asked the medical director for some points. He said the most important thing was to avoid any attempt on the part of the preacher to accommodate himself to his audience as if they were different from other people. He said:

"If you attempt to adapt yourself to their condition, they will instantly discover it, and they will hate you."

Warned.

"Did I understand you to say something about teachin the young idea how to shoot?" asked a Clay county (Ky.) citizen.

"Yes," answered the man who is interested in the work of education.

"Well, so fur as this part of the country is concerned you're workin on the wrong line. What you want to do is to watch the boys at recess and lam the fust one that brings a gun to school with him."—Washington Star.

She Knew It.

Polite Passenger—Madam, this is the smoking car.

Old Woman (producing her pipe)—Yes, I tho't it be. Great convenience, ain't they?—Ohio State Journal.

CLOSE CALL FOR A REPORTER.

Episode that Cured Him of All Desire to "Fake" Interviews.

"The most painful experience of my career occurred when I had been in the business only three months," said an old reporter to a New Orleans Times-Democrat man, "and the city editor assigned me to interview a big Northern politician who had dropped into town en route to 'Frisco. I rushed over to the hotel, saw my man, and he promised to give me a talk at 8:30 p. m.; so that evening, after supper, I was fool enough to go out to see my best girl, thinking I would be back in plenty of time for the appointment. As bad luck would have it, we had a quarrel, and when we got it patched up and I looked at my watch it was after 10. I was horrified. I grabbed my hat, flew to the hotel and was informed that my man had been in bed for an hour. Merciful heavens! What was I to do? To own up meant certain discharge and disgrace, and, on the spur of the moment, I had a desperate inspiration. Why not fake up an interview? The big man was going away early in the morning, and if he ever saw the article it was dollars to doughnuts he'd ignore it altogether. So, without appreciating the enormity of my idiocy, I wrote up the story. It was a very conservative interview, but I handed it in feeling like a felon. Next day I was slinking to the office, nervous as a cat, when whom should I meet but the distinguished politician himself, bound the same way. I felt my hair stand on end, but, to my unbounded amazement, he addressed me cordially.

"'That interview was very satisfactory,' he said, 'very accurate indeed,' and he invited me to have a drink. I construed his remarks as bitter sarcasm and supposed, of course, he had prepared some horrible revenge, but I went along, mechanically, like a man hypnotized. In the cafe he seemed curiously embarrassed.

"'By the way,' he said, confidentially, 'I didn't say or do anything unusual last evening, did I?'

"'Unusual!' I gasped, 'I—I don't understand.'

"'I asked,' he said, smiling, 'because—well, to tell the truth, I have only a very—er—indistinct idea of what happened after I met some old friends. I know I talked with you, and that you have the—er—substance of my remarks correctly, but I thought possibly I might have said something else.'

"'No, sir; not a word,' I replied, fervently, and we shook hands and parted. It was the narrowest escape and the biggest scare of my life. It cured me permanently of faking."

A DRESS SUIT QUANDARY.

Strange Fate of One Which a Philadelphian Loaned a Friend.

"No, I am not going out in the evenings just now to anything but strictly informal affairs," remarked a friend of the Saunterer the other day. "Why? Well because just now I am not the possessor of a dress suit, and lack the wherewithal to purchase another. It happened this way: I had a friend, a good fellow, who came to me one night and asked me if I wouldn't lend him my swallowtail. I consented, but I told him I wanted the clothes back the next week, as I had a function to attend myself.

"Well, to make a long story short, the week went by, and not a word from my friend and not a sign of my evening duds. I had to miss my date, and was pretty mad, but I didn't say anything. Another week went by, and still no word. Then I decided to go out and hunt up my friend and find out if he intended to keep my clothes forever.

"I called at his boarding house and rang the bell. His landlady came to the door. When I asked if my friend was in she gave a gasp of astonishment and exclaimed: "Why, didn't you know he was dead and buried?'

"It was my turn to be knocked out. After I recovered my breath I explained that I had not heard the news, and had merely called to take back my dress suit. It would doubtless be found among my friends effects, I explained.

"The landlady turned pink, white, and then pink again. 'Why,' she gasped, 'it must have been the suit we buried him in. It was the only good one we found among his wardrobe.'

"So you see the reason why I say no to R. S. V. P. notes just now."—Philadelphia Inquirer.

Knew a Thing or Two.

When a boy at school, the late Mr. Spurgeon took a prominent part in answering all questions put to the class.

One cold day, however, the teacher noticed that he was so very backward that he remained the whole time at the bottom of the class.

This went on for some time, and puzzled the teacher, until he noticed that the fire was near the bottom of the class. He immediately changed the class about, making the bottom the top.

He then had the satisfaction of hearing all his questions fully answered by Spurgeon, and that young hopeful keeping the same seat, the only difference being that he was at the top of the class instead of the bottom.—Spare Moments.

Women Thieves.

According to the Paris police, there has been a marked increase of late in the number of women thieves in that city. It seems they cannot resist the temptation offered by the displays in the large shops.

Age of Whales.

Whales from 300 to 400 years old are sometimes met with. The age is ascertained by the size and number of layers of the whalebone, which increase yearly.

As a rule the cast-iron rule should be cast aside.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, NOVEMBER 10 1899

When war became inevitable in South Africa a boastful London newspaper announced that the British troops would make a "grand parade" fron. Cape Town to Pretoria, the Boer capital. It was to be a "military pageant" to dazzle the eyes of Europe, and impress the continentinal Nations with the might of British arms. This was reckoning without the Boers. In a few weeks a wonderful change has come. Now the greatest anxiety is felt in London, where so recently there was vainglorious pride and anticipation of fresh conquest. The Boers have shown astonishing military skill as well as desperate courage and great accuracy of fire. They have surrounded a number of British garrisons, compelled the surrender of several towns, killed hundreds of British officers and men, and taken thousands of prisoners, including three crack regiments and squadron of cavalry, besides a mountain battery. The towns of Mafeking and Kimberly, west of the Transvaal and Orange Free State, are invested and are likely to be taken, along with their English garrisons. The situation of General White and his forces at Ladysmith is certainly precarious, in view of his heavy losses, the fact that his troops are greatly outnumbered by the enemy, and that he is in danger of having his communications and supplies cut off. It is said that two weeks must elapse before any part of the army corps which recently embarked from England can reach the scene of action. The disaster at Ladysmith cost the British from 1500 to 2000 men and six seven-pound screw guns, which will go to augment the Boer artillery. The feeling in London over the news is expressed by a war official as follows: "It is inexplicable and I am sorry to say that its moral effect is inestimable. We have lost heavily in many wars and have had regiments almost wiped out, but to have regiments captured and by the Boers, it is terrible."

Should the Boers force the surrender of the remainder of General White's army at Ladysmith, and also of the troops at Mafeking and Kimberly, they will be in an excellent position for defence against the attacks of the British reinforcements under General Buller.

It is related that Professor Agassiz, in response to a request to lecture for a very handsome fee, declined, replying, "I am too busy to make money." Such people have not yet died out. The French explorer Marchland is of the same kind. Asked to lecture by an American, he declines a munificent offer. "My wants are few," he says, and he adds that if he could lecture he would give all the money he earned to benificence. Then there is General Leonard Wood, who, though offered many times more than the amount of his salary of Governor General of Santiago to accept a position with a New York corporation, turned a deaf ear to the call of business and capital, preferring rather at a financial sacrifice, to answer the call of duty. There are other such earnest and self-sacrificing men in the world, but there is room for many more.

On his departure for home Sir Thomas Lipton, addressing the crowd which had gathered to see him off, spoke as follows:

"As you know I came here with designs on one of your most valued possessions. I did not accomplish my purpose, but I have been thoroughly compensated. It was a square and fair race, and I was squarely and fairly licked. I could not have received kinder or more courteous treatment. I am sorry to be leaving you, but I sincerely thank you for your kindness and goodness."

Sir Thomas shook hands with all who could get near enough as he pushed his way to the gang plank, and a great cheer went up as he stepped on the plank.

Congressman Roberts, the polygamist, against whom the shafts of scores of societies are aimed, has at last found a champion. She is a woman, lives in Chicago, and insists with a woman's logic, that Roberts ought to be seated as a member of the House of Representatives. Her reason is the customary ladylike one of "simply because." Perhaps she is one of the forty-five wives of the man now on trial in Chicago.

The Sacramento *Bee* advises us not to be disturbed at all, for it has a "straight tip" from a reliable source that there will be no extra session of the Legislature. It does not assure us that Governor Gage will not commission Dan Burns as Senator from California.

Reports from South Africa indicate that the British must soon stop trying to discover the secret of how they are being outgeneraled by an army of farmers and press into service somebody who knows something of the game of war.

South American republics must be short of ammunition or too busy with their several domestic quarrels to go to war with each other. They have decided to arbitrate any trouble that may arise among themselves.

Jeffries won the fight last Friday on points in twenty-five rounds. Considerable dissatisfaction was felt, however, at the decision of the referee.

The Women's Health Protective Association of Cleveland has just declared that women who ride horseback should ride astride.

A charming widow of Washington has effected that which all the heroes of the Philippines could not—the conquest of Dewey.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - - Plaintiff,

vs.

Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, state of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

(SEAL.)

P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of the County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estat, subject to confirmation by said Court, will sell at private sale, to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit:

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be receive at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS.

Administrator of the Estate of Jedediah S. Collins, deceased.
P. H. MACK, Attorney for Administrator.
Dated August 23d, 1899.

Notice of Sale of Mining Property.

PUBLIC NOTICE IS HEREBY GIVEN THAT the undersigned, administrator of the estate of John F. Ginser, deceased, under the order of the Superior Court of Los Angeles county, will sell at public auction, in front of the postoffice at Ballarat, in the County of Inyo, State of California, on Monday, the 20th day of November, 1899, all the right, title and interest which said John F. Ginser had at the time of his death, and all the interest which his said estate has subsequently acquired, in and to the following described mining property, situate in said Inyo County, to wit: An undivided one-fourth interest in the "AURORA" and "TUBER" mines in the South Park Mining District, (in accordance with location notices duly recorded) together with mill-site located in connection therewith.

Terms of sale Cash, gold coin of the United States; 20 per cent. of the purchase price payable at the time of sale, and the balance upon confirmation of sale by the Superior Court of Los Angeles County.

Dated, October 14, 1899.

FRANK M. KELSEY,

Administrator of the Estate of John F. Ginser, deceased.

FLINT & BARKER, Attorneys for Administrator.

CARSON & COLORADO RAILROAD.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains o Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leav promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the mo ning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spen examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

FRIDAY, NOV. 3, 1899.

Catherine Motz vs. Geo. A. Free—Decree of foreclosure granted.

People vs. Chin Lee, Chinaman—Selling whisky to Indian. Plead guilty; time for pronouncing judgment waived; sentenced to fine of $300 or 150 days in county jail.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:00 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 3 o'clock a. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

MARRIED.

WILLIAMS—KIMLER—At Olancha, Inyo Co. Cal., on Wednesday, Nov. 8, 1899, Richard H. Williams and Amy G. Kimler, the Rev. J. Pardee officiating.

Charley Anthony has been in town all the week.

S. A. Fraser of Lone Pine is a visitor in town to-day.

P. H. Mack Esq. will arrive home from San Francisco next Monday.

Mrs. George Montgomery is visiting with Mrs. L. F. J. Wrinkle at Georges Creek.

A. M. Given and S. W. Austin left last Monday for a trip to the Coso mineral springs.

S. H. Spratt, the Big Pine lumber merchant, spent several days in town this week.

Supervisor Jones has been looking after road matters in this end of the district during the week.

Miss Mattie Wallace came down from Big Pine last Monday and is visiting with friends at Independence.

H. C. Hampton, Superintendent of Schools, visited Independence this week on his regular tour of inspection.

Mr. and Mrs. Fred Barnes came over to Independence Wednesday evening and will remain until to-morrow.

Albert Lewis left last Monday with a buckboard and pair of mules for Mountain Springs where he expects to remain for the winter.

Jerry Mairs left Wednesday evening for a visit with his daughters and other relatives at his old home in Canada. He expects to remain for the winter.

N. E. Conklin outfitted here last Monday and left for Bakersfield. His cattle summered well at Monache and were got out in good condition this fall.

There will be a grand meteoric display some time Monday night. We are billed to cross the path of a comet which we strike every thirty-three years.

Jack Curran, the pioneer of Panamint, is spending a few days at the County seat. Mr. Curran reports a great deal of mining activity in the Panamint section.

There was a light fall of snow on the mountains during the week. Weather sharps, including Prof. Hilgard, are predicting a dryer winter than last season.

Phelan has been re-elected Mayor of San Francisco. The *Call* as usual waged a dirty war and as it should be was repudiated by the voters who appreciate Mr. Phelan's faithful service.

W. W. Boswell has arrived at Darwin from Julian, Cal., and will take charge of a mine at Darwin. Clarence King accompanied him and will work in the mine under the new Superintendent.

Don't forget the donation party at the M. E. Church Tuesday evening. There will be no regular programme, but a social evening and a goodly donation for our pastor is hoped for.

Railway Extension.

As suggested in our last issue, the matter of railway extension in the desert section of Southern California is to be prosecuted during the coming winter. The Randsburg Railway, or the line from Kramer on the Santa Fe to Johannesburg, is to be extended to Keeler in Inyo county, which is a distance of about 130 miles through a rich mining territory, which in the past twenty years produced many million dollars worth of silver, when silver mining was possible. Of late years the attention of the prospectors and miners in this section has been devoted to exploration for gold ores with exceedingly happy results. In the region where silver once was mined, the belt of rocks which experience has found to be gold producers in other regions have been examined with the result that valuable mines are now being operated for gold. The new desert mining camp at Ballarat, which was once called Soda Spring, on the west side of the Panamint range of mountains is an evidence of the coming prosperity and possibilities of this section. The town has two stores, three saloons, two restaurants, a lodging house, and requires a hotel at present. The elevation is about 1200 feet above sea level and the climate mild. Water is obtained from wells about 16 to 20 feet deep, but a better supply could be obtained from the mountains three or four miles away when the population warrants the expense. Copper ores and galena, as well as other ores and economic minerals requiring shipping facilities, have been neglected in the past, and it is the intention to put the Borax works in operation during the coming spring. A party of twelve surveyors has been in the field for some days making a preliminary survey to ascertain the probable cost of the proposed line. A representative of the *Journal* in an interview with Mr. Woodard of the Randsburg Railway has his authority for the statement that the road will be pushed as soon as a feasible line has been located. The owners of claims in that district will soon be within touch of the base of supplies in Southern California by direct communication and the rich agricultural sections of northern Inyo county will have a market in the mining districts. A new railway line makes traffic for itself by opening new towns in the wilderness, rendering heavy minerals valuable by giving them shipping facilities, and is the chief aid to mining developments.—*Mining and Metallurgical Journal.*

Grand Jury.

The following list of grand jurors was drawn last Monday.

1. Edwin H. Edwards, Lone Pine.
2. Julius C. Roeper, Independence.
3. Cyrus B. Rawson, East Bishop.
4. Philip P. Keough, Bishop.
5. Willis H. Wells, Round Valley.
6. William F. Matlack, Independence.
7. L. F. J. Wrinkle, Georges Creek.
8. James R. Eldred, Big Pine.
9. Horace Bellows, Olancha.
10. Helaire P. Cartier, Independence.
11. Clemens L. Meyers, Big Pine.
12. Hannibal N. Gunter, Bishop.
13. Benjamin F. Williams, Darwin.
14. Albert Halverson, Big Pine.
15. Robert W. Ford, Lincoln.
16. Henry Shirley, Bishop.
17. August Stecker, Independence.
18. Henry Giles, Independence.
19. William H. Uhlmeyer, Big Pine.
20. John Shepherd, Georges Creek.
21. Peter M. Laberge, Lone Pine.
22. John H. Bulpitt, Bishop.
23. Allen Matlick, Bishop.
24. John S. Gorman, Independence.
25. Guilford P. Bourland, Lincoln.
26. Omie I. Mairs, Independence.
27. Louis Wood, Independence.
28. Pleasant A. Chalfant, Bishop.
29. Charles A. McKay, East Bishop.
30. Thomas Williams, Round Valley.

The grand jury meets at Independence on the first Tuesday in December.

Wedding At Olancha.

Just an hour before noon at the home of the bride's grandmother, one more of our young ladies entered the list of wedded folks. Miss Amy G. Kimler and Mr. Richard H. Williams were married by Rev. John J. Pardee of this place. The bride was attended by her half-sister, Miss Laura Brown, and the groom by Mr. Webster H. Walker, uncle of the bride. Miss Kimler was attired in a becoming costume and of course looked very sweet. The groom wore the conventional black. Quite a little wedding party had gathered to witness the happy event, and after the ceremony was concluded that made them man and wife, congratulations were in order. Then a bountiful and delicious wedding breakfast was served, which all present thoroughly enjoyed.

The following is a list of the wedding presents: Table linen, Mrs. Wm. Walker; lace bed set, Mr. and Mrs. Brown; tidies, Miss Laura Brown and Master George Brown; silver knives and forks, Dr. I. J. Woodin and son; table glass set, W. T. Grant; silver cake dish, Horace Bellows; silver butter dish, A. Walker.

Real Estate Transfers.

The following deeds have been recorded since November 2, 1899:

G. P. Rixford et als. to Inyo Marble Co.—Sept. 8, 1899. Marble Quarry at Inyo; $1.

Ottimo Garcia to W. P. De Remer—August 19, 1899. Und ½ int in San Leon mine, Coso Dist.; $50.

C. L. Byam to J. W. Blam—Oct. 28, 1899. Und ½ int in Byam group, Sherman Dist.; $1000.

H. W. Barton to Western Borax Co.—Sept. 29, 1899. 10 borax claims, Saline Valley; $10.

In the report of the proceedings held last week relative to the Mazourka road the name of E. Robinson was erroneously given as a member of the subscription committee in place of Bertrand Rhine. A. W. Eibeshutz of the committee has secured $1400 with the other members yet to hear from. From this it would seem that the success of the project is assured.

The Pipe And Poodle.

Harry Epstein vouches for the truth of the following: As the train left Dayton the other day a woman with a little dog under her arm entered the smoking car. There was but one other passenger in the car, a man who sat smoking a meerschaum pipe. The woman seated herself and glared at the smoker. Presently she flounced over to the man and told him to stop smoking as it was offensive to her. He refused, stating that the car was reserved for smoking and that she could go in the ladies' coach if she didn't like it. The woman declared that she would stop his smoking pretty quick, and snatching the pipe out of his mouth she threw it out of the window. Whereupon the angry man grabbed the poodle from under her arm and cast it after the pipe. Then followed a scene that would rival the Kilkenny cat fight. Presently the train stopped at a station, where the combatants spied the sheriff standing on the platform. Both flew at him and seizing an arm began to tell their story. The bewildered sheriff looked about for some means of escape and saw, trotting down the track after the train, the poodle with the meerschaum pipe in his mouth.

Thanksgiving Proclamation.

Following is the shortest Thanksgiving proclamation on record:

"In obedience to the universal and praiseworthy American custom of setting apart a day for public thanksgiving and prayer to Almighty God, and for the performance of charitable works: and, further in conformity with the proclamation of the President of the United States of America, given at the City of Washington, D. C., October 25, 1899, I, Henry T. Gage, as Governor of the State of California, do hereby proclaim Thursday, the 30th day of November, A. D., 1899, as Thanksgiving Day, and I do hereby declare the same a legal holiday."

R. W. Correll arrived at Independence Wednesday evening and will superintend the work on the Barnes and Anderson mine for the Salt Lake people who have it bonded. Mr. Correll has purchased a complete bill of camp supplies and will commence operations to-morrow morning with a force of ten miners and development work will be pushed as rapidly as possible.

NEW ADVERTISEMENTS.

HOMESTEAD, FINAL PROOF.

U. S. LAND OFFICE, Independence, Cal, Oct. 31, 1899.

Notice is hereby given that the following-named settler has filed notice of his intention to make final proof in support of his claim and that said proof will be made before the Register and Receiver at Independence, Cal., on December 18, 1899, viz.

JAMES DRURY,

for the NE ¼ of Sec 15, T 13 S, R 35 E, M D M

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz.: William J. Lake, Frank Lawrence, Arlington F. Mairs, William H. Huff, all of Independence, Cal.

S. W. AUSTIN, Register.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist, Inyo County, California, and from J. H Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 28th day of September, 1899 an assessment, No. 35, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.
CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 31, 10th Floor, San Francisco, California.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNty of Inyo, State of California.

Robert W. Troeger, Plaintiff, vs. Susie Troeger, Defendant.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Ben. H. Yandell, Attorney for Plaintiff.

The people of the State of California send greeting to Susie Troeger, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this 5th day of September, A. D. 1899.

D. J. HESSION,
[SEAL] Clerk.
Ben. H. Yandell, Independence, Cal. attorney for plaintiff.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

Lodge 221, F. & A. M.

Regular meetings of Lodge No. 221, F. & A M., for the year

Dewey Celebration.

Americans are quick to appreciate merit. The Dewey celebrations prove that, and it is again forcibly demonstrated in the praise and confidence which is accorded Hostetter's Stomach Bitters, one of the most meritorious remedies ever compounded for indigestion, constipation, dyspepsia, biliousness, liver or kidney disease or any trouble arising from a weak stomach.

Most girls love a rainy day matinee, for when it rains the men can't go to the ball game.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.
Hall's Family Pills are the best.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE LTD., 931 Arch St, Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Piso's Cure for Consumption is our only medicine for coughs and colds.—Mrs. C. Beltz, 439 8th ave., Denver, Col., Nov. 8, '95.

Lost His Birthmark.

An amusing incident took place at the Grand Central station a few weeks ago. A portly man with clothes of foreign cut, outlandish baggage and a decided German brogue bought a ticket for a western point and then bought a sleeping berth and waited for his train to be announced. As soon as it was called he got into line, occupied much space with all his bags and bundles and made people in front and behind him uncomfortable. He had no sooner reached the platform than he dropped his baggage and freight and pushed his way back into the waiting room, ran up to the police officer and said breathlessly:

"Say, I lost my birthmark."

"Your birthmark? Where was it?"

"Here in my pocket in."

"In your pocket? That's a nice place to have one," said the officer, wishing to humor a crazy man. "How did it look?"

"Red—fool—like all birthmark. I can without it not in the sleep wagon go," and he rushed to the ticket window, where they knew that the German meant berth check when he said birthmark, and the matter was settled to his satisfaction. The crowds had gone through the door, and it was nearly train time when he came bounding back and up to the ticket window, where, with profuse apologies, he told the clerk that he had found his "birthmark."—New York Tribune.

Too Much Realism.

Mme. de Navarro has recorded in "A Few Memories" the greatest lesson she ever received against too much realism. In a certain drama the heroine, under great excitement, suddenly stops to gain composure as she hears the approaching carriages of the guests.

"Hark!" she says. "I hear the wheels of their carriages."

We obtained the effects of approaching wheels, but, try as we would, the stamping of the horses' feet upon the gravel before Clarisse's door we could not manage. At last a brilliant idea struck me, which the stage manager promptly indorsed.

It was that we should have in a donkey from Covent Garden to trot up and down behind the scenes on the gravel especially laid for him. We were decidedly nervous on the first appearance of our four footed friend, whose role was to counterfeit the high stepping horses of the brilliant French court.

When his cue was given, there was only an ominous silence. I repeated the word in a louder voice, when such a braying and scuffling were heard as sent the audience into roars of laughter. Although it was one of the most serious situations of the play, I could not help joining in their mirth until the tears rolled down my cheeks.

An Inviting Gun.

The Hon. William Wortham, long state treasurer of Texas, was in a New York jewelry store one day when he noticed a showcase filled with splendid jeweled revolvers with silver and gold grips and chased barrels, having precious stones set into the butts.

"Lemme see one of those guns," he said to the clerk.

"Which one, sir?"

"The gold one with the big ruby in the handle."

The clerk took it from the case. It was marked $33, and it looked worth even more. The Texan took it tenderly in both hands and held it admiringly up to the light. Then drawing himself up to his full height, which was 6½ feet, he rested the revolver barrel upon his left elbow, crooked for the purpose, and looked over the sights down the long store. Those persons who saw him involuntarily dodged.

"Say," said Mr. Wortham, with quiet but intense enthusiasm, as he returned the weapon, "if I was to wear that gun down in my state the people would be falling down on their knees begging to be killed with it."

What Paper Costs.

Ladies who go shopping have little idea of the cost of their trip, even in such a minor detail as the cost of paper for the packages they have sent home. A Baltimorean has recently compared the weight of paper with the food supplied to the purchaser. In one day's purchases it is said that the paper wrapping amounted to about 10 per cent of the total. In a list of supplies costing about $1.40 he found that the paper which was weighed with the provisions cost 14¾ cents.

"Necessity is the Mother of Invention."

It was the necessity for a reliable blood purifier and tonic that brought into existence Hood's Sarsaparilla. It is a highly concentrated extract prepared by a combination, proportion and process peculiar to itself and giving to Hood's Sarsaparilla unequalled curative power.

Hood's Sarsaparilla
Never Disappoints

OPENING UP AFRICA.

PROPOSED RAILWAY LINES BEING SURVEYED.

Extend from the Congo to the Central African Lakes, Traversing Almost Impenetrable Forests — Dauntless Vigor of Belgian Enterprise.

When we hear that two railroad routes are surveying through the dense forest of equatorial Africa in regions that have never been penetrated by white men except when Emin Pasha pushed through them, just before he was murdered, it is easy to see that great changes are occurring in Africa. A while ago men were exploring the land merely to improve the maps and see if the country was worth anything. Now they are entering new regions with the sole purpose of making preliminary surveys for railroads. Business, and not research, is giving impetus to their efforts.

The Congo State has decided to have outlets to the Indian Ocean and the Nile, as well as to the Atlantic. It also desires to tap the great central lake region and make a highway for some of its commerce to the west and down the Congo. There is another potent reason for building the proposed railroads. Beyond Stanley Falls the Congo affluents are so cut up by rapids that they can not be used as routes to connect the provinces of the eastern frontier of the states and the great lakes with the railroad and river route below the falls. So railroads are essential to unite the eastern and western provinces.

A party of six engineers headed by Mr. Adam, formerly at the head of the engineer corps of the Congo Railroad Company, have begun the survey for the railroads. The station at Stanley Falls is the point of departure. There will be only one road for several hundred miles east of Stanley Falls. Then there will be a bifurcation, one line running to the northeast to some station near the south end of Albert Nyanza, where it will be at the head of navigation in the Nile Valley. The other road will turn to the south and terminate at the north end of Lake Tanganyika, where steamers will connect it with the south end and with the Stephenson wagon road between Lakes Tanganyika and Nyassa, which was put into good condition last year. Of course, when Cecil Rhodes gets his transcontinental railroad up into the lake regions it will form a junction with both these lines.

It is known that for a good deal of the way these roads will traverse densely wooded country, just like the terrible forests through which Stanley passed on his way to the relief of Emin. The difficulties of building the roads are expected to be very trying, but Belgian enterprise has carried other formidable undertakings in equatorial Africa to success, and it is fully expected in Belgium that the building of these roads will begin as soon as the preliminary surveys have been completed.

The success of the Congo Railroad, which has been opened just a year, and is already earning good dividends, has made African enterprise very popular in Belgium. In the month of May its receipts for freight and passengers were $232,000, and in the first eleven months of its operation its gross earnings were $1,690,138.—New York Sun.

SYSTEM OF STREET SIGNALING.

The Very Latest Discovery in Wireless Communication.

In the bustle and noise of our large cities it is never an easy matter, and sometimes it is quite impossible, to make a remark to a friend one meets in the streets. Besides, when your acquaintances are numerous, a lot of valuable time is wasted saying in many words what might readily be conveyed by a single gesture.

There is a language of flowers, a language of postage stamps, of fans, of handkerchiefs and the like. But, says the Chronicle, it has occurred to an inventor that dwells in Chicago that Chicagoans are very much in want of a system of signals to express the things men commonly say to each other when they meet in the streets.

THE NEW SALUTING CODE.

This system has many advantages. Like wireless telegraphy, it can be used from a passing car to a man on the sidewalk. You can stand on Rush street bridge and ask a friend in a river steamer to lend you a five. From the parquette of a theater you can invite an acquaintance in the gallery to dine with you on the following evening.

You can converse from one side of the street to the other. You can say good morning without taking your pipe or cigarette out of your mouth. You can talk in French, German, Italian, Spanish Hindustani, Yiddish—in fact, in every language of the globe. If you happen to forget a man's name no awkwardness will arise. And the saving of time will be immense.

The key to the new system is as follows:

First finger to temple—Good morning.

Second finger to temple—How are they coming?

Third finger to temple—Hello, old chap!

Fourth finger to temple—Cold, isn't it?

Thumb to temple—Windy.

Finger to chin—Can you lend me a V?

Finger to cheek—Will you dine with me to-morrow?

A Rise in Life.

Cassidy—In this blissed country of ours a man can come up from nothing! Just look at our Mayor!

Cassidy—He did! He hasn't got a drop of Irish blood in his veins!"—Puck.

SEA DOG FEARS FOR HIS SON

The Promising Boy Had Imbibed Some Newfangled Words.

"He's right," said the weather beaten old man with a fringe of whiskers under his chin. "The feller as wrote that is steerin straight an no mistake," he added as he bit a piece out of a plug of tobacco.

"What's the trouble?" asked the man who had sat down near him on the park bench.

"A father's sorrer. This paper says that boys ain't eddycated right."

"Well, it's pretty hard to keep them at their books, and that's a fact. I've got a boy whose sole ambition is to run away and go to sea."

"Look out fur 'im. Watch his eddyration before it gits too late. I sent my boy to school, but I didn't take pains an keep an eye on him. I went to see the lad the other day, an while I was talkin about old times I started in to tell him a fo'c'sle yarn. He looked at me kind o' inquirin like an says, 'Excuse me, father, but don't you mean forecastle?' You can imagine a parent's feelings. But I led him on an could feel myself turnin pale to hear him talk about bulwarks when he meant bullarks an referrin offhand to the main topgallant sail. What he meant was the mentogallans'l. But he didn't know any better. I told him better, but he jes' grinned. Now what's that boy's chance in life? S'posen he takes a notion to make a man o' himself an runs away to sea, fur I wouldn't have the nerve, knowin what I do, to recommend him. What'll the result be? He'll walk up to the bo'sun an ask him if he ain't the boatswain, an then he'll jes' naturally get dropped overboard.'—Washington Star.

WHEN FASTING IS FATAL.

Loss of Weight Below a Certain Point Brings Death.

During a long fast the daily loss of weight becomes gradually less and less. Death comes when the total loss has reached a certain percentage, which percentage varies with the original weight. Fat animals may lose half their weight, thinner ones perhaps two-fifths.

A man or woman of rather spare habit, weighing 143 pounds, could, therefore, lose about 55 pounds before succumbing. Heart action, respiration and blood pressure remain unaltered during starvation, but the temperature of the body falls nearly a degree in most cases. The secretion of gastric juice ceases, but saliva and bile are still formed. The duration of life depends upon the extent and activity of the physiological processes.

Children die after a fast of from three to five days, during which they have lost a quarter of their weight. Healthy adults, however, have fasted 60 days when water has been taken.

Dr. Schaeffer, a German physician, notes the case of a woman, aged 47, who died after a fast of 43 days, during which she drank water freely. Her weight, which was 143 pounds a year before her death, was reduced to 99 pounds. It was a case of suicidal melancholia, and the woman patiently carried out her horrible undertaking so quietly as to scarcely attract the notice of her family and died at last calmly and peacefully without complaint or apparent evidence of suffering.—San Francisco Examiner.

A Tough Bantam.

A letter in a Glasgow paper records a phenomenon much too remarkable to be reserved for Scottish consumption. The writer says: "An acquaintance of mine, who lives up north, has among others of the feathered tribe a little bantam cock. A few weeks ago he noticed that it was looking the worse for a slight difference of opinion with a canine friend, but did not examine it closely till his mother's and sisters' vociferations brought him in a hurry. There was the bantam picking away at corn, but the corn was dropping from a rent in the bird's chest just as fast as it was lifted. Not wanting to kill the bird, my friend got a needle and some horsehair and stitched up the tear, with the result that the bird now is as good as new."

The Kind He Bought.

Little Edwin—Mamma, what is liquid air?

Mamma—I don't know. Ask your papa. He's always going out between the acts "to get a little air."—Chicago Times-Herald.

Hope is a flatterer, but the most upright of all parasites, for she frequents the poor man's hut as well as the palace of his superiors.—Shenstone.

When Pain Racks the Body

Frank Long, who lives near Lennon, Mich., says: "I was taken with a pain in my back, and I was obliged to take to my bed. The physician pronounced my case muscular rheumatism accompanied by lumbago.

"I gradually became worse, until I thought death would be welcome release. I was finally induced to try Dr. Williams' Pink Pills for Pale People, and after using five boxes, was entirely cured.

"I am confident that Dr. Williams' Pink Pills saved my life. I will gladly answer inquiries concerning my sickness and wonderful cure, provided stamp be enclosed for reply.

"FRANK LONG."

Sworn to before me at Venice, Mich., this 15th day of April, 1898.
G. B. GOLDSMITH, *Justice of the Peace.*
—From the Observer, Flushing, Mich.

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box. 6 boxes $2.50.

Bad Blood

Pimples, eruptions, blotches, scales, ulcers, sores, eczema and chronic swellings are caused by bad blood. CASCARETS are wonder-workers in the cure of any disease caused by bad or impure blood. They eliminate all poisons, build up and enrich the blood, enabling it to make new, healthy tissue. Pure blood means perfect health, and if you will use Cascarets they will give you good health and a pure, clean skin, free from pimples and blotches. To try Cascarets is to like them, for never before has there been produced as perfect and so harmless a blood purifier, liver and stomach regulator as CASCARETS Candy Cathartic!

Don't be imposed upon with "something just as good" as CASCARETS—you can't find it!

"CASCARETS do all claimed for them and are a truly wonderful medicine. I have often wished for a medicine pleasant to take, and at last have found it in CASCARETS. Since taking them my blood has been purified and my complexion has improved wonderfully, and I feel much better in every way."
MRS. SALLIE E. SELLARS, Luttrell, Tenn.

A Biblical Explanation.

DRUGGISTS

CASCARETS are absolutely harmless, a purely vegetable compound. No mercurial or other mineral pill-poison in Cascarets. Cascarets promptly, effectively and permanently cure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhœa and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Be sure you get the genuine! Beware of imitations and substitutes! Buy a box of CASCARETS to-day, and if not pleased in every respect, get your money back! Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK. 377

A HARD WON BET.

Carrying Four Bricks Half a Mile Is Not an Easy Task.

"The hardest won bet I ever made," remarked the traveling man as he shook the ashes off his cigar, "was to carry four bricks half a mile. That sounds like a simple thing to do, doesn't it? Well, you try it and you will find out whether it is or not. Of course the manner of carrying the bricks is important. A man bet me that I couldn't carry two bricks in each hand from where we were back to the hotel and put them up on the bar. The bricks were to be put side by side and grasped, two in each hand, between the thumb and fingers, the fingers pointing down. I was not allowed to stop and rest, nor to put the bricks down.

"Well, thought I, that's $2 easily earned, so I took the bet and started. For a quarter of the distance it was easy and I already felt those two silver dollars in my pocket. But then my fingers began to grow tired. The muscles between my forefingers and thumbs were soon aching terribly. My arms began to pain me and to throb like mad. I found myself setting my teeth together and the cords in my neck were in a high state of tension. When I came within a hundred yards of the hotel there was scarcely an inch in my whole body that was not aching as if I had been stuck full of pins.

"I don't know how I managed to go that last little distance. I could no longer stand erect, and I was trembling like a leaf, and yet the other fellow was alongside, laughing as if to split his sides. And when I got into the barroom, it was all I could do to raise first one hand and then the other and put the bricks on the counter. I know that I couldn't have gone 50 feet farther. I got the $2, but the next day I could scarcely move, and I didn't get over the soreness for a week. It looks easy, but just you try it."—Detroit Free Press.

THE DOORBELL.

It Tells What Manner of Man You Are by Your Ring.

Doorbells are pretty fair indicators of character. Probably you have not been conscious of it, but every time you pull a doorbell you register what manner of man you are. Your ring will not tell everything about you, from the color of your eyes to your taste in flowers, but to those who know the signs the doorbell is as good as a title page. Any one who has had occasion to answer bell pulls knows how much difference there is in them. One person's method varies little from time to time, though the difference between that method and somebody else's, while slight, will be sufficiently well marked. It is seldom that two rings are exactly alike.

The housewife recognizes each, the impatient man, who pulls the bell twice in quick succession and does not wait long before trying it again; the one of more phlegmatic temperament, whose ring is slower and more substantial; the hesitating woman, who draws the knob out in a succession of nervous jerks; the seedy individual with matches to sell, who stretches the wire carefully to its full length and then allows it to relax with a faint, apologetic tinkle, and the jolly friend, who knows he is welcome, and therefore grasps the knob with a hearty swing that is fairly eloquent with good nature, and sets the bell to shaking its sides with such peals of echoing laughter that it positively cannot stop at once, but subsides gradually with a merry, irrepressible little titter. A doorbell has as many voices as visitors.—Berlin (Md.) Herald.

To Test Wall Papers.

Arsenic is very often present in the pigment used for wall papers, and as every one knows, if one covers one's walls with a paper containing deadly poison one's health must suffer. It is important, therefore, to select wall papers which do not contain arsenic, and the method of testing them is simple in the extreme. Take a piece of the paper and light it, and if arsenic be present you will notice an odor like that of garlic. Do not inhale the smoke. Another way of testing the paper is to pour over it a little diluted hydrochloric acid. If the greens in the pattern become blue in this treatment it is because they contain arsenic.—Home Notes.

A GLEAM OF PLEASURE.

Along the noisy city ways,
And in this rattling city car,
On this the dreariest of days,
Perplexed with business fret and jar,

When suddenly a young, sweet face
Looked on my petulance and pain
And lent it something of its grace
And charmed it into peace again.

The day was just as bleak without,
My neighbors just as cold within,
And truth was just as full of doubt,
The world was just as full of sin.

But in the light of that young smile
The world grew pure, the heart grew warm,
And sunshine gleamed a little while
Across the darkness of the storm.

I did not care to seek her name.
I only said: "God bless thy life.
Thy sweet, young grace be still the same,
Or happy maid or happy wife."
—Phillips Brooks.

Pretty Lively Fooling.

I was out walking in Kingston, Jamaica, one afternoon, and while on a narrow side street I came upon two black women, each apparently in a towering rage. Each woman's tongue was going at a phenomenal rate, but not a word of their screeching jargon was intelligible to me.

Finally one of the women scooped up a double handful of the ever present Kingston dust and flung it over the other woman with a wild shriek of laughter. The dust covered woman retaliated by taking a tin pan she had in her hand and scooping up a couple of quarts of the dirty water in the gutter by the roadside drenched her assailant with it, while all that part of Kingston resounded with the mad laughter. The two women then closed in on each other and proceeded to engage in a prolonged wrestle, which resulted in both of them falling to the ground, where they rolled over and over in a cloud of dust and finally stood upon their feet, facing each other in a state of dirt and disorder beyond description.

Fearing that they would make a second onslaught on each other and wishing to play the part of peacemaker, I stepped forward and asked:

"What is the trouble?"

Courtesying low, one of the women said in a soft, drawling voice:

"No trouble at all, mastah; we's jess foolin."—Harper's Bazar.

The Only Place to Put Them.

"I say," said a friend the other day, "you are an old hand at it. I have only just got married and don't understand much about the business. I should like to know whether a married man has any rights left when he takes unto himself a wife?"

"Rights? Yes, lots. He has a right to pay all the bills"—

"Stop! I mean this. Let me give you an instance. Every box, every chest of drawers and portmanteau and in fact every available receptacle of every description is stuffed full of my wife's property, and when I want to put away a few cuffs and collars"—

"Hold hard. I know what you mean. Listen, young man. If your bedroom were 200 yards long, lined from the door to the ceiling with shelves, and you wanted a place to stow away a couple of shirts, you couldn't find a nook that wasn't full of hairpins, scent bottles, odd gloves, pieces of ribbon, odd feathers and artificial flowers, little bits of tape and buttons galore, with pins and needles thrown in, so just accept the inevitable. Wrap your personal property in an old newspaper parcel and hide it under the bed."

He grinned ironically, but passed on a sadder and wiser man.—London Tid-Bits.

25 CTS PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists CONSUMPTION

Smelling the Glass.

Bartenders who pride themselves on their mixed drinks have a habit of smelling of the empty glass as soon as the customer has drained it. In this way they can tell to a dot whether they "hit it right" or not. I have not seen the bartender who can make two drinks alike, and none is ever certain that he has guessed rightly the proportions of liquor and its disguises until after the olfactory test. "Fred, this isn't quite up to the mark," says Tosspot, who drinks every drop. "That so?" smelling of the glass. "You're right. Not enough curacoa. Let me make you another."

The worst telltale is the beer glass. Not one-tenth of the beer sold over the bar or in cases is fit for a dog to drink. If you are fond of a glass and it does not lie easily on the stomach, if there is an unpleasant after effect, a disagreeable taste in the mouth or a sudden disinclination to drink further, smell of the emptied glass, and the chances are that you will conclude you have been putting part of a cow lot inside of you. You will resolve never to touch that beer again, wherein you will be wise.

The same test may be applied to whiskies, wines and liqueurs, gins, rums, brandies and cordials. Many a man would save his breath and his stomach by employing his function of smell after the first drink. It is the surest prohibition I know.—New York Press.

Cross In Front of Engines.

"One of the oddest traits in animal nature," said an old time Illinois Central engineer, "is the desire of every living thing to cross in front of the locomotive. At first it filled me with wonder, and I used to lie awake nights trying to explain it. Now it's grown to be an old story with me.

"What goes in front of the engine? Why, everything. Let me see! I've seen snakes—and I'm a sober man, mind you—stick up their heads to see what was making all the rumble along the right of way and then deliberately start to crawl across the rails. I've seen many a quail spring up along the right of way, fly along just ahead of the engine and then shoot across in front. Several times when I've been running a mile a minute the engine has struck these birds and killed them. In the old days I used to jump a deer now and then, and the chances were he'd cross the track every time. Cattle invariably do it until they have learned better; so do pigs and all domestic animals. Even chickens will run fluttering across.

"It seems to me I've killed enough animals to stock a farm and a menagerie."—Chicago Inter Ocean.

CRIME OF THE AGES.

DREYFUS CASE THE DARKEST DRAMA IN HISTORY.

A Story of Tragic Incidents, Foul Intrigue, Vile Treachery, Suffering Innocence and Triumphant Villainy.

The story of Alfred Dreyfus, a captain in the French artillery, who was reconvicted on the charge of selling state secrets to the German Government, is one of the most remarkable in the history of the world. It is a story full of dramatic and tragic incidents, of foul intrigue and vile treachery, of forgery, assassination, suicide and almost every species of crime and wickedness known to desperate and degenerate men. That dreadful drama that has so dishonorably affected a nation has overthrown five French cabinets, has driven three men to suicide, others to exile and many to undying shame and infamy. Nor is the end yet. Truth, justice, the sympathy and moral support of the unprejudiced in every land are on the side of Dreyfus, and the day will eventually come when the French nation will declare the innocence of the man whom it has twice condemned.

Dreyfus' Career.

Alfred Dreyfus is an Alsatian Jew. He received a military training at the Ecole Polytechnique, Paris, and in 1878 was appointed to a sub-lieutenancy. He made a specialty of the artillery service and his rise was rapid. In 1889 he was a captain in the army; in 1893 he was attached to the general staff—the first Hebrew to hold that position. He was married, the father of two children, and the future seemed roseate.

But Dreyfus was a Jew—a crime in France. Hounding Jews in that opera bouffe of a republic is a pastime and a passion. Schemers curry favor by it in the estimation of the baser elements, and France has a superabundance of the former. Then Dreyfus was brilliant and studious. These qualities generated envy, and so, in 1894, when certain high-born and accomplished rascals wanted a victim upon whom to cast the odium of their malodorous lives, what more natural than to select the despised and envied Jew—Dreyfus?

HISTORICAL CONFRONTATION OF HENRY AND PICQUART.

Selling State Secrets.

In that year—1894—spies of the French secret service department recovered a letter from the office of the German embassy in Paris which seemed to indicate that some Frenchman was carrying secret information to that office. The letter contained the sentence: "This dog of a D—— is really getting too greedy." In September, 1894, the spies brought to light another document known as the bordereau. It was in the nature of a memorandum naming five military secrets which the writer offered to convey to the unnamed person he was addressing. It was turned over to the miserable Mercier, French Minister of War, and he summoned experts who pronounced it to be the work of Dreyfus. Major du Paty de Clam, one of the most execrable scoundrels who have figured in the whole national drama, was given the bordereau for further investigation. He summoned Dreyfus before him. The investigation was secret, and the infamous Paty de Clam pronounced Dreyfus guilty, and added that the latter had made a full confession. Dreyfus was arrested and incarcerated in the Cherche Midi military prison.

The First Conviction.

In December, 1894, Dreyfus was put on trial before a court-martial. The trial was a farce. It is now known that not a particle of credible proof was adduced against him. Casimir-Perier, then President of France, left it on record that only one incriminating document was laid before the judges, and that document was a forgery. The principal witnesses against the prisoner were Colonels Henry, Esterhazy and Paty de Clam. Dreyfus was convicted. His conviction was necessary to shield others just as his second conviction was decreed upon for reasons of state. Jan. 5, 1895, Dreyfus was publicly degraded, his sword being broken and his uniform defaced. The Parisian mob shouted "Down with the Jews!" and "Live the army!" and a little later the prisoner was taken to Devil's Island, off the coast of French Guiana, to suffer imprisonment for life.

Working for the Prisoner.

The case of Dreyfus apparently was closed. The conspirators who had condemned him were strong and powerful. It was unpopular and unsafe to speak a word in favor of the prisoner or of the proscribed race to which he belonged.

But the case was not closed. The heroic wife of the prisoner, Mme. Lucile Dreyfus, remained, to fight for the honor of her husband, in whom she believed, and well and loyally did she wage her battle against entrenched wrong and injustice and hate. Friends rallied around her, and in the press and legislative halls the case of Dreyfus was kept ever to the front.

In June, 1895, Col. George Picquart became head of the secret intelligence of the war office. Documents came into his hands that convinced him that Esterhazy had written the bordereau and that Dreyfus was innocent. He communicated this belief to Generals Boisdeffre and Gonse. But Esterhazy stood high in their regard, and Picquart was sent on a perilous mission to Africa in the hope that he would never return. This was in the fall of 1896.

Others, however, followed along the lines of Picquart in his investigation. Scheurer-Kestner asserted the innocence of Dreyfus, and Mathieu Dreyfus, brother of the prisoner, openly accused Esterhazy as the author of the bordereau. The agitation was so strong that in January, 1898, the war office ordered a whitewash court-martial for Esterhazy. Picquart was recalled to testify. Esterhazy was acquitted according to program, and then Picquart was arrested on a trumped-up charge of forgery and sent to prison. The war office was still in the ascendant, while the lonely prisoner on Devil's Island was eating out his heart in suffering and shame.

The Zola Episode.

Then came the novelist, Emile Zola, who in an open letter charged Esterhazy, Henry and the chiefs of the war office with conspiracy to ruin Dreyfus. This brought upon his head the wrath of the army chiefs and he was tried for slander and found guilty. He appealed, was again convicted and fled from France. M. Labori was his counsel.

France at this time was in a state of the utmost disorder. There were frequent riots. The cabinet of M. Meline fell, to be succeeded by that of M. Brisson, and the general political fabric seemed on the verge of breaking up.

At this juncture—July, 1898—War Minister Cavaignac asserted his belief in Dreyfus' guilt, and his speech to this effect in the Chamber of Deputies was ordered posted throughout France. He produced a document at the time that he said had convinced him of Dreyfus' guilt.

It was retorted that the document was a forgery and was committed by Col. Henry. The latter soon afterward admitted his guilt and then committed suicide. Previous to this Lemercier-Picard, who figured in the scandal, committed suicide, and last spring, Lorimier, Col. Henry's former clerk, followed suit.

After the Henry fiasco Cavaignac resigned as Minister of War. Gen. Zurlinden succeeded him, and he soon resigned because he was opposed to a revision of the Dreyfus case. A month later still another War Minister, Gen. Chanoine, went down and out for the same reason, and after him the whole cabinet. Francois de Pressense was expelled from the Legion of Honor because he raised his voice for Dreyfus, and others suffered social ostracism and political death for like offenses. There were accusations and recriminations, threats of riot and rebellion, and other resignations from high offices, all because of the exile away off on the coast of Guiana.

New Trial Ordered.

This was the situation at the opening of the present year. Then the testimony of Dreyfus, taken on Devil's Island, was presented before the Court of Cassation, which was considering the granting of a new trial to Dreyfus. Events then crowded on one another. Paty de Clam was arrested in Paris and imprisoned. Esterhazy, who had fled to London, confessed that he was the author of the bordereau. In June the Court of Cassation ordered a new trial for Dreyfus and referred the case to the Rennes court-martial. July 1 Capt. Dreyfus arrived at Rennes, and Aug. 7 the second court-martial began.

The details of the trial, famous and infamous alike, and the outrageous conviction of the prisoner are familiar to all. The fight made for their client by M. Labori and M. Demange and the prejudiced and unfair rulings of the court-martial's president, Col. Jouaust, will live, the one a record of honor, the other a record of shame. It was not Dreyfus so much as France that was on trial at Rennes, and France convicted herself of an infamy as deep, an injustice as black and a dishonor as great as ever stained the life of a nation. But one thought can come to a person considering the present result of the drama: "A government that cannot do justice to the humblest of its citizens has no justification to exist."

HE GOT WELL,

And the Despised Little German Band Saved His Life.

It was a sad scene. The old man lay on his bed, and by him sat the faithful wife, holding his worn hand in hers, and forcing back the tears to greet his wondering look with a smile. But he felt the cold hand falling on him, and he turned his weary eyes up to her pale, wan face.

"Jennie, dear, I am going."

"Oh, no, John—not yet—not yet."

"Yes, dear wife," and he closed his eyes; "the end is near. The world grows dark about me. There is a mist around me gathering thicker and thicker, and there, as through a cloud, I hear the music of angels—sweet and sad."

"No, no, John, dear; that isn't angels; that's the brass band at the corner."

"What!" said the dying man. "Have those scoundrels dared to come here when they know I'm dying? Give me my bootjack. I'll let 'em see."

And, in a towering rage, the old man jumped from his bed, and, before his wife could think, he had opened the window and shied the bootjack at the band.

"I've hit that fat leader in the neck!"

And he went back to bed and got well.

Pianos and Literary Reform.

A funny story about Miss Marie Corelli comes from Stratford-on-Avon, where that mystic novelist has been living opposite a young ladies' school. It appears that in this school are many pianos, daily practice upon which by the pupils has been excessively damaging to Miss Corelli's nerves. Driven to desperation, she wrote to the principal of the school, asking that when piano-forte practice was going forward the windows might be kept closed, as the noise interfered with the progress of literary composition. To which the schoolmistress replied that if the noise would prevent the composition of another book like the "Sorrows of Satan" she would order half a dozen more pianos.—New York Tribune.

LADY YARDE-BULLER INSANE.

Famous California Beauty Is Placed Under Care of a Guardian.

Lady Yarde-Buller, concerned in many remarkable episodes in Europe and California, has been adjudged insane, and a guardian appointed for her person and estate. She has run through a fortune in fifteen years and has gained notoriety by her eccentric behavior. Those who have been thrown into contact with her during the last few months testified that Lady Yarde-Buller's addiction to alcohol had increased so much that she is incompetent to manage her affairs. She spent her money recklessly and went so far as to actually throw it away on the streets. While her actual income is only about $100 or $500 a month she had been spending $600. Lady Yarde-Buller's career has been checkered. She was spoiled by her father, who was very wealthy, and when in her teens tried to elope in Japan with young Majoribanks, afterward Lord Tweedmouth. Then she wedded an Englishman

LADY YARDE-BULLER.

named Blair, who was killed in South Africa. Soon after his death she married Yarde-Buller, a Scotchman, who taught her how to drink. They quarreled and he sued for a divorce, alleging that she showed too much partiality for the society of Valentine Gadsden, a mining promoter.

Ancient New Mexican Idols.

Agents of the bureau of ethnology at Washington have taken photographs of the unique collection of stone idols owned by ex-Gov. L. Bradford Prince, of Santa Fe, N. M. He has over 1,000 of them, and they were all dug up on the sites of ancient Pueblo villages. Some are over six feet in height; some are light enough to float in water. It is difficult to tell the age of the idols; it is only known that they were used by the ancestors of the present Pueblo Indians before the Spanish conquest.

To agree with everybody is as bad as not to agree with anybody.

GREAT DEPTHS OF LAKES.

Distance to the Bottom Varies from 1,386 to 210 Feet.

If the chain of great lakes which bound the northern limits of a portion of the United States could be reached to the level of the sea two of the chains would be practically wiped off the face of the earth. Lake Michigan would become two lakes much smaller than the present majestic body of water which lies off Chicago. Chicagoans could travel on what is now the bottom of the lake as far north as a point midway between the shores off Milwaukee and Grand Haven without getting their feet wet. But while this statement duly explained shows the great depth of the great lakes, the mariner is concerned only with the shore line and any obstructions of navi-

DEPTHS FROM CHICAGO TO ST. JOSEPH.

gation in the usual channels. The recent grounding of a huge freighter off Drummond Island in the northern straits shows how faulty the surveys and soundings of the chain are relative to modern vessels.

The freighter standing up the channel to the "Soo" was in what her chart declared to be thirty-four feet of water. As she draws about thirteen she had plain sailing. But when all were snug and confident the ship drove onto a rock and was stuck fast aground. This rock lies but ten feet below the surface. Ten years ago it was no obstruction for the reason that the average draught of lake vessels was about eight feet on the load water line. To-day it is much nearer fifteen or even eighteen, so the soundings of years ago are not altogether reliable in channels dotted with small islands.

The Government, through the engineers of the army, makes frequent soundings in harbors and along shore lines. Changes in types of vessels, changes in currents, changes in water levels when found to be permanent all require modifications of existing charts. Probably no system of internal waterways is so thoroughly charted as the great lakes. Yet it is no infrequent thing for some vessel to run aground on concealed obstructions where the detailed sounding charts establish a depth of water more than three times sufficient to float the vessel.

Six years ago the old Michigan made a series of harbor soundings for Chicago. No lake port in the whole sys-

X AT INTERSECTION OF TWO LINES SHOWS POINT WHERE VESSEL GROUNDED.

tem has been more thoroughly explored than this. Yet W. J. Wilson of the hydrographic office says that it would not be a matter for surprise if a large vessel, freight or passenger, should find something the Michigan overlooked. Mr. Wilson says that unless an exact topographical chart of every acre of harbor is made it cannot be relied upon conclusively. Yet the charts as made are trustworthy because they cover the ground so fully that changes from the depths marked in detail are not probable.

As soon as an obstruction is located and reported new soundings are made over it and all about for a long distance to determine its extent and the possibility of its being one of a group. These new charts are issued as soon as completed and every shipmaster has one for future guidance. Of course in the lakes where shore lines are so close sailing by the compass is not so exact as it is at sea. Still masters are expected to be able to do this whenever called upon. In lake charts, however, obstructions are plated both by latitude and longitude and with reference to lights or harbors nearest at hand.

No system of lakes presents as wide variations of extreme depth as the big fresh water system. Beginning with Superior and following the chain eastward they vary from 1,386 feet to but 210. They are respectively 602 feet above sea level for Superior, 581 each for Michigan and Huron, 573 for Erie, and but 247 for Ontario. Superior is far the deepest, with Michigan second. Ontario is close on its heels, being within a few feet of Huron, while Erie is so shallow that its greatest depth is thirty-six feet less than the midlake depth of Michigan between Chicago and St. Joseph. Erie can claim but 210 feet extreme depth.

Superior, if reduced to the sea level, would be robbed of two-thirds of its dimensions. The extreme depth is well east of the middle line. Michigan has her greatest depth, 1,000 feet up toward the straits. Huron is less than 800 while Ontario has a depth of 735 feet owing to the falls of Niagara. If all were brought to sea level Erie would be 500 feet above, Michigan would be a couple of ponds, Huron almost out of it. Superior a lake not much larger than many another and Ontario the largest of the system.

CHARLES A. PILLSBURY.

Career of One of the Most Prominent Men of Minnesota.

Charles Alfred Pillsbury, one of the leading men of the Northwest and conspicuous as one of the founders of the flouring mills center in Minneapolis died at his residence in Minneapolis not long ago of heart disease.

Charles Alfred Pillsbury was born at Warner, Merrimac County, N. H., Oct. 3, 1842. He graduated from Dartmouth College at the age of 21, having partly supported himself by teaching. For six years later he engaged in mercantile pursuits in Montreal, and Sept. 12, 1866, he married Miss Mary A. Stinson, Goffstown, N. H.

After coming to Minneapolis in 1869 Mr. Pillsbury bought an interest in a small flour mill at St. Anthony's Falls. His father, George A. Pillsbury; his uncle, John S. Pillsbury, and brother, F. C. Pillsbury, were admitted to the firm, which continued as Charles A. Pillsbury & Co. until the acquisition of the property by the English syndicate in 1890. New mills were added to the original, and a system of elevators was purchased in connection with the mills. His "A" mill, capacity 7,000 barrels a day, is said to be the largest

CHARLES A. PILLSBURY.

and best mill in the world. In 1890 Mr. Pillsbury retired from the conduct of his vast milling interests, though he remained as the manager of the property for some time. The only public office he ever held was that of State Senator.

Out of Order.

While the General Synod of the Reformed Dutch Church was sitting in New York, a quaint-looking old man, with a broad-brimmed, round-crowned hat in his hand, walked calmly up the aisle to the President's seat, bowing as he came.

"Mr. President," he said, "I want to talk."

Nobody knew the speaker, and the President asked, "Are you a member of this body, sir?"

"No, sir," replied the old gentleman, "but I want to talk."

The President reminded him that none but members had a right to speak, but an aged minister who had just come in recognized the would-be talker, and said, "I move that the Rev. Elias Van Benschooten have leave to talk."

The motion was carried, and the old man went up to the President's table and drew from his pocket a roll of bank-bills. These he counted—eight hundred dollars in all. Then he drew out another package of securities amounting to thirteen thousand eight hundred and forty dollars, and counted them out, afterward, in a few well-chosen words, presenting the whole sum to the Synod for educational purposes.

It was the first endowment made in the Dutch Reformed Church for theological education. The old gentleman's speech was certainly out of order, but everybody felt that it was distinctly a speech in the right place.—Christian Work.

A Foolish Mistake.

The Hunter—My! I wish I'd brought me sling-shot!

The Certificate Valid.

Col. Bell, the United States consul in Sydney, lately appeared as a witness in the divorce court in that city on the point whether a certain certificate would be accepted in the American courts as formal proof of marriage. "You are a lawyer, I think, Col. Bell," remarked the judge. "Well, no, sir," replied the colonel with a Mark Twain-like drawl; "I was once, but I have reformed." When the laughter had subsided the bench settled the matter with the dictum: "Once a lawyer always a lawyer." The colonel then pronounced the certificate valid from a legal American standpoint.

EYES OF SOME GREAT LEADERS

Optical Comparison of Kaiser, Kitchener, Chamberlain, Rhodes.

The eye as indicating a man's mental powers has been receiving a great deal of attention lately. It is a fact that all the great men of recent times have been endowed with what is called the "magnetic eye."

"The penetrative eye" is invariably a characteristic of the man born to exercise immense influence over his fellows. Look where you will among the ranks of modern men who wield great power, one feature of their personality impresses the beholder above all others—the bright, keen, generally "knowing" eye that, with a glance, reckons one to the last gramme of merit and seems to pierce one's very thoughts.

You can't bamboozle an eye like that, you can't throw figurative dust in it with brag or "bounce;" it would just look at you and its X-rays would penetrate the cloak of sham and show you in your true worth.

Such an eye is possessed by Mr. Rhodes. "But let me look at him," he once remarked of an influentially backed applicant for an appointment under him. Mr. Rhodes trusts his eye where he would doubt the word of potentates.

Lord Kitchener has an eye as keen as his own sword blade. A young subaltern known to the writer once had occasion to particularly notice that eye, "and I'd rather face the flash of guns

RHODES' EYE. KITCHENER'S EYE.

than go through the experience again," the culprit declared.

Everybody has heard of Mr. Chamberlain's eye—and his eyeglass. There is something very "deep" and mysterious in the appearance of that famous right optic. A clever man, indeed, is he who could fathom Mr. Chamberlain's meaning by studying his eyes. In his case they are not "the windows of the soul"—he never allows them to "give him away" to that extent. But when occasion requires that same eye can flash in a way that is positively disconcerting. A radical M. P. had a

CHAMBERLAIN'S EYE KAISER'S EYE.

rather lively encounter with Mr. Chamberlain in the early part of the present session and in telling the story the radical M. P.—who is of a rather timorous disposition—declared that "Chamberlain's glance of indignation fairly bit me." This is an eloquent tribute to the Birmingham member's eye power.

A writer tells how on one occasion he saw the Kaiser riding at the head of his favorite and magnificent guards along Unter den Linden, Berlin. The Emperor's face was a study. Hard, remorseless, terribly determined, it was a face that one could never forget. And the eyes—those wonderful eyes—glittered in it like burnished steel. He would be a brave man who dared to say "No" to the Kaiser.

Love grows by what it doesn't feed on.

Love never condescends to reason; that is why it is so reasonable.

No thin girl will ever admit that there is a family skeleton anywhere around her house.

The average woman would rather have a man think less of her and think of her oftener.

You can always distract a woman's attention bw showing her a new dolly pattern or a baby.

When a man has a piece of bad luck there is always some woman around to say it is a judgment.

Some of the worst gifts that Santa Claus ever put in a stocking are what women wear in them.

The first time a girl kisses a man she tries to pose just like the actress she once saw kiss in some play.

The average woman gets about half her pleasure in life out of "misunderstandings" with people she likes.

After a girl has been engaged three or four times she feels lonesome every night a man doesn't propose to her.

The Lord probably made man first because he was afraid Eve would insist on advising Him about making Adam.

A well dressed woman looks as if her clothes were made for her, but a well dressed man looks as if he was made for his clothes.

A woman's's idea of society is to talk and act before people who aren't her own family like she thought the world was nothing but a nice dish of strawberries and cream.

The Country's Physicians.

At the present rate of increase the United States will have in 1900 about 125,000 physicians.

Britain's Postal Profits.

The profits of Great Britain's postal service are $20,000,000 a year.

HOW THE OCTOPUS EATS.

Few Have Ever Seen the Monster Devour His Prey.

"Never before had it fallen to my lot to see the terrible monster we encountered on the last passage from San Francisco toward Nanaimo in the bark Willscott of Honolulu," said a skipper the other day.

"We knew that the octopus grew to an immense size, as Banks and Solander, who accompanied Captain Cook in his first voyage around the world, found the dead carcass of one floating on the water to the westward of Cape Horn. It was supposed to be twenty by thirty feet, the body only; the tentacles were hanging under water. It was surrounded by myriads of birds, which were feeding greedily on its remains. Pliny also mentions a similar monster, having eight arms thirty feet long and a corresponding girth, and many other writers, too numerous to mention, have certified to its actual existence. But I did not believe that anything similar to the terrible 'devil fish' described by Victor Hugo was really in existence until I had ocular demonstration of the fact on this passage.

"Its eyes were large, of a greenish tint and somewhat protruding; its mouth, however, was not so very large and it appeared to be shaped like a parrot's bill; its tentacles were tapering and, like its body, of a grayish color, covered with spots. It appeared to possess the chameleon-like power of changing the color of these spots in a most extraordinary manner as fast as the eye could detect the changes; they varied from a very rich crimson to a dark, dull brown, these changes, no doubt, indicating the high state of excitement under which the creature was at the time.

"Suddenly the octopus discharged a huge jet of a dark-colored fluid full into the eyes of a sunfish, and then, rushing forward with the rapidity of an arrow, it encircled its prey with the long tentacles, and in another moment the victor and vanquished had disappeared below the surface of the water.

"In a few moments more we had sailed right over the scene and found the water was colored almost black for a space fully 200 feet in diameter, and we noticed an odor slightly resembling iodine rising from the water; our patent log line of snow-white cotton, which was towing astern, was colored almost black, and it has not yet assumed its white freshness, although it was towed in the water fully 800 miles since the above episode.

"About twenty minutes after we had passed over the spot we saw the huge creature again on the surface enjoying its meal in a very leisurely manner, rolling the body of the unfortunate sunfish over and over and biting off large mouthfuls with its cruel-looking beak.

"I knew before that these huge octopods and their relatives, the decapods, were not altogether mythical, as they have at the United States National Museum in Washington a papier mache cast of one of the latter which was found stranded on the north shore of Trinity Bay, Newfoundland, on the 22d day of September, 1877. The total length of this specimen, including tentacles, was only sixty feet, so it is quite safe to infer that it had not become of age when it was wrecked."—San Francisco Call.

Particular About His Diet.

If beggars cannot be choosers, convicts ought to have even less privileges, but some of the gentry think otherwise.

A prisoner in the Marshall County (South Dakota) jail wrote the following letter to the Sheriff the other day:

"Dear Sir: Inasmuch as I may board with you a couple of weeks, I will respectfully suggest a few points about my bill of fare. First, there are many things I cannot eat without injury to my health. The following things I should not eat at all. Pork, cheese, doughnuts, fresh bread, biscuits, pancakes, fried potatoes, pie, cake, pastries of any kind.

"Some of the chief things I may eat: Rye bread, graham bread, or graham gems and corn bread; meats, fish, sausage, beef, et cetera; any kind of porridge that is well cooked; soups of various kinds, always good; baked potatoes are the only ones I may eat; simply made puddings are all right; soft boiled eggs for breakfast when they are not too dear; a good dish of sauce either for breakfast or supper; good coffee, but no tea; a little variety in the bill of fare, so a fellow cannot tell six months ahead just what he is going to have for supper or breakfast."

Kitchens Should Be Ventilated.

Poorly ventilated, overheated kitchens, says one who has given the matter much thought, are responsible in many cases not only for the proverbial ill temper of cooks, but for their predisposition to disease as well. Rheumatism, varicose veins and tuberculosis are frequent maladies which afflict the cook, while alcoholism and a first-class cook are too often synonymous to be pleasant. The reason adduced for the prevalence of the alcohol habit is that men or women working in heavy air with odors of food are seldom hungry, but crave stimulants.

Steady Progress.

At the end of the fifteenth century less than four millions of people spoke the English language. Now it is spoken by one hundred and sixteen millions.

Religion in English Politics.

A plan has been adopted in England for political purposes, in which in every constituency a Protestant hundred is organized to promote the return of Protestant members to Parliament.

The more worthless the man looking for a job the better letters of recommendation he carries.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, NOVEMBER 17 1899

With the warm weather and the rains falling gently but in prolonged showers there have come brightness, freshness and new stimulus to everything in California, from the minds of men and women to the grass upon the mountain sides. All anxiety lest there might be another drought has vanished. Thus far the rainfall has greatly surpassed that of the corresponding season last year. The plowing season has begun with an activity which recalls the bounding energies of boom years. All reports agree there will be a larger acreage planted than ever before in the history of the State. The great grain farms will be worked to the limit, and the most improved machinery will be used to speed the task. There will be new orchards and new vineyards set out, and the cultivation of olives and of nuts will be undertaken on a more comprehensive scale than ever. It is to be a year of progress for rural industry, and every section of our diversified State from mountain sides to valleys will exhibit evidences of the beauty and thrift that are to follow industry. It is not in a material sense alone that the rains have brought us blessings. They have revived the bloom and the verdure of the landscape and infused a beauty into every rural vista that cannot fail to have its effect upon the minds of the people. In such a land with such a season, there is no room for the discontented, no suggestion of anything save rejoicing. The people have already in their hearts begun the thanksgiving of the year and the celebration of the festal day will be but the outward jubilant expression of a feeling which is already making radiant ihe faces of all. It is to be a Californian year in the truest sense of the word, and through all of its seasons will show our Golden State worthy the love of its people and the admiration of the world.

The great industrial activity that now prevails throughout the United States is no where more marked than in mining of every class. Oil, also, is attracting attention, particularly in California. As a result the country is flooded with prospectuses of this or that mine or oil well. Nearly all of these alluring pamphlets contain more or less extravagant statements, but some of them deal in absurdities, and were evidently written by persons wholly unfamiliar with either the subject of mining or oil boring. The oil promoting scheme is comparatively new, and, as most people are thoroughly unfamilior with the subject, there is likely to be a large amount of money lost in useless prospecting. Many people are lead to believe that all that is necessary is to sink a hole in a country where oil is found, and a flowing, or, at least, a pumping well is found. The large percentage of failures clearly shows this not to be the case. In California oil occurs along certain lines of uplift in sandstones and shales, and of the wells pored along these lines a large number become profittable investments; but of the wells sunk at random all over the district in which oil occurs, the greater number are failures. Those contemplating an investment in oil should take the precaution to employ some competent person to investigate the geological conditions before assuming the risk of such investment; for ouly those who have made a study of the geological structure of the oil region is capable of passing judgment on the likelihood of striking oil. Some of those who secure large tracts of land and incorporate oil companies have not the required knowledge of the subject, but, as they are on the inside, will lose little in any event.

Admiral Dewey was married last week in Washington to Mrs. Hazen. The pair demonstrated their good taste and sound sense by making no parade of the wedding. They went quietly with four friends to the pries'ts house, were married without any fuss or feathers add took the cars for another city. It is all right for youth to make marriage a glorious festival occasion. But when an old man and a woman of middle age unite, they prove their good sense by not making the wedding a spectacle. All the nation will heartily congratulate the Admiral and his accomplished bride. It It happens that the two have been warm friends for years; their union is therefore the result of very much deliberation. These two people, one filling so large a place in the national vision just now, propose to pass their remaining years in congenial company, to go down the declining ways helping each other to that content and peace which long lives of useful activity deserve when the days for rest come on.

A conservative estimate places the gold output of the mines of Southern California for the present year at $6,000,000. Yet, four years ago, the total production of gold in Southern California did not amount to half a million dollars a year. The development of the desert mines has scarcely yet commenced, and we may look for a large further increase during the next few years. With nine-tenths of the citrus fruits, seven-eighths of the petroleum, three-fourths of the beet sugar, and nearly half of the gold of the State, Southern California may surely be said to be doing quite well, thank you!

Latest reports from the South African war possess one gratifying characteristic—they are delightfully indefinite. They appeal to partizans of every shade of opinion; they picture Britons and Boers of equal savagery and cruelty; they accord to both sides the credit of victories of appalling significance. Later in the season, perhaps, the facts may be known.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - Plaintiff,
vs.
Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Compaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

(SEAL.)

P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Notice of Sale.

NOTICE IS HEREBY GIVEN that in pursuance of an order of sale made by the Superior Court of The County of Inyo, State of California, on the 15th day of July, 1899, in the matter of the Estate of Jedediah S. Collins, deceased, the undersigned administrator of said estat , subject to confirmation by said Court, will sell at private sale, to the highest bidder, all those certain lots, pieces or parcels of land, and water, situate and being in the County of Inyo, State of California, to wit

The East half of the Southwest quarter, the Southeast quarter of the Northwest quarter, and the Northwest quarter of the Southeast quarter of Section Seven in Township Eight South, Range Number Thirty-four East, Mount Diablo Base and Meridian.

Also, Eighty inches of water in the Hughes & Edson Ditch, situated in the said Inyo County.

The sale will be made on or after the Twenty-third day of September 1899, and bids will be receive ' at the law office of P. H. Mack, in the town of Independence, Inyo County, California. Said sale will be for Cash, in Gold Coin of the United States, ten per cent upon the amount of bid payable upon the acceptance of the bid and the balance of purchase price payable upon confirmation of sale.

A. O. COLLINS.

Administrator of the Estate of Jedediah S. Collins, deceased.
P. H MACK, Attorney for Administrator.
Dated August 23d, 1899.

Notice of Sale of Mining Property.

PUBLIC NOTICE IS HEREBY GIVEN THAT the undersigned, administrator of the estate of John F. Ginser, deceased, under the order of the Superior Court of Los Angeles county, will sell at public auction, in front of the postoffice at Ballarat, in the County of Inyo, State of California, on Monday, the 20th day of November, 1899, all the right, title and interest which said John F. Ginser had at the time of his death, and all the interest which his said estate has subsequently acquired, in and to the following described mining property, situate in said Inyo County, to wit. An undivided one-fourth interest in the "AURORA" and "TUBER" mines in the South Park Mining District, (in accordance with location notices duly recorded) together with mill-site located in connec.ion therewith

Terms of sale. Cash, gold coin of the United States: 20 per cent. of the burchase price payable at the time of sale, and the balance upon confirmation of sale by the Superior Court of Los Angeles County.

Dated, October 14, 1899.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains o Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

TUESDAY, Nov. 14, 1899.

R. W. Troeger vs. Susie Troeger—Decree of divorce granted plaintiff.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:00 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 3 o'clock a. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

DIED.

SNELEN—At Bishop, November 7, 1899, Seth G. Sneden, a native of New Jersey, aged 69 years.

Rain! How do you like it?

There'll be "Water to burn" next year.

Giles says it's going to rain ninety days.

Snow in the mountains. Looks good doesn't it?

Carl Walter is clerking for A. W. Eibeshutz.

B. H. Hoskins was over from the Reward yesterday.

Geo. Montgomery will arrive from San Francisco next Monday.

Mrs. Albert Halverson of Big Pine is very ill and not expected to live.

Andy Ramsy got back Wednesday from a prospecting trip in the Inyos.

Sheriff Given and Register Austin have returned from their trip to Cosc.

Charley Summers came down from Bishop on Wednesday, returning next day.

Miss Maud Cook is the proud possessor of a beautiful saddle animal, the gift of H. Giles.

J. Sub Johnson has accepted the position of Professor of Penmanship at our local Atheneum.

James Harry and R. J. Lowry came in from Darwin yesterday and will spend a few days in town.

Miss Georgia J. Johnson came down Carson to Bishop last Monday to see her mother who is very ill.

Supervisor James Jones, accompanied by his daughter, Miss Eva, visited Independence yesterday.

Sam Thomas will leave to-morrow with a ten mule team for Darwin where he will load a quartz mill for Panamint.

High water will take out the river bridge at Citrus, for the timbers are rotten. In all probability a team will go with it.

Wm. Rowan stopped at Independence Wednesday night on his way to Los Angeles with a band of horses. They were a good looking lot.

Ballarat in Inyo County is one of the mining camps enjoying a boom. The activity in the Panamint district and Argus range is responsible.—*Call.*

We've got a crick in the neck from craning it all hours of the night to catch a glimpse of that shooting match of the stars which is announced for this month.

T. C. Boland and J. A. McKenzie came up from Lone Pine last Saturday. On Sunday they inspected a mine at Mazourka in which they are interested.

E. H. Sterling came up from Los Angeles last Saturday, remained at Independence until Monday and went to Bishop Monday, where he expects to remain for a few days.

The largest oil engine ever built for a mining hoist has been erected by a San Francisco firm for the Yellow Aster Mining Company at at Randsburg. It is a four-cylinder vertical engine of 130 horse power, and is calculated to work the hoist to a possible depth of 2,000 feet.

Never Better.

The prospect of the development of the latent mining resources of the county were never better than at the present time. A telegram from Los Angeles Tuesday announced the sale of the Reward mine, and H. H. Douglas arrived here yesterday for the purpose of completing the transfer. The new owners will entirely remodel the present mill and install an air compressor and power drills at the mine. About 50,000 tons of ore are blocked out ready for extraction, and the prospect in the bottom of the incline was never better. There is a fifty-ton cyanide plant now in operation on the Reward tailings and yielding good returns. This plant will be secured by the new owners and maintained in operation. By means of the new drills prospecting new ground will always be kept well in advance of stoping. The mine has always paid, even under the most adverse circumstances, and with the proper means for attacking the large ore bodies will certainly yield large returns.

Mr. Correll has a force of men at work at the Barnes & Anderson under a $00,000 bond. He is working three shifts sinking on the main shaft and is developing at other points along the vein. This mine is one of the best prospects on the Coast. So far as development work has has been prosecuted a four-foot vein of $60 rock is shown.

The old Kearsarge mine will soon be added to the list of producers. Very careful examination and sampling has established the fact that large bodies of ore exist in the old workings ranging in value from $5 per ton up into the hundreds. The main ore bodies average $12 per ton. From several tests made it is proven to be highly susceptible of treatment by the cyanide process. This mine was originally worked, by crude methods for silver in the early '60s and when the ore values fell below $50 per ton work was abandoned. The mine is opened by over 5,000 feet of tunnels and drifts and large ore bodies are developed in all of them. There are over 10,000 tons of ore on the dumps which will pay well by cyanide treatment and a plant will be installed next spring.

The Squires Bros. are working three shifts in their gravel mine at Mazourka and are in 700 feet. Giles, Thorpe & Cook have a tunnel over 2,000 in Mazourka canyon and expect to reach bedrock any day. A dozen or more men are dry-washing with good success.

Salt Lake and Los Angeles

In an article on the subject of the desirability of a direct railway between Salt Lake and Los Angeles the *Mining Review* published at Salt Lake says:

"Southern California is anxious for railroad extension such as will connect her seaport cities with the great coal fields of Iron county, this State. That such a line will be built in due time now seems certain, and when it is it will open up a section of country that is almost unrivalled in its mineral possibilities. Such a road would cut through some of the richest mining camps that the west can boast of and its construction would not only stimulate the iron industry of that section, now virtually sleeping, but environed by so many advantages that the least sign of advantages in the way of railroad facilities, an open way to the coast, would result at once in the establishment of blast furnaces for the manufacture of pig iron and the erection of foundries for the production of iron and steel rails, car-wheels and other commodities of commercial value in the manufacture of which iron so largely enters. In fact, several strong companies are now figuring to enter this field as soon as possible and it is now predicted that it will not be long before the iron interests of this State will rank as only second to our magnificent mineral industry. The road to the coast should be built by all means.

E. H. McPherson of Bishop spent a couple of days in town this week. Mr. McPherson is an enthusiastic believer in the future value of real estate in this Valley.

It was reported over the wires yesterday that General Joubert, commander-in chief of the Boer army, was killed. As there are three generals by that name, it may be a mistake.

Rain fell this week at Independence to the amount of .82 of an inch. This is the heaviest rainfall in any one storm for years, The mountains on both sides of the valley are covered with snow.

G. P. Bourland passed through town early in the week with a band of about forty young horses en route for Los Angeles. The recent heavy rains should enable him to find buyers readily at good prices. Horses and mules bring more than double the amount paid for them last year.

Howard H. Douglas, a mining engineer located at Los Angeles, arrived here yesterday morning. Mr. Douglas was here some time ago and obtained an option on the Reward mine. The object of his last visit was to secure an extension of time, which has been given until the 28th of the month.

A party of Eastern capitalists have located both islands in Mono lake. Mr. Combs, one of the locators, who resides in Boston, will visit the properties about the first of next month, bringing with him an expert who will examine the property and take charge of the work. It is their belief that an abundance of coal-oil can be obtained from these islands.

Word was received at Independence last Tuesday that S. G. Sneden had died at Bishop that morning. With the passing of "Uncle Seth" one of the most prominent land marks of Inyo county's history ceases to be. He came here in early days, and as he was a man of vigorous ability, at once assumed a commanding position in public affairs. For more than two years his health has been precarious, and his death was not unexpected. He was a native of New Jersey and had reached the three-score and ten years allotted to man.

Real Estate Transfers.

The following deeds have been recorded since November 9, 1899:

Al. Williams to S. Smalley—October 23, 1899. Bertie mine, Panamint, $1.

United States to Horace Bellows—November 23, 1891. Patent to 160 acres at Haiwai.

W. L. Coats to Sol. Foorman—November 3, 1899. Coats ranch at Bishop; $600

P. W. Forbes to J. D. Mairs—November 6, 1899. Frac. lot 8, blk , town of Independence, $25.

Eastern Elections.

The republicans carried Ohio by 45,000 majority.

Goebel, Democrat, is elected governor of Kentucky by 3,000.

The democrats carried New York by 50,000. The republicans claim the legislature.

Iowa is republican by 50,000.

The republicans get Massachusetts by 65,000.

In Nebraska the fusion ticket made a clean sweep.

The republicans get New Jersey.

The democrats capture Maryland by 15,000.

The democrats elected a mayor at Denver.

Dr. F. V. Coville, United States Botanist, writes that the plant brought in from the Ubeheba District by Mr. W. L. Hunter a few weeks ago is, probably a new species of poppy, belonging to the genus Arctomecon. It will be fully classified when its bloom is obtained next spring.

NEW ADVERTISEMENTS.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.
GENETAL LAND OFFICE.
Independence California.

A protest having been filed in this office by Rafael Rossi, against Lieu Selection No. 390, by C. W. Clarke, for the NW¼ of SE¼ of Sec. 33, T. 8 S., R. 33 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter said C. W. Clarke and R. Louis Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

S. W. AUSTIN,
Register.
F. E. DENSMORE,
Receiver.

Dated October 30, 1899.

HOMESTEAD, FINAL PROOF.

U. S. LAND OFFICE, Independence, Cal, Oct. 31, 1899.

Notice is hereby given that the following-named settler has filed notice of his intention to make final proof in support of his claim and that said proof will be made before the Register and Receiver at Independence, Cal., on December 18, 1899, viz.:

JAMES DRURY,

for the NE ¼ of Sec 15, T 13 S, R 35 E, M D M

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz.: William J. Lake, Frank Lawrence, Arlington F. Mairs, William H. Hull, all of Independence, Cal.

S. W AUSTIN, Register.

Certificate of Co-Partnership.

STATE OF CALIFORNIA, } ss.
COUNTY OF INYO.

WE, THE UNDERSIGNED, do hereby certify that we are partners transacting general mercantile business in the town of Ballarat, County of Inyo, State of California, under the firm name and style of WEAVER & PORTER BROS; that the names in full of all the members of such partnership are Charles A. Weaver, Hiram D. Porter and Lyman D. Porter, and that the places of our respective residences are set opposite our respective names hereto subscribed.

In Witness Whereof, we have hereunto set our hands and seals this — — ——, 1899.

Name. Residence.
HIRAM D. PORTER, Ballarat, Inyo County.
CHARLES A. WEAVER, " " "

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist, Inyo County, California, and from J. H Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 28th day of September, 1899 an assessment, No. 35, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.
CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 31, 10th Floor, San Francisco, California.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

Lodge 221, F. & A. M.

Regular meetings of Lodge No. 221, F. & A. M., for the year 1899, will be held at the Lodge room at Independence as follows:

PLEA FOR THE CODFISH.

A Chef Who Says This Fish Is Not Appreciated at His Real Worth.

"If codfish cost a dollar a pound," said the chef, "it would be more universally beloved. I tell you, it is the best dinner fish known. I have tried the whitefish all over the world, but the codfish is king of them all and is not appreciated at his real worth. Cook him in any way you like and he is delicious. Even the dried codfish, picked up and served in cream for breakfast, is a fine dish. Put him in a bag, sew him up tightly, and let him boil, or bake him carefully, well stuffed, and he is delicious.

"Let me tell you that when you make fish cakes you should not drown out the fish with potato. Put as little potato or other substance in the cakes as possible, and, if you want them as fine as they can be made, wrap them in a blanket of eggs, and do not be sparing of the egg. You can make a tasty dish of codfish cakes if you will follow my advice. Fish cakes are considered a very democratic dish, of course, but my patron, who pays me a large salary, is as democratic as he used to be in his younger days. When he sends down to me an order for fish cakes for the next morning's breakfast, he says he wants Meschutt's fish cakes, with egg. That is the order, and he is thinking of his younger life when, as he once told me, in a basement on Broadway he used to get the finest butter cakes and fish cakes he ever tasted, 'excepting yours, chef,' he adds always. But I know that dimes in those days were as $1,000 bills are to him now and his appetite was keener and more appreciative."—New York Sun.

Becoming a British Subject.

It is an easy thing to become a British subject. All that an alien has to do is to declare his intention to reside within the British dominions on leaving his own country, and forthwith he takes out his naturalization papers, issued to him by the secretary of state upon his taking the oath of allegiance.

These papers invest him with the rights and privileges of a Britisher, except that he is barred from becoming a privy councilor or a member of parliament and also barred from accepting office under the crown. But if an alien be naturalized by special act of parliament passed for his own benefit then he becomes as much a British subject and has all the rights and privileges as though a native.

When the snake sheds his skin, which occurs frequently—as often as every four or five weeks—the skin of the eye comes off with the rest. Translucent in most parts, the skin over the snake's eye is perfectly transparent.

In Mexico everything and everybody pays a direct tax, from the street porter to the largest mercantile establishment, and the stamp tax for documents is equally lucrative.

A Perfect Diagnosis.

Dr. George Fordyce, who came in 1762 from Edinburgh to London, very speedily made himself a name by a series of public lectures on medical science, which he afterward published in a volume entitled, "Elements of the Practice of Physics," which passed through many editions. Unfortunately he was given to drink, and, though he never was known to be dead drunk, yet he was often in a state which rendered him unfit for professional duties.

One night when he was in such a condition he was suddenly sent for to attend a lady of title who was very ill. He went, sat down, listened to her story and felt her pulse. He found he was not up to his work. He lost his wits and in a moment of forgetfulness exclaimed, "Drunk, by Jove!" Still he managed to write out a mild prescription.

Early next morning he received a message from his noble patient to call on her at once. Dr. Fordyce felt very uncomfortable. The lady evidently intended to upbraid him either with an improper prescription or with his disgraceful condition. But to his surprise and relief she thanked him for his prompt compliance with her pressing summons and then confessed that he had rightly diagnosed her case, that unfortunately she occasionally indulged too freely in drink, but that she hoped he would preserve inviolable secrecy as to the condition he had found her in. Fordyce listened to her grave as a judge and said: "You may depend upon me, madam. I shall be as silent as the grave."—Gentleman's Magazine.

Dangerous Trading.

Upon returning to camp we found that John, the driver, had purchased a load of pumpkins, which the native men and women from the Mazoe valley had brought to the wagon to barter.

At first I was pleased, but when I found that John had traded away about 20 pounds of preservative, consisting of alum and arsenic, which he had mistaken for salt, I was filled with dismay! We knew not the villages whence the natives had come, nor could we explain the mistake, as we were ignorant of their language; and before my scared mental vision rose piles of dead Mashonas, pestilence and war on the whites—provided there remained enough live Mashonas to make it.

Hence it was that before daylight the next morning we left for the fort. We made no mention of the matter to any one, but a year later, when visiting the Mazoe valley, I inquired of the natives if there had been any disease among them about the time when the white men arrived in the country. They said there had been an epidemic of stomach aches, but, fortunately, no one had died from it; so my conscience was profoundly relieved.—"On the South African Frontier."

Curds and Cheese.

The rough outlines of cheesemaking are probably familiar to every one. Fresh milk is taken and curdled with rennet. The curd is then broken up and the liquid whey drawn off; the breaking up of the curd, its straining and the subjection of it to pressure are processes repeated several times until eventually the curd has become of the necessary consistency and solidity. It is then set aside, usually for some considerable time, to ripen, and during this time great changes are subtly taking place in its substance, so that the curd, which at first was an uneatable solid, becomes gradually transformed into a palatable cheese.

Suitable external conditions, chief among which is a proper temperature, are, of course, necessary to bring this ripening of the curd to a successful issue, but the real reason of the transformation is the presence of myriads of bacteria, which find in the curd a luxurious dwelling place, where they can live and multiply. That in so living they must abstract foodstuffs from the curd around and give out in turn new substances is merely the natural course of their life, but it makes all the difference between curd and cheese.—Good Words.

The Combination Crank.

"What are you doing?" asked the inquisitive man.

"I'm working on an interesting problem," replied the man who has a passion for figures. "New York has 25,000 barbers, and I am endeavoring to find out whether the groans they bring from their victims at a given time would, if they could all be put into one, produce a roar as loud as that of Niagara or not."—Chicago Times-Herald.

Modulated Tones.

"A woman, I notice, always lowers her voice to ask a favor."

"Yes, and raises her voice if she doesn't get it."—Chicago Record.

SAUCY AND SELF RELIANT.

Such Is the Typical East Side Girl of New York City.

"The typical east side girl of New York," writes Charles T. Brodhead in The Ladies' Home Journal, "is simply a product of her environments. She is surrounded by the good, bad and indifferent. She is in an atmosphere in which no girl should be reared. Her eyes and ears are closed to many disagreeable things around her. And she shuts them simply because she does not care to see and hear. Yet the east side girl is no saint. Far from it. The typical girl of that section is self reliant, saucy, impertinent, slangy, quick tempered, ready to fight with the tongue, and even with fists if necessary. She will dance all night and work all day, repeat it three or four times a week, then declare she isn't tired and look bright and fresh all the while. She will upbraid her mother, whom she calls 'me ole woman;' and abuse her father, referred to by her as 'me ole man;' cuff the ears of her younger brothers; have a hair pulling match with a sister; yet if any one should dare utter a word derogatory to the members of her family, 'Miss East Side' would go at them like a wildcat. She flirts outrageously with motormen, conductors and the like and will laugh derisively at or slap the face of the well dressed man who presumes to become acquainted with her on the street; remain night after night at the bedside of a girl friend who is ill and follow a begging cripple half a block to give her last cent for charity."

Evarts' Puns.

William M. Evarts, secretary of state under President Hayes, made perhaps his best and his worst puns from railway platforms while traveling with the presidential party.

They had ascended Mount Washington by the steep cable road, and other tourists, gathered there from all parts of the country, called for a speech. "We are not strangers," said Mr. Evarts genially. "We have all been born and brought up here."

At another time, when traveling through Tennessee, Mr. Evarts laid a wager with the young people of his party that he could make a pun upon each town through which they should pass. As they reached Chattanooga the crowd clamored for a speech. Mr. Evarts pleaded that as the train would stop but a moment he could only make a few Chattanoogatory remarks!

The unexpected element which characterizes a pun was marked in all the wit of Rufus Choate. "I can't endure X," he once exclaimed of another famous Bostonian. "I should not care if I should never see him again." Then half remorsefully, "Well, I should not care if I should see him in a procession."

What Broke Him Up.

"What broke him up in business?"

"Slow collections."

"I thought he sold goods for cash only."

"He did. It was the firms he owed that had the trouble in making the collections, and they closed him out."—Chicago Tribune.

The Philippine War

Is proving more stubborn than anticipated. It needs a vigorous contest to straighten matters out. We should tackle the Philippines and overcome them as Hostetter's Stomach Bitters does dyspepsia, indigestion, malaria, fever and ague. The battle is short and decisive, and for fifty years the Bitters have always won.

And now some irrepressible fiend on the Boston Transcript asks to ask: "Isn't New York rather over Deweying it?"

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight or new shoes feel easy. It is a certain cure for Ingrowing Nails, sweating, callous and hot, tired, aching feet. We have over 30,000 testimonials. Try it *to-day*. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

The poorer a man plays golf the more exercise he gets out of it, and if he is a fat man, the more he plays the poorer he gets.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

SUSPENDERS ABOLISHED.

A Shirt of New Pattern Which Does Away with Suspenders.

A shirt recently patented in England and placed on the market there dispenses entirely with the use of suspenders. The burden of the braces is taken off the shoulders entirely by the shirt. As will be seen by the dotted lines in the illustrations, the yoke is extended both back and front, and to it are fixed three tabs,

SHIRT WHICH DISPLACES SUSPENDERS.

which are easily attached or detached by loops or suspenders to the trousers. This relieves the downward pressure of trouser braces on the shoulders, which has a natural tendency to contract the chest. This shirt, it is claimed, is the most comfortable garment a man can wear, inasmuch as the weight is equally distributed over the body. For cricket, cycling, rowing, and, in fact, all kinds of sports, it is most invaluable. It is also recommended for

BACK VIEW OF NEW SHIRT.

dress shirts, as it not only allows one to sit upright at table, but always keeps the front of the shirt in position, and prevents it from bulging out of the waistcoat. Two figures of the new design are shown, back and front. By these it is said that while the new shirt has an equal pressure all around, the ordinary braces pull heavily on the neck portion of the shoulders.

Wives of the Waltz King.

Johann Strauss, the waltz king, was scarcely laid away to rest in the Friedhof when a series of disputes arose over his possessions. Strauss secured to his wife and stepdaughter, as well as his sisters, moderate incomes for life, and then made the Society of Friends of Music his heir-at-law. He disinherited his brother, the well-known Eduard Strauss, and made no provision for the destitute widow of his brother Joseph. The chief effort to dispute the legality of Strauss' will is to be made by his second wife, from whom he claimed that he was divorced.

When Strauss contracted his second marriage both he and his wife were Roman Catholics, and were united in a Catholic church and with the rites of that religion. The Austrian marriage laws are exceptionally severe, and married Catholics can in this country secure a legal separation from one another, but never an absolute divorce which enables them to marry again. The result is that Roman Catholics who have secured a separation resort to all sorts of evasions of the law in order to marry again. Johann Strauss receded from Roman Catholicism and became a Protestant, then emigrated to the Duchy of Saxe-Coburg-Gotha, resided there for a period, obtained an absolute divorce from his wife and married a third time.

This evasion of the Austrian marriage laws deprived Strauss of the court favor which he had enjoyed, and it seems certain that in the strict legal sense his second wife is his rightful widow, whereas his third wife, for whom he has provided, had no authentic claim on him. The Austrian laws of succession provide that a wife can never be disinherited, but has always a claim on at least one-third of the property left by her husband, so that the second wife of the great musician has every prospect of obtaining this share of his wealth. At present she is in poor circumstances, and earns her living in a photographic studio in Berlin.

Walls Plastered with Coins.

Miss Daisy Dentz, of Dentzville, N. J., a suburb of Trenton, has probably the largest collection of coins in New Jersey. Some of them are many hundred years old, and they represent the currencies of nearly every country in the world. Some idea of the size of the collection may be gathered from the fact that the ceiling of Miss Dentz's boudoir is completely covered with United States money, while the four walls are hidden behind the coins of Asiatic, European, African and South American countries. There is considerable history attached to this collection, especially to the English coins, which were found near Princeton in a queer shaped hat by one of Miss Dentz's relatives while in search of minerals. The hat is similar in shape to those worn by the Hessian soldiers during the revolution and is still in Miss Detnz's possession. There are many valuable coins in her collection, and were she to convert them all into present American currency they would yield quite a snug sum.—Philadelphia Record.

The Wind Made Snowballs.

Last March there was a remarkable exhibition at Grafton, N. H., of the comparatively rare phenomenon of "snow rollers." Freshly fallen snow was rolled by the wind into innumerable cylinders, some of them as large as a barrel, which dotted the hills and fields. Similar rollers have been seen in recent years in Connecticut, in Kansas and in the State of Washington. The size varies with the strength of the wind.

Glass Railways.

By means of a valuable toughening process recently discovered glass may be molded into lengths and used as railway sleepers. It is, therefore, possible to have a complete glass railway.

A Change All Around.

"There goes a party that will be heard from," said Smith, pointing to a young man who was going down the street. "He has managed to keep his head in love and financial matters, and they are the two great tests.

"Two months ago he was a young man with all the world before him and with no prospects ahead of him except a determination to fight life's battles.

"He was in love with a young lady living in this city, but his financial condition prevented him from declaring his passion; besides he was not sure that the young lady in question cared for him.

"But by one of those curious turns of the wheel of fortune an old aunt, that he had never seen, died and left him a large sum of money. Without delay he called upon the young lady and asked her to marry him, saying nothing about the fortune that had been left him. He met with a point blank refusal.

"Two days later the girl heard of his unexpected windfall and wrote him a note saying, 'I have changed my mind.'

"His answer was just as short. It said:

"'So have I.'"—Detroit Free Press.

Not Very Flattering.

Last winter a delegation of Indians from a far western state, on a tour of inspection through the interior department, visited the land office, where they were introduced to the clerk who had especial charge of their section of the country, a bumptious little individual with a big head. This official proceeded to overpower the red men with his importance. Grasping each one of them cordially by the hand, he patted them patronizingly on their backs and then delivered a long speech, explaining in detail the work of the office, their interest in it, laying particular stress on the fact that he was the motive power of it all. As soon as their entertainer paused for breath the visiting Indians began to grunt and talk among themselves.

"What are they saying?" asked the egotistical clerk, expecting to hear high praise of himself. "Tell me what they are saying."

"I cannot tell you," replied the interpreter. "It was not for you to hear."

But the little man insisted, and with great reluctance the interpreter finally yielded. "They said," he translated, "Little man, big head, heap talk, say nothing, much fool."—Washington Letter in New York Tribune.

Making a Child Too Quiet.

Play is the proper and natural outlet for a child's thoughts. To restrain his motion is to drive back his living fancy into the recesses of his mind, and this results in his confusion and unhappiness. Some children who are forced to be still and passive when they are longing for action find relief in whispering over stories to themselves, but it is an unsatisfactory substitute for dramatic action. And it is also morally injurious, for the necessity of concealing one's ideas destroys after awhile the ability for fluent expression and brings about timidity and distrust of our friends.—Florence Hull Winterburn in Woman's Home Companion.

Followed Her Doctor's Advice

Mrs. G. W. Palmer, of Jonesville, Vt., said: "Two years ago I was afflicted with stomach and bowel trouble. My case puzzled the doctors. I subsisted only on the lightest kind of diet. My stomach would not retain solid food. The pain in my stomach and bowels was so intense that I cannot describe it. I continued to grow worse. I lost 48 pounds, my nerves were completely shattered, and I was very weak. Dr. C. W. Jacobs, of Richmond, advised me to take Dr. Williams' Pink Pills for Pale People. I began to use the pills, and the first effect was the restoration of my appetite, and the quieting of my shattered nervous system. I began to regain my lost strength, and in one month after commencing to take the pills I was able to do my housework. I have gained 30 pounds and to-day am in good health."

From the Free Press, Burlington, Vt.

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box, 6 boxes $2.50.

GEN. JOE WHEELER PRAISES PERUNA

The Great Catarrh Cure.

JOE WHEELER'S CHARGE AT SAN JUAN HILL.

Major General Joseph Wheeler, commanding the cavalry forces in front of Santiago and the author of "The Santiago Campaign," in speaking of the great catarrh remedy, Pe-ru-na, says: "I join with Senators Sullivan, Roach and McEnery in their good opinion of Pe-ru-na. It is recommended to me by those who have used it as an excellent tonic and particularly effective as a cure for catarrh."

United States Senator McEnery.

Hon. S. D. McEnery, United States Senator from Louisiana, says the following in regard to Pe-ru-na:

"Pe-ru-na is an excellent tonic. I have used it sufficiently to say that I believe it to be all that you claim for it.—S. D. McEnery, New Orleans, Louisiana."

United States Senator Sullivan.

"I desire to say that I have been taking Pe-ru-na for some time for catarrh, and have found it an excellent medicine, giving me more relief than anything I have ever taken.—W. V. Sullivan, Oxford, Miss."

United States Senator Roach.

"Persuaded by a friend I have used Pe-ru-na as a tonic, and am glad to testify that it has greatly helped me in strength, vigor and appetite. I have been advised by friends that it is remarkably efficacious as a cure for the almost universal complaint of catarrh.—W. N. Roach, Larimore, North Dakota."

A free book on catarrh sent to any address by The Pe-ru-na Drug M'f'g Co., Columbus, Ohio.

Want an engine?

A durable, reliable, satisfactory one? Then send TO-DAY for our new catalog. We make stationary, portable, marine and hoisting engines. Will operate with gas, gasoline or distillate oil fuel. 2½ to 200 H.P. Not very costly.

Best Prescription for Malaria, Chills and Fever,

Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form.... Sold by every druggist in the malarial sections of the United States..... No cure, no pay.... Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured.. All other so-called "Tasteless" Tonics are imitations.. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.

ST. LOUIS, MO., Feb. 6, 1899.

PARIS MEDICINE CO., City.

Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2660 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.

Please rush down order enclosed herewith, and oblige, Yours truly,

MEYER BROS. DRUG CO.

Per Schall.

RETAILER.

EDDRON, ILLS.

PARIS MEDICINE CO.,

Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.

Respectfully,

JOHN T. VINYARD.

CONSUMER.

WHITESBORO, TEX., Sep. 13, 1898.

PARIS MEDICINE CO., St. Louis, Mo.

Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.

Yours truly,

JAMES D. ROBERTS.

GREAT SHIP OCEANIC.

LATEST OF MONSTER ATLANTIC STEAMSHIPS.

Evolution in Naval Construction Since Launch of the First Oceanic—History of Transatlantic Maritime Development of the Century.

The new steamship Oceanic of the White Star Line has broken all maritime records and her appearance on the Atlantic marks an epoch in the history of ocean steamship building. The advent commemorates a development of upward of eighty years. The Oceanic is the largest steamship in the world, larger even than that fabled failure, the Great Eastern. The enormous dimensions of the Oceanic appeal to the imagination. She is an unprecedented feat in engineering, but aside from this her appointments are on a scale of magnificence made possible only by her size. This is concealed largely by her graceful line. The Great Eastern, with her great height above the water line and her enormous paddle boxes, looked more than her size, while in the Oceanic the long, trim forecastle deck and poop turtleback deck and the central arrangement of the deckhouses, all tend to relieve her of the appearance of mere bulk. The Great Eastern's length was 691 feet. The Oceanic's is 704 feet. The former's light draught was 15 feet; the later's is 22 feet. The respective displacements are 11,844 tons and 12,500 tons, and when laden it is estimated that the Oceanic will weigh 28,000 tons, as against the Great Eastern's 25,000 tons. The Oceanic is well able to steam 23.400 knots at cruising speed (twelve knots an hour) without coaling, or about the earth's girdle. Her saloon is 80 feet by 64 feet and 9 feet high, with a dome in the center of great beauty. Some of the staterooms are 13 feet 6 inches by 9 feet and the vessel surpasses the wildest conceptions of Jules Verne's "Floating City." Her speed on her trial trip was twenty-three knots.

The main saloon will accommodate 350 pasengers at one sitting. There is accommodation for 410 first-class, 300 second-class and 1,000 third-class passengers. Besides the transients, the vessel will carry 300 in the crew, and when filled, in the season, she will have on board 2,100 souls. Used as a transport the Oceanic could accommodate an army of 10,000 men.

The first steamship to cross the Atlantic was the Savannah, an American ship built at Corlears Hook, on the East River, and launched Aug. 22, 1818. She was originally built for a sailing packet between New York and Liverpool, but was purchased before completion by William Scarborough & Co., of Savannah and fitted with machinery.

The paddle wheels were so constructed as to fold up and be stored on deck in stormy weather; the wheel was inclosed in canvas held in place by iron rims. Her model was considered fine and her passenger accommodations were thought elegant.

She went to Savannah in 1819 and left that port for Liverpool May 26, 1819. She arrived in twenty-two days, having used her engine for fourteen days. She then went to St. Petersburg, returning to Savannah in November, 1819. Her machinery was afterwards taken out and she was converted into a sailing packet. She ran some time between New York and Savannah, finally running ashore on Long Island. She was of 380 tons burden.

The first ship to cross the Atlantic propelled all the way by steam was the Royal William, a Canadian boat, built in 1833. Within the next decade the first iron trans-Atlantic steamship was launched in England. This was the Great Britain, the forerunner of the Great Eastern, and designed by the same engineer, Brunel. This ship was provided with a screw propeller and crossed the sea in fifteen days at an average speed of nine knots an hour.

It was the famous Cunard line which first established a regular trans-Atlantic service with regular dates of departure. The Britannia, the first of the four ships, left Liverpool on her maiden trip on July 4, 1840, and reached Boston on July 19. The Cunard Line made such inroads on the business of the American packets that Congress, impelled by the clamor of American patriotism, granted a subsidy to E. K. Collins, of New York, for an American line between this port and Liverpool. The new vessels were swifter and more elegant than the Cunarders, and, like the sailing ships of the old Collins line, won many laurels. The Cunard vessels stopped calling at Halifax, but in spite of this were easily beaten by their American competitors. The Pacific, of the new line, made the passage from New York to Liverpool in less than ten days, her time in May, 1851, being 9 days 20 hours and 16 minutes. The next year the Atlantic crossed in 9 days 6 hours and 18 minutes. The line, however, wound up with disaster. The Arctic was sunk by a collision in 1854 and went down with 540 souls. The Pacific left Liverpool the next year and was never heard from. The American capital which had been invested in the Collins line was transferred to the Inman line, for years one of the most successful, and it subsequently became the American line.

The Scotia, the last paddle-wheel steamer built for the Cunard line, was the first to make the passage in less than nine days, her time being 8 days 3 hours in 1863. The City of Brussels of the Inman line brought it under eight days in 1869, with a record of 7 days 22 hours and 3 minutes. The seven-day limit was reduced by the Alaska of the Guion line, which crossed in 6 days 22 hours in 1882. The City of Paris of the Inman line, afterward the Paris of the American line, reduced it under six days, making the westward passage in 5 days 19 hours and 18 minutes in 1889. The Lucania of the Cunard line holds the present record of 5 days 7 hours and 23 minutes.

The Southampton record is held by the big Kaiser Wilhelm der Grosse of the North German Lloyd line, which reduced the westward time to 5 days 18 hours and 15 minutes on her last voyage to this port, which ended last week. She covered 3,049 knots at an average speed of 22.08 knots an hour.

But the present-day ship must look to her laurels, for the bigness of the Oceanic proclaims her speed. Certainly great things may be expected from her powerful engines.

THE FIRST AND THE LATEST OF GREAT ATLANTIC STEAMSHIPS.

The Oceanic, the monster iron steamship, on her maiden voyage to New York, and the great Britain, the first iron steamship to cross the Atlantic, 1845.

THE BOER LANGUAGE.

Its Pronunciation Is Easy When Dutch Tongue Is Understood.

The language of the Boers of South Africa is grammatically the language of the people of Holland. They speak Dutch as their forefathers in Holland spoke it and speak it now. They are called Boers because that is a Dutch word which describes them. It means a farmer, and agriculture is the main pursuit of the peace-loving compatriots of Oom Paul. A knowledge of Dutch would supply an explanation of the odd-looking words that are used now and then in the news reports from the sturdy little republic. It would also enable one to pronounce these words as they should be enunciated.

Dutch diphthongs are not given the same sounds as their equivalents in English. The double "o" for instance in Dutch has the same sound as "o" in Rome, while the dipthong "oe" is pronounced by the Dutch as we pronounce "oo" in boot. The English pronunciation of these two dipthongs is the reverse of that given them by those who speak Dutch. And "ou" has the sound of "ow" in owl. The sound of "ui" is nearly like that of the English "oy" in boy. The Dutch double "aa" is the same as the English "a" in war. As there is no "y" in Dutch its place is taken by "ij," which is sounded as "y" in defy.

If one, therefore, would pronounce Oom Paul properly he would say it as if it were spelled "Ome Powl." The family name of Gen. Joubert would for the same reason be pronounced as if it were spelled "Yowbert." The word Boer is pronounced by the Afrikander as if it were of two syllables; the first long and the second short, thus: "Booer." The plural is not "Boers." It is "Boeren," and it is pronounced "Booer-eh," because the final "n" is slurred.

Here are some of the Dutch words that are oftenest in print in connection with the news of the Transvaal and their pronunciation and meaning:

Bloemfontein (bloom-fon-tine).....Flower fountain.
Boer (boo-er).....Farmer.
Buitenlander (boy-ten-lon-der).....Foreigner.
Burgher (buhr-ker).....Citizen.
Burgerregt (buhr-ker-rekt).....Citizenship.
Burgerwacht (buhr-ker-vokt).....Citizen soldiery.
Jonkherr (yenk-hare)..Member of the Volksraad; gentleman.
Oom (ome).....Uncle.
Raad (rahd).....Senate.
Raadsheer (rahds-hare).....Senator.
Raadhuis (rahd-hoys).....Senate house.
Rand (rahnt).....Margin; edge.
Staat (stahl).....State.
Staatkunde (stahl-kuhn-de).....Politics.
Staatsraad (stahts-rahd)...Council of State.
Stad (stot).....City.
Stemmer (stemmer).....Voter; elector.
Transvaal (trons-fahl).....Circular valley.
Trek (treck).....Draught; journey.
Trekken (treck-en).....to draw; to travel.
Trekpaard (treck-pahrd).....Draft horse.
Uit (oyt).....out; out of.
Uitlander (oyt-lont-er).....Foreigner.
Vaal (fahl).....Valley.
Vaderlandsliefde (fah-ter-lonts-leef-ter).Love of one's country; patriotism.
Veld (felt).....Field; open lands.
Veldheer (felt-hare)...General; commandant.
Veldwachter (felt-vock-ter).....Rural guard.
Volksraad (folks-rahd).....Lower House of Congress.
Voorregt (fore-rekt).....Franchise; privilege.
Vreemdeling (frame-da-ling).....Stranger.
Witwatersrand (vit-vot-ters-ront)...Margin of the white water.

Pretoria, the capital of the South African republic, is named in honor of its first President, Pretorius, who led the Dutch in the great trek, or journey, out of Cape Colony sixty years ago and into the Transvaal to escape the dominion of England. Johannesburg is easily translated into English, as Johnstown. The term "Afrikander" is used to designate the Dutch from the other white people of South Africa.

Feeding the Baby.

The care of babies is never a sinecure, as many of our readers can testify, and the ordinary difficulties of the case sometimes assume extraordinary proportions.

An English lady in India was recently worried about the failing health of her infant. The milk was suspected, and the doctor ordered that the child be fed with asses' milk. The lady spoke to a native officer of the district, and receiving a satisfactory reply drove with a man-servant to the station where the ass was to be in waiting.

To her amazement there, tied to a post, all ready to be milked, stood a huge she bear. It seems that in the native dialect, the words ass and bear are so nearly alike as to be scarcely distinguishable in the mouth of a European.

A variation of the milk problem was presented to F. G. Jackson, the Arctic explorer, when he found and adopted the infant cub of a polar bear. There seemed no way to feed the poor little beast until Mr. Jackson hit upon the following ingenious method:

Taking a bit of sponge, he covered it with chamois leather and fastened it to a rubber tube which had previously been inserted in a bottle. Fixed into the cork of this bottle was a piece of glass tubing through which air might be blown to make the milk run freely.

The cub took to the bottle like any other baby, and sucked away in most ravenous fashion, with a contented look upon her face, as if the last of her troubles were ended.

An Original One.

A sign over a negro cabin in Liberty County reads:

I Teaches Folks to Reed an Rite an do figgers in their heads.

—Atlanta Constitution.

An Aid to Vision.

"I suppose a monocle aids vision."

"Yes; it helps people to see through the man who wears it."—Detroit Journal.

CHARMING OF SNAKES

SECRETS OF SEEMINGLY MYSTERIOUS PROCESS.

Several Feats Performed by East Indian and Other Fakirs that Are Only Tricks of the Trade—Snakes Cannot Hear Music.

A few days ago there appeared in one of the papers a wonderful story of a snake which was charmed by the strains of a jew's harp. The story was to the effect that a countryman, meeting a dangerous reptile in a road, was horrified at seeing the creature prepare to attack him. Being an enthusiastic performer upon the jew's harp, he immediately struck up the tune "St. Patrick's Day in the Morning," which either paralyzed the serpent with astonishment or sent a series of sentimental chills down its undulating vertebrae. At any rate, it discarded all hostile intentions and became motionless, when the countryman mercilessly ground its head into the dust.

This is an example of the many snake stories which appear constantly before the eyes of credulous humanity. It originates, like all of its kind, from superstitious sources. Snakes are utterly devoid of any sense of appreciation of music. They have no ears, and although they may distinguish vibrations of heavy sounds upon their delicate scales, a voracious, hungry serpent is entirely ignorant of the presence of a chirping bird, providing it does not see or scent its prey. The familiar exhibitions of the East Indian fakirs, during which the deadly cobra is made to "dance" to the music of a flute, have led many to believe that these creatures are extremely sensitive to the sound of music. But exhibitions of this character are only tricks practiced by the clever Hindoo, and the cobra, instead of being in a quiescent, charmed condition, as it waves its body to and fro, is really in a fit of intense anger.

Not long ago a large cobra was in the possession of Dr. Joseph C. Thompson, of Rosebank, S. I., an assistant surgeon in the United States navy. This reptile was purchased by Dr. Thompson in South Africa. It was then in the possession of some professional charmers. After it had left their hands it was made to go through a lively performance without the accompaniment of the weird music of the fakir.

The operation of making the cobra dance is very simple. The reptile has the characteristic habit of elevating the forward part of the body from the ground when annoyed, spreading its neck or hood, and glaring fiercely at the object of its anger. When in this position its keen eyes watch eagerly for a chance to deliver a deadly blow, observing every movement of the object or person in front of it. If one moves, no matter how slightly, there is a corresponding nervous movement on the part of the snake. Here the entire secret of the snake dance is explained. When the Hindoo opens the snake basket the cobras rise ominously to their peculiar position of defense. He now commands the snakes to dance, at the same time beginning a lively tune upon his flute and swaying his body from side to side in time to the music. The nervous cobras follow every motion of the supposed charmer. They are not dancing to the music, but, intensely angered, are seeking to revenge themselves upon their human captor.

The snake charming act of the bespangled female, with the giant boas and pythons at the circus, is even more simple. The large snakes used in these exhibitions are, in the first place, of a harmless nature. Secondly, they are most inoffensive in their hands. The lazy boa will lie for hours, or days, motionless in its cage, and when suddenly awakened from a long nap is utterly indifferent to what is going on around it. After a few weeks in captivity these huge reptiles become very tame and seem to enjoy being handled by one familiar with their movements. The chief requisites of a "snake charmer" are great deliberation and sufficient nerve to handle a ten foot boa or anaconda without the slightest hesitation. A nervous movement is apt to annoy the serpent, and cause it to bite, while if treated gently and handled with movements corresponding to its sluggish habits, it evinces the utmost good nature.

Accounts have been published of large snakes coiling themselves about the object of their annoyance and demonstrating in an exceedingly uncomfortable, if not dangerous manner, the power of their scaly bodies. This characteristic is popularly supposed to be commonly resorted to by the "boa constrictor," but the idea is purely erroneous and originates from an aversion to the serpent race from which have sprung innumerable fallacies and superstitions.—New York Times.

Rockefeller's Frugal Lunch.

Though possessed of boundless wealth, John D. Rockefeller lives a life of Spartan simplicity. He works harder than most men whom necessity compels to work for their living, and he accomplishes more in a given time than ten ordinary men can do. He arises at an hour which the servants of most rich men consider night and attends to the many details of his business. He arose at 5 o'clock in the morning a few weeks ago, when the New Amsterdam hotel was full of Ohio lawyers who were trying to find out some matters connected with the Standard Oil Company. He did two hours work in his office, and then went through three hours of intellectual fencing with the commission from Ohio.

There was an adjournment for luncheon. Mr. Rockefeller remarked to one of his counsel, Virgil P. Kline, of Cleveland, that he was very hungry. The two went to the Union Club for the midday repast. Mr. Kline came back looking radiant, for those who are acquainted with him know he does not despise the products of culinary skill.

"Mr. Rockefeller," he said slowly, as he puffed a cigar, "is a remarkable man. But how does he do it? Think of a man driving to the Union Club to get a banana and a glass of milk!"

Cox's Quaint Visiting Cards.

Not long ago an office boy in one of the great newspaper offices came grinning into the room occupied by the Sunday editor.

"There's a man outside," he said, "who won't give his name."

"Why didn't you ask him for his card?" the Sunday editor asked.

"I did," said the boy, "and this is what he handed me."

The boy laughed again and placed a small slip of pasteboard on the editor's desk. On it was the neat pen drawing of a brownie. Then did the editor smile.

"You dunce," he said to the boy, "that is the gentleman's card. It's Palmer Cox, father of the brownies."

So it was. Mr. Cox has a most happy way of putting his quaint little people on his cards and on the cards of his friends. He always has a new position for one of the well-known children of his fancy. In scrap books over the country there are hundreds of original drawings of the quaint little people with large stomachs, and no two of the many sketches are alike.

TOPICS OF TIMES

Although one-half of the rubber product of the forests along the Amazon goes to the United States, most of the steamers, wharves and banking houses in the region belong to the English.

Extremes seem to meet in liquid air. Applied in one way it can be made to freeze mercury solid, while in another it is proposed to use it for the cremation of bodies so that not even a trace of them shall be left.

Salvation Army folks are forbidden to use trumpet, drum or tambourine in the streets of Philadelphia, and speech only is left to them in their public worship. They feel much aggrieved by the action of the police.

During the international exposition, soon to be held at Buffalo, the Niagara Falls will be illuminated by huge electric searchlights, equipped with multi colored glasses, and are lights will be operated in the Cave of the Winds.

The island of Heligoland, in the German ocean, scarcely three miles in circumference, rising abruptly 200 feet out of the sea, is visibly crumbling away and effacing itself in the waves more rapidly than any other place of equal size known to scientific observation.

In Cuba the kitchens are always on the roof or in the courtyards back of the house. Only twice a day does the Cuban housewife or servant prepare meals—at 10 o'clock, when she enters the kitchen to make ready, 11 o'clock breakfast and at 6 o'clock to cook the dinner, which is served at 8.

A New York woman who is making a study of flowers and their effects upon different temperaments claims that yellow blossoms afford protection from disease germs, that daisies worn by nervous women will benefit them and that violets act as intoxicants or stimulants upon some people.

The Star of Hope, a newspaper printed by the convicts in Sing Sing prison, New York, in a recent issue printed the following pithy advertisement: "Lost—A good character; the owner will give all of his earthly possessions for its return and no questions asked. Address Contrition, Clinton prison."

The government has outstanding three $5,000 United States notes of an issue long since retired in favor of smaller denominations and their whereabouts is unknown. They have remained hidden so long as to give ground to the supposition that they have been lost, in which case the government would be the gainer by $15,000.

A planter in Yazoo County, Mississippi, reposes faith in the katydid as predicter of frost. He says the katydid began to play his little fiddle this year about June 6 and that if the first frost comes in just four months from that time, "as it surely will," it will so reduce the cotton crop that it will bring a good price and good times in the South will follow.

The average American has probably overlooked the fact that our government has one warship in course of construction in a foreign country. She is the Albany, at Sir William Armstrong's yards in England. This vessel was purchased more than a year ago, or about the same time that the cruiser New Orleans was bought, but after the early termination of the Spanish war work on her was not hastened. She is to be delivered before the end of 1899.

The town of Hartford, in Oxford County, Maine, has a custard pie association, which meets annually in a hemlock grove on the margin of Swan pond and gorges itself with custard pie. It grew out of a custard-pie eating contest between two residents of the town on the annual fast day thirty-nine years ago. The match was adjudged to be a tie, the association was formed and everybody in it now strives to beat everybody else eating custard pie. Secretary John D. Long, who was born in the near-by town of Buckfield, is an honored member.

When a man has one foot in the grave he naturally objects to "getting there with both feet."

BOY GOLFER A WONDER.

Hugo Reisinger, Eight Years Old, Defeats Experts at the Game.

Golf, like all other sports, has at last found its infant phenomenon. Hugo Reisinger, a boy 8 years old, has astonished members of the Hapatcong Golf Club, of which he is an honorary member, by remarkable exhibitions. Many of those regarded as experts by the club members have been defeated by him. Young Reisinger took four lessons from Mungo Park, the famous professional of Scotland. He showed himself at once apt in taking hold of the game and Park predicted that his pupil would some day become champion of the world.

HUGO REISINGER.

TALKS ON ADVERTISING

The Scriptural suggestion, "Hide not your light under a bushel," is most pertinent to-day as advice to the business man. If a man has a good thing—an article of commerce needed by the people—and it is something which he desires to dispose of, if he is a business man—a progressive one—his first idea is to advertise it. He may advertise it with a placard placed upon it in the window. The passer-by sees it and it is advertised. He may paint a dozen board signs and place them about the thoroughfares. Likewise that is advertising, but on a more extensive scale. But if he is a thoroughly progressive man he will take the surest, the cheapest and most satisfactory way of telling the people about this article and its desirability by putting a sign—an advertisement—in the newspaper. The present decade has revolutionized the theory, so long proposed by political economists, that demand regulates the supply, because thousands of people, who would become customers, do not realize that they are in want of the article until they read the advertisement and are reminded of that need. Consequently the supply and the publicity an article gets, regulates the demand. The modern adaptation of the oft-quoted passage in Scripture might well be "Advertise."

Rhyme of the Tired Farmer.

A farmer was trying to plough
With a jackass hitched up to a cough,
When they kicked up a terrible rough.
Said the farmer, "It's hard; I allough
I could do near as well with a sough;
I will rest 'neath the shade of this bough

"Such driving for me is too rough,
I've had of it nearly enough.
I'll give this old jackass a cough
And quit, for I'm quite in a hough.
All farming is nonsense and stough
And ploughing is almighty tough.

"With farming I'm glad to be through—
My wife, she is tired of it, tough.
We're wet with the rain and the dough
And ploughing has made me quite blough.

"I'll sell out and pocket the dough,
To the city I'll glad enough gough.
I'll through down the shovel and hough,
In Wall street my money I'll blough.

"My wife has contracted a cough.
'Tis time for us both to be ough."
—New York Sun.

Gambling in the Eighteenth Century

Early in the eighteenth century, gambling had obtained a tremendous hold upon all classes of society in England. One of the most striking features of this period was the female gambler of high rank. Noble women of the highest rank used to keep public gambling rooms where the play was high, fast and furious. In 1739 an act was passed by which the keepers and frequenters of such places were made liable to heavy fines. In 1745, we find the Chairmen of the Quarter Sessions for Westminster and Middlesex appealing in person to the House of Lords. They had tried to do their duty, but told how "claims of privilege of Peerage were made, and insisted on, by the Ladies Mordington and Cassells, in order to intimidate the peace officers from doing their duty in suppressing the public gaming houses kept by the said Ladies."

Consumption of Rubber.

The consumption of rubber in the United States has attained enormous proportions, and is still rapidly increasing. In 1896 we used 34,000,000 pounds, in 1897 over 42,000,000, and in 1898 44,256,026.

THE POPE WORKS HARD.

How the Supreme Pontiff Passes Each Day at the Vatican.

Rome, Oct., 1989. (Special Cable.)

Pope Leo is an early riser, and by that I mean a man who is out of bed and at work at five o'clock in the morning. He takes a light breakfast—a little very weak coffee with plenty of milk, and a piece of bread. He works, reading or writing and receiving some visits until lunch time. In the afternoon he takes his walk, and when in ordinary health spends some time in the gardens of the Vatican; then he returns to his apartment, where he says his rosary. He may then receive a few visitors, after which he takes a nap and dines. At ten P. M. he reads the newspapers and then retires for the night. The Pope thus really works all day long, and latterly he has

taken nourishment four or five times a day, but always of a light character—a little meat, soups, bouillon, a glass or two of Mariani wine and a good deal of milk, which forms the larger part of his diet.

During his recent illness very little medicine was given him; the physicians relied principally upon rest, nourishment and stimulants every now and then, but always in small quantities.

The Pope's nervous energy, as already noted in a previous letter, is something remarkable in one of his advanced years, and when he comes out of his apartment he almost runs—walking so fast that his attendants can hardly keep up with him.

When he is to be carried in state into the Sistine Chapel, to attend or preside at any ceremony, the clanking of the sabres of the noble guard on the marble floors can be heard a long distance off, and several minutes before the procession reaches the chapel. The Pope, it seems, although sleeping well and enjoying his afternoon nap, which he takes every day, does not sleep so much at night, during which he may get up several times, and even go to work.

Where's Your Dead Spot?

Most people have doubted their eyes when at some conjuring performance they have seen a man run needles and pins through both cheeks, evincing no pain as he does so. In reality every person has hundreds of senseless specks of skin all over his body through which he could run pins, or even cut them out, without feeling any pain. If some one else were to do so when he was blindfolded, he would not be even aware of the fact. Physicians call them dead spots, and the reason that one man can sew his cheeks up while another could not is simply because the former happens to have many hundreds of these spots in one place.

These dead spots are caused by the minute nerves which convey every sensation to the brain being either absent in these particular places or dead and senseless. But should any one of our readers allow himself to be blindfolded, and then get one of his friends to prod him very gently with a clean needle, say all on one arm, out of every hundred pricks he will feel only about 60 or 70 at the most.

In the other cases the needle will have touched dead spots.—Cincinnati Enquirer.

A Painful Discovery.

"It was about the witching hour," said the suburbanite. "I had left the station some distance behind me and was on my way up the road toward home. I had got comfortably cool by that time, and the charming influence of the starlit night possessed me and made me feel at peace with all the world. Nor did the fact that I and my new suit had made a hit with the friends I had been visiting detract from the fullness of my self satisfaction.

"All went well until I came to a street crossing my road. At the corner was a street lamp, which from some cause was not lit, and from this lamp fluttered what seemed to be a handkerchief. You know I am a little bit near sighted.

"I reached over to take it, but it was touched by the wind and waved just beyond my grasp. I reached over farther, leaning full against the lamp post. This time I was successful, and I found that the supposed handkerchief was a piece of paper on which was written in bold and dashing letters the legend 'Fresh Paint.'"—Philadelphia Inquirer.

The Real Reason.

Long ago he had taken the resolution always to be perfectly honest with his children.

"My son," he accordingly observed, "I am beating you with this trunk strap not for your own good, but because I am hot under the collar! No, it does not by any means hurt me more than it hurts you!"

In the face of such a luminous example it would be strange if a boy did not grow up to be an honest man.

It was perhaps possible to overdo this thing and render a boy so honest that he would be unable to earn his living in any of the learned professions, but that difficulty, if it existed at all, was theoretical rather than practical.—Detroit Journal.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, NOVEMBER 24 1899

The conclusions reached by the convention as to the storage and distribution of flood waters for irrigation and power prove to be a compromise between the national and State plans in which the stockmen, who don't want irrigation, but who do want leasehold control of grazing lands, got a little the best of the irrigators. That a proper system of leasing these lands will result in the gradual restoration of their stock-feeding capacity, now seriously impaired by past over-stocking, no one doubts. It should be speedily entered upon to the end that the great cattle interests may be put upon a better basis, the public grazing domain serve its highest utility, and the irrigators be undeceived as to its importance to them as a means of producing revenue for their purposes.

The resolutions propose that Federal efforts be supplemented by such State appropriations as may be useful and necessary, and a divided jurisdiction is provided for that will probably prove a failure if it is ever tried. Such division ion usually results in neither jurisdiction doing anything and laying its failure on the other. However, the convention, the resolutions introduced, the plans suggested and the discussions had served to bring out many details, difficulties and propositions for reform that have put the whole situation plainly before the people.

To Hobson will probably be delegated the task of raising the Charleston. The scene of the wreck is on the northwestern coast of the island of Luzon, where the cruiser was doing patrol duty. The Charleston was the first of the war vessels built for the United States Government by the Union Iron works. Her keel was laid in 1887, and she was launched early in 1890. She was somewhat of the type, though smaller, of the Newark and San Francisco, and was built from designs acquired abroad. Her displacement was 4040 tons; horsepower, 7500; speed, 18 knots. The cost of her construction and equipment exceeded $1,000,000. Her armament consisted, besides two eight-inch and six six-inch rifled guns and a secondary battery of rapid-fire guns, as follows: Four six-pounders, two three pounders and two one-pounders, with four 37-mm revolving cannon (Hotchkiss pattern) and two Gatlings.

"All things come round to him who will but wait." Our astronomical friends who have been waiting thirty-three years for the meteoric shower are now having their night.

Cattle For Feeding.

Mr. McLain Smith believes that "the injury to the cattle interest in Ohio and adjoining states through the general use of Jersey bulls some 20 years ago, and since, is almost incalculable." He adds, "It is almost impossible now to buy a bunch of good feeding steers grown in Ohio." I do not doubt that the Jerseys and Guernseys are without rivals in limited sections of our state, but the general introduction of Jersey blood into the three-fourth of our state that is not devoted to dairying to any considerable degree has worked injury to Ohio farming. As Mr. Smith says, there are few home grown steers for feeding. The small feeder is the one most hurt. Formerly he could pick up a few calves right at home, and the coarse feed and some grain of the farm were converted into beef. Now they are sold off the farm because he cannot get a half dozen or more good feeders without going to a city market for them. While I haven't a stock farm, i formerly bought a dozen or more steers for winter stall feeding in order that the extra feeding stuff might be fed on the farm, but quit the business because one could not get a dozen good feeders together without paying a price for culling out what was wanted that knocked out all the profit. There are many farms that should have a few calves for grazing and a few steers for stall feeding, so that all fodder, roots and cheap grain could be utilized and the supply of manure increased, but the Jersey has made this impossible.

Aluminium Horseshoes.

Russian military authorities have for some time past made an effort to employ aluminium in place of iron, copper and steel for articles of equipment carried by infantry in order to reduce the weight as much as possible. With the same object the Russian minister of war has ordered aluminium horseshoes for the cavalry. The first trial is being made by the Finland dragoons, and the horses are shod as follows: A shoe of the new aluminium model is placed on one foot, the three remaining shoes being of the kind now in use. The trial so far has been satisfactory, for the aluminium wears out less rapidly and is less affected by mud and moisture than the ordinary shoe. The difference in weight is about 2½ ounces on each shoe. The cost is not greater than at present and will be less as soon as the system of manufacturing the new shoe has been perfected.

Cotton and Sheep.

Texas cotton growers are using a good many sheep in connection with their work. Old cotton fields make excellent sheep pastures, and the combination of the two lines of work is a good one. Of course, sheep under such circumstances are not grown in large numbers, but they can be made very good, and farmers soon see the value of paying attention to quality where they are limited as to quantity.—Drovers Journal.

Sheep Ticks.

The old practice of expelling ticks by sprinkling Scotch snuff in the wool is at best a mere expedient, for though it may temporarily expel the ticks, it has no effect on the larvae, which soon develop a new crop of ticks. There is only one sure remedy for ticks and that is a bath in the dipping tank.—

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - Plaintiff,
vs.
Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, state of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

(SEAL)
P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.
GENERAL LAND OFFICE
Independence California.

A protest having been filed in this office by Rafael Rossi, against Lieu Section No. 390, by C. W. Clarke, for the NW¼ of SE¼ of Sec. 33, T 8 S., R. 33 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter said C. W. Clarke and R. Louis Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

TUESDAY, Nov. 21, 1899.

Estate of Josiah G. Dodge, deceased—Letters of administration granted to Norman M. Dodge.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7.00 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 3 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

DIED.

NORRIS—At Big Pine, Nov. 22, 1899, Mrs. E. R. Norris, a native of Ireland, aged 57 years.

Norman M. and Frank Dodge were up from Lone Pine last Monday.

M. G. Reddy came up from Los Angeles on last Tuesday's train.

Richard Hession of Big Pine spent a couple of days in town this week.

Gustave Sanger and Will Sanger were among the visitors in town this week.

Roland Laird arrived at Independence last Saturday morning from Bakersfield.

Fred Crocker and John Miles of Big Pine were visitors in town in the early part of the week.

J. Sub Johnson, Frank Carson and Sam Lunt got back last night from a hunting trip to Owens Lake.

H. S. Mackay was a passenger on last Monday's south bound train on his way to the Saline Valley copper mines.

S. H. Spratt came down from Big Pine yesterday and in company with W. T. Grant left for Keeler this morning.

P. H. Mack Esq. and George Montgomery got back last Monday from a trip to Los Angeles and San Francisco. They were absent three weeks.

There will be a stereoptican exhibition at the Methodist Church at Lone Pine on Saturday evening, December 2, illustrating "A trip around the World."

Allie McGee got down from Long Valley last Tuesday with the last of the Rickey cattle and has taken up his quarters at the Blackrock Ranch for the winter.

E. M. Dineen returned yesterday morning from a trip to Ballarat. He says there is considerable stir there, particularly in town lots, owing to the probability of railroad extension.

There will be a special Thanksgiving service at the Methodist Church on Thanksgiving morning at 11 o'clock, consisting of a sermon by the pastor and special music for the occasion.

Ben H. Yandell Esq. and E. Robinson left for Los Angeles Wednesday, traveling by private conveyance. Mr. Robinson's son Arthur is still at Los Angeles, his health being much improved.

Mrs. B. Rhine received a telegram last Monday announcing the death of the little son of Charley Collins from the effects of an operation performed at the California hospital, Los Angeles, about a month ago.

There was another heavy fall of snow in the mountains Tuesday, though the rainfall in the valley was slight. There has been 1 15 inches of rain since the 1st of October, the greatest fall in any preceding year since a record was kept being .83 in 1895.

Billy Dunn stopped at Independence Wednesday night on his way to Los Angeles with about sixty head of young horses for that market. They were nearly all bays, weighing about two hundred pounds, and were all thoroughly broken. In view of the fact that there has been heavy rains all over the southern part of the State the should bring ready sale at good prices.

The Copper Market.

Although no advance over 17 cents for copper has been reported the New York and London markets show a firmer tone and higher prices are confidently looked for. It is even asserted that there is not any Lake copper obtainable at 17¼ cents. Commenting upon the late flurry on the New York and London markets the *New York Metal Report* says: "Just such a turn as has appeared in the market during the past three or four days was certainly needed at this juncture in order to convince the doubting ones that there is a bottom to foreign and domestic markets for the metal and to bring them into line as buyers."

The *New York Metal Exchange* in a report issued last Wednesday says the United States production of copper last month was almost 24,000 tons, the largest quantity yet produced in any one month. While it may be the largest quantity produced in any single month it is not so great as to materially disturb average for the last year. The total production of copper in the United States for 1899 was almost 525,000,250 pounds, or say, 272,500 tons. This was an average of nearly 22,000 tons a month, and supplies were behind.

Distinguished Visitors.

A party of distinguished visitors arrived at Independence last Monday evening from Boston and will remain until to-morrow morning. It consists of Alfred A. Glasier, who is at the head of the Boston copper syndicate that has been furnishing Messrs. Mackay and Schen with the capital for the purchase and exploiting of the Saline Valley copper mines, and Messrs. Hastings and Ferguson. They met by appointment the parties who are selling the mines and have been busy with matters appertaining to the sale. Messrs. Mackay and Bomer came on the same train and went on to Keeler Monday night on their way to the mines. Mr. Bomer is a Denver expert of the highest repute, and upon his report the sale of the mine depends. The entire party will go north on to-morrow's train. The sale and subsequent working of the vast copper deposits in Saline Valley is a matter of the greatest importance to the people of this valley, and the report of the final action of the parties interested will be awaited with deep interest.

Again Here.

Col. Woodard and E. H. Stagg of the Randsburg railway were in Independence in the early part of the week, and after outfitting left for Saline Valley to look over the route for a railway into the copper mines. A party of twelve surveyors are now at work laying off the roadway from Johannesburg to Ballarat, and Col. Woodward stated while here that trains would be running into that camp by spring. A mining expert was with the party, who made a careful examination of the lead mines in and about the Darwin district for the purpose of ascertaining the amount of ore that could be obtained there for shipment. Two others of the party are occupied with taking statistics of the production and consumption of Owens Valley. All this may have no immediate effect, but it is evidence that the capital is looking about for investment, and we may ultimately feel the effects of it. Col. Woodard is expected to return here before going to Los Angeles.

Where They Missed It.

One of the instances of the irony of fate is the condition of affairs at the Redlands mill near Ballarat. It seems that a corporation was formed in Southern California for the ostensible purpose of working a gold mine in the South Park mining district, but really with the object of "skinning" confiding stock holders. A modern milling plant was purchased and located all right, but there was no ore, and at the proper time the affair collapsed. One day a prospector came along to the abandoned property. He dug around the mill for a day or two, hornes the rock, and the result of his observation proved the astounding fact that the mill itself was built over a large vein—over twenty feet of gold-bearing ore—that will mill over $30 a ton. Curious, isn't it? But the facts are given us by a mining man of the highest repute, and there is no doubt as to the truth of the statement.

Real Estate Transfers.

The following deeds have been recorded since November 16, 1899:

J. S. Stotler to Richard Day—November 6, 1899. Water right in Surprise Canyon; $250.

W. L. Hunter and R. C. Spear were in town yesterday on business connected with the sale of their Saline Valley copper mines. They left last evening for Hunter's Canyon where they are working assessments on a group of gold mines.

F. Lawrence is at work getting out a quantity of mining timbers for the Troeger Brothers at Cerro Gordo. There has been a heavy fall of snow on the summit of the Inyos and he will have no easy task in consequence.

PROPOSALS FOR BUILDING A BRANCH JAIL AT BALLARAT.

NOTICE IS HEREBY GIVEN, that pursuant to an order of the Board of supervisors of the County of Inyo, State of California, made October 6, 1899, sealed proposals will be received for the construction of a branch jail in the town of Ballarat, County of Inyo, State of California, to comply with the following specifications:

The building to be 14x16 feet, walls 10 feet high, with two cells, 7x10 feet; one ventilator 1x12 inches on top of each cell; all walls to be double, of 1x12, surfaced lumber, inside diagonal; 4-inch battens on joints outside; wall of cells partition to be diagonal double; building to stand on rocks 4 feet apart; sills, 4x4, floor joists, 2x8; ceiling joists rafters and plates, 2x4; double floor and ceiling 1x12 surfaced; sheeting, 1x6; roof, redwood shingles, 4½ in. to weather; three double doors, 2x4x6 ft. hung with iron hook hinges 8x9½ in., with bolts ⅝ in.; hasp and staple bolted on; door to be built of 1x12, 3 in thick; 3 jail locks.

All bids must be sealed and indorsed "Proposal for Building a Branch Jail at Ballarat," and addressed to the Clerk of the Board of Supervisors, the same to be received not later than 10 o'clock a. m. on THURSDAY, the FOURTH day of JANUARY 1900, and will be opened by the Board at 2 o'clock p. m. of said day. The Board hereby reserves the right to reject any or all bids.

A. C. FREEMAN, Chairman.
Attest: D. J. HESSION, Clerk.

NEW ADVERTISEMENTS.

NOTICE TO CREDITORS.

Estate of Josiah G. Dodge, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Josiah G. Dodge, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said administrator at his place of residence at Lone Pine, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

NORMAN M. DODGE.
Administrator of the estate of Josiah G. Dodge, deceased.
Dated at Lone Pine, November 23rd, 1899.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles, dated the 9th day of November, 1899, in a certain action wherein P. B. Mathison, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Albert Wibbelt, defendant, on the 3d day of August, 1897, for the sum of twenty five hundred and eighty-eight and forty one-hundredths ($2 588.40) dollars and costs of suit, I have levied upon the following described property, to wit:

That certain mining claim situate in the Argus Range of Mountains, in the County of Inyo State of California, known as the "McKinley" Gold Quartz Mining Claim, together with all the rights, members and appurtenances thereunto belonging.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Albert Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, the 22nd day of November, 1899.

A. M. GIVEN, Sheriff.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles dated the 9th day of November, 1899, in a certain action wherein P. B. Mathison, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Theodor Wibbelt, defendant, on the 31st day of July, 1899, for the sum of two thousand eight hundred five ($2,805.00) dollars and costs of suit taxed at twenty-two and sixty-five hundredths ($22.65) dollars, I have levied upon the following described property, to wit: Those three certain mining claims situated in the Argus Range of Mountains, in the County of Inyo, State of California, known as the "Westphalia," the "McKinley," and the "Los Angeles" Gold Quartz Mining Claims and also those two mining claims situated in the Slate Range of Mountains in said County of Inyo known as the "Matura" and the "Los Angeles" Gold Quartz Mining Claims, together with all the rights, members and appurtenances thereunto belonging; also fourteen thousand (14,000) feet of iron pipe running from the spring in Big Canyon to the Ballarat stage road in said County of Inyo; also the right to take and use the waters of said spring.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell at the right, title and interest of the said Theodore Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, November 22nd, 1899.

A. M. GIVEN, Sheriff.

Commissioner's Sale.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

George Collins, Administrator of the estate of Catherine Motz, deceased, Plaintiff, vs. George A. Free, Defendant.

Under and by virtue of an order of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 3rd day of November, 1899, in the above entitled action wherein George Collins, Administrator of the estate of Catherine Motz, deceased, the above named plaintiff, obtained a judgment and decree against, defendant George A. Free, on the 3rd day of November, 1899, which said decree was on the 3rd day of November, 1899 recorded in Judgment Book No. 2 of said Court, at page 424 I am commanded to sell, and by said decree the same is directed to be sold, all those certain lands and premises situate, lying and being in the County of Inyo, State of California, and bounded and particularly described as follows, to wit:

The south-west quarter of the north-west quarter, the north half of the south-west quarter, and the south-east quarter of the south-west quarter of Section No. 25, in Township No. 7 South, of Range No. 34 East, Mount Diablo Meridian.

Together with all and singular the tenements hereditaments and appurtenances thereunto belonging, or in any wise appertaining.

Notice is hereby given that on Saturday, December 16th, 1899, at the hour of 10 o'clock a.m. of that day, in front of the Court House of said County of Inyo, at Independence, in said county, I will in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in lawful money of the United States.

BEN H. YANDELL,
Commissioner.
Dated November 13th, 1899.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist., Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 25th day of September, 1899 an assessment, No. 23, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 35, 10th Floor Mills Building, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899 to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of Directors.

CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 21, 10th Floor, San Francisco, California.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Rev

Does Your Baking Powder Contain Alum?

Prof. Geo. F. Barker, M. D., University of Penn.: "All the constituents of alum remain (from alum baking powders) in the bread, and the alum itself is reproduced to all intents and purposes when the bread is dissolved by the gastric juice in the process of digestion. I regard the use of alum as highly injurious."

Dr. Alonzo Clark: "A substance (alum) which can derange the stomach should not be tolerated in baking powder."

Prof. W. G. Tucker, New York State Chemist: "I believe it (alum) to be decidedly injurious when used as a constituent of food articles."

Prof. S. W. Johnson, Yale College: "I regard their (alum and soluble alumina salts) introduction into baking powders as most dangerous to health."

In view of such testimony as this, every care must be exercised by the housewife to exclude the over and over condemned cheap, alum baking powders from the food.

Baking powders made from cream of tartar, which is highly refined grape acid, are promotive of health, and more efficient. No other kind should be used in leavening food. Royal Baking Powder is the highest example of a pure cream of tartar powder.

ROYAL BAKING POWDER CO., NEW YORK.

Shocks From Live Wires.

"It is a singular fact," said an electrician of this city, "that the human body is capable of becoming more or less inured to shocks from live wires. I suppose the average scientist would scout the idea, but what I say is borne out by everyday experience. The employees of a big electric light works, for instance, are continually receiving shocks that would disable an ordinary man, but are apparently none the worse for the experience.

"I remember some time ago a couple of young fellows came in contact accidentally with a live wire at a manufactory here in town, and both received exactly the same current. One of them was a helper around a dynamo and had met with mishaps of that sort before. He was knocked off his feet and momentarily stunned, but was all right in less than two minutes. The other man, who was a stranger, fell over as if struck by lightning, and it was fully half an hour before he showed the least signs of returning consciousness. He was laid up for several days and, oddly enough, was much the more powerful physically of the pair.

"I have known several cases of practically the same sort. The motormen on the street cars frequently 'get the current,' as they call it, especially in rainy weather, when wet wood becomes a conductor. They tell me they don't mind it much after the first few times."—New Orleans Times-Democrat.

His Busy Time.

Mosely Wrags—I never was so busy as I am now, mum.

Mrs. Smith—What are you doing?

Mosely Wrags—I'm lookin fer a job.—Baltimore Jewish Comment.

Secret of a Girl's Beauty

Hon. J. H. Fletcher, formerly Governor of South Dakota, but now a resident of Salem, Ore., says:

"For over two years my daughter had been declining from a strong, healthy, rosy-cheeked girl to a pale weak and helpless invalid. She was afflicted with terrible headaches, and gradually grew weaker and more languid, apparently without cause. I tried several doctors, but all without avail. Finally, to please a friend, I bought a box of Dr. Williams' Pink Pills for Pale People, and to our surprise, before it was used her headaches ceased, the color began to return to her cheeks and lips and her strength began to assert itself. I bought five boxes more, and by the time she had finished them she was completely restored, and to-day she is a robust, rosy, healthy girl instead of a pale, tired and sickly one."—*From the Oregon Independent, Salem, Ore.*

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box, 6 boxes $2.50.

RATHER EMBARRASSING.

The Sad Case of the Young Woman Who Wanted to Talk.

A most embarrassing experience was that of a certain West Philadelphia young woman who a few evenings ago attended a reception, in which a number of well known clubwomen participated. It so happened that among these were several who had found the matrimonial yoke an unwelcome one for various reasons and had obtained legal separation from their husbands. To one of these women, quite unwittingly, having just been introduced, the young woman, who is nothing if not vivacious and conversational, addressed the question:

"By the way, Mrs. R., don't you think divorce is wrong?" The woman, reddening slightly, replied:

"My dear, there are two sides to that question. Perhaps you have not heard my story."

The questioner, embarrassed beyond measure, stammered an excuse and walked away. To the first woman she met she confided her trouble, saying: "Oh, dear! I have just made a most unfortunate remark. You know Mrs. R.? Well, I spoke to her about divorce, and she's divorced, you know."

"So am I, my dear," was the smiling reply, and once again the young woman wished that the floor would open under her. She felt so bad that she went to one of the women in charge of the reception and, taking her aside, told her the whole story, asking her advice as to what she should do.

"Do nothing at all, Miss L.," was the reply. "I really don't think they have any horror of the subject so long as it's innocently called up. I know I haven't, and I too, am a divorcee."

Whereat the conversational miss donned her hat, and, fearing to say another word, went home.—Exchange.

Throne That Was Never Called For.

On the eve of the Franco-German war when the Emperor Louis Napoleon entered upon the conflict which ended so disastrously to himself and his countrymen, a couple of strangers appeared at a German town. They brought with them a large packing case, which on their arrival was carried to a hotel. Here the unknown visitors remained some time and eventually disappeared without paying their bill, which amounted to a considerable sum.

The landlord, whose curiosity had often been aroused with reference to the possible contents of the case, at last determined to open it and on doing so found a handsomely designed and richly upholstered state chair. This was adorned with the French imperial arms, eagle and Louis Napoleon's monogram, and beneath it was a musical box which played when the cushion was sat upon.

It is supposed that the throne—for such it is believed to have been—in the event of success attending the French army was to have been used by the emperor at Berlin after the capture of the German metropolis. Fate, however, spoiled the imperial plans, hence the sudden and precipitate flight of the custodians of the chair. The widow of the hotel keeper a few years later sent it to England, where it eventually found a purchaser.—Stray Stories.

The Refractory Weather.

"Does the climate agree with you?" inquired the mild but conversational person.

"No," answered the weather prophet fiercely. "Nearly every time I announce what it ought to do it assumes an attitude of rigid and uncompromising opposition."—Washington Star.

HOW A BULLET TRAVELS.

Lessons the Soldier Is Taught In Learning How to Shoot.

The soldier is taught that the bullet travels through the air in a curved line called the trajectory, and that three forces act upon it—first, the exploded charge, tending to drive it forward in a straight line along the line of fire; second, the force of gravity, and, third, the air resistance. At 200 yards, owing to these forces, the bullet, traveling at the rate of 2,000 feet a second, will have fallen about two feet. In the excitement of firing at close quarters the aim will invariably be too high.

It has been calculated that when the enemy approaches within 350 yards the soldiers will instinctively fire as much as two feet or three feet above their heads. Now, it has been found by experiment that the fact of fixing bayonets will cause the bullet to drop a distance of about 2½ feet in 350 yards, and therefore when about this distance from the enemy soldiers are instructed to fix bayonets, in order to counteract the excessive elevation of their aim.

The recruit learns that the mean extreme range of the bullet is 3,500 yards, and that the longest shot ever observed was 3,760 yards. He is taught the penetrating power of his weapon, a subject full of interest. To take one or two examples, rammed earth gives less protection than loose; bullets easily find their way through joints of walls, while a concentrated fire of about 150 rounds at 200 yards will breach a nine inch brick wall.

Only experience can teach a soldier how much he must aim to the right or left of his mark to counteract the force of the wind. A side wind has more effect on the flight of the bullet than a wind blowing directly toward the firer. The soldier must learn the habits of his rifle, since some shoot higher or lower than others. Every rifle, like every marksman, has its own individuality.—Pearson's Weekly.

Glad He Lost His Job.

There is a certain editor in New York with whom the power of the daily press is such a hobby that he raised the salary of a subeditor who suggested a "Sunday special" on "Famous Graduates of the Reporters' Room," and at once assigned his best dressed reporter to interview leading authors along this line. It happened that Mark Twain was in New York, and the editor counted on him as a striking example of the literary value of newspaper training. The reporter was ordered not to spare space for the interview. Yet when the article appeared Mr. Clemens' name was conspicuously absent. It was this way:

Mr. Clemens received the reporter with his customary urbanity, though he shrugged his shoulders when he learned what paper the young man represented. As usual, Mr. Clemens was a most elusive man to pin down to an interview, but at last the reporter gathered his wits and asked the question which he meant should point his article.

"Mr. Twain," he asked, "to what one thing most of all do you owe your marvelous success in literature?" He had counted on "my newspaper training" was the answer.

The famous humorist half shut his eyes, thought a few moments in silence and then said decisively, "To the fact that when I was young and very ambitious I lost my job."

"May I ask what was your job, Mr. Twain?" exclaimed the puzzled reporter.

"Certainly, sir, certainly," replied Mr. Clemens, with great suavity, "I was a reporter."—Saturday Evening Post.

MIXED THOSE ANSWERS UP.

Trials of an Unlettered Fisherman at an Examination for Drivers.

They had an examination for drivers in the rooms of the civil service board in the Criminal Court building, and among the applicants was a fisherman. It was evident to the examiners that the fisherman was not practiced in reading and writing. He came to the rooms with a list of answers which he had been instructed to write opposite the printed questions on the blanks furnished to him. For six months at least he had practiced writing these answers. The questions were all on printed blanks, and the person who had coached the fisherman had written the answers in the order of the questions on the old blanks. The civil service board got in some new blanks recently and the fisherman scrawled his answers in the order he had learned them. The result produced upon the first paper was as follows:

Q.—Where were you born? A.—Along the coast of Massachusetts.

Q.—If not born in the United States have you been naturalized? A.—Sometimes.

Q.—When? A.—Mostly on the water.

Q.—Are you married or single or widower? A.—I was captain of a steamboat for two years.

Q.—What family have you? A.—A pipe and chewing tobacco.

Q.—Are you addicted to the use of tobacco? A.—Two, both dead.

Q.—Have you been complained of, indicted for or convicted of any criminal offense? A.—I've been a widower since my wife died.

Q.—What has been the nature of your occupation for the last five years? A.—Naturalized.

Q.—Have you ever held a position under the government? A.—No. I don't believe in it.

Q.—Have you ever paid or promised to pay or given any money or other consideration to any person directly or indirectly for any aid or influence toward procuring your appointment? A.—Yes.

Q.—Have you ever been in the army or navy of the United States? A.—I had fits.

Q.—In what capacity? A.—Fisherman.

Q.—Have you ever been vaccinated? A.—Whisky and beer, moderately.

Q.—Have you ever had rheumatism? A.—Yes, from all my former employers.

Signature of applicant—Never arrested.—New York Sun.

A Novel Drink.

The agony of thirst is often experienced by travelers in the sand-belts of South Africa. Dr. Schulz, in "The New Africa," tells of a strange device to which his bearers and guides resorted one night, when the pangs of thirst became unendurable.

We had no water that night, and the boys got so thirsty that some of them went off to search the nighborhood, carrying firebrands as a protection against possible lions. A shout in the distance induced us to walk over to where they were. There we were surprised to find two boys squatting on the ground holding the legs of one of their companions, who had gone down head first into an ant-bear hole in search of water.

By and by he gave a signal and was hauled up, but what was our astonishment to find, when he was pulled out, that he had hold of the legs of another boy, who in his turn brought up a calabash full of wet mud that he had dug up at the bottom of the ant-bear pit.

This moist earth was duly shared by the crowd, who filled their mouths and sucked such fluid out of the stuff, as it contained, and then spat out the remaining sand.

While the first lot were enjoying the moisture thus obtained another cycle of boys took up the job, and so the night was spent by them in getting up the mud with which to wet their parched throats.

As for ourselves, we could not touch it; it was accompanied by a fearful smell of decaying material like sulphureted hydrogen, which we could not stomach.

Cross in Front of Engines.

"One of the oddest traits of animal nature," said an old-time Illinois Central engineer, "is the desire of every living thing to cross in front of the locomotive. At first it filled me with wonder, and I used to lie awake nights trying to explain it. Now it's grown to be an old story with me.

"What goes in front of the engine? Why, everything. Let me see! I've seen snakes—and I'm a sober man, mind you—stick up their heads to see what was making all the rumble along the right of way, and then deliberately start to crawl across the rails. I've seen many a quail spring up along the right of way, fly along just ahead of the engine, and then shoot across in front. Several times when I've been running a mile a minute the engine has struck these birds and killed them. In the old days I used to jump a deer every now and then, and the chances were he'd cross the track every time. Cattle invariably do it until they have learned better; so do pigs and all the domestic animals. Even chickens will run fluttering across.

"It seems to me I've killed enough animals to stock a farm and menagerie."

Growing Hair by Suction.

A Paris hairdresser undertakes to grow a good crop of hair on the baldest head by mechanical means. His apparatus consists of a flexible plate of convenient shape to fit the top of the head. This is pressed down and the air from beneath it exhausted; the cupping process is supposed to stimulate the growth of the roots.

Health-Giving Bacteria.

Dr. H. S. Gabbett comes to the defense of germs, in the Nineteenth Century, which are not all microbes of disease and death, but for the most part indispensable to life and health. A soil sterilized to bacteria would be sterile in every other sense.

New Marriage Law in Massachusetts

A new law has just gone into effect in Massachusetts forbidding the performance of the marriage ceremony by justices of the peace unless they have been specially designated for that purpose.

The youth who patronizes the racecourse is on the wrong track, figuratively speaking.

A CHILD'S FANCY.

Explanation of What Seems Precociousness In Imaginative Children.

"An active, healthy imagination is one of the happiest gifts a child can possess," is the theory advanced by Florence Hull Winterburn, the well known padiologist, in The Woman's Home Companion.

"If we watch an intelligent child, four or five years old, who believes himself unnoticed we will probably be astonished at the richness and fertility of the fancy which can give life and color to dull, commonplace things and weave whole stories and dramas around the simple toy that means nothing more to us than what it plainly stands for. But we will perceive that even his wildest romances found themselves upon many facts, for free and frolicsome as imagination may appear, it is subject to its laws. It deals with real things in a playful way. It embroiders, paints, molds, but it must have its material, its basis in actual life.

"What we call creative ability is really nothing but the power to reconstruct, perhaps to connect several separate plans or patterns into a whole which seems different from the original. The child is an artist who daubs on his colors boldly, without any sense of the absurdities he may commit, and so he often produces effects that surprise others as well as himself. Many of the acts that seem so precocious because we suppose them to be the outcome of a well considered plan are really happy accidents, not devoid of the merit of originality, but neither to be overpraised as work of genius. Childhood is one unbroken succession of experimentings."

A Much Abused Word.

The way certain words are misused and abused should appeal to one. It is a fact that if any word has tried to adapt itself to every possible and impossible situation "grand" is the one that has made the attempt. A person needs but walk about any city to be confronted with Grand hotels and Grand View houses. Sometimes it fits the house which it adorns, sometimes it seems but a sardonic attempt to make them seem the more forlorn. It rises to the sublime and describes the mountains, it descends to the level of everyday life and appears as a descriptive term when the weather is mentioned. On the lips of the milliner it lures on to her doom the woman who without the support of a friend is selecting a hat, and the "doesn't she look grand in that?" causes her to depart with the hat in her possession. One hears about "grand" dinners and "grand" times, but the last straw is when the shopwoman says, "That coat fits you something grand."—New York Sun.

A Musical Snake.

The Pittsburg Times is responsible for this tale of black snakes who loved music not wisely but too well. One of the ophidians became so proficient in musical knowledge that he crawled into a church with a number of companions, wiggled up on the organ bench, pushed up the lid with their aid, grasped with his tail the lever that started the water motor and proceeded to play the organ with his head, varying the performance by crawling over the keys. He scared the choir nearly into fits one Sunday by entering during service time.

A "Sure Thing" Bet.

Those who are unsportsmanlike enough to bet on a sure thing might try this: A bets that B cannot endure a piece of ice on his arm for two minutes, A to select a place between the fingers and the elbow. B bares his arm, and A puts a lump of ice on the pulse in the wrist. In 41 seconds usually the pain becomes so great that B gives it up. This catch originated on the London Stock Exchange. It is said that Guy Kickalls, the oarsman, is the only one who ever endured the pain two minutes.

A West Indian Hurricane

Recently traveled up the coast at will, and acted in an entirely different manner from any other storm. Sometimes dyspepsia acts in the same way. It refuses to yield to treatment which has cured similar cases. Then Hostetter's Stomach Bitters should be taken. It has cured stomach trouble for half a century.

As long as half the population come down to see the train go through, it may be set down as a small town.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

The Youth's Companion

Issued Every Week.
$1.75 a Year.

FAMOUS soldiers and sailors, statesmen, scholars, travellers, hunters, and the most gifted writers of stories will enrich the pages of The Companion during 1900. Send your address on a postal card, and we will mail you our Illustrated Announcement Number, giving a full Prospectus of articles and authors already engaged for the 1900 Volume.

Is the time to subscribe for the volume for 1900 to take advantage of the special offer below:

....FREE....

SEND $1.75 at once with this slip or mention this paper, and we will send you THE COMPANION FREE for the remaining weeks of 1899, and then for the 52 weeks of the year 1900.

The Companion Calendar for 1900, given also to all New Subscribers, lithographed in twelve colors, is the most beautiful one in the long series of exquisite Companion Calendars.

O 303

THE YOUTH'S COMPANION, BOSTON, MASS.

General Grant's Suggestion.

An official who quite generally knows what he is talking about was dilating the other afternoon upon the funny hopelessness for all reasonable purposes of many of the little creeks and rivers for the "improvement" of which congress is asked to appropriate money under the river and harbor bill.

"When Grant was president," said this official, "he used to alternately chuckle and fulminate against the expenditure of good government coin for the 'improvement' of measly little streams that he himself knew could never be made fit for any human purpose. There was a Virginian who, failing to get congress to stick in an appropriation for the dredging of a little stream down in his section, finally importuned Grant in the matter.

"'Let's see,' said Grant musingly, 'I believe I crossed that stream in 1864, wasn't it?'

"The Virginian, who remembered Grant's crossing of the stream, replied affirmatively.

"'Look here,' said Grant after a pause, his face lighting up suddenly, 'why don't you macadamize it?'"—Washington Post.

A Bad Symptom.

"Has George ever hinted that he had thought of you as a possible wife?" asked the anxious mother.

"No," replied the girl, a faraway look in her eyes, "and I'm afraid he never will."

"Why," said the mother, "I thought"—

"It doesn't matter what you thought, mamma, dear," interrupted the daughter. "Only last night he complained of feeling drowsy, and it wasn't 9 o'clock."

A Medical Prospector.

"It isn't getting your diploma that's the worst of it," said a new fledged M. D. "It's where to hang out your shingle. A doctor's got to bear two things in mind in deciding that—he mustn't choose a place that already has physicians enough, and, above all, he must not settle in a healthy place—one of those towns, don't you know, where nobody dies except of old age. Of course a doctor doesn't want people to die—that's almost as bad as to have them never sick—but he does want them to be sick enough to keep him going.

"Now, the way a friend of mine did was this: He took the train out through central New York, and he stopped off at pretty much every place he came to till he found what he wanted. It was a pretty place to look at, but it lay low along a river. He noticed as they approached it lots of marsh lands, and he said to himself, 'There'll be malaria here anyhow and probably typhoid.' And, sure enough, though he's only been there three years, he already has a paying practice."—New York Commercial Advertiser.

The Tragedian's Defi.

"Yah! Yah!" yelled the boys in the gallery. "Wot ye doin on de stage? Go back to de lunch counter!"

"Canaille! Rabble! Scum of the earth! Offscourings of the slums!" hissed the tragedian, facing them with folded arms; "the hoodlums of the gallery hoot at me and the critics of a venal press roast me! I defy ye both! I care neither for the higher criticism nor the hired criticism!"

And he went on with his lines.—Chicago Tribune.

VIN MARIANI

MARIANI WINE—THE IDEAL FRENCH TONIC—FOR BODY AND BRAIN.

FOR H. I. M. EMPRESS OF RUSSIA.

"Her Majesty, Empress Marie Feodorowna, finding great benefit from the use of your tonic-wine, requests 50 bottles Vin Mariani sent immediately, addressed to her Majesty the Empress."

AMERICA'S THREE ADMIRALS AND THEIR FLAGSHIPS.

ALASKA IS FERTILE.

GROWING THINGS THRIVE IN OUR ARCTIC DOMAIN.

Gratifying Information from the Government's Experimental Agricultural Stations—Early Vegetables Excel in Flavor Those of the States.

The Federal Department of Agriculture has shown that fruits, vegetables and grain are being grown with profit in Alaska, and that our great Arctic domain offers enormous possibilities, hitherto unsuspected, for agriculture on a large scale.

Along the Alaskan coast the soil is capable of producing grain, vegetables, small fruits and forage plants of as good quality and in as great abundance as many of our Northern States, and of supporting countless herds of cattle. In southeastern Alaska is a region as large as all New York, New Jersey and Pennsylvania combined, that is adapted in all respects to cattle raising.

ALASKAN REDTOPS.

The Government is establishing three agricultural experiment stations at different points in the Territory, to test thoroughly and scientifically the capacity of its soil for producing a food supply for its present and future population, and enable the Territory ultimately to become self-supporting with respect to the food it may need.

The stations are at Sitka, on the southeastern coast; at Kadiak, on Kadiak island, off the southern coast; and at Kenai, on the Kenai peninsula, beside Cook inlet, about 110 miles to the north and east. The conditions at Sitka represent all the heavily timbered region of southeastern Alaska, with its deep moss and peaty soil. At Kadiak the climate is somewhat cooler, and the soil less peaty, while in the Kenai peninsula there is a large area of agricultural land inside the coast range, which presents favorable conditions for farming, although it lies north of the sixtieth parallel of north latitude.

GROWN AT SITKA.
Oats, Barley, Flax, Potatoes and Clover.

Last year the Department sent to Alaska a special agent, Prof. C. C. Georgeson, a native of Denmark. He made his headquarters at Sitka and Skaguay, and experimented with seeds of over 100 varieties of grain, vegetables, grasses and forage plants. He also distributed seeds to individuals in other localities in Alaska and made arrangements for co-operative experiments and reports as to the results obtained. All of the seeds were planted between May 18 and May 25. The season was backward, and it was impracticable to plant them earlier.

Of vegetable seeds planted there were asparagus, wax beans, beets, cress, kale, lettuce, mustard, onions, parsley, parsnips, peas, radishes, rutabagas, rhubarb, salsify, spinach, sage, thyme, turnips and Windsor beans. All these, including in some cases several varieties of each, except the wax beans and spinach, made excellent growth and produced vegetables and plants that compared favorably with the products of gardens almost anywhere in southern latitudes. The peas were especially prolific, and the turnips, radishes, parsnips, parsley and salsify produced roots as good as can be found anywhere. Some of the turnips weighed five pounds each, and some even ten pounds, and were of excellent flavor. Potatoes also were a decided success. Many of them weighed each a pound or more.

POTATOES GROWN AT KADIAK.

A more important test, however, was made with grains and foliage plants. Oats and barley were grown at Sitka and Skaguay with gratifying results. Several varieties of Norwegian and Russian barley were grown with the same excellent result as with the oats. Of forage plants there were seeded several varieties of Norwegian clover, timothy, hairy vetch and Riga flax, and all were successful, the clover being especially vigorous, measuring over two feet high.

Alaska is pre-eminently a land of small fruits and berries. The flavor of most of the native berries is pronounced to be so excellent that it is said they are worthy of introduction into the States.

Cattle were introduced in Alaska long ago by the Russians in their various settlements, and, according to reports, they always did well. Professor Georgeson reports that the cattle now found at the little towns along the coast thrive and appear to have become well adapted to the climate. This excellent condition, Prof. Georgeson says, is evidence of the nutritious qualities of the indigenous grasses.

The soils of Alaska are largely of vegetable origin, and to a great degree resemble the black earth of rice lands or peat formations. In the southeastern portion of Alaska there are deep deposits of this rich soil overlying slate or conglomerate bedrock. The organic content of many of these soils is very much higher than in any of the agricultural lands of the States. If these soils are so situated as to be well drained they should be capable of producing enormous crops, and, with an abundant and well-distributed rainfall, they would be adapted to almost any kind of crop suited to the general climatic conditions of that portion of the country.

HOTEL SERVANTS ARE HONEST.

They Are Often Accused of Stealing, but Are Rarely Guilty.

"A curious thing happened here today," said the head clerk at one of the leading hotels in New Orleans to a Times-Democrat man. "About a month ago a gentleman and his wife, from Milwaukee, spent a couple of days in the house, and on leaving the lady missed a valuable ring. She was positive she left it on the dresser and equally positive it had been stolen by one of the servants. We set an investigation on foot and promised to forward the ring if found. A little later the husband wrote to inquire whether the search had been successful, and when we replied in the negative he notified us that he proposed to sue the hotel. He claimed we had shown great negligence in not arresting a suspected employe, and his comments were bitter in the extreme. That was two weeks ago.

"Now here is the sequel in the shape of a third letter that arrived this morning. He says that he and his wife reached home a few days ago and in unpacking the luggage found the ring in one of the trunks, and he is manly enough to add a very handsome apology for his hasty conclusions. Strange to say, that is the first time in the history of the house that any guest has frankly admitted such a blunder after taking his departure, and blunders of that kind are of almost weekly occurrence.

"It is the commonest thing in the world at all hotels for persons to go away declaring that they have been robbed by the help. We know the missing article subsequently turned up, because the subject is never referred to during later visits, but in the meanwhile a score or so of humble, but honest and hard-working people, have been placed under a suspicion that is wholly unwarranted and unjust. That is a point the average traveler doesn't seem to consider. Hotel chambermaids are continually returning valuables which they find in rooms. Dishonesty among them is so rare as to be almost unknown."

Lost Child of the Miamis.

In 1770, when a mere child, Frances Slocum was stolen from her parents by a roving Indian band at Wilkesbarre, Pa. She moved West with the ebbing tide of Indians and was finally adopted by a chief of the Miamis. Her parents searched far and near for their missing child, but were unable to locate her until she had been adopted by the Miami tribe, and when overtures were made for her return she declared that the life in the Indian camp had such a fascination for her that she had no desire to return to civilization. She was extremely popular among the members of the tribe, and the village southwest of Wabash, Ind., where she made her home was known as the "white woman's" village. As she grew to womanhood, adopting the savage customs, attire and language, she married She-pan-can-nah, meaning the Deaf Man, the chief of the Osage village, and by him had four children, two sons and two daughters. She accompanied her husband to the Osage village and afterward to the Deaf Man's village, and lived there long after the white man had invaded the wilderness and begun to clear up the dense forests.

She-pah-can-nah died in 1833, and in 1847, fourteen years after, she died at the age of 80, loved and respected by whites and Indians alike. Frances Slocum's Indian name was Mah-cones-quah, or "Young Bear." Her daughter, Ke-ke-kah-kushwa, became the wife of Capt. B. Brouillette, and died on March 13, 1847, aged 47. The other daughter was O-zah-was-shing-quah, who married Tah-co-nah, and he dying she became the bride of Wah-pah-pe-tah, and several of her children by the last marriage live on the Indian land south of Wabash in abject poverty. She died in January, 1877, the last of Frances Slocum's children.

Home of the Edam Cheese.

While the Edam cheese is a familiar visitor on the table, not every one knows whence it comes nor how its cannon ball proportions and gay coloring have been achieved. The northern part of Holland is the seat of the Edam cheese industry, and the consequent cleanliness of the relish is therefore doubly assured. In making it the fresh cow's milk is carefully strained and the renet added. As soon as the milk curdles the whey is drawn off and the curd, thoroughly kneaded, is pressed into molds. This process is repeated until the whey has all been extracted and the curd is comparatively dry. It is then wrapped in a linen cloth and kept for ten or twelve days until quite solid. Then the cloth is removed and the cheese put into salt lye. Afterward a little more dry salt is sprinkled on the cheese, until the maker thinks it is salt enough to insure its keeping. It is next put into a vessel and washed with whey and scraped to remove the white crust. It is next carried into a cool room and laid on shelves, where it is frequently turned. The ripening process lasts from two to three months, the round balls growing the fine yellow or reddish color peculiar to Edam cheese. The cheeses intended to be exported to this country are rendered still more brilliant by dyeing the rind with a vegetable dye.—New York Tribune.

Queer Jap Funeral.

Lieut. Yoshibumi Fukagawa, of the I. J. N., left behind a curious request to his family a few days prior to his death, which occurred the other day in his native district of Hizen. He observed to his family that as he had never had the time to investigate religious questions deeply enough to enable him to determine which faith he should embrace, he was neither prejudiced against nor partial toward any form of religion. However, he himself was of opinion that his soul would perish with the cessation of his life, while his remains would crumble to dust. Therefore he did not wish to have any religious service performed on his behalf. The funeral, also, should be as simple as could be; and flowers and similar offerings be strictly declined. No announcement should be made of his death to friends of his until four or five days after the funeral. Two or three weeks after his death his relatives and friends should be invited to a banquet, and they should be asked to join the occasion as heartily as possible. A priest might be invited, if the presence of such a personage was deemed desirable. At the funeral, also, nobody should accompany the bier; except, if considered necessary, one or two representatives on behalf of the family and relatives might follow the remains to the grave. The tomb was to be of the simplest description, only his name being inscribed upon it. A memorial tablet was entirely tabooed.—Japan Times.

A Real Genius.

The man that sharpened shoe pegs at both ends and sold them for wheat was a genius, but he has his equal in Mexico. Some time ago one of the habitual revolutionary flare-ups was about to commence in one of the belligerent little South American Presidencies which masquerade under the title of republics. A couple of hundred men marshaled in opposition to the government, swore solemn oaths, and met nightly in an abandoned hut at the entrance to a swamp. Enthusiasm was plentiful, but arms were scarce; so a purse was made up, and three of the party set off to buy ammunition.

They went to Mexico, where a cargo of powder was delivered to them, and, after inspection, was shipped to the revolutionary headquarters. A signal gun was mounted on a hilltop, and when the day and hour arrived the field marshal of the revolutionary army touched a match to the fuse of the piece. There was no response. The marshal used all the matches in his silver matchbox, but the gun refused to fire. An investigation by the "War Office" followed, and that cargo of powder proved to be nothing but mahogany sawdust, which had been vigorously stirred up with powdered graphite to give it the proper color and appearance.

Astronomy as a science interests fewer people than gastronomy does.

A STRINGENT FOOD LAW.

Prohibits the Use of Arsenic or Alum in all Articles of Diet.

The law enacted by the Missouri legislature, a copy of which was recently published in our columns, and which prohibits the manufacture or sale of any article intended for food or to be used in the preparation of food, which contains alum, arsenic, ammonia, etc., places that state in the lead in the matter of sanitary legislation.

Laws restricting the use of alum in bread have been in force in England, Germany and France for many years. In this country, in Minnesota, Wisconsin, Michigan, Ohio, Kentucky and several other states, direct legislation in reference to the sale of alum baking powders has also been effected. In several of these states their sale is prohibited unless they are branded to show that they contain alum, and in the District of Columbia, under the laws of Congress, the sale of bread containing alum has been made illegal.

Following are the names of some of the brands of baking powder sold in this vicinity which are shown by recent analysis to contain alum. Housekeepers and grocers should cut the list out and keep it for reference:

Baking Powders Containing Alum

K. C. ..... Contains Alum.
Manf. by Jaques Mfg. Co., Chicago.
CALUMET ..... Contains Alum.
Manf. by Calumet Baking Powder Co., Chicago.
HOME ..... Contains Alum.
Manf. by Home Baking Foader Co., San Francisco.
BEE-HIVE ..... Contains Alum.
Manf. by Washington Mfg. Co., San Francisco.
CLOVER LEAF ..... Contains Alum.
Manf. by Pacific Mfg. Co., Los Angeles.

The housekeeper should bear in mind that alum makes a cheap baking powder. It costs but two cents a pound while cream of tartar costs thirty. The quality of the powder is therefore usually indicated by the price.

Walking Up Stairs.

A physician who declared that few people knew how to walk up stairs properly was asked to describe how it should be done. He said: "Usually a person will tread on the ball of the foot in taking each step. This is very tiresome and wearing on the muscles, as it throws the entire suspended weight of the body on the muscles of the legs and feet. You should in walking or climbing stairs seek for the most equal distribution of the body's weight possible.

"In walking up stairs your feet should be placed squarely down on the step, heel and all, and then the work should be performed slowly and deliberately. In this way there is no strain upon any particular muscle, but each one is doing its duty in a natural manner. The woman who goes up stairs with a spring is no philosopher, or at least she is not making a proper use of her reasoning faculties.

"The habit, too, of bending over half double when ascending a flight of stairs is exceeding reprehensible. In any exertion of this kind, when the heart is naturally excited to a more rapid action, it is desirable that the lungs should have full play. The crouching position interferes with their action, the blood is imperfectly aerated, and there is trouble at once. Give the lungs a chance to do their work everywhere and at all times."—New York Sun.

The Parrot Turned Brown.

Long had the wife of a poor Washington clerk been yearning for the possession of a green parrot.

At last a fine specimen was obtained for $10. It was delivered in the morning, and it came to pass that a new servant from the depths of the country opened the door to the delivery boy. Her mistress was out; there was not a soul to instruct her in the code of ethics as applied to parrots.

"Is it for the table?" she asked.

"Without doubt," was the wicked reply.

Whereupon the parrot was dispatched at once, plucked, trussed and put into the oven. He was just turning a beautiful brown when the mistress of the establishment returned, and that same evening the little servant from the country was back among the ducks and drakes of her own village green a wiser and sadder girl.—Washington Times.

The Trunk Strap.

"No good," said a baggage man, touching as he spoke a rope that was tied around a trunk standing in a railroad baggage room. It was a stout rope and securely tied so far as the knot was concerned, but it did not bind on the trunk, and it would have been difficult, if not impossible, to draw it close without some mechanical means to help. As it stood with the rope loose about it the trunk could have been easily broken by careless handling as though there had been no rope around it at all.

"A strap is the only thing," the baggage man said, "to put around a trunk."—New York Sun.

Broiling a Steak.

The broiling of steak often fills the house with smoke and the meat odor. In many cases this can be avoided by as simple an expedient as opening the dampers of the stove or range when the broiler is put on and letting the draft carry the fumes up the chimney. A great many things that are odious in housekeeping may be avoided by "knowing how."

The Old, Old Story.

Old Lady (reading a letter from her son in college)—Lor' sakes alive! Josiar, if John hain't gone an done it! An he warn't no hand fer the gals, nuther!

Her Worse Half—Wut's the trouble, Samanthy?

Old Lady—Why, he says he's fallen in love with Belle—er—Belle Letters.—Brooklyn Life.

FRIEND OF THE BOER.

Dr. W. J. Leyds, Secretary State for the Transvaal.

Dr. W. J. Leyds, Secretary of State for the Transvaal, is likely to give Joseph Chamberlain, Colonial Secretary of England, many a troublesome hour before the Boer is Anglicized. Dr. Leyda is described as a man of peculiarly strong personal power, gifted with a persuasive tongue, and fully alive to the fact that the Boer and the Englishman can never agree. Dr. Leyda is particularly known for his hatred of everything English. He is a statesman who visited Germany and secured from Emperor William recognition of the independence of the Transvaal Republic. The Emperor promised him that he would appoint to the Transvaal a German resident instead of a consul. That is the way in which the independence of the Transvaal is acknowledged. Emperor William likes the man, for he decorated him some eighteen months ago, and other honors were shown him. He is considered one of the very ablest members of the Transvaal Government. President Kruger intrusted to him the negotiations with Germany which have been in progress for some months past. These negotiations are of a nature by which in reality Dutch and German interests become as one in the South African country. Dr. Leyds is of Dutch descent, but is not a Boer.

DR. W. J. LEYDS.

MONEY IN KEEPING GOATS.

They Live on Next to Nothing, and Are a Source of Good Profit.

Uncle Samuel's Department of Agriculture, in seeking out new fields of husbandry for the American farmer, has completed a curious and interesting investigation into the possibilities of an industry highly profitable abroad, but ignored in this country—that of goat raising for skins, fleece, milk, cheese and by-products. In a report the Department offers this slighted industry as a means by which the farmer can increase his prosperity and incidentally enrich his soil without cost. The department says that the conditions of climate, land and labor in most of the States of the Union afford almost unlimited natural facilities for the successful prosecution of this industry.

YOUNG MALE GOATS 8½ MONTHS FLEECE

We use in our manufactures a constantly increasing amount of goat skins, but we produce comparatively none ourselves. Last year over 32,000 tons, or 65,000,000 pounds, of goat skins was brought in, chiefly at New York, and the average price in New York was 40 cents a pound, or a total value of $26,000,000. At four pounds to the skin, the average weight of dry skins, it requires the slaughter of 16,226,700 goats and kids to yield the skins imported last year. This represents live flocks of foreign goats aggregating from 25,000,000 to 30,000,000 for our present supply of marketable goat skins alone. If all the goats in this country were kept solely to supply skins for market they would fail to supply even an insignificant fraction of the present demand.

FEMALE GOATS, 5 MONTHS FLEECE.

The total number of goats in the United States is only about 500,000, and one-half of these are in Texas. One-half of the total number also are of Angora fleece-bearing stock, confined chiefly to Texas, Oregon, New Mexico, California, Colorado and Nevada. Few, if any, goats in the United States are raised for their skins.

The cost of keeping goats is less than for any other animal. They graze upon coarse herbs that are not eaten by any other stock, such as ironweed, dock, mullein, briars, buds and broken sprouts. The ease with which all breeds of goats can be kept fits them for many mountainous portions of our country where sheep cannot be sustained to advantage, while their ability and disposition to defend themselves against dogs give to them another great advantage over sheep. They are free from all diseases to which sheep are liable, are hardy and prolific, and experience has proven that they are adaptable to all parts of the United States. The feed of one cow will keep twelve goats. Cows must have certain food or they will not thrive. Goats will eat anything, almost, and still do well, and they have this great advantage also that their milk is not in any way affected by their diet.

The goat is a reliable and lifelong botanical scavenger, and can be depended upon to destroy the many undesirable products of cultivated and fallow lands—the abundant and persistent weedy vegetation which so incessantly besets the cultivated crops. Over 42 per cent of the land in farms in the United States is unimproved, amounting to over 265,000,000 acres, against 375,000,000 acres improved. Thus is presented a vast field for selection of favored localities in every part of the country, and much of the field especially invites the primitive occupation of herding, which precedes and prepares the way for agriculture, with inestimable benefit to the soil. In the aggregate, millions of acres of land, at present poor, rough, rocky and bushy, distributed through nearly all the States, call for subjugation and enrichment through animal occupation, preferably of the goat. They will furnish in abundance such forage as is suitable and preferable for goats. And under such conditions whatever profit can be derived from herding goats will come near being a total profit. Wherever foul land is regularly pastured by goats for a few years it becomes clean, weedless and bushless, and being evenly fertilized by them also, it usually runs naturally into nutritious grasses.

CIGARS FROM THE PHILIPPINES.

Cheap Grades Are Being Brought Here by Returning Soldiers.

Time was, before the dusky little Cubans began their last efforts to throw off the Spanish yoke, that a Havana cigar with a Manila wrapper was one of the choicest weeds that an exquisite could place between his lips in the way of a smoker. As Havana fillers became scarce, owing to the insurrection, other tobacco was substituted for your "15-centers" and the Manila wrappers also went to the boards to a large extent.

Then Gen. Charles King came back from Manila with a private stock of Manila-made cigars, pure and undefiled. They were done up each in its suit of shining tin foil to preserve the moisture. Gen. King extolled their virtues, and passed them around among his friends. They did not like the flavor at the start, but the cigars had a faculty of growing into favor, even after Gen. King had given out the information that they were "2-centers" away over there in Manila. Now the information comes from Dresden that the German smokers are getting up next to the pure Manilas, and that they are sold in that city for 6 pfennigs, or about 1½ cents each.

When Gen. King's attention was called to the price at which the Manila cigars were selling in Dresden he expressed no surprise. "I wrote a letter to the Sentinel in which I stated that good cigars in Manila sold at 1 cent each," said Gen. King. "I can conceive how they can be sold at Dresden for 1½ cents each, notwithstanding the cost of transportation and the fact that the manufacturer has to make his profit. For 2½ cents I obtained as good a cigar as I care to smoke; as good, in my opinion, as the 15-cent cigar here in Milwaukee. You may not be able to detect the delicate flavor of the Vuelta Avajo of Cuba in it, but you are getting an honest, well-made and unadulterated weed.

"The army officers at first did not take kindly to the Manila cigars, but they soon grew to like them. The only reason we see so little of the Manila cigars in this country is that it costs just as much to import a cheap Manila cigar as it does to import the more expensive Havanas, the customs duties being levied by the pounds and not by the cost price of the article. In this way a 2-cent Manila becomes a 15-cent cigar when it reaches New York or Chicago or Milwaukee and people will probably prefer a good Key West for some time to come."—Milwaukee Sentinel.

An Arctic Bill of Fare.

The Arctic region is no place for epicures. The men who explored Franz Josef Land under the command of F. G. Jackson were by no means dainty in their tastes, but their leader tells us, in his diary, that during the long winters, when the birds had migrated to the south, monotonous was not the word to describe the bill of fare.

We are none of us in love with walrus meat. It is very tough, coarse and dark in color, and has a distinct flavor of iodine. Every day I am having all the blood of the animals killed kept and frozen. Every day a pound or so of the frozen blood is chipped out with an axe and added to our soup. The fat of the walrus we find peculiarly unpleasant.

I should like to place either walrus or bear, cooked a l'Arctic, before a London club man, and be privileged to watch his expression and hear his remarks.

Whistle on Egg Cooker.

A new English invention for boiling eggs consists of a little canister which can be placed in a pan, which is fitted with a basket to hold half a dozen eggs at a time. As soon as the eggs are properly cooked the apparatus whistles loudly and continues to whistle until taken out of the pan.

Vast Mass of Rock Salt.

The largest mass of pure rock salt in the world lies under the province of Galicia, Hungary. It is known to be 550 miles long, twenty broad and 250 feet in thickness.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, DECEMBER 1 1899

The failure of the expected Leonid shower to appear in America last week was the source of much disappointment both to the astronomers and to that portion of the general public which has become interested the matter. For three successive mornings in some part of this country or Canada a few meteors were seen, but not all of them were Leonids. Some of them appeared from other radiant points than the Sickle. The display was only a trifle more brilliant than that of the average clear night in any other month of the year. European observers fared but little better than American. In England, France, Austria and Germany a sharp watch was maintained, and the weather seems to have been as favorable as on this side of the Atlantic. It is asserted on recognized authority that nothing whatever was seen in India. A number of theories have been advanced to explain the very limited character of the display this year. Perhaps the most reasonable of them is that the swarm was not fully due at the time when the earth crossed the orbit of the Leonids. The period of this famous celestial dust cloud is officially put at thirty-three and a quarter years, but it was a rather sanguine expectation, perhaps that anticipated the arrival of the densest part of it this fall, precisely sixty-six years after the encounter of 1833. The movements of the moon have been watched so long and with such care that it is feasible to predict within a minute or even a second when it will pass between the earth and the sun, and to say just how much of the solar surface will be thus obscured. But it is much more difficult to forecast a meteor shower. The chief scientific value of a meteor shower is the chance which it offers for studying the depth of the earth's atmosphere. A meteor is merely a tiny bit of mineral matter, invisible and incalculably cold, flying through space. As soon as it enters the aerial envelope of the globe friction almost instantly raises its incandescence. The velocity of the Leonids is greater than that of some other meteors. They have their own motion through space, and they meet the earth almost "head on". Hence the speed with which they fly through the air is the result of the combination of their motion and the earth's and they take fire at a little greater altitude than other aerolites. Incidentally, something would probably have been learned about velocities, too, if there had been a good display this year.

The chief contribution of the South African war to the military knowledge of the world relates to the usefulness of armed and armored railroad trains. It is now too early to form a judgment as to their utility. They have proved their value and they have betrayed their defects, the chief of which is their dependence upon the integrity of the track upon which thep run. A faulty track—perhaps injured by the explosion of a long range shell—has compelled the train to halt and the men to get out to repair the damage, and thus the men have been exposed to the attention of Boer sharpshooters, while the motionless train itself has served as a target for cannon. In like fashion the limitations of use of the bicycle, in war as well as in peace, are being demonstrated. Each army now has a bicycle corps and gets good service from it. But the idea that the bicycle will replace the horse for cavalry work is seen to be idle. So long as he has a fairly smooth, unobstructed and not too hilly road before him the cyclist is all right. But fences or ditches that a horse would leap with ease are hopeless barriers to him. A swamp, through which a horse could flounder in some fashion, a soft ploughed field across which he could at least plod, or a steep, rough hillside up which he could climb, are not to be traversed awheel, and on reaching them the cyclist is instantly transformed into a foot soldier, hampered by the necessity of having to carry his "silent steed" instead of having it carry him. The same rule will doubtless apply to all sorts of automotive vehicles. The horse has disappeared from the streetcar. He is disappearing from the city tradesman's delivery wagon and from the cab, and he may presently vanish from the truck and dray. But the horseless vehicle can never replace the horse to the man who knows the joy of driving a thoroughbred horse with nerves and desires in full sympathy with his own, so that in driver and steed the same pulse seems to beat and the same passion of pace to prevail. Inventions will be made and wonderful results will be attained with iron and brass, but by no such devices will the "personal factor' which resides alone in flesh and blood be duplicated. In the contest of blood against iron the latter will win some victories. But blood can do some things which iron, though moved by steam or electricity, can never hope to do. We shall have an "automobile age" but it will not be a "horseless age."

A correspondent complains of the burden of Jury duty, and calls attention to the fact that it is frequently over trfling matters, unworthy the waste of time involved. That is one of the penalties of free government, where every man has a right to trial by jury, no matter what inconvenience to his neighbors. The privilege is often a public wrong rather than otherwise; but it is so important a feature of free government that it wouldn't do to abolish it. In civil cases there is some compensation, and the discreet officer can usually select those who are not seriously inconvenienced by it.

Some learned Buddhist missionaries are trying to convert the Christians of San Francisco

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

J. J. WALL - - - - - - - Plaintiff,

vs.

Surprise Mining and Milling Company, a Corporation, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Surprise Mining and Milling Company, a Corporation, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 15th day of September, A. D. 1899. D. J. HESSION, Clerk.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.
GENERAL LAND OFFICE.
Independence California.

A protest having been filed in this office by Rafael Rossi, against Lieu Selection No. 390, by C. W. Clarke, for the NW¼ of SE¼ of Sec. 33, T 8 S., R. 34 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter said C. W. Clarke and R. Louis Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:00 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 3 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

BORN.

WRIGHT—At Blackrock, November 24, 1899, to Mr. and Mrs. J. W. Wright, a son.

MARRIED.

SMITH—WATTERSON—At Bishop, November 28, 1899, Mr. White Smith and Miss Margaret E. Watterson, both of Bishop.

DIED.

SULLIVAN—At Camp Independence, November 30, 1899. Patrick Sullivan, a native of Ireland, aged 77 years.

Dave Holland was in town on Monday last.

C. H. Parsons and T. F. A. Connelly were down from Bishop last Tuesday.

There are about one hundred and twenty-five men at the Soda works at Keeler.

The regular fall and winter fights have commenced but no serious casualties yet reported.

P. H. Mack Esq. has moved into his new law office on the west side of Edwards street.

Mr. and Mrs. White Smith are spending their honey-moon with friends at Independence.

John C. Quinn and D. Holland came up from Keeler yesterday and spent Thanksgiving in town.

Joe Levy had a run-away and smash-up at the Fort a few days ago. The buggy is an utter wreck.

Interested parties will observe the notice published this week by Barnes & Anderson relative to their mine.

A four-horse load of people went to Keeler yesterday to attend the ball. It not generally known here that there was going to be anything doing there.

Pat Sullivan, a well known character in this vicinity, died at the County Hospital yesterday. He had been an inmate of that institution for many years.

Jerry Squires has gone to Los Angeles for a month's visit. Meanwhile work will be actively prosecuted on the Mazourka tunnel, which is now in over 700 feet.

George Montgomery leaves to-day for Los Angeles and will close the sale of the World Beater mine while there. He will be gone ten days and will return by way of Ballarat.

Fred Conn was in town last Saturday. Mr. Conn had just returned from a trip to San Francisco and says it was raining very heavily throughout the San Joaquin Valley.

Lester Laird came in from the Saline Valley copper mines early in the week. He says that so far as development work has gone the prospects are excellent. There are over a million dollars in sight in one mine.

Superintendent Correll was in town yesterday and reports good progress in the development work on the Barnes & Anderson mine. The shaft is down seventy feet, and the ore body is three feet wide of sixty dollar rock.

Charley Summers bought several lots of cattle in this vicinity lately. Among the lot were about seventy five head from the Rose Bros. and a hundred head each from N. E. Conklin and S. A. Fraser. The latter has bought a lot from J. R. Turner.

Real Estate Transfers.

The following deeds have been recorded since November 23, 1899:

Patrick Langan to John J. Shay—November 15, 1899. Und. ¾ int. in Blue Cloud mine, South Park Dist; $100.

John W. Calbreath to John Strohmeyer—October 14, 1899. 80 acres at Georges Creek; $240.

Richard Day and wife to Mineral Hill Mining Co—November 13, 1899. Mineral Hill group, South Park Dist.; $1.

The Walker Lake *Bulletin* is responsible for the following: "A young man went to church in Bodie Sunday night. He took his best girl along with him. Both were quite handsome and modest. When the collection was being taken up the young man explored his pockets and finding nothing, whispered to the young lady. 'I haven't got a cent; I left my money in my other pants.' Meanwhile the young lady had been searching her pocket and finding nothing blushed a rosy red as she stammered: 'How provoking! I've done the same thing.'"

One of the pleasantest affairs had here in many a day was the dance at Mairs' Hall last evening. There were about fifty people in attendance so that the room was not too crowded, all were in the mood for a good time—and they had it. A midnight supper was served at the Independence hotel, and the fun was continued until four o'clock that we know of. Not the least enjoyable feature of the evening was a number of recitations and witty stories furnished impromptu at intervals during the evening, and which were applauded to the echo.

The service at the Methodist Church on Sunday evening will be one of song and praise, particularly appropriate for the Thanksgiving season. In addition there will be a short talk by the pastor to both the older ones and the children, and then there will be awarded the prizes for regular attendance at Sunday School. All welcome.

Who ever knew lovlier weather on the first day of December? There is a slight chill of frost in the early morning, but the days are a dream of balmy beauty, and every breath is an invigorating draught of purity and warmth which makes one feel that life is indeed worth living.

Where it can be shown that work done in a tunnel is for the benefit or development of adjoining claims constituting a group work so performed may be made to apply as assessment work on the adjoining claims.—*Scientific Press.*

Sunflower Seed For Cattle Food.

Sunflowers are no longer to be regarded as mere garden ornaments with a faculty for turning their heads so that their large, full faces are aimed always at the sun. The plant is a big, oily, gold producing article of commerce and has its own peculiar points of growth and management. It has just been learned in England that sunflower seed is the most fattening of all foods for cattle. Several farmers there are coining money by raising the plant wholesale for market. Within a mile of the principal farm in the southern counties there are more sunflowers probably than in all other parts of the world. The farms look like great yellow mists when viewed from Edgeton hill, 20 miles away.

There are 500 acres of sunflowers altogether, and when the ripe heads are cut in the fall the crop will yield about 300 wagon loads of seed. The market value of the seed is $50 a load—a total income of $15,000 for the crop. The seed is crushed and pressed into cattle cakes. To raise these great sunflower crops the fields must first be fertilized with calf bone dust. That is an expensive feature. Twenty men are employed in the bone grinding mill.

The fields have to be watched closely while the flowers are ripening. Blackbirds, starlings and especially sparrows know the fattening qualities of the seed and immense flocks of the birds come from all points of the compass to feast upon the growing crop. Boys are posted around the edges of the plantations during that period to scare the feathered thieves away.

NEW ADVERTISEMENTS.

NOTICE.

TO ALL WHOM IT MAY CONCERN: Notice is hereby given that the undersigned, owners of those certain mines or mining claims situate, lying and being in the Union Mining District, County of Inyo, State of California, commonly known and designated as the "Alhambra" and "Black Eagle" mines, have made and entered into an agreement to sell said mines to Peter Kimberly; that said agreement is now of record in Book "A" of Bonds, page 294, records of said Inyo County; that under the terms and conditions of said agreement the said Kimberly has the right to work said mines at his sole cost and expense; that from the date hereof the said mines, nor the ores produced therefrom, nor the undersigned will be liable or responsible for any labor or improvements done or made upon the said mines, or for any material furnished therefor by any person without a written order from said undersigned.

Dated November 25, 1899.

NOTICE TO CREDITORS.

Estate of Josiah G. Dodge, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Josiah G. Dodge, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said administrator at his place of residence at Lone Pine, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

NORMAN M. DODGE.
Administrator of the estate of Josiah G. Dodge, deceased.

Dated at Lone Pine, November 23rd, 1899.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles, dated the 9th day of November, 1899, in a certain action wherein P. B. Mathason, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Albert Wibbelt, defendant, on the 3rd day of August, 1897, for the sum of twenty five hundred and eighty-eight and forty one-hundredths ($2 588.40) dollars and costs of suit, I have levied upon the following described property, to wit:

That certain mining claim situate in the Argus Range of Mountains, in the County of Inyo State of California, known as the "McKinley" Gold Quartz Mining Claim, together with all the rights, members and appurtenances thereunto belonging.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Albert Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, the 22nd day of November, 1899.

A. M. GIVEN, Sheriff.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles dated the 9th day of November, 1899, in a certain action wherein P. B. Mathason, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Theodor Wibbelt, defendant, on the 31st day of July, 1899, for the sum of two thousand and forty five ($2,045.00) dollars and costs of suit taxed at twenty-two and sixty-five hundredths ($22.65) dollars, I have levied upon the following described property, to wit: Those three certain mining claims situated in the Argus Range of Mountains, in the County of Inyo, State of California, known as the "Westphalia," the "McKinley," and the "Iron Queen" Gold Quartz Mining Claims and also those two mining claims situated in the State Range of Mountains in said County of Inyo known as the "Mariera" and the "Los Angeles" Gold Quartz Mining Claims, together with all the rights, members and appurtenances thereunto belonging; also fourteen thousand (14,000) feet of iron pipe running from the spring in Big Canyon to the Bullfrat stage road in said County of Inyo; also the right to take and use the waters of said spring.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Theodore Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, November 22nd, 1899.

A. M. GIVEN, Sheriff.

Commissioner's Sale.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

George Collins, Administrator of the estate of Caline de Moltz, deceased, Plaintiff, vs. George A. Free, Defendant.

Under and by virtue of an order of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 30 day of November, 1899, in the above cet Defendant Warren George Collins, Administrator of the estate of Caline de Moltz, deceased, the above named plaintiff, obtained a judgment and decree against, defendant George A. Free, on the 3rd day of November, 1899, which said decree was on the 3rd day of November, 1899 recorded in Judgment Book No 2 of said Court, at page 124 I am commanded to sell, and by said decree the same is directed to be sold, all those certain lands and premises situate, lying and being in the County of Inyo, State of California, and bounded and particularly described as follows, to wit:

The south-west quarter of the north-west quarter, the north half of the south west quarter, and the south-east quarter of the south west quarter of Section No. 25, in Township No. 7 South, of Range No. 34 East, Mount Diablo Meridian.

Together with all and singular the tenements hereditaments and appurtenances thereunto belonging, or in any wise appertaining.

Notice is hereby given that on Saturday, December 16th, 1899, at the hour of 10 o'clock a.m of that day, in front of the Court House of said County of Inyo, at Independence, in said county, I will in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary, to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in lawful money of the United States.

PEN H. YANDELL,
Commissioner.

Dated November 13th, 1899.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist., Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE OF ASSESSMENT.

INYO MARBLE COMPANY OF CALIFORNIA

Location of principal place of business, San Francisco, California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 26th day of September, 1899 an assessment, No. 35, of 5 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the Company, Room 31, 10th Floor Mills Building, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 6th day of November, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 6th day of December, 1899 to pay the delinquent assessment, together with costs of advertising and expenses of sale.

By order of the Board of directors.

CHARLES E. ANDERSON,
Secretary.

OFFICE—Mills Building, Room 31, 10th Floor, San Francisco, California.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Iny

Send us your address on a postal and we will mail you our Illustrated Announcement of the 1900 volume and sample copies of the Paper Free.

The Youth's Companion, Boston, Mass.

RECIPE FOR RAINMAKING.

Subsulphuric Acid, Water and Zinc Create Artificial Storms.

Some years ago Kansas was overrun with so called "rainmakers" who did a thriving business in vicinities afflicted with drought. The Rock Island railroad had a rainmaker who traveled about the country in a special car and made rain from Texas to Iowa. At the time the process employed was guarded as a secret, and no doubt the mystery surrounding the operation had much to do with the interest aroused among the people. But now comes George Matthews in the Wichita Eagle with a full exposition of the means employed by the Rock Island wizard and others, and the following is the recipe given by him:

"Ten fluid ounces of subsulphuric acid.

"Fifty fluid ounces of water.

"Five ounces of zinc.

"Renew every hour and stir every 36 minutes day and night until rain comes. The moment rain begins to fall remove jar or crock. In territory west of Kansas use one-third less; at sea level use double the quantity. In Kansas work only on southerly winds, which are the moisture bearing winds. Begin an experiment only in a clear sky. One station of the experiment, if successful, will produce a rain 30 to 50 miles in diameter. A better and more certain result can be secured by having three or more stations 40 or 50 miles apart."

According to Mr. Matthews, this mixture left in an open mouthed jar generates hydrogen gas, which rapidly ascends. The theory is that this gas ascending creates a shaft through the hot air down which the cold air rushes, creating a storm center and gathering moisture for precipitation. Matthews claims that of the 200 experiments made by him at least 180 were successful.—Kansas City Journal.

Take the Tombstone Along.

The cemetery superintendents say that there is one peculiarity about the funerals of Chinamen which is never noticed at any other funerals. The tombstone always comes along with the funeral. Most of the tombstones are simple slabs of marble, with the inscription in Chinese characters, which are arranged up and down instead of across the stone. In two or three instances the funerals of Chinamen have been known to be delayed because the friends of the man who was to be buried were waiting for the tombstone to be finished. The stone is always taken to the cemetery in the undertaker's wagon.—Baltimore Sun.

Another Mystery.

"The study of the occult sciences interests me very much," remarked the new boarder. "I love to explore the dark depths of the mysterious, to delve into the regions of the unknown, to fathom the unfathomable, as it were, and to"—

"May I help you to some of the hash, professor?" interrupted the landlady.

And the good woman never knew why the other boarders smiled audibly.—Chicago News.

Acid in the Blood

That rheumatism in its worst form can be cured by proper treatment is shown by this interview with Mat Tanner, of 231 Hamilton St., Albany, N. Y. He said: "I was taken with rheumatism that began in my hips and spread throughout my body. For two years and a half I was confined to my bed. I employed nine of the best physicians of Albany, and two specialists from New York, but all declared my case hopeless. My niece recommended Dr. Williams' Pink Pills for Pale People. The use of several boxes enabled me to leave my bed and go about with crutches. Finally I abandoned the crutches, and am now as well as ever. No praise of Dr. Williams' Pink Pills for Pale People is too strong for my case.

MAT TANNER."

Sworn to and subscribed before me this 17th day of September, 1898.
NEILE F. TOWNER, *Notary Public.*
—From the Albany (N. Y.) Journal

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred, but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box. 6 boxes $2.50.

An Expensive Knife.

An old man went into a cigar store where pocketknives are on sale. He had a fancy for one of the knives, but thought the price, 75 cents, too high. After a parley with the proprietor he concluded to wager 75 cents against the knife and play a game of poker. He lost the money and then that much again. He continued to lose until he lost $121, all the money he had, but the proprietor made him a present of the knife.

In the afternoon he returned, saying he was dissatisfied with the knife. He had paid $121 for it, but would willingly exchange it for a $1 article. The dealer kindly made the exchange, and the man went his way rejoicing. He had no money to trouble him, but he had a knife, and, after all, a knife is a good thing to have.—Arizona Republican.

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight or new shoes feel easy. It is a certain cure for Ingrowing Nails, sweating, callous and hot, tired, aching feet. We have over 30,000 testimonials. Try it *today.* Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.
Sold by Druggists, 75c.
Hall's Family Pills are the best.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd. 931 Arch St., Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Two bottles of Piso's Cure for Consumption cured me of a bad lung trouble.—Mrs. I. Nichols, Princeton, Ind., Mar. 26, 1895.

It Carries the Current.

"If I were you, I wouldn't lean against that post. You might get hurt."

The speaker was a policeman, and the person to whom his words were addressed was a young fellow who stood under an iron awning with one hand resting on an iron post which helped to support the awning. The young man jerked his hand away quickly.

"What's the matter with the post?" he asked. "It looks all right."

"Yes, it does," responded the policeman, "and it may be all right. But it's iron, and its surface is wet from the rain that is falling. There are a whole lot of telephone and telegraph wires in the vicinity. One of them may be mixed up with an electric light wire somewhere and may also be rubbing up against some part of this awning. Understand? If it should be, the combination would be one that, with the water that is running down the post as a conductor, would be apt to put you out of existence. I've seen one man killed in just that way, and I really don't want to see another. That's all. Goodby."

Then the policeman walked off down the street, leaving the young fellow staring first at the post and then at the wires overhead. But as long as the saunterer remained under the awning he kept his hands away from the wet iron.—Philadelphia Inquirer.

Willing to Compromise.

About the middle of the civil war a freshly appointed colonel, with a newly enlisted regiment, joined the Union forces in the far south. One bright October morning word was received that a small detachment of General Wheeler's cavalrymen was on the other side of the hill, and a force started out in pursuit. The next day the Confederates were reported miles distant in the opposite direction. The third day the new colonel and a veteran brigadier started out for a pleasure ride. A mile from camp they rode into the fugitive Confederates, who had been circling the camp for a week. It was a narrow escape, but they got away unharmed.

After it was over the general said to the colonel, "Well, what do you think of war now?"

"Is Wheeler in this neighborhood much of the time?" replied the colonel evasively.

"All the time. He is here, there and everywhere. What do you think of the prospect?"

"Well," answered the colonel reflectively, "I wonder whether there isn't some way this infernal thing can be compromised!"—San Francisco Argonaut.

THE PIANO DETECTIVE.

Work That Keeps a Sleuth Busy Most of the Time.

"Did you ever hear of a piano detective?"

The city hall detective scratched his head reflectively and then was compelled to admit that he had never heard of such an individual.

"Well, there are a dozen or more of them in Philadelphia, and they make good money too.

"Their work is simple. You see, a great many piano firms sell instruments on the installment plan. That is, the purchaser pays, say, $50 down on a $500 or $600 instrument and agrees to make good the remainder at so much a month. By far the greater number of such purchasers are as honest as the day is long, but once in a while a man comes along whose little scheme is to move out the piano a day or two after it is delivered and sell it for a couple of hundred.

"It is the business of the piano detective to circumvent this sort of thing. As a rule, some suspicious movement on the part of the would be defrauder of the piano dealer causes him to be placed under suspicion. The dealer can't step in and take his instrument away under the contract, and the only thing he can do is to watch it. Here is where the piano detective comes in. He hovers around the house in which the suspected purchaser lives, night and day, watching any attempt to make way with the piano. Usually three or four weeks are long enough to settle the question one way or another. If the piano buyer is crooked, he is practically certain to make some sort of a move before the expiration of that time. If he doesn't, it is pretty safe presumption that the suspicion is groundless and the piano detective is called off by his employer, with no one but himself and two or three others the wiser. But the precaution is a necessary one."—Cincinnati Enquirer.

The Yankee Joker Abroad.

A story on the fraudulent conferring of degrees is told in the London Post, which, while it may not be strictly accurate, is not without interest. It seems that a chimney sweep took proceedings against an Edinburgh man for debt, and in the course of his evidence the sweep mentioned that his name was "Jamie Gregory, LL. D." The following colloquy ensued between the witness and the sheriff:

"What, doctor of laws or letters? And where on earth did you get that distinction?"

"It was a fellow fra' an American university, an I sweepit his chimney three times. 'I canna pay ye cash, Jamie Gregory,' he says, 'but I'll make ye an LL. D., and we'll ca' it quets.' An he did."

Passing of the Horse.

So soon as nature sees an improvement there is a change. The candle gave way to electricity and the horse to the automobile. The fact that Hostetter's Stomach Bitters has been sold for over half a century, proves its value. There is nothing to equal it for stomach or liver trouble.

When Coal Gives Out.

The Adirondack region abounds with streams, most of which can some time be made use of as sources of power for carrying on industries, running railroads and furnishing light and heat. Indeed, the great problem at present is not at all to find available heads of water, but to devise means of transmitting the power with the minimum loss for long distances.

It is impossible to believe that with the success of existing plants and the spectacle of practically unlimited power going to waste on every hand, to stimulate inventive genius, methods will not be devised before very long for overcoming this difficulty of transmission.

Whether it is by the discovery of some new conveyor or by using a succession of generating plants or by a process of storing the electricity and conveying it by freight or express or however, the new power is bound in time to come into practically universal use. If the difficulty of transmission is never wholly obvious, it may be there will be some regrouping of industries and communities in the near vicinity of important sources of water supply.—Gunton's Magazine.

The Cause of It.

A reflection not altogether without value to such feminine scribes as have not yet found their public is contained in a remark made at a recent dinner in London, where 200 literary women met one another. Says the London Outlook:

As the extremely well dressed crowd surged and swayed round the platform after the recitation which followed the dinner a young woman ventured to remark to one of the "old hands" upon the exceedingly prosperous appearance of several of the literary women.

"Bless you," was the quick response, "that is not literature—it is husbands!"

Politics.

Mr. Ward Heel—Booze has promised me that if I help nominate him he will give me a job.

Mrs. Ward Heel—Is this man Booze sure of getting it?

Mr. W. H.—Not by any means. Old Slydog is running against Booze.

Mrs. W. H.—And if Slydog gets it?

Mr. W. H.—I'll be all right anyhow. I'm under contract to help nominate both of them on the same terms.—Ohio State Journal.

Mutual Aid.

From the time that the mother binds the child's head till the moment when some kind assistant wipes the damp from the brow of the dying we cannot exist without mutual aid. All, therefore, that need aid have a right to ask it from their fellow mortals. None who hold the power of granting aid can refuse it without guilt.

"It is an Ill Wind That Blows Nobody Good."

That small ache or pain or weakness is the "ill-wind" that directs your attention to the necessity of purifying your blood by taking Hood's Sarsaparilla. Then your whole body receives good, for the purified blood goes tingling to every organ. It is the remedy for all ages and both sexes.

Hood's Sarsaparilla
Never Disappoints

$100.00 Reward

will be promptly paid to any one furnishing us evidence on which we can secure conviction of any substitutor or dealer who attempts to palm off inferior imitations when Cascarets Candy Cathartic are called for. Be on the lookout for imitations and counterfeits of Cascarets, and don't you ever buy preparations that are made and sometimes pushed by unscrupulous dealers whose intention is to mislead the buyer and infringe on our trade-mark and trade-name. As soon as some one tries to sell you something else when you ask for Cascarets, look out for him! Get all the details and confidentially write us on the subject at once.

Never sicken, weaken or gripe. Write for booklet and free sample. Address STERLING REMEDY CO., CHICAGO or NEW YORK. 378

The Bishop's Label.

Bishop Huntington once went down to a town in Connecticut to perform a marriage ceremony. He arrived the day before the wedding, and he left at the same time the bridal pair did, although he was driven to a different railway station. As he passed through the station, carrying his traveling bag, he was aware that he was creating a sensation, but was totally at a loss to account for it. In the car he found that he was still the object of amused attention. The porter positively snickered as he passed his seat, and finally just as the train drew out he came up and assisted the churchman to remove his overcoat.

"What is the matter with you, my man?" asked the bishop. The porter's snicker broadened into a laugh.

"Ain't you done lef' the lady, sah?" he chuckled.

"Eh?" exclaimed the bishop in surprise. Then his eye fell on the side of his traveling bag which the porter had just turned round. There glued to it was a wide strip of white satin ribbon on which was painted in large letters:

"Married this morning."

The facetiously minded best man had mistaken the bishop's traveling bag for that of the bridegroom, and a chuckling black porter worked late into the night removing that ribbon.—Washington Post.

A MAGNIFICENT WOMAN

Holds Up Peruna as the Ideal Remedy For Female Catarrh.

Mrs. Clara Makemer.

Mrs. Clara Makemer, housekeeper for the Florence Crittenden Anchorage Mission, of Chicago, writes the following letter from 302 Chestnut street, Chicago:

"Peruna is the best tonic I have ever known for general debility, a sure cure for liver complaint, and a never failing adjuster in cases of dyspepsia.

"I have used it in cases of female irregularities and weak nerves common to the sex, and have found it most satisfactory."

From early girlhood to the end of the child-bearing period few women are entirely free from some degree of catarrh of the pelvic organs.

With Peruna the thousand and one ailments dependent upon catarrh of the pelvic organs can be wholly averted.

"Health and Beauty" sent free to women only, by The Peruna Medicine Co., Columbus, Ohio.

The microbes that cause chills and fever and malaria enter the system through mucous membranes made porous by catarrh. Pe-ru-na heals the mucous membranes and prevents the entrance of malarial germs, thus preventing and curing these affections.

A Man of Means.

"Mamma," said little Ethel, "papa must be just awfully rich."

"Why do you think that, my child?"

"I heard him tell grandma that he was going to buy Boston and Albany today."—Brooklyn Life.

A fly so minute as to be almost invisible ran three inches in a half second and was calculated to make no less than 510 steps in the time a healthy man would take to breathe once. A man with proportionate agility could run 24 miles in a minute.

Originally clocks had only the hour hand, but the minute was added later, as it became fashionable to make the dials as decorative as possible.

A Political Trick.

"There is a good deal of pure moonshine," said a local warhorse now out of harness, "in the faculty of remembering names and faces which is attributed to most successful politicians. In nine cases out of ten they have no abnormal powers of that kind, and their apparent feats of memory are very easily explained. Take, for example, the case of a political personage at a public reception. He is sure to be surrounded by a group of local leaders who know everybody in town. Presently a valuable constituent approaches. 'Colonel,' whispers one of the henchmen, 'here comes Mr. Blank. He's an active party worker and a great admirer of yours. He met you here last fall.'

"The personage catches on promptly. 'What does Blank do?' he whispers back.

"'He's a produce merchant,' replies the henchman. By that time the valuable constituent gets in range.

"'How are you, my dear Mr. Blank?' exclaims the notable cordially. 'I'm delighted to see you again. And how is the produce business coming on?'

"Poor Blank has spasms of joy. That the famous man should remember him so accurately makes him as proud as a peacock, and 20 spectators proceed to tell the story in proof of the colonel's miraculous mental gifts. Thus reputations are made."—New Orleans Times-Democrat.

Edible Birds' Nests.

The nests of the little swift (a kind of swallow), gathered along the rocky cliffs with so much difficulty and yet in such quantities on account of the Chinese demand, are formed of a salivary secretion which soon becomes firm on exposure to the air. It is a glutinous white substance with little red dots. They are clean, the nests being taken as soon as completed. The little swift, being repeatedly robbed, is at last compelled to eke out its waning supply of secretion with little sticks and grass and is thus enabled to lay its eggs and hatch its young, as only nests free from foreign material are merchantable.—"A Sketch of the Philippines" in Self Culture.

Horse on Him.

"Got a good joke on myself," said the man who has accumulated a little property by hard work. "I asked my wife what was the difference between me and a horse, intending to say that I was a forehanded man and the horse was a four footed beast. What do you suppose she said?"

"Give it up," said the other man.

"Said she guessed it must be the length of my ears."—Indianapolis Journal.

Those Loving Girls.

Helen—See my new engagement ring. Don't you think George has good taste?

Mattie—He certainly has—in the selection of a ring.—Chicago Record.

RELIEF FOR WOMAN

THIS BIG CATALOGUE contains 1286 pages, is 9x12x2 inches in size, contains over 100,000 quotations, 10,000 illustrations, the largest, most complete and lowest priced catalogue ever published. NAMES THE LOWEST WHOLESALE CHICAGO PRICES ON EVERYTHING including everything in Groceries, Drugs, Dry Goods, Notions, Clothing, Cloaks, Dresses, Boots and Shoes, Watches, Jewelry, Books, Hardware, Stoves, Agricultural Implements, Furniture, Harness, Saddles, Buggies, Sewing Machines, Crockery, Organs, Pianos, Musical Instruments, Furnishing Goods, Guns, Revolvers, Fishing Tackle, Bicycles, Photographic Goods, Etc. Tells just what your storekeeper at home must pay for everything he buys and will prevent him from overcharging you on anything you buy; explains just how to order, how much the freight, express or mail will be on anything to your town. The big book costs us nearly $1.00, the postage alone is 34 cents.

OUR FREE OFFER. Cut this ad. out and send to us with 15 cents in stamps to help pay the 34 cents postage, and the Big Book will be sent to you FREE by mail postpaid, and if you don't think it is worth 100 times the 15 cents you send, as a key to the lowest wholesale prices of everything, say so and we will immediately return your 15 cents.

WHAT THE PRESS SAYS ABOUT THIS CATALOGUE:

"It is a monument of business information."—Minneapolis (Minn.) Tribune.

"A wonderful piece of work."—Washington National Tribune.

"The Catalogue is a wonder."—Manchester (N. H.) Union.

"Sears, Roebuck & Co. is one of the largest houses of its kind in Chicago."—Chicago Inter Ocean.

"The big catalogue forms one of the finest shopping mediums that could possibly be sent into a district."—Boyce's Monthly, Chicago.

"Their catalogue is a vast department store boiled down."—Atlanta Constitution.

"The catalogue is certainly a merchandise encyclopædia."—Chicago Epworth Herald.

"A law should be passed compelling the use of this catalogue in all public schools."—The Hon. G. A. Southtoun.

We could quote thousands of similar extracts. Send 15 cents at once and you will receive the 4-pound book by return mail. Address, SEARS, ROEBUCK & CO. (Inc.), CHICAGO, ILLINOIS, U. S. A.

25c. SAMPLE BOTTLE 10c. FOR NEXT 30 DAYS.

No DISEASE has so baffled the medical skill of all ages as RHEUMATISM.

and no remedy has ever been known to cure it until "5 Drops,"

the Rheumatic Cure demonstrated its wonderful curative power.

It has never failed to cure RHEUMATISM in any form, Acute or Chronic.

5 DROPS [TRADE MARK]

Here is what a Prominent Physician has to say who has had 35 years of active Practice of Medicine:

I have never before in my 35 years of practice of medicine given my testimonial or recommendation to any patent medicine, but there is a remedy, the result of which has come under my own observation; for there is no **Disease** which has so baffled the medical skill of all ages as **Rheumatism** and to find a **Reliable** remedy for the same. At last we have found it in **"5 DROPS,"** manufactured by the **Swanson Rheumatic Cure Company, Chicago, Ill.**

The **"5 DROPS,"** has proven itself wonderful for its curative power in **Rheumatism,** not as a **Temporary Reliever** only, but to give a **Permanent Cure** even in chronic cases. Sometime ago, I had among others several Rheumatic cases, under my treatment and prescribed for these patients the very best **Remedies** which I skillfully selected, but without desirable results. I then heard of **"5 DROPS"** and of its **Wonderful Cures,** and prescribed it to a few patients who found relief from its use within a few days. After that I prescribed it to a great number and to my surprise, I will say that in the course of **Two or Three Weeks** after they had used **"5 DROPS"** and **"5 Drop" Plasters** they were **Cured.**

Among these were a few who had, for a number of years, been suffering with **Chronic Rheumatism,** who had piloted themselves around on **Crutches.** They came to my office without **Crutches** and told me they were perfectly **Well.** They give all the credit to **"5 DROPS"** and to **"5 Drop" Plasters** and this is their testimony to the **Swanson Rheumatic Cure Company** for their kindness and for the conscientious way in which they are placing these **Wonderful Remedies** among suffering humanity, which they told me to write to the Company as an acknowledgement.

As I have seen the **Curative Power** of **"5 DROPS"** and **"5 Drop" Plasters,** in a great many instances, I can **Truly** recommend them and also that the firm is perfectly honest and reliable to deal with. C. A. JACKSON, Physician and Surgeon, Kearney, Neb., Aug. 29, 1899.

How Long Have You Suffered with RHEUMATISM?
How Long Have You Read About "5 DROPS" Without Taking Them?

Do you not think you have wasted precious time and suffered enough? If so, then try the "5 drops" and be promptly and permanently cured of your afflictions. "5 Drops" is a speedy and **Sure Cure** for **Rheumatism, Neuralgia, Sciatica, Lumbago** (lame back), **Kidney Diseases, Asthma, Hay-Fever, Dyspepsia, Catarrh** of all kinds, **Bronchitis, La Grippe, Headache,** Nervous or Neuralgic, **Heart Weakness, Dropsy, Earache,** Spasmodic and Catarrhal **Croup, Toothache, Nervousness, Sleeplessness, Creeping Numbness, Malaria,** and kindred diseases. "5 Drops" has cured more people, during the past four years, of the above named diseases than all other remedies known, and in case of **Rheumatism** is curing more than all the doctors, patent medicines, electric belts and batteries combined, for they cannot cure Chronic Rheumatism. Therefore, waste no more valuable time and money longer, but try "5 Drops" and be promptly **CURED.** "5 Drops" is not only the best medicine, but it is the cheapest, for a $1.00 bottle contains 300 doses. Price per bottle $1.00, prepaid by mail or express, or 6 bottles for $5.00. For the next 30 days we will send a 25c. sample **FREE** to any one sending 10 cents to pay for the mailing. Agents wanted. Write to-day.

SWANSON RHEUMATIC CURE CO., 160-164 E. LAKE STREET, CHICAGO.

Sales Agents Wanted!

Men and Women make $50 to $200 every month selling our Gents' and Ladies' Waterproof Mackintoshes or Rain Coats. WE SELL MEN'S MACKINTOSHES in all styles at $1.89 to $4.75. LADIES' MACKINTOSHES AND WATERPROOF DRESS SKIRTS and CAPES at $2.00 to $6.00.

YOU (man or woman) can make **$5.00** every day taking orders for these garments. At your low prices, everyone will order from you, for no one can meet your prices.

WE WANT ONE AGENT (man or woman) in every city and county in the United States. No experience necessary, no capital required. We furnish a BIG BOOK of Mackintosh Cloth Samples, fashion figures, your name on rubber stamp, tape measure, business cards, all necessary stationery. Everything complete for doing business.

We are the **LARGEST DEALERS** in America in Men's and Women's Waterproof Mackintoshes and we sell them at the lowest prices ever known, and exclusively through regularly appointed men and women agents, who make $50.00 to $200.00 every month at the work.

OUR LIBERAL OFFER. Cut this notice out and send to us. State the territory you wish to work in. Say in your letter you will give this work an immediate trial of at least 10 DAYS, and we will immediately SEND YOU FREE OUR SALESMAN'S COMPLETE OUTFIT on the following easy conditions. Each outfit costs us nearly $2.00, for it is made very complete to insure immediate success for the agent. The outfit consists of one handsome heavy cloth bound book, 10x12½ inches, containing a complete assortment of large samples of our entire line of men's and women's mackintoshes, also handsome large fashion figures, etc., one confidential price and instruction book, one tape measure, one rubber stamp with your name and pad, business cards, order blanks, stationery, etc. We MAKE NO CHARGE FOR THIS OUTFIT, but as a guarantee of good faith on your part and to protect us against those who would order outfits (which cost us nearly $2.00) out of curiosity or just to get the cloth samples, we require everyone, after receiving the outfit at the express office, to pay as a temporary deposit 50 cents and express charges, and we will return the 50 cents with your first order. Understand we will send you the complete outfit by express C. O. D., subject to examination, you to examine the outfit at your express office and if found perfectly satisfactory and you are convinced you can make money taking orders, pay the express agent 50c and express charges, we to return your 50c with your first order.

START TO WORK AT ONCE. You need no money; show the samples, take the orders at your own price, adding a good profit for yourself; we will fill your orders daily; send the mackintoshes to your customers C. O. D., subject to examination, collect your full selling price and weekly send you in cash your full profit. No other work is so simple. Money can't be made easier. Any man or woman anywhere can make $5.00 every day. Our book of instructions makes everything so plain that anyone can do the work at once and be sure of big wages from the start. Cut this notice out and send to us today saying you will give it 10 days' trial. YOU WILL NEVER REGRET IT. Nearly everyone sends the 50 cents with their application. We refer to Metropolitan National Bank or any Express Co. in Chicago. Address, DUNDEE RUBBER CORPORATION, 184 Fulton St., Chicago.

DR. GUNN'S IMPROVED LIVER PILL

ONE FOR A DOSE. Cure Sick Headache and Dyspepsia, Remove Pimples and Purify the Blood, Aid Digestion and Prevent Biliousness. They not Gripe or Sicken. To convince you we will mail sample free, or full box for 25c. DR. BOSANKO CO., Philada., Penna. Sold by Druggists.

OUTBOUND.

A lonely sail in the vast sea-room,
I have put out for the port of gloom.

The voyage is far on the trackless tide,
The watch is long, and the seas are wide.

The headlands blue in the sinking day
Kiss me a hand on the outward way.

The fading gulls, as they dip and veer,
Lift me a voice that is good to hear.

The great winds come, and the heaving sea,
The restless mother, is calling me.

The cry of her heart is lone and wild,
Searching the night for her wandered child.

Beautiful, weariless mother of mine,
In the drift of doom I am here, I am thine.

Beyond the fathom of hope or fear,
From bourn to bourn of the dusk I steer.

Swept on in the wake of the stars, in the stream
Of a roving tide, from dream to dream.
—Bliss Carman.

They Were All Sorry.

"GEORGE FERGUSON, what does this mean?"

The voice was that of Mrs. Ferguson—shrill, piercing, and ominous.

"What does what mean?" asked George.

"This letter!"

She held it up.

"Laura, have you been——"

"No, I haven't been searching your pockets. You know I haven't. I was moving your coat from this chair, and a letter fell out. This is the letter. It is directed to you, and it's in a woman's hand. You haven't told me of any correspondence you are carrying on with——"

"Open it and read it, Laura," interrupted Mr. Ferguson. "If there was any letter in my pocket I didn't know it. Go ahead and read it. Maybe it's a millinery bill."

Scorning to reply to this, Mrs. Ferguson opened the letter and ran her eye over it.

"Oh, you didn't know this was in your pocket!" she piped. "You didn't know it! Maybe it's a millinery bill, is it? Listen! 'My dearest George'—so you're somebody else's dearest

THIS LETTER DROPPED OUT OF YOUR POCKET.

George, are you?—'My dearest George: When are you coming to see me again? I am very lonely'—she is very lonely, is she? Oh, you two-faced hypocrite!—'If you can't come, George, dearest, do write!'—she wants you to write if you can't come, does she?—'You can't think, dearest George, how I miss——'"

"What nonsense are you reading, Laura?" demanded George, beginning to be roused. "Do you mean to say——"

"I mean to say I am reading this letter you told me to read, Mr. Ferguson. I am reading this letter I found in your—that dropped out of your pocket. You don't know anything about it, don't you? 'You can't think, dearest George——'"

"Laura, are you fool enough to think that's genuine? Don't you know better than to imagine——"

"I am a fool, am I, Mr. Ferguson? Well, I'll just show you——"

"Let me see the letter."

"Let you see it? What do you want to see it for? Oh, no, Mr. Ferguson! I am going to keep it and show it to my mother!"

"Well, hold it so I can look at it. I promise you solemnly I will not attempt to take it away from you."

"I'll see that you don't. Here it is. Now look at it. Stay right where you are, George Ferguson. Don't you come a step nearer!"

"How can I see it ten feet away? Lay it down and then come and tie my hands behind me if you are afraid I'll——"

"Oh, yes! Lay it down and you'll grab it! I see through you! What's the use of pretending you never saw this before?"

"There doesn't seem to be any use in it—that's a fact. Nevertheless, I assure you, Laura, on my honor as a man——"

"On your honor! Humph!"

"Yes, on my honor—h'mph! I have never seen that letter before. I never put it in my pocket. I didn't know it was there. I am not anybody else's dearest George, and that letter is a clumsy fake got up by somebody who wants to have a little fun with me——"

"I wish I could believe it! Oh, George! George!"

(Sobs).

* * * * * * *

"Boys," said George Ferguson the next day when he went into the office where he was employed downtown, "that was a good joke some one of you played on me when you put that letter in my pocket yesterday, but it threatens to break up my family, and I ask as a favor that the chap who did it will just write a letter to my wife and tell her it was a bit of fun and that I am not to blame in the slightest degree. I don't want to know who it was. All I ask is that the thing be straightened out."

* * * * * * *

It was late in the afternoon. There came a ring at the door bell pertaining to the Ferguson dwelling, and a messenger delivered a letter addressed to Mrs. George Ferguson.

She opened it and read:

"Dear Mrs. Ferguson—In a spirit of mischief I slipped a letter in your husband's coat pocket yesterday which I fear may have fallen into your hands, and in order to atone for any misunderstanding it may possibly have caused I wish to say that I wrote it myself and that it is purely imaginary. With great respect, I subscribe myself yours truly."

This was signed "Marcellus Hankinson."

Hardly had she finished reading this when another messenger came and left another letter. It read thus:

"My Dear Mrs. Ferguson: I have a little confession to make. Yesterday, in a thoughtless moment, I wrote a letter purporting to come from some woman and dropped it into your husband's pocket. For fear you may have seen it I take occasion to assume the responsibility for the clumsy joke and to apologize for it. With great respect, yours sincerely."

The signature was "Oliver Peduncle."

Then there came another letter—also by special messenger. It was as follows:

"My Dear Madam: Pardon me for addressing you, but I wish to plead guilty to the perpetration of a foolish joke on your husband yesterday. I wrote a love letter (signed 'Dollie,' if I remember rightly) and slipped it into Mr. Ferguson's coat pocket. Fearing it may have met your eye I write this to exonerate your husband and to take upon myself the entire blame for the silly performance. Respectfully yours."

It was signed "A. Spoonamore."

The bewildered woman had hardly perused this note and laid it on the parlor table with the others, when a fourth came. It was to this effect:

"Permit me, my dear Mrs. Ferguson, to atone for an act of thoughtlessness committed yesterday. Yielding to a hasty impulse, I wrote a letter to your husband purporting to come from some feminine admirer. This I placed in one of the pockets of his coat, unknown to him. As it may possibly have fallen into your hands, I take the liberty of assuring you that I alone am to blame for the stupid joke and to express my hearty contrition."

The signature to this was "Wesley Higintop."

About two hours later Mr. Ferguson came home. He was whistling, with apparent unconsciousness of any domestic trouble, past, present, or to come.

"George," exclaimed Mrs. Ferguson, in a high-pitched voice, as she met him at the door, "where are those other letters?"—Chicago Tribune.

WRECKING A BRIDGE.

Novel Use of Electricity Successfully Tried at Clinton, Ind.

The 735-foot bridge over the Wabash at Clinton, Ind., was wrecked in August by a Hoosier, who employed the heating power of an electric current to do the work, without injury to the substructure. This exceedingly interesting feat is described in the Western Electrician.

It appears that the bridge was, up to that time, the only toll bridge in the State, and was owned by one man. It had become antiquated, and the county authorities purchased it with the idea of erecting a steel bridge in its place, using the same piers and approaches. Under the terms of the contract, the owner of the bridge was to remove the superstructure inside of thirty days, without injuring in any way the sustaining piers and masonry. This was apparently a very easy task, but, after consultation with bridge builders, house wreckers, riggers, engineers, and, in fact, every one who had a plan to suggest, the only practical plan evolved was to build a false work and take the bridge down piecemeal. To blow the bridge up with dynamite would probably injure the piers, and to burn it would likewise crack and injure the masonry. The thirty days elapsed, and no plan had been decided upon. An extension of the time for one week was granted. At this point a young electrician living in Clinton came to the fore with a scheme to literally cut the bridge down with hot electric wires, and this unique plan was finally successfully carried out with the greatest satisfaction, the operation requiring but ten hours.

The bridge, which was built in 1853, consisted of three spans with a 70-foot draw, and, as already mentioned, was 735 feet long. Each of these spans was composed of nine chords, each consisting of three nine-inch by nine-inch yellow poplar timbers. It is perfectly evident, therefore, that if each of these timbers was cut through simultaneously, the span would drop into the river without injuring the piers. Current was secured from a near-by generating plant, and leading wires were run to the farthest span. Each of the timbers cut was next encircled with a heavy resistance wire and connections run to the main circuit. The resistance of these wires was so proportioned that the passage of an electric current of definite strength would bring them to a cherry red, just on the same principle as an incandescent lamp filament is brought to a nearly white heat. To make the cutting, or more correctly, burning, more positive, a five-pound sash weight was hung at the bottom of each loop. In exactly one hour and forty minutes after the application of

FALL OF THE FIRST SPAN.

BRIDGE BEFORE WRECKING.

the current each timber was cut through by the hot wires to a point where the weight of the structure was sufficient to break the rest, and the span they supported tumbled into the river. This operation was repeated with each span without a hitch or delay of any kind.

An examination after the fall of the bridge showed how thoroughly the current had done its work. Each timber was burned through to the same extent, namely, five inches deep on the top and three inches on the sides, the cut being comparatively clean, the wood not being charred more than an inch on each side of the point of contact with the hot wire.

Juvenile Depravity.

"Papa," said the boy, as they drove along, "that's the same horsefly that was buzzing around the horse when we started out, isn't it?"

"Yes."

"Then one horsefly will follow one horse more'n a dozen miles, won't it?"

"It seems so."

"I reckon," said the boy, who had been busy thinking again, "you'd call it a one-horse fly, wouldn't you?"

"Perhaps."

"Then it was a one-horse town where we got this rig, wasn't it?"

"Don't be too fly, my son," said papa, grasping his whip and meeting the necessity firmly.—Chicago Tribune.

A Greedy Crane.

A New York man claims to have shot a crane up in the Adirondacks that had forty-five trout in its stomach, none of which weighed less than a pound.

ODD FLOATING BRIDGES OF PRINCE EDWARD ISLAND.

Floating bridges are picturesque affairs, but one who ventures on them for the first time feels that he is risking his safety in crossing. The one shown in the illustration does not span, but lies upon the beautiful Morrell river, in Prince Edward Island. The central portion is merely a raft, attached at each end to slightly more stationary divisions. The stretch is long, and as a vehicle crosses the bridge sways and threatens to float down stream. In the flood seasons, or even at high tide, the water frequently comes up over the timbers, and as the horse splashes through the water the sense of uneasiness increases if one is not bred to such methods of getting from one side of a river to another. In winter the bridge is embedded so firmly in the ice that it is as stable as the Brooklyn bridge, but at that season it is not needed, for one may cross anywhere on the ice for six months or more.

COIN FOR UNIVERSE.

DEMAND FOR MONEY THAT WILL BE THE SAME EVERYWHERE.

Talk of a Cosmopolitan Coin Is Not New—How It Would Prove a Boon to Travelers and Traders in All Countries.

For many years commercial men of all nationalities have spoken and written on the subject of the introduction of a system of coinage which should have a universal standard. The proposition has failed to meet with success on account of the difficulty in persuading the people of different countries to abandon their own systems of coinage, which appear to them part and parcel of themselves as much as their language itself.

"The time seems approaching," said a financier, "when it will be possible and perhaps advisable for the great nations of the earth to meet in convention and adopt a coin which shall be cosmopolitan, the weight and fineness of which might be determined by the convention and the minting of which might be intrusted to a body of experts made up of representatives from all the nations who care to enter into the project. It may be some time before this comes about, yet it would greatly facilitate international business, especially since large international transactions have come to be quite common. Such a coin would probably never supplant the coin local to the various countries in which also the cosmopolitan coin became current, yet with education taking such strides as it seems to be doing everywhere it ought not to be difficult to instruct the children in schools in the table of the proposed coin and give them practical illustrations in its use. Such a coin would not be welcomed enthusiastically by small traders in different countries who are wont to profit by the unfamiliarity of travelers with the coin of the realm and their natural bewilderment in attempting to fix in their minds the comparative value of articles considered in relation to the money they have always handled, but it would be a boon to the great traveling world's public, to our globe-trotting commercial travelers, to opulent tourists and to indigent emigrants. The current is surely in the direction of a universal harmonizing of commercial interests and the elimination of all the little lucky cards and a relegation of all things and people in trade to a sound basis of intrinsic merit."

"The subject of a cosmopolitan coin is not a new one," said a member of a banking firm. "In some of the aspects of the case it appears to be very desirable. It has been suggested that the various commercial nations agree upon a gold coin, of uniform weight and fineness, to be given a name which would be understood in most of the countries agreeing to its coinage. Each country is to coin its own pieces and to be responsible for their accuracy. The coin is to have on one side the stamp or legend of the country coining it and on the other its universal name. It will readily be seen that with such a coin in universal use, both in practice and accounts, commercial transactions would no doubt be greatly facilitated. I do not look, however, for its early accomplishment. Its desirability is not sufficient to overcome the long established customs of the various countries so as to lead them to relinquish the names and styles of their various coins. Conservative England, for instance, with its cumbrous system, is not likely to relinquish its pounds, shillings and pence and adopt the decimal system of France, Germany, Italy and the United States. And it is not likely that the latter would give up their quick and handy decimal system for that of England. On the whole, the idea is a very good one, but, like many other good things—like the proposed metrical system, for instance—impossible of accomplishment for various reasons at present."

CHANGED HER BRIDEGROOMS.

While Eloping with One She Found the Other.

There is a Detroiter who was a principal in one of the queerest elopements on record, declares the Free Press of that city. He was at a resort in the upper lake regions. Among the guests was a beautiful girl from the South, educated in a convent and unsophisticated as to the ways of the world. The Detroiter found her one day vainly trying to cast a fly and taught her the trick. It took time; he did not believe in crowding her education, and they became very friendly. A natural result followed, and when he presented his case to her father the old gentleman, metaphorically speaking, tore up the sod. His daughter was engaged, this new lover knew it, and if he didn't drop the matter just where it was he would either be thrown into the lake or pumped full of lead.

The maiden thought a good deal of the man she had left behind, but the new infatuation was stronger, so an elopement was planned. When they went stealthily to the boathouse at night every craft was securely locked up except an Indian canoe. He was not an artist in propelling such a boat, but they "sailed" away. They kept close to the shore, but he grew overconfident, leaned suddenly toward her to renew some of his vows, and over they went. He managed to keep her afloat and shouted so lustily that the guide at a near-by camp rowed to the rescue.

She was soon stowed away beneath blankets, and he made the acquaintance of a lot of Southerners who had just arrived for hunting and fishing. He told his story, all were sympathetic and a messenger was hurried off into the country for a parson, as it was thought best to put an insuperable barrier in the way of the wrathy father. When the bride stepped forth for the ceremony one of the Southerners, pale and excited, rushed to her. She hesitated but a moment before falling into his arms. The parson did his work, but her first love was the bridegroom. The Detroiter admits that he made up his mind in a flash that he would rather be a bachelor than food for fishes.

Ants on Trees.

Wherever ants abound upon trees and plants, it shows that the trees are infested with Aphis plant lice, which are doing the harm to the plant. These plant lice suck the juices of the plant, and secrete a sweet substance, which is much liked by the ants, who go among them gathering up this sweet substance, which is often called honey dew, as, where trees are very thickly infested with the Aphis, it often drops from the trees in such quantities as to appear like dew under them. These Aphis being attended by the ants are often called the ants' cows, as they are known to carry the Aphis from plant to plant, as one might move their cows to fresh pastures.

The destroying of the ants will not help the trees, but if the Aphis are destroyed by spraying with kerosene emulsion or a strong infusion of tobacco the ants will leave also.

BITS FOR BOOKWORMS

Richard Whiteing, the author of "No. 5 John Street," is at work upon a new novel and also upon a series of papers for an American magazine.

Georg Brandes, the Danish critic, tells how Ibsen was once loud in his praises of Russia. "A splendid country!" he said; "think of all the grand oppression they have! Only think of all the glorious love of liberty it engenders! Russia is one of the few countries in the world where men still love liberty and make sacrifices for it."

Kipling writes all his verses while humming tunes which are generally Irish, if William Strong, the artist, who visited Kipling before his illness, is correct. The interesting confession is given in the poet's words: "I take up, for example," he said, "the 'Wearing of the Green,' and hum it over and over, and the spirit moves me to write words to fit it." It is queer to note, now that the thing is mentioned, that "Mandalay" goes to the tune of "Wearing of the Green." Try it.

Victor Cherbuliez, of the French Academy, who has died at the age of 70, has sometimes been called the French Anthony Trollope; but except in fertility of production there was nothing in common between them. Cherbuliez wrote like a scholar and a gentleman, but his novels were often dull, and of late years he had been totally eclipsed by M. Anatole France. His critical writings were of great merit, for he had the advantage, uncommon in a literary Frenchman, of knowing several languages besides his own. He knew English and German literature thoroughly and his sympathies were proportionately wide.

A well-known English publisher, in the course of a conversation, has incidentally revealed the portentous fact that no fewer than 1,200 novels on the average are submitted to his firm alone in the course of every year. To find the total annual output of manuscript fiction it is happily not necessary to multiply this number by that of the existing publishing houses, since a vast proportion of such manuscripts, of course, "go the rounds" from one unappreciative firm to another. But, even when all due allowance has been made on this score, ample evidence remains of a waste of time and energy in the production of fiction which is depressing to contemplate. Of the annual 1,200 works submitted to the particular firm in question, only about half a dozen, it appears, gain acceptance.

LUCKY IN MONEY AND LOVE.

The Vanderbilt Heir and His Pretty Fiancee.

Alfred Gwynne Vanderbilt, who will probably inherit the bulk of the $100,000,000 fortune left by Cornelius Vanderbilt, is the second living son of the late steward of the Vanderbilt wealth. Alfred was educated in Yale. He was very popular among the students in the big university. While still in his studies Alfred fell in love with Miss Elsie

French, and he was quite impatient to be married. His father, however, persuaded him to wait until after his graduation and likewise until he had made a tour of the world before settling down. Miss French is only 18, and very beautiful. She is the daughter of the late Francis Ormond French. The future Mrs. Vanderbilt has a fortune of her own of nearly $5,000,000.

"The Free German Rhine."

Nikolaus Becker, who wrote the patriotic song, "They Never Shall Have It, the Free German Rhine," is to be honored by a monument at Geilenkirchen.

When a funeral is held on a Sunday, a man knows that he can invent no excuse for staying away that his wife will accept.

OUR BOYS AND GIRLS.

THIS IS THEIR DEPARTMENT OF THE PAPER.

Quaint Sayings and Cute Doings of the Little Folks Everywhere, Gathered and Printed Here for All Other Little Ones to Read.

Miss Seraphina Martha Newell
Was thought by some to be quite cruel.
And shall I tell you why?

On Saturdays she used to bake
The pasty cates, the tasty cake,
And pastry known as pie.

To watch her was a fearsome sight!

She beat the eggs, both yolk and white;
She whipped the cream with all her might,
And stoned the raisins with delight!

That's why Miss Seraphina Newell
Was thought by some to be quite cruel.
—St. Nicholas.

What "Sing a Song of Sixpence" Means

Sing a song of sixpence, a pocket full of rye;
Four and twenty blackbirds baked in a pie.
When the pie was opened, the birds began to sing;
Was not that a dainty dish to set before the king?

The king was in his counting house, counting out his money;
The queen was in the parlor, eating bread and honey.
The maid was in the garden, hanging out the clothes;
Down came a blackbird, and snapped off her nose.

You all know this rhyme, but have you ever heard what it really means? The four-and-twenty blackbirds represent the twenty-four hours. The bottom of the pie is the world, while the top crust is the sky that overarches it. The opening of the pie is the day dawn, when the birds begin to sing, and surely such a sight is fit for a king.

The king, who is represented sitting in his parlor, counting out his money, is the sun, while the gold pieces that slip through his fingers are the golden sunbeams. The queen, who sits in the parlor, is the moon, and the honey is the moonlight.

The industrious maid, who is in the garden at work before her king—the sun—has risen, is the day dawn, and the clothes she hangs out are the clouds. The bird who ends the song by nipping off her nose is the sunset. So we have the whole day, if not in a nutshell, in a pie.

Grace Darling.

It is a brave thing to risk one's life to save that of another—and that is what a young girl, Grace Darling, did, many years ago.

Grace Darling's father was a lighthouse keeper and kept the Folkstone light, on one of the Farne Islands, off the coast of England.

One night a severe storm drove a vessel on the rocks of one of these islands and almost cut it to pieces.

The poor sailors, nine in number, clung to the ship and made a desperate fight for their lives, all through the night. Towards morning, when they were all but exhausted, they saw a little boat coming to them from the shore, tossing like a shell on the angry waves. To their surprise they saw a young girl alone in the boat coming to their rescue. With great skill she guided her boat to the wrecked ship and was able to carry the sailors, in safety, back to her father's lighthouse; for it was the lightkeeper's young daughter who had done this brave deed.

Grace Darling's noble act was soon known throughout England, and numerous letters of congratulation and many beautiful medals were sent her.

But our young heroine was a true girl and said, "she had only done her duty," and that she was glad she had been taught to row and swim and was so strong and fearless on the water.

If any of our young people were at the World's Fair in Chicago, a few years ago, you probably saw the very boat that Grace Darling rowed that morning through the storm.

Colonial Children at Table.

In a little book, printed in America about the time of the Revolution, and entitled "A Pretty Little Pocket Book," there are given a number of rules for the behavior of children at the table, which Miss Earle quotes in her "Home Life in Colonial Days."

They were not to seat themselves at the table until after the blessing had been asked, and their parents told them to be seated.

They were never to ask for anything on the table; never to speak unless spoken to; always to break the bread, not to bite into a whole slice; never to take salt except with a clean knife (there was one common saltcellar); and not to throw bones under the table.

One rule reads: "Hold not thy knife upright, but sloping; lay it down at right hand of the plate, with end of blade on the plate." Another, "Look not earnestly at any other person that is eating." When children had eaten all that had been given them, if they were "moderately satisfied," they were told to leave at once the table and room.

In many households the children were not allowed to sit at the table, but were compelled to stand by the side of the table during the entire meal. "I know," writes Miss Earle, "of children not fifty years ago standing at meals at the table of one of the judges of the Supreme Court. He had a bountiful table, was a hospitable entertainer and well-known epicure; but children sat not at his board. Each stood at his own place and had to behave with decorum and eat in entire silence."

In some families children stood at a side-table; and trencher in hand ran over to the great table to be helped. In other houses they stood behind their parents, and food was handed them from the table. "This seems," comments Miss Earle, "closely akin to throwing food to an animal, and must have been among people of low station."

Belle's Answer.

Mrs. D. had invited some friends to dinner, and desiring to make a favorable impression she had previously cautioned her little daughter Belle as to her conduct at the table. Everything came off satisfactorily until the coffee-and-cake stage was reached.

"Will you have some cake, Mr. S?" asked the hostess of one of the guests.

"No, thank you," answered Mr. S.

The same inquiry was made of the others, with varying replies, until little Belle was finally reached.

"Will you have some cake, Belle?" asked the mother.

"No," replied the little miss, abruptly.

"No what?" sternly demanded the mother.

"No cake," answered little Belle, innocently, and Mrs. D. collapsed.

Funniest Sight of All.

"Well, Clara, what did you see in the country?" asked a father of his little 4-year-old daughter who had just returned from a visit to her grandparents. "Oh, just lots of funny things," was the reply, "and the funniest of all was the hired man unmilking the cows."

Of Course.

"What is the plural of man, Johnny?" asked the teacher of a small pupil in the grammar class. "Men," answered Johnny. "Correct," said the teacher. "And what is the plural of child?" "Twins," was the logical but unexpected reply.

Boys Must Be Scarce.

"Mamma," said little 5-year-old Tommy, "do only good little boys go to heaven?" "Yes, my dear," replied the mother. "Well," continued the youthful observer, "if that's the case boys must be rather scarce up there."

Answered His Own Letter.

A certain young railroad man who has charge of a department in the auditing branch of his company's business had occasion recently to dictate a letter to the head of a corresponding department of another road. There was a point in dispute between the two railroads involving money and this young official had taken a stubborn ground that the other official was totally at fault and advanced what seemed to him unanswerable arguments to prove it. A short time after he had forwarded the letter he received a proposition from headquarters of the other railroads which he accepted, and within a few days he became the head of the department with which he had been in dispute. The first letter he found on file ready to be answered was his own on the point in question. There was only one thing to do. He immediately dictated an answer to his own letter, refuting and repudiating its argument, and wound up by a heated insinuation that the writer of it was an unmitigated donkey. Of course, the letter was addressed to himself and signed by himself, but in his enthusiasm for the interests of his new employer he did not mind a little thing like that.—Chicago News.

Strategy of a Spendthrift.

A good story is told of a young man who, besides being of the spendthrift order, is a mimic and can imitate his father's voice to a nicety. Not long ago the young man wanted, without delay, some money to pay a bill, and he knew that his father would treat his request with cold contempt. Waiting till he knew that his father would be away he went to the telephone and rang up the office, calling for the cashier. The cashier was forthcoming, and when he was at the other end the young man imitated his sire's voice:

"I say, Blank, if that scapegoat son of mine comes around and asks for $100, don't give it to him. Only give him $50."

The cashier promised that he would fulfill the commands. Not long after the son called at the office and demanded $100. He was refused by the conscientious cashier, and, apparently in anger, the young man contented himself with the $50. When the old man reached the office there was a scene.

A Romantic Career.

The recent death in Italy of Giacoma Naretti ended a most romantic career. The son of poor Italian parents, Naretti learned the trade of a carpenter, and went to Africa during his country's early occupation of that continent. There his trade stood him in good stead. He attracted the attention of Emperor John of Abyssinia, for whom he built a throne, called the throne of Solomon. It was a modest wooden affair, but it excited the admiration and wonder of the dusky King. Later for Emperor Menelek he built a royal palace, and was then made a sort of minister of public works. He married an English woman, got rich, and lived in a palace of his own.

High-Speed Trains.

Records for high speed in express train service have been made on French railroads lately, showing an average of 54.5 miles per hour, including stops. Special compound locomotives of the four-cylinder type, designed for this service, are employed exclusively in these trains.—Pittsburg Post.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, DECEMBER 8 1899

Marconi is not the only inventor whose genius and industry are working a revolution in the art of telegraphy. He stands indeed at the head of those who are advancing the system of wireless telegraphy, but what he has done in that direction is not more wonderful than what has apparently been accomplished by Josef Virag and Anton Pollak in increasing the rapidity with which messages can be sent over wires. According to reports the two inventors made experimental tests in New York in sending dispatches between that city and Chicago and succeeded in transmitting signals consisting of letters of the alphabet at the rate of 60,000 an hour. To achieve that feat it was necessary to use an electric current of seventy-five volts and genuine messages were not transmitted because of the amount of induction to be overcome and the interference and interruptions with the wire. Further experiments were made in Chicago, first between that city and Milwaukee and afterward with Buffalo. In those tests real marvels were accomplished. In the first experiments messages were dispatched at the rate of 122,000 words an hour. Then wires were obtained to Buffalo and back, making a circuit of 1062 miles, and over that distance messages were sent at the rate of 90,000 words an hour when, owing to the excessive voltage, there came a blur in the receiver which stopped further experiments for the time. Over a short loop messages were sent, beginning slowly but gradually increasing in speed until they were run up to the rate of 140,000 words an hour. To send messages at that rate of speed they are first translated into the Morse code by a Wheatstone perforator which punches holes in a strip of paper tape. In the upper side of the paper a hole represents a dash and on the lower side a dot. The tape is placed so as to run from one spool to another, passing over a brass drum, and two wire brushes run over it, one brushing along the dots and one along the dashes. Whenever a hole in the tape permits the brush to come into contact with the drum it closes the circuit and causes a vibration upon a telephone diaphragm at the other end of the wire. To receive the message a tiny mirror is fastened to the center of the diaphragm and so placed as to reflect the rays of an incandescent light through a tube into a drum where it strikes a sensitised paper revolving upon a spool. The mirror moves up and down with the diaphragm in response to the electric vibrations, and as it does so the beam which it reflects vibrates along the paper. After the transmission has been completed the paper is taken from the spool and developed like the negative of a photograph, and by counting each upward angle as a dash and each downward one as a dot, the horizontal lines representing spaces between the words and letters, the receiving operator reads the message without difficulty. The only defect of the system thus far is the slow method of perforating the strip of paper which is to be used in transmitting the message. The inventors believe they can remedy that defect before long. When once the paper has been perforated the message can be sent as rapidly as the spool on which the tape is wound can be revolved and a speed of 140,000 words an hour is regarded as practicable for general use over ordinary distances. Such is the probability of telegraphy which now confronts the world. Under the present system about 2,000 words an hour is the best a rapid telegrapher can do. It will be seen that what is promised is virtually a revolution and will enable one operator to do the work of forty.

It is now a recognized fact by most well informed teachers and professional men that quite a proportion of the children in our schools are taxing the eyes far beyond the power of endurance. To any one of common observation this is apparent on entering any school room and simply watching the movements of the children for fifteen minutes in their study. As you will observe, you will see one holding his book on one side as if he had but one eye, a second girl will first hold the book near and then far off, and a third will look as if he was not looking on his book at all. The teacher says: "Johnny, look on your book and study your lesson." Johnny looks up surprised, but does not change the position of his book, and finally the teacher comes along and adjusts Johnny's head to the proper position. And all for what? Johnny does not know, and the teacher has not given time or thought enough to the matter to see that Johnny cannot see and is trying to focus his letters. Hence he is called stupid, a dull boy and all that. Such children often become cross and irritable, and are drowsy and dull, while at the same time they become discouraged ann lose self-respect and ambition.

NOTICE TO CREDITORS.

Estate of Josiah G. Dodge, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Josiah G. Dodge, deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said administrator at his place of residence at Lone Pine, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles, dated the 9th day of November, 1899, in a certain action wherein P. B. Mahinney, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Albert Wibbelt, defendant, on the 3d day of August, 1897, for the sum of twenty-five hundred and eighty-eight and forty one-hundredths ($2 588 40) dollars and costs of suit, I have levied upon the following described property, to wit:

That certain mining claim situate in the Argus Range of Mountains, in the county of Inyo State of California, known as the "McKinley" Gold Quartz Mining Claim, together with all the rights, members and appurtenances thereunto belonging.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Albert Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, the 22nd day of November, 1899.

A. M. GIVEN, Sheriff.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.)
GENERAL LAND OFFICE
Independence California.

A protest having been filed in this office by Rafael Rossi, against Lieu Selection No. 390, by C. W. Clarke, for the NW ¼ of SE ¼ of Sec. 33 T 8 S, R 34 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter, said C. W. Clarke and Rafael Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

Trains 1 and 2 run daily. Train 3 runs Mondays, Wednesdays and Fridays. Train 4 runs Tuesdays, Thursdays and Saturdays.

Passenger trains make close connections Mound House with express trains of V. & T. R. R., which connect at Reno with east and west bound trains of Central Pacific Rail

STAGE CONNECTIONS.

At Hawthorne, with U. S. Stage Company's daily coaches for Aurora, 26 miles; Bodie, 37 miles, and for Lundy and Bridgeport.

At Luning, 125 miles from Mound House, with Gilmer, Salisbury & Co's tri-weekly stages leaving Tuesday s Thursdays and Saturdays, at 3:00 a. m., for Downeyville, Grantsville, etc.

At Candelaria, with U. S. Stage Company's stages from Columbus, Silver Peak, Montezuma, Alida Valley, Gold Mountain, etc.

At Keeler, with stages from Cerro Gordo, miles, Darwin, 22 miles, and Panamint.

This road has a first-class equipment, is opening up new and most promising mining districts, farming and grazing valeys. West o Owens River Valley the Sierra Nevadas rise rapidly to an imposing height and are easy of access. A trip to Mt. Whitney, the "Nose" of the Sierras, and to the cataracts and great canons of the south fork of Kings river, offers the tourist a new and unsurpassed region—or soon to become famous

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above. Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

Methodist Church.

Preaching services will be held at the several appointments of the Independence charge of the Nevada Mission of the M. E. Church until further notice as follows:

Independence—Each Sunday evening at 7:00 o'clock.

Lone Pine—1st, 2d and 3d Sunday in each month at 11 o'clock a. m.

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 3 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m., each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

SUPERIOR COURT PROCEEDINGS

Hon. Walter A. Lamar, Judge.

TUESDAY, Dec. 5, 1899.

Estate of Mary Jones, deceased—Hearing of petition involving property rights of estate.

MARRIED.

GILL—ROUGHNEY—At the residence of J. R. Moffett, Independence, Cal., December 7, 1899, by Hon. W. A. Lamar, Superior Judge, Mr H. D. Gill and Mrs. Julia Roughney.

See the advertisement for the ball during Institute week.

It's getting wintry. Thermometer was down to 23 this week.

Will Vaughn went to Big Pine yesterday after a load of lumber.

Mrs. J. R. Eldred spent several days in town this week visiting friends.

The Grand Jury brought quite a number of visitors to town this week.

The Grand Jury recommends the repairing of the river bridge at Citrus. It needs it.

Billy Grant is making a collection of photographs of old-time Invoites which is highly interesting.

Mr. and Mrs. H. D. Gill left for Big Pine yesterday where they will make their future home.

Mrs. Albert Halverson has recovered from her recent severe illness and was a a visitor in town this week.

Mike McSweeny left yesterday for Los Angeles with a band of horses and mules which he has sold to parties there.

J. C. Roeper has sent for a lot of fresh fish and oysters for the Independence Market to be here Monday evening.

Mrs Charlotte S. Riggs, Mrs. J. Shipley and Miss Deborah Jones of Round Valley were visitors in town this week.

Mrs. J. J. Gunn arrived home on Monday evening last from San Francisco, she having spent the summer there. Miss Helen remained in the City where she is attending school.

D. Scott and Bill Adams passed through town Wednesday on their way to Bishop from Los Angeles. They are reported to have sold their horses to good advantage and to be looking for more.

The Ladies Aid Society of Big Pine is making extensive preparations for a grand Bazaar and New England supper to be held at the Big Pine school house on next Tuesday evening.

F. M. Smith has started up the old Searles borax works and will manufacture about one hundred tons per month. Dennis Searles is Superintendent and a large force of men are employed.

F. M. Bradshaw, a well known Los Angeles mining man, arrived at Independence last Tuesday and in company with H. H. Douglas, his expert, left for Bishop Thursday for the purpose of examining the Sacramento mine.

Arrangements have been made by which ample occommodations are provided for visitors at the coming Teacher's Institute. Suitable hall room has been provided for holding all meetings. The programme will be published next week.

The Southern Pacific Railroad company has filed in the United States Land Office at Independence an application for a right of way from Randsburg north to Lone Willow, along the line surveyed by the Randsburg Railway people for their road to Ballarat. Interesting developments are looked for.

GRAND JURY REPORT.

In the Superior Court of the County of Inyo, State of California.

To the Hon. Walter A. Lamar, Judge of the Superior Court in and for the County of Inyo, State of California.

We, the Grand Jury, empaneled in the said Superior Court on the 5th day of December, 1899, herewith submit our report as follows:

We have examined all criminal complaints brought to our notice and fail to find sufficient evidence to indite.

We have examined the books of the various county officers and find them kept in a legible manner and from the brief examination we believe them to be correct.

We have examined the County buildings and find they answer all necessary requirements, except the outhouses belonging to the Court House should be put in a sanitary condition.

We have also examined into the affairs of the County Hospital and find sixteen inmates, fifteen males and one female. We find them all well provided for, beds etc. in good cleanly condition. Have talked with the patients and find them well satisfied with their treatment, with the exception of the stove, which is in one corner of the room and will accommodate but two or three patients to the exclusion of the balance. We therefore recommend the moving of the stove to center of the room, and also the banking up of the new addition to the building, which the Matron has promised to have done as soon as she receives the heater and the lumber which is now ordered. We suggest and recommend to the Supervisors of the County that they rescind their rule not to grant any relief to the indigent sick at their homes; as we think it is against the principles of humanity to separate families when their needs can be supplied cheaper at home.

We believe that it would be to the interest of the County to own suitable land and erect thereon Hospital and other necessary buildings for the accommodation of the indigent sick and poor of the County, and we therefore recommend that the Board of Supervisors immediately take steps toward the establishment of such institution.

We find that the County bridge across the river on the road from Independence to Citrus, and also the bridge across the river between Lone Pine and the Railroad Station are in an unsafe condition and in immediate need of repairs.

We find by the records that the road fund of the County shows that for the last quarter that over fifty percent of the road money has been paid for overseeing the work done, and we earnestly recommend that the Road Commissioner of each road district make a change and hire a capable man to work and care for the roads in his district, and that the Road Commissioner receive his report each month, and that each Road Commissioner spend only two or three days in each month in overseeing the roads.

We further recommend that the Hon. Board of Supervisors of Inyo County, at their earliest convenience, amend the liquor license ordinance now in force in this County, so as to conform as near as practicable to the liquor license ordinance now in force in the County of Orange, this State.

All of which is respectfully submitted.

J. R. ELDRED,
Foreman.

Dated this 7th day of December, 1899.

New Cars For The C & C.

The patrons of the Carson & Colorado railway will be delighted with the strictly up-to-date accommodations which have been introduced for their comfort and pleasure. Two more cars have been sent to Mound House to be put in service, one a combination passenger coach and smoker and the other a mail and express car. The interior of the passenger coach presents a bright and attractive appearance, being finished in cherry, the doors of black walnut and cherry; the windows with double inside blinds. But the ease and comfort with which a long journey can be undertaken is what especially attracts attention, for the coach contains four reclining and two revolving chairs, besides seven regular passenger seats, all finished in chestnut and upholstered with morocco leather and steel springs. The revolving chairs are very convenient, but the reclining chairs are luxurious in the extreme, being reversible, provided with foot rests and can be placed in three positions to suit the convenience of the traveler. For those sufferers who are obliged to leave their homes for medical treatment they are a great boon as they ease the torture usually endured. The smoker is partitioned from the passenger department with plate glass and furnished with seven car chairs. The Wells Fargo and mail car is furnished with all the latest conveniences for the handling of mail and express. The management of the Carson & Colorado has always endeavored to keep the road-bed and rolling stock in first-class condition and the thanks of the C. & C. traveling public are due President Yerington for this luxurious innovation. The entire work was done in the Carson shops and in fine workmanship cannot be excelled.

The Northern Mines

Mr. Woodard and Mr. Stagg, officers of the Randsburg railroad, accompanied by two other gentlemen, have just returned from a trip to the Panamint country. They had a two-seated rig and drove out to take a good look at that country, chiefly with a view of securing business for the road. It is well known that vast quantities of freight are going north from the railroad, freight and machinery for mills and cyanide plants, everything connected with gold mining. Very little is at present coming in, but in time this will be corrected and freight will move both ways. The surveying party which left here some time ago was expected to reach Ballarat yesterday. They went first from Garden Station up to the west of Slate Range, up past the new borax works to the east of Borax lake, expecting to cross over opposite Redlands mill and drop down into Panamint Valley, but found that while they could get up well enough on this side it was entirely too much of a drop down the other side, as the Panamint valley is so much lower than the borax lake on the west side of the range. After making this discovery they returned to Garden Station, started a new line, skirting the Slate Range to the south, going to Lone Willow and down the Panamint Valley to Ballarat. On this route they have a good practical grade all the way. The surveying party has now been in the field nearly two months and they are making a permanent survey at considerable cost to somebody.—*Randsburg Miner.*

Indian Fandango

The Indians of the Fort are preparing for the annual fandango or harvest feast. The dance will be held just west of the Fort grounds, beginning Monday, December 11. The Indians having the matter in hand want to make it an orderly Indian festival, as they were conducted before the white man came with his whiskey or the Chinaman with his opium. It is therefore requested that no intoxicants be sold or in any way given to any Indians, either men or women. All whites who come to see the dance are requested to leave promptly when the dances are over. The Indian Under-Sheriffs are authorized to arrest any one violating the law against selling or giving intoxicants to Indians. This feast was kept for ages as a feast of Thanksgiving for a bountiful harvest and was religious in tendency. Now it is merely memorial. It is hoped that the whites will assist in keeping it orderly, thus avoiding such serious disturbance as ended in bloodshed during the recent Fair at Big Pine.

Keeler Ball

On Thanksgiving night Keeler was the scene of one of the liveliest balls given at that town for many years. The hotel dining room was taxed to the uttermost to accommodate the dancers assembled there. Some thirty-five couples were in attendance, who, under the direction and management of Messrs. Ramsey and Reynolds kept up the livliest kind of a trip until day-break. The Independence String Band furnished the music and the supper which was served at midnight consisted of every delicacy that the hotel could obtain. A four-horse load of folks from Independence and a six-horse load from Lone Pine, besides a number from Darwin and the vicinity swelled the number of merry-making, all of whom returned home well pleased with the cordial reception tendered them by the residents of Keeler.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles dated the 9th day of November, 1899, in a certain action wherein P. P. Mathason, Henry Andersen and Cyrus Wheeler, as plaintiffs, recovered judgment against Theodore Wibbelt, Defendant, on the 31st day of July, 1899, for the sum of two thousand and forty-five ($2,045.00) dollars and costs of suit taxed at twenty-two and sixty-five hundredths ($22.65) dollars, I have levied upon the following described property, to wit: Those three certain mining claims situated in the Argus Range of Mountains, in the County of Inyo, State of California, known as the "Westphalia," the "McKinley," and the "Iron Queen" Gold Quartz Mining Claims, together with all the rights, members and appurtenances thereunto belonging; also fourteen thousand (14,000) feet of iron pipe running from the spring in Big Canyon to the Ballarat stage road in said County of Inyo; also the right to take and use the waters of said spring.

Notice is hereby given that on Wednesday the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Theodore Wibbelt, the defendant, in and to the above described property, at public auction for cash to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, November 22nd, 1899.

A. M. GIVEN, Sheriff.

Commissioner's Sale.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

George Collins, Administrator of the estate of Catherine Motz, deceased, Plaintiff, vs. George A. Free, Defendant.

Under and by virtue of an order of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 3d day of November, 1899, in the above-entitled action wherein George Collins, Administrator of the estate of Catherine Motz, deceased, the above named plaintiff, obtained a judgment and decree against, defendant, George A. Free, on the 3rd day of November, 1899, which said decree was on the 3rd day of November, 1899 recorded in Judgment Book No 2 of said Court at page 124 I am commanded to sell, and by said decree the same is directed to be sold, all those certain lands and premises situate, lying and being in the County of Inyo, State of California, and bounded and particularly described as follows, to wit:

The south-west quarter of the north-west quarter, the north half of the south-west quarter, and the south-east quarter of the south-west quarter of Section No 25, in Township No. 7 South, of Range No. 34 East, Mount Diablo Meridian.

Together with all and singular the tenements hereditaments and appurtenances thereunto belonging, or in any wise appertaining

Notice is hereby given that on Saturday, December 16th, 1899, at the hour of 10 o'clock a.m. of that day, in front of the Court House of said County of Inyo, at Independence, in said county, I will in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary, to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in lawful money of the United States.

BEN H. VANDELL,
Commissioner.

Dated November 13th, 1899.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING SEPTEMBER 30TH, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending September 30th, 1899.

Respectfully submitted,
W. T. BUNNEY, County Treasurer.

Respectfully submitted to the Honorable Board of Supervisors.

D. J. HESSION
County Auditor.

Filed October 5, 1899.

D. J. HESSION,
Clerk

Approved October 5th, 1899.

A. C. FREEMAN,
Chairman.

Attest: D. J. HESSION, Clerk.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist., Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE.

TO ALL WHOM IT MAY CONCERN: Notice is hereby given that the undersigned, owners of those certain mines or mining claims situate, lying and being in the Union Mining District, County of Inyo, State of California, commonly known and designated as the "Alhambra" and and "Black Eagle" mines, have made and entered into an agreement to sell said mines to Peter Kimberly; that said agreement is now of record in Book "A" of Bonds, page 294, records of said Inyo County; that under the terms and conditions of said agreement the said Kimberly has the right to work said mines at his sole cost and expense; that from the date hereof the said mines, nor the ores produced therefrom, nor the undersigned will be liable or responsible for any labor or improvements done or made upon the said mines, or for any material furnished therefor by any person without a written order from said undersigned.

Dated November 25, 1899.

PARKE BARNES,
E. T. ANDERSON.

PROPOSALS FOR BUILDING A BRANCH JAIL AT BALLARAT.

NOTICE IS HEREBY GIVEN, that pursuant to an order of the Board of Supervisors of the County of Inyo, State of California, made October 6, 1899, sealed proposals will be received for the construction of a Branch Jail in the town of Ballarat, County of Inyo, State of California, to comply with the following specifications.

The Building to be 14x16 feet, walls 10 feet high, with two cells, 7x10 feet; one ventilator 12x12 inches on top of each cell; all walls to be double, of 1x12 surfaced lumber, inside diagonal; 4-inch battens on joints outside; wall of cells partition to be diagonal double; building to stand on rocks 4 feet apart; sills, 4x4, floor joists, 2x6; ceiling joists rafters and plates, 2x4; double floor and ceiling 1x 12 surfaced; sheeting, 1x6; roof, redwood shingles, 16 in. to weather; three double doors, 2x4x6 ft. hung with iron hook hinges ¾x12 in., with bolts ¾ in.; hasp and staple bolted on; door to be built of 1x12, 3 in thick; 3 jail locks.

All bids must be sealed and indorsed "Proposal for Building a Branch Jail at Ballarat," and addressed to the Clerk of the Board of Supervisors, the same to be received not later than 10 o'clock a. m. on THURSDAY, the FOURTH day of JANUARY 1900, and will be opened by the Board at 2 o'clock p. m. of said day. The Board hereby reserves the right to reject any or all bids.

A. C. FREEMAN, Chairman.

Attest: D. J. HESSION, Clerk.

SURVEYOR

—AND—

U. S. Deputy Mineral Surveyor

For California and Nevada.

—BISHOP CREEK, INYO CO., CAL.—

The obtaining of United States mineral patents a specialty.

All kinds of surveying given the most careful and accurate attention.

True Economy

The difference of cost between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cost many times this in doctors' bills.

Royal Baking Powder may cost a little more per can, but it insures perfect, wholesome food. In fact, it is more economical in the end, because it goes further in leavening and never spoils the food.

Royal Baking Powder used always in making the biscuit and cake saves both health and money.

You cannot, if you value good health, afford to use cheap, low-grade, alum baking powders. They are apt to spoil the food; they do endanger the health. All physicians will tell you that alum in food is deleterious.

ROYAL BAKING POWDER CO., NEW YORK.

HAD A KICK TO MAKE.

AND HE MADE IT RIGHT TO THE HEAD OF THE FIRM.

The Kicker Went About Landing His Protest In a Rather Unconventional Manner, but the Chances Are He Got What He Was After.

"Yes," said the tall, loose jointed man at the telephone, "that's the number I want—229."

"Double two nine?" queried the voice at the central office.

"Well, I don't know that double two nine is any better than the plain, ordinary two, two, nine, but if you insist on that style suppose we say double two single nine and get it exactly right. Hello! Is that Spotcash & Co.'s?"

"Yes," responded the voice at the other end of the wire.

"Is Mr. Spotcash in?"

"Is it something important? He is much occupied."

"So am I. Yes; it's a matter of some importance, and I want to talk to Mr. Spotcash personally. Yes; I'll hold the wire—that is, I'll hold the phone"—

"Hello!" snapped somebody at this juncture.

"Hello! Is that Mr. Spotcash?"

"Yes. Who is it?"

"You are the head of the firm of Spotcash & Co., are you not?"

"Yes," was the impatient answer. "What do you want? Who are you?"

"Gwilliams, 1195 Pumpernickel street. I want to enter a complaint."

"What about?"

"I bought an icebox at your store a few days ago, and"—

"Call up the household goods department, confound you! I have no time to spare to look after such things."

"You've got as much time, perhaps, as I have. I haven't any complaint to make to the household goods department. The head of the firm is the man I want to talk to. I bought an icebox at your store a few days ago for $16.75. I might have got it cheaper somewhere else, but that isn't the point. Having bought it and paid for it, I had a right to expect it to be delivered within a reasonable time and in fair condition. It didn't come for four days, and when it did come"—

"Say, you, I employ men to hear complaints of this kind"—

"I have no use for them. You're the responsible man of the house. The system is yours. If it doesn't work smoothly, it is your fault. When that icebox came four days after purchase, one of the castors was missing, the varnish was scraped off the outside surface in more than a dozen places, and it looked as if it had gone through a hard season at a cheap boarding house"—

"If there's anything wrong with it," roared Mr. Spotcash, "send it back! I can't take up my time"—

"Stand a little farther away from the phone, Mr. Spotcash. Your voice sounds as if you had your mouth full of mashed potatoes"—

"Who the devil are you?"

"I think I gave you my name and address—Gwilliams, 1195 Pumpernickel street, next door to Lazarus J. Spillhorn. You don't know me from a stuffed alligator, but you may have heard of Spillhorn. Don't you allow yourself to get hot, Mr. Spotcash, over an icebox. The incongruity of such a thing ought to be apparent even to the head of an overgrown junkshop"—

"If you were here, sir, I should kick you out of my office"—

"You would probably need some help. If that icebox had simply been defaced a little, I shouldn't have made any fuss about it, but the stupid ass you sent to deliver it"—

"Haven't you sense enough, you infernal idiot, to know that I don't look personally after the little details of a business amounting to millions of dollars a year?"

"If you don't grasp every detail of that business, you Cheap John notion peddler in a gilt binding, you are not fit to be the boss of it! Don't try to crawl out of the responsibility by throwing the blame on some boy. If that icebox had simply been defaced a little, I repeat, I shouldn't have made any fuss about it, but the fellow you sent to deliver it didn't have any more sense than to tumble it on the sidewalk"—

"Bring it back, blank you"—

"Look here, Spotcash, that won't do, you know. You are not allowed to talk in that style over the telephone. Exercise a little common sense, Spotcash. You know it isn't my place to bring that icebox back. The proper thing to do, you thirty-third degree haberdasher and toy vendor, is to send me a new icebox and take the damaged one back"—

"You blank fool, do you think you can tell me"—

"Again let me tell you, Spotcash, not to use such language over the telephone. Some remote ancestor of yours may possibly have been a gentleman. Try to emulate him, Spotcash. In the meantime please accept the assurances of my distinguished consideration, and the icebox will remain in my dwelling subject to your order. If it is replaced properly and within a reasonable time, you will not hear from me again. If it isn't, I shall call you up, Spotcash, personally a dozen times a day through all the public telephones in town. I have not the patience to call at your store to make the complaint. Your system of making exchanges is too complicated, and I believe in going to headquarters with all kicks anyhow. Never allow yourself to think, Spotcash, that you are too big a man to listen to a complaint from your meanest customer. I think that's all. Good morning, Spotcash!"—Chicago Tribune.

Love of Liquor Not Hereditary.

Professor Sims Woodhead, speaking before the Society For the Study of Inebriety in England, came to these conclusions: He held most strongly that a direct transmission of the taste for alcohol never occurred. Of course he accepted very fully the fact that certain nervous diseases and degenerations involving certain altered and weakened inhibitory powers are transmitted from generation to generation. These, however, did not always assume the same form, the manifestation of the effect often taking on very different characters in different generations.

But whatever character they assumed the result as regards alcohol was inevitably the same, and until far more evidence was brought forward than had yet been presented he should strongly maintain that what was so often spoken of as an inherited taste for alcohol was an inherited weakness and lessened self restraint affecting many other things besides drink and that a direct transmission of the taste for alcohol from parents to children in a constitution otherwise healthy did not occur. As with tuberculosis, the disease was *not* transmitted, but only the weakly and unbalanced condition of the tissues.—London Hospital.

Where's the Difference?

"So you don't believe in women smoking?" said the little woman as she watched her husband light his third cigar.

"No, I don't—decidedly! If I ever should hear of your doing such a thing, I would get a divorce!"

"Well, now, really, John, dear, what do you call smoking, anyway?"

"Why, inhaling tobacco smoke, of course."

"But I really don't understand your objection to cigarettes," said she. "Now just look at this room; it is blue with smoke. I have inhaled that into my lungs for the last six years. To be sure, you have held all the cigars, but then—now really, what is the difference? Why would it be any worse for me to hold a cigarette in my hand while I inhale the smoke?"

"It's of no use trying to tell you—there's no arguing with a woman," said John sarcastically.

"There's a little use in arguing with some men, though," said his wife.

He didn't ask why, but she told him, just the same, that it was because of the satisfaction of coming out ahead.—Detroit Free Press.

No Newfangled Stove For Her.

A Memphis family which employs an old time negress as a cook recently had a gas range put in the kitchen. When the range was put in place, the workman who put it there lighted the jets inside the oven and then closed the doors. He opened them, turned off the gas and then, relighting the jets, explained to the old negress how the range was used. The jets cannot be seen when the doors of the oven are closed, and in the excitement of the explanation the workman closed them and forgot the lighted jets.

The old negress, after hearing all he had to say, said:

"Tain't no use ter tell me erbout hit. I'm gwinter use dis yere ole wood stove whut I se cooked on so long."

The workman laughed and went away, not thinking that the old cook meant what she said. She did mean it, though, and continued to use the old wood stove to cook with.

When the head of the family that employs her received his gas bill 15 days after the gas stove was put in, he almost dropped dead. The bill showed that he owed the gas company $21.

Investigation proved that the jets in the oven had been burning from the time the workman left. The old cook had never opened the oven doors.—Memphis Scimitar.

Backing Up the Horse.

Not all of the driver's skill is devoted to driving ahead; it takes a good driver to be able to back up in good shape. Not every driver, by any means, can halt and then back up to a curbstone and hit it square and true with both wheels the first clip. That is something that requires more skill than might be imagined by one who had never tried it.

But in backing up on the level, if a man fails to hit the curb exactly the first time, he can maneuver until he does. There are places where skill must be exercised and where a level head is called for too. For instance, in backing up, or rather backing down, into an excavation on the inclined causeway left for that purpose. The excavation is begun at the rear of the lot, and the earth forming the causeway, running up to the level of the street at the front, is left until the last. In the later stages of the excavating the causeway is left just wide enough at the top for the carts or wagons to move on, and its sides slope down precipitously. The driver who backs down on one of these narrow cellar causeways simply must hit it right.—New York Sun.

What the Church Carpet Cost.

The Chicago Advance gives the following estimate of the direct and collateral cost of a church carpet. The price was $800, but as the women of the church raised the money by giving entertainments the pastor's estimate was that when all the items of cost were figured in the carpet had cost fully $4,000. He reached this astonishing total by estimating the work, worry, nervous strain, bodily weariness and heartaches of 100 women, the heroic efforts of men, women and children to eat the things which were to be eaten and hear, see or buy things which had been provided to extract money from them; the colds, fevers and other ailments contracted while attending the entertainments and the consequent doctors' bills; the money spent in other churches, for if they come to your entertainment you must go to theirs, and, worst and most costly of all, the demoralization of the church and the curtailment of the legitimate giving which follow in the train of such methods of raising money. But they got their carpet.

Still the Woman Objected.

A certain Dyersburg woman assured her husband she never told him a lie and never would. He told her he did not doubt it, but would hereafter cut a notch in the piano when he knew she deceived him. "No you won't!" she screamed. "I'm not going to have my piano all ruined!"—Tennessee State Gazette.

WIND LYRICS.

East wind—
Through gates of pearl, with sapphire set,
I steal at dawn to fly, while yet
The clouds with silver dew are wet,
On wings that brush the morning star
Of song afar.

North wind—
From fields of frozen stars I blow,
I bear the fragile flowers of snow
That fall upon the earth below,
With pure celestial lips to bless
In soft caress.

South wind—
On wings of perfume, born of spring,
Sweet memories of the south I bring;
From birds and blossoms pink that fling
To heav'n their gladness in an ecstasy
Of melody.

West wind—
Back through the gates of gold and rose,
Where late the star of evening glows,
I slip, before the evening's close,
On pinions woven of a sigh,
Into the night I seem to die.
But, hush! The night will soon pass by.
Before the lark, when morning breaks,
The east wind wakes.

—Carrie L. Ward in Danald.

FIRST AMERICAN PATENT.

Granted at Boston In 1648 and Called a Monopoly.

To the general court of Massachusetts belongs the honor of granting the first American patent. This was in 1648 and was then designated as a monopoly. It was confined to the region controlled by Massachusetts, and the one issue apparently included all the invention of the inventor connected with engines that depended upon water for their motive power. The limit of the monopoly was 14 years, and the court not only retained power to forbid exportation, but to prevent exorbitant charges upon the public for their use.

The patent was issued in this form:

"JENKES MONOPOLYE.

"At a generall Courte at Boston the 6th of the 3th Mo 1648. The cor't consid'inge ye necessity of raising such manifactures of engins of mils to go by water for speedy dispatch of much worke with few hands, and being sufficiently informed of ye ability of ye petition to peforme such workes grant his petition (yet no Othr per son shall set up or use any such new invention, or trade for 14 yeares without ye license of him the said Joseph Jenkes) so farr as concernes any such new invention, & so it shall be alwayes in ye powr of this co'te to restrain ye exportation of such manufactures & ye prizes of them to moderation if occasion so require."

This inventor, Joseph Jenkes, or Jenks, as it would now be spelled, came from Hammersmith, England, settled in Lynn in 1643 and died in 1682-83, aged 81. He was a blacksmith and machinist, made the dies for the coining of the "Pine Tree" money and built the first fire engine in this country, altogether a man of great inventive genius and the ancestor of a large number of descendants. One of his sons removed to Rhode Island, where he built several mills.—Boston Transcript.

An Absentminded Bridegroom.

Robert Dewar, brother of Lord William Dewar, the British scientist who was the first experimenter to liquefy air, is a remarkably absentminded man. It is said that on one occasion he left his home early one morning and repaired to the house of a friend, in which there was a fine library to which he had access. That afternoon his relatives and friends searched the neighborhood in vain for him. At length he was run down in this library. By his side was a new suit of clothes.

"It's a nice man you are," ironically said the spokesman.

"What's the matter now?" returned Robert irritably.

"Your bride and the preacher are waiting for you this two hours. Don't you know this is your wedding day, man?"

"I declare," said the groom, "I'd forgotten all about it! Wait till I dress, and I'll go along with you."—Saturday Evening Post.

A Just Rebuke.

A young and newly married couple were entertaining their friends, and among the guests was one whose continued rudeness made him extremely objectionable to the rest of the company. His conduct, although most unbearable, was put up with for some time, until at supper he held up on his fork a piece of meat which had been served to him, and in a vein of intended humor he looked round and remarked:

"Is this pig?"

This immediately drew forth the remark from a quiet looking individual sitting at the other end of the table:

"Which end of the fork do you refer to?"—Spare Moments.

"Example is Better Than Precept."

It is not what we say, but what Hood's Sarsaparilla does, that tells the story. Thousands of testimonials are examples of what Hood's has done for others, and what it will do for you.

Dyspepsia—*"A complication of troubles, dyspepsia, chronic catarrh and inflammation of the stomach, rheumatism, etc., made me miserable. Had no appetite until I took Hood's Sarsaparilla—which cured me." N. B. Seeley, 1874 W. 14th Ave., Denver, Colorado.*

N. B. Be sure to get Hood's because

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; the non-irritating and only cathartic to take with Hood's Sarsaparilla.

Trade Mark. BIG G. CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A.

CURE YOURSELF! Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. **Sold by Druggists,** or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles, $2.75. Circular sent on request.

PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS 25 CTS

The Isthmus of Panama.

Its engineers believe that they have solved the problem of the successful completion of this great enterprise. If so, it will prove a great benefit, no more than has Hostetter's Stomach Bitters, the remedy which never fails to cure afflictions of the stomach. The Bitters strengthens weak stomachs and torpid livers.

"All the world may be a stage," mused the pensive Benedict, "but it's only the women who have speaking parts."

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address,
F. J. CHENEY & CO., Toledo, O.
Sold by Druggists, 75c.
Hall's Family Pills are the best.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Extent of His Superstition.

"Are you superstitious?"

"To a certain extent."

"What do you mean by that?"

"Well, I should hesitate to pass under a ladder if there was a man with a pot of paint at the top of it."—Chicago Inter Ocean.

Since time is not a person we can overtake when he is gone let us honor him with mirth and cheerfulness of heart while he is passing.—Goethe.

It is in the cow's mouth that you find true equality. There you will see no upper set.—Boston Transcript.

When Doctors Disagree

Herbert M. Fish, a progressive and respected resident of Cape Vincent, N. Y., said: "The doctors disagreed in my case, one said I had the grip, another that it was jaundice, and so on. I tried many remedies but did not receive the slightest benefit. I was low spirited and nervous and had become reduced in weight from 155 pounds to less than 125. One day a friend recommended Dr. Williams' Pink Pills for Pale People. I tried them and the result was indeed marvelous. My appetite returned and I began to feel rested and restored. At the end of the tenth box my physical condition was better than it had been for years and I was a well man.

"HERBERT M. FISH."

Sworn to and subscribed before me this 17th day of November, 1898.
LEO D. O. WOODRUFF,
Notary Public.
—From the Eagle, Cape Vincent, N. Y.

Dr. Williams' Pink Pills for Pale People are never sold by the dozen or hundred but always in packages. At all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., 50 cents per box. 6 boxes $2.50

PAID BY UNCLE SAM.

Some of the Odd Expenses the Government Has to Bear.

Every one knows that it costs almost $400,000,000 a year to run the United States government in times of peace and that the department of war and the navy, the Indian and pension bureaus absorb the larger part of this amount, but in the course of years a large number of dependents upon Uncle Sam's purse have come into being of which the general public knows little.

Such, for example, are the international bureau for the repression of the African slave trade, located at Brussels, a highly laudable institution, to the expenses of which our government contributes $100 a year; the international bureau of weights and measures, also at Brussels, to which $2,270 is contributed, and the International Geodetic association, the expenses of which our government shares to the extent of $1,500 yearly.

As a leading member of a group of nations specially interested in humane and philanthropic work we subscribe $325 a year to a lighthouse service on the coast of Morocco, about $4,500 to be divided among citizens of other lands for service rendered to shipwrecked American seamen, $500 a year toward maintaining a hospital for sailors at Panama and $9,000 for keeping and feeding American convicts imprisoned in foreign countries.

Among the unfamiliar purposes in the home country for which money is appropriated from the federal treasury is the maintenance of the Washington monument, costing $11,520 annually, and the provision of artificial limbs for soldiers calling for $547,000 a year.—Leslie's Weekly.

The Deacon and the Prayer.

"I didn't like your prayer very much this morning," said a fault finding deacon to his minister.

"What was wrong with it?"

"Well, in the first place, it was too long, and then I thought it contained two or three expressions that were unwarranted."

"I am very sorry it meets with your disapproval, deacon," the good man responded, "but you must bear in mind that the prayer was not addressed to you."—Ohio State Journal.

Vulgar Trade.

She shuddered and averted her face.

"To marry for money," she protested, "is to sell oneself, and I can't see why it isn't just as bad to sell oneself as it is to sell dry goods or groceries. Trade is trade."

She was a candid girl and scorned the subtle artifices of logic whereby some are wont to still the voice of conscience.—Detroit Journal.

As to Feathering Nests.

"My experience," said the reformed confidence man who had played the races frequently in his day, "is that it is hard to pick the winner, but comparatively easy to pluck him."—Chicago Tribune.

A durable, reliable, satisfactory one? Then send TO-DAY for our new catalog. We make stationary, portable, marine and hoisting engines. Will operate with gas, gasoline or distillate oil fuel. 2½ to 200 H.P. Not very costly.
Hercules Gas Engine Works
305 MARKET ST. San Francisco, Cal.

4-POUND CATALOGUE FREE
THIS BIG CATALOGUE contains 1286 pages, is 9x12x2 inches in size, contains over 100,000 quotations, 10,000 illustrations, the largest, most complete and lowest priced catalogue ever published. **NAMES THE LOWEST WHOLESALE CHICAGO PRICES ON EVERYTHING** including everything in Groceries, Drugs, Dry Goods, Notions, Clothing, Cloaks, Dresses, Boots and Shoes, Watches, Jewelry, Books, Hardware, Stoves, Agricultural Implements, Furniture, Harness, Saddles, Buggies, Sewing Machines, Crockery, Organs, Pianos, Musical Instruments, Furnishing Goods, Guns, Revolvers, Fishing Tackle, Bicycles, Photographic Goods, Etc. Tells just what your storekeeper at home must pay for everything he buys and will prevent him from overcharging you on anything you buy; explains just how to order, how much the freight, express or mail will be on anything to your town. **The big book costs us nearly $1.00,** the postage alone is 24 cents.
OUR FREE OFFER. Cut this ad. out and send to us with **15 cents** in stamps to help pay the 24 cents postage, and the Big Book will be sent to you FREE by mail postpaid, and if you don't think it is worth 100 times the 15 cents you send, as a key to the lowest wholesale prices of everything you go and we will immediately return your 15 cents.
WHAT THE PRESS SAYS ABOUT THIS CATALOGUE:
"It is a monument of business information."—Minneapolis (Minn.) Tribune.
"A wonderful piece of work."—Washington National Tribune.
"The Catalogue is a wonder."—Manchester (N. H.) Union.
"Sears, Roebuck & Co. is one of the largest houses of its kind in Chicago."—Chicago Inter Ocean.
"The big catalogue forms one of the finest shopping mediums that could possibly be sent into a district."—Boyce's Monthly, Chicago.
"Their catalogue is a vast department store bolted down."—Atlanta Constitution.
"The catalogue is certainly a merchandise encyclopedia."—Chicago Epworth Herald.
"A law should be passed compelling the use of this catalogue in all public schools."—The Hon. G. A. Soutiteug.
We could quote thousands of similar extracts. Send 15 cents at once and you will receive the 4-pound book by return mail. Address, **SEARS, ROEBUCK & CO. (Inc.), CHICAGO, ILLINOIS, U. S. A.**

Best Prescription for Malaria, Chills and Fever,
Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form.... Sold by every druggist in the malarial sections of the United States..... No cure, no pay.... Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.
ST. LOUIS, MO., Feb. 6, 1899.
PARIS MEDICINE CO., City.
Gentlemen:—We wish to congratulate you on the increased sales we are having on your **Grove's Tasteless Chill Tonic.** On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2690 dozen **Grove's Tonic.** We also find that our sales on your **Laxative Bromo-Quinine Tablets** have been something enormous; having sold during the late Cold and Grip season 4,200 dozen.
Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.
KEDRON, ILLS.
PARIS MEDICINE CO.,
Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of **Grove's** to where I sell one of the others. I sold 36 bottles of **Grove's Chill Tonic** in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.
Respectfully,
JOHN T. VINYARD.

CONSUMER.
WHITESBORO, TEX., Sep. 13, 1899.
PARIS MEDICINE CO., St. Louis, Mo.
Gentlemen:—I write you a few lines of gratitude. I think your **Grove's Tasteless Chill Tonic** is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of **Grove's Tonic.** My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.
Yours truly,
JAMES D. ROBERTS.

HIS DREAM OF TROUBLE.

Oh, I dream a dream er trouble fo' de
breakin' er de light;
Ol' Satan play de fiddle, en I dance all
night!
I fussin' en I frettin',
En he min' de way I sweatin',
But he still keep up de music en I dance
all night!

I tell him dat I tired, en he ain't a-playin'
right!
But my task is took—he tell me—fer ter
dance all night!
I tell him dat I gwine
Ter de meetin' house, ter j'ine;
But he say: "You know you lyin'!" so I
dance all night!

"Oh, de white man got me hired, en he
comin' wid de light;
How kin I hoe de cotton ef I dance all
night?"
Den he say: "Dat's what you'll do,
suh—
Got de white man dancin', too, suh!
He in de boat wid you, suh, an' he dance
all night!"

Oh, I dream a dream er trouble, but I
rise at break er day—
De devil bust his fiddle strings en up en
fly away;
En whar'ever I's a-stayin'
Dar is preachin', dar is prayin'—
Oh, I done wid all delayin' sence de devil
fly away!
—Atlanta Constitution.

A Young Man's Fancy.

HAROLD WESTERN had been ill for four weeks with typhoid fever, and was now only a weak shadow of his real self, subject to nervous starts and chills, and with just strength enough to turn in bed.

It was in the chill hours of early dawn that he woke with a start and missed the familiar figure that had haunted his bedside for so long, a blue and white figure, with kind, quiet face above it and cool, helpful hands that always did just the right thing.

"Nurse," he called faintly, and a moment more brought the day nurse from the next room. Her blue and white uniform was gone and her stiff white cap. In their place she wore a soft wrapper and her hair was plaited in a heavy braid that hung below her waist. She turned up the gas, drew a low stool to the bedside, and sat down.

"The night nurse has gone," she began, quietly; "you are so much better

HAROLD STUDIED THE TWO.

we thought I could manage alone. You have slept nearly all night, Mr. Western, and now I shall get you your milk and you will go to sleep again."

He followed her lazily, with his eyes while she lighted the alcohol lamp and put the porringer of milk over it. Then she sat down on a chair, her head dropped on her breast and she slept soundly for five minutes, waking when the milk was hot as easily as though she were some sort of machine adjusted to rest just so long.

"So there were two of you," he said, as she came toward him with the milk.

She sat down on the stool by the bedside, holding the drinking tube to his mouth. This action brought her close, and he noted, as he drank, the soft sheen of her hair, the delicate curve of her cheek, the long lashes shading her eyes, the firm, sweet mouth, and the strong, white hands that were ministering to his needs.

"You are Nurse Dimple," he said, as he finished. "I don't remember the other one."

She showed two dimples as she answered, "Yes, that is what you have called me ever since I came. My name is Wade—Emily Wade."

"I like my name best," he answered.

"Very well, but now you are to go to sleep."

But the patient was not so easily disposed of.

"Nurse Dimple," he began, as she turned away, "do patients ever remember what they said and did when they were delirious?"

"I don't know," she answered. "If they do they never spoke to me of it. I hope they do not, for the most of them would feel ashamed of themselves if they did."

"You meant that for me, and you know I remember that I insisted on you calling me Harold or I wouldn't take my medicine or my nourishment. And you did it, too." And he laughed weakly at the remembrance.

"I shall call you something worse than your Christian name if you talk any more. Go to sleep." And she passed her hands over his forehead until drowsiness overcame him.

The next two weeks were very hazy to the young man, and consisted of long naps, with occasional irritating calls to drink gruel or milk.

At last came a morning when the fog cleared from his brain, and he awoke refreshed. Before him stood the nurse, in a fresh blue and white dress, and a snowy cap above her soft brown hair.

"A whole egg this time, Mr. Western, and you look as though you could take it."

He took his egg and asked meekly if he might be allowed to talk, and was granted ten minutes. After he had learned the day of the week and month he asked suddenly:

"Did that night nurse ever come back, or have you taken care of me alone all this time?"

"Not quite alone," she answered. "Your sister, Mrs. Albright, sits with you every other afternoon, and Miss Violet Grant takes the alternate day. She sits in the dressing-room and rings the bell if you stir. She is too shy to run the risk of your waking and finding her here. She has brought a bunch of these violets every morning early, and inquired for you."

"She is a little wood violet herself," he exclaimed, gallantly. "But you, Nurse Dimple, are a very rose for freshness this morning. I prefer roses."

"Spare your compliments, Mr. Western. You are getting too well to be allowed to talk nonense."

"Yes, I am better, thanks to your care," he said, soberly; "but if I am not to be allowed to say what I think and feel toward you I shall wish myself back into the days of weakness and delirium, when I made you do what I wished."

"Your ten minutes are up, Mr. Western," Miss Wade said, a little sharply, and she set about tidying up the room with unnecessary swiftness.

Harold continued to gain each day, and seeing that direct love-making was distasteful to his nurse, and that more careful advances must be made, he turned to studying her likes and dislikes, talking over books with her and getting her to read passages from his or her favorites. Thus a very real and pleasant friendship sprang up between them.

But Miss Wade could not help seeing that the lad was growing to love her, and many long hours at night she debated the question with herself. Harold was much younger than Miss Wade, very handsome, and would soon be very rich. It was a temptation to the woman, who knew just what the world had to offer her.

She had nursed eight years, and knew that two more were about as many as the average nurse could do. Then would come some offer to become matron of an orphan asylum or some similar position, or else she would be obliged to hunt for a chance as companion to some nervous crank or old person. It was not a tempting future to look forward to, and here before her was ease if she would take it.

The thought of Violet Grant always intruded just as she had made up her mind that she would encourage Harold's love-making. "I am afraid that she loves him," was the thought that closed all soliloquies.

Little Violet Grant, with her shy tribute of flowers, her patient waiting in the little dressing-room, and her eager questions about Harold's welfare. It brought Harold's thoughts to a troubled pause, too, whenever he was allowing himself a day dream about Miss Wade. He and Violet had been schoolmates, and he admired her shy, sweet ways, and had given her many reasons to think she was dear to him, though he had never directly proposed to her.

"But, oh, dear!" he would sigh, "she is just as I said, a violet, while my nurse Dimple is a full-blown rose. I wish she wouldn't bring those confounded flowers."

Miss Violet was in love in her own way with Miss Wade, too, considering her the savior of the boy she loved so tenderly; the twelve years between them made the nurse seem an impossible rival. She chatted with her quite freely one afternoon, telling her how pleased she was that Harold would be dressed and on the veranda in a day or two. "I owe you so much, Miss Wade," she finished, with a pretty blush and eyes full of tears.

Miss Wade went up to her own room with hot cheeks. "And you planned to rob her," she scolded at her reflection in the glass. "Well, that's over, you mercenary wretch," and with the same firm expression she wore when controlling a delirious patient she went downstairs.

Harold was asleep when she came into the room, and he looked boyish, even with a six-weeks' growth of silky beard on his chin. "What a fool I was to think the boy could be happy with me, or wouldn't hate me in a year," she thought, and laughed grimly.

The next day Harold was well enough to be dressed and wheeled out on the veranda. It was a June morning, and Violet Grant came up the path with her arms full of roses.

"I overheard you say you liked roses better than violets, Harold," she said simply, "and, oh, I am so glad to see you getting well."

Harold took both her hands and pressed them warmly, reddening suddenly with something like shame.

Miss Wade came out just then with a magazine in her hand and declared she would have to read them a story, else they would talk too much for her patient's good. So violet produced a bit of embroidery and Harold leaned back luxuriously in his chair and quietly studied the two before him.

Violet was small and very fair, with faintly pink cheeks which blushed easily and prettily, and big blue eyes that had never lost their baby expression of depth and innocence. Her hands were very small and slender, and handled her embroidery floss as though meant for such work only. She wore a pale pink muslin that floated about her softly, making it seem as though she perched on her chair like a butterfly. One tiny toe tapped the floor as she rocked back and forth. The big blue eyes sought Harold's, and smiled frankly and happily while the color deepened in her cheeks.

Harold answered the smile and turned embarrassed toward the reader. In her he saw a face and figure we oftenest describe as comfortable, and to such we turn instinctively in time of distress of any kind, but at other times fail to admire.

"How big she is 'side of Violet," thought Harold, "and how much older she seems out here in the sunlight than she did when I was sick. Why, she must be 30. What a fool I was!"

And he turned once more toward the girl of 18 with a love glance that sent the blushes racing over her sweet face.

At the close of the story Miss Wade went in to make an eggnog, and Violet rose to go.

"I shall be 21 next week," said Harold, "and I shall have something to tell you, Violet, my violet," he whispered, as she gave him her hand. "I promised father I wouldn't engage myself till I was 21, but I didn't promise not to love any one. Do you love me, Violet?"

"I'll tell you next week," she answered with a laugh, and ran away, blushing.—Boston Globe.

TINY CHINESE MAID

Captivated an Entire Train-Load of Admirers by Her Quaintness.

A tiny Celestial Queen held in absolute sway a transcontinental express that recently made its way from San Francisco to New York. She ruled by right of beauty and sweetness, and every man, woman and child aboard acknowledged her sovereignty. Dressed in her quaint Oriental costumes, she accepted the homage paid her with a demure grace that went to every heart.

The little maid was traveling with her mother, Lam Sheng, and her father, Chu Moy Yen. Mr. Yen is employed in a railway office in New York, and, though he has been married eight years, he was only now bringing to his home in America his wife and child.

Mrs. Yen was one of the Chinese beauties of Hongkong before her marriage, and was the daughter of a wealthy tea merchant, who had amassed a fortune in the trade with the United States.

That was how Mr. Yen, who was brought up and educated in America, found favor with the merchant in China, and was permitted to marry his daughter. After the marriage Mrs. Yen could not make up her mind to leave China, and her husband had to return without her.

This summer she consented, and with her little daughter Bo left Hongkong for Port Townsend. Her husband met her there and brought her to her New York home. Mrs. Yen is an Oriental lady of quality in every respect. She has received the advantage of an education, accorded few Chinese women, and speaks English, very brokenly, to be sure, but with sufficient command to make herself understood.

Little Bo has not mastered the language so well, though she smiles prettily and says "Pretty, pretty," when pleased. The costumes of the mother and her child were quaint and attractive. Both were dressed alike, with the single exception of colors, the head being uncovered, and the garments consisting of a voluminous overdress of silk, with flowing sleeves, and silk trousers, covered with a very wide sash of the finest silk.

Mrs. Yen wore an overdress of blue silk, while Bo was dressed in lavender, trimmed with black. The seams were covered with the daintiest of silk embroidery, and both wore jewels. Little Bo had a circlet of velvet, with pendants of strings of pearls at the end of which were sapphires, and wore earrings set with turquoises and small diamonds.

The mother wore a magnificent pair of turquoise earrings, carved in the shape of a crescent. Her slippers, of white silk, which incased feet hardly half the size of those of her little daughter, were embroidered with garnets, turquoises and sapphires. Her long black hair was caught with a bow set with a large number of exceptionally brilliant pearls.

They Knew His Business.

Professor Frank Rees, of Columbia University, who holds the chair of astronomy there, was a visitor recently at a county fair, where he soon made himself quite popular. While resting in a refreshment tent he overhead women discussing him.

"So he's an astronomer? I wonder how it pays?" said one.

"Pretty well," said another; "he tells fortunes from the stars at 50 cents apiece."

"That isn't all," added a third; "he makes almanacs, with jokes and advice to take pills in the spring, and the druggists pay him as much as $50 for them."

The professor arose and fled.—Philadelphia Post.

Returned the Compliment.

The obsequious person who seeks fees from travelers by pretending to mistake them for noblemen occasionally meets one who does not fall into the trap. The following example is taken from an English paper:

An Englishman gentleman of somewhat imposing personal appearance had a door opened for him at the Paris opera-house by an usher, who bowed low and said, "The door is open, prince."

The Englishman glanced at him, and without extending the expected fee, simply said, "Thank you very much, viscount."

For Mine Fires.

Carbonic acid is now successfully used for extinguishing large fires in coal mines. It is taken into the mine in a liquefied state in steel cylinders and liberated.

Not Guilty.

She—Is your friend a literary man?
He—No, indeed. He never knew what it was to be broke.

As many as 4,061 muscles have been counted in the body of a moth.

CHICAGO SETS A PACE.

NEW POSTOFFICE AN ARCHITECTURAL INNOVATION.

The Old and Gloomy Models Give Way to More Modern Ideas—Designed for the Future, It Will Be Up to Date in All Particulars.

It remained for Chicago to persuade the federal government to violate the traditions of a century in the construction of federal buildings. Gloom, deep and unbending, heavy fortress or prison-like masonry, angularity of architecture, models old as ancient Greece and Rome, but lacking utterly in the graceful lines of either, these had always been the types chosen for government

POSTOFFICE BEFORE THE FIRE.

buildings. The idea that an officer of the national government could, would, should or might be permitted to perform his duties in a modern office building never occurred to the federal mind. When first broached this proposition took the federal breath in a tight cinch. But something of this kind was de-

GOVERNMENT BUILDING AND POSTOFFICE AT CHICAGO.

manded by Chicago to replace the old unsightly postoffice, and Chicago won.

But the new building, the cornerstone of which was recently laid by the President, is only a modification and not entire change of scheme. The combination of lofty dome, beautiful classic colonnades and light airy office building has resulted in the planning of a

SECOND HOME OF POSTOFFICE
Clark street, near Randolph.

noble, imposing and handsome structure. With such a new home for the postal authorities of the city it is well that the Chicago proposition to make it a modern office building entire was not adopted. Few national buildings in the world will exceed that of Chicago in gracefulness of lines, nobility of architecture and adaptability to modern requirements.

In form the building will be a gigantic cross surmounted by a dome fashioned after that over the national Capitol. Fourteen stories will run up to the base of the dome. Hundreds of large,

SECOND GOVERNMENT BUILDING.
On Site of New Building.

well lighted and ventilated rooms will be provided for the Federal officers who are now scattered all over half a dozen buildings. Wide wings will fill in the ground space on each side of each arm of the cross.

These wings, with the ample basement, will furnish plenty of room for the enormous postal business of the city. The main structure will be fitted up with offices and courtrooms for the officials of the Government having stations in Chicago. The structure will be an ornament to the city in marked contrast to former productions from the office of the Federal supervisor of buildings. It will represent an outlay of $4,000,000 at least, that sum having been already appropriated for the construction. With the valuable land on which it will rest it will represent an investment for Uncle Sam of some $10,000,000. Quite a tidy sum to be laid away in one building and site.

The Chicago postoffice has enjoyed quite a migratory career, made necessary by the rapid growth of business. It has been made homeless three times by fire, and for a series of years, between 1855 and 1879, skipped about merrily. The office was established first in 1831 in a small building in Clark street near the bridge. Then it moved successively along that street into half a dozen storerooms rented in the absence of a federal building. In the spring of 1855 the first regular home of the office was commenced. It was in Monroe street, cost nearly $500,000, and was an admirably adapted structure for the purposes for which it was designed.

There the office remained until wiped out by the great fire of Oct. 9, 1871. Its business had grown meanwhile to over $2,000,000 cash annually, and a force of 405 clerks and carriers was employed in transacting the business. The office was moved to the Wabash Avenue Methodist Church for a temporary home from Burlington Hall, where it had been hurriedly placed immediately after the fire. This new home was burned and the office was moved to the basement of the Honore Building following the second great fire in 1874. On Jan. 4, 1879, this building was burned and temporary quarters were established in the Singer Building, Washington and State streets.

But the recently demolished structure was nearing completion and the office was speedily moved therein, to remain until the necessity for a new building. The old one was never fully completed, a couple of stories being lopped off the top to enable the postmaster to get into the building at once. It housed the office for nearly twenty years, half a dozen of the later ones being under the shadow of fear of collapse. But the new steel structure will give the second office in the nation the handsomest and best equipped home in America.

Ozark Agriculture.

Ozark humor appreciates the story that a scientist was quite amazed the other day at observing a farmer, after killing a nest of snakes turned up by the plow, arrange the dead snakes in the furrow before he went back to the plow.

"Why do you do that, my good man?" the scientist asked.

The farmer looked curiously at the scientist, and, seeing that he was really in search of information, replied:

"I do that so the plow will cover the snakes on the next round."

Seeing that the scientist was still mystified, the farmer continued:

"I cover the snakes so that they will decompose. That is what you call it, isn't it?"

"Yes?" said the scientist, with a rising inflection.

"Well," continued the farmer, "the decomposition of animal matter furnishes nourishment for plant life, I believe?"

"es?" again said the scientist.

"Then, snakes will make corn grow, won't they?" triumphantly asked the farmer.

"Yes?" said the scientist.

"And more corn will make more whisky, won't it?" said the farmer.

"Yes," said the scientist.

"And whisky will make more snakes, won't it? Mister, that is what we call rotation in the agriculture of this region."—St. Louis Globe-Democrat.

Surprised the Congregation.

Two little folks went to church alone. It was only around the corner from their home, and their mamma knew they would be safe. During the long sermon they got tired, and the older one, supposing that the school rules held good in church, led her sister up in front of the pulpit and said: "Please, may we go home." Much surprised, the clergyman gazed at them over his spectacles; then he understood and said: "Certainly, my children." And the two toddled out, while the congregation smiled.

Kitchener Corrected the Metaphor.

Lord Kitchener has little sense of humor and is not at home in the small cut-and-thrust skirmishes of general society. At an official ball once he remarked to a young lady who stood beside him: "We are fortunate in having these places for standing here. We shall see the first entrance of the new Turkish and French ministers into London society." The young woman replied: "I am glad to hear it; I like to see lions break the ice." Kitchener was silent for a few minutes, but presently said: "Miss Anderson, in the country where lions live there is no ice."

Is It Malaria Or Alum?

Langour, loss of appetite, indigestion and often feverishness are the common symptoms of a physiological condition termed "malaria." All these symptoms may be and frequently are the effect of the use of alum baking powders in food making. There is no question about the poisonous effect of alum upon the system. It obstructs digestion, prostrates the nerves, coagulates and devitalizes the blood. All this has been made clear, thanks to physicians, boards of health, and food commissions. So "highly injurious to the health of the community" does the eminent head of the University of Pennsylvania, Dr. Barker, consider the alum baking powders, that he says "their sale should be prohibited by law."

Under these circumstances it is worth the while of every housewife to employ the very little care that is necessary to keep so dangerous an element from the food of her family.

A pure cream of tartar baking powder, which is the only kind that should be used, ought to cost about forty-five to fifty cents a pound. Therefore, if you are paying much less, something is wrong; if you are paying twenty-five cents or less per pound, the powder is certainly made from alum.

Always bear these simple facts in mind when purchasing baking powder.—Popular Science Monthly.

His Modest Luncheons.

"The ordering of my luncheon used to be a great nuisance," said a lawyer yesterday. "I would go into a cafe, perhaps pretty hungry, but two or tree minutes' study of the huge menu would put me in an uncertain, irritable mood, and no matter what I'd order I wouldn't enjoy it on account of the thought that I might have ordered something different and better. It was like going into a public library to read. With so many books there, it is impossible to sit down and read one book contentedly, as you can at home. But now I have an arrangement that makes my luncheon a joy. I said to my waiter one day:

"'What I eat here at noon costs me, on the average, $1.25, and my average tip to you is 20 cents. Now you ought to know what a nice luncheon is better than I do, so I make you this proposal: Serve me every day a lunch of my usual number of courses, and whatever under $1.25 it costs you can keep.'

"The waiter jumped at that. He brings me every day now a better meal than I would think of ordering myself, and he makes from 20 to 30 cents by keeping down the price. It is a splendid scheme, and I wonder why I never thought of it before."—Philadelphia Record.

They Don't Know Nerves.

Those who know the Chinese best have been particularly struck with their absence of nerves. The foreigner fidgets, the native sits still; balmy sleep, especially in hot weather, will resist the foreigner's sweetest wooing, while to the native lying on a heap of stones or across the bars of a wheelbarrow she comes as a matter of course; we need constant change and variety, they would find contentment and rest on the treadmill.

"It would be easy," says Mr. Smith, "to raise in China an army of 1,000,000 men—nay, 10,000,000—tested by competitive examination as to their capacity to go to sleep across three wheelbarrows, with heads downward, like a spider, their mouths wide open and a fly inside!"

From which it is evident, says The North China Herald, that in a crusade against noise we can hope for no assistance from our native fellow townsmen, but instead a great amount of vis inertiae, if not positive opposition.

A Chinese Dooley.

Two Irishmen stood at Gates avenue and Bedford street discussing a Chinese laundry sign.

"Kin ye say it, Pat?"

"Where?"

"There. Don't ye say it?"

"Oh, Oi do now."

"Well, they say a Chinaman's furst name is his last name. Do ye blave it, Pat?"

"Yis."

"Then rade it backward."

"But rade it furrud furst, an it spells Lee Dew."

"But rade it backward, man."

"D-e-w, Do; L-e-e, Le—Dooley."

"Roight ye are, Pat, an Dooley is a foine old Irish name, but it's the furst toime in me loife Oi iver heerd of a Chinese with an Oirish name. He ought to hang, the spalpeen."—New York Press

His Style.

"I have been considering your application for an editorial position," said the managing editor, "and I sent for you today that I might get some idea of your style."

"Just so," replied the bright young man. "Well, you will observe, I am wearing a blue suit, plain, but well cut, and a brown soft hat; quite the proper thing for this time of the year. Will I do?"

In Cuba.

In Cuba the kitchens are always on the roof or in the courtyards back of the house. Only twice a day does the Cuban housewife or servant prepare meals—at 10 o'clock, when she enters the kitchen to make ready 11 o'clock breakfast, and at 6 o'clock to cook the dinner, which is served at 8.

Those Loving Girls.

Tody—Jennie tells me young Woodby proposed to her last night.

Viola—I don't think I know him. Is he well off?

Tody—He certainly is. She refused him.—Chicago News.

Effect of Opulence.

When a man gets beyond wondering where his next meal is coming from, he falls to wondering who his ancestors were.—Detroit Journal.

HOAXING A BRITISH FLEET.

How a Stupid Irishman Baffled the English Sailors.

An amusing story is told of the hoaxing of a British fleet by "a stupid Irishman" during the recent naval maneuvers. It appears that during an attack on Bere Island by some of the vessels of the "B" fleet the officer at the Hut received instructions from Castletown coast-guard station to gather up all telegrams and secret plans, send a man away with the same to hide in a cave, and on no account to let them fall into the enemy's hands. With the remainder of his crew he was then to show fight until the last. In the meantime an attacking force of eighteen men and an officer had been landed, which marched to the Hut and secured its surrender. All search for the secret papers, however, proved useless, and the men at the Hut maintained a profound silence to all interrogations. During the afternoon one of the men of the Castletown coast-guard station had been sent to Bere Island with the pay of the men. Upon arrival there he proceeded at once to the Hut (having previously disguised himself) and found himself surrounded by the invaders, who wanted to know his business. He posed as an old naval pensioner, stating that he was a native, and was trying, with the help of his small pension, to make a living on the island by cutting and selling turf. He had provided himself with a turf-cutting spade in order to give color to his story.

The sailors of the invading party were very sympathetic, and advised him to go to England, where he would be sure of getting work in one of the royal dockyards. After getting the invaders into a good humor he immediately went in search of the man with the secret documents in his possession. With the aid of some of the islanders he found the man he was in search of, took from him all the documents, which he hid in two baskets of turf, and returned to the Hut. This time the sub-lieutenant in charge of the invaders took him in hand and closely questioned him with a view to obtain some reliable information regarding the defenders, but all to no purpose. At last the sub-lieutenant dismissed the man, with the remark that he was the most stupid Irishman that he had ever met. Little did the officer imagine that the supposed stupid Irishman was the very man they wanted, as at the time he had in his possession all the documents the invaders were searching for.

During the night the enemy's flotilla left Berehaven, going west, disconnecting the telephone at the Hut before leaving.—Westminster Gazette.

PLEASANT SUMMER HOUSE.

Something that the Children Will Thoroughly Enjoy.

A nice little summer house may be constructed from an old umbrella and the stump of a tree. Sometimes this stump is planted full of vines and flowers and then it is a thing of beauty, but oftener it is left unadorned and ugly. Some little girls made a nice playhouse for themselves this summer by boring a hole in the middle of the

A COZY LITTLE SPOT.

stump in their yard and putting down into the hole the handle of an old red umbrella, whose best days had gone by. Stout twine had been tied on each point of the umbrella and fastened to a peg driven in the ground near the stump. Then vines were planted, which crept up these pillars of twine, making just the nicest little retreat imaginable for a hot day.

A Chivalrous Urchin.

The first specimen of true manly chivalry—the very pattern of a small knight who holds the rights of his lady love sacred—was encountered the other day in a Cambridge kindergarten. The teacher discovered that a very small boy, not more than 5 years old, was chewing gum, and she ordered him out and bade him disgorge it.

"I can't," he said.

"You can't?" she answered in surprise. "Why, yes, you can, and you must."

"No, I can't," he persisted, and kept the gum in his mouth.

"Now, why can't you give me that gum, Johnny?" the teacher asked.

"Because," said Johnny, stoutly, "it belongs to a little girl in Somerville."—Life.

Literary Switzerland.

A French statistician records that Switzerland produces annually more books than any other country in proportion to the number of inhabitants—namely, one to every 3,000. Germany comes next with one to every 3,200, Italy with one for 3,300, France one for 3,500, England one for 6,500 and the United States one for 12,400.—Pittsburg Post.

"Don't leave the table," said the landlady, as her new boarder rose from his scanty breakfast. "I must, madam; it's hard wood, and my teeth are not what they used to be."—Tit-Bits.

Some men get up in the world only as high as the elevator runs.

RYE AS A FORAGE PLANT.

Its Advantages and How It Is Grown in Various States.

L. H. Pammel of Iowa, who thinks the value of rye as a forage plant is not appreciated as it should be, writes of it as follows in The Prairie Farmer:

If used during the fall or winter, rye should be started early in the season, as early in September as possible; then it might be pastured through October and November without detriment. Care should, however, be taken not to stock too heavy. In western Wisconsin, where considerable quantities are sown, it is started early in September. During October and November sheep are allowed to range on it. It will not do to turn cattle in, as they are very apt to injure it by tramping.

In most parts of the country rye has been chiefly grown with reference to its value as a summer forage plant. Thus in Alabama it was found when sown in the summer it gave an abundant amount of green fodder and three or four cuttings during the fall and winter. At the Vermont station it was found "that rye sown in September gave abundant green fodder for cows up to the middle of May, but afterward the stalks became tough and unpalatable. On May 16 the heads were just beginning to show and the crop was in fine conditon for cutting to feed green to cows. Its value at this stage is quite high, an analysis of the sample showing 17.39 per cent of albuminoids in the dry matter, while clover was only 14 per cent and timothy but 7 per cent. This would make its feeding value per acre equal to about three tons of hay. A part of the field cut May 27 came up again and made quite a respectable second growth."

We have seen rye tried at numerous places in this state, and where it was sown in September it gave an abundant yield of forage by May 1. It was even possible to pasture from the middle of April to the first of May without detriment.

One other advantage of rye is that when cut for hay early in the season before it blossoms it is possible to harvest two or three crops. It readily stools from the base, and it is the only one of our cultivated cereals in which this is the case. In fact, rye is a perennial and is extensively used as a forage plant in western Asia.

A Farm Convenience.

Scandinavian farmers in the northwest have preserved a number of old country devices for buildings and tools, some of which gain favor with friends and neighbors of those who put them into practice. A drawing of one of these sent to The Ohio Farmer represents two half doors of the common type. The lower one carries near the top a tool box, the usefulness of which goes without question, as it is always easily accessible both from without and from inside of the barn. Whatever articles are commonly placed in the window, on dusty shelves, on crossbeams and in odd corners should find their way into the door box, so that one might always know where to find things instead of hunting them up and losing one's time and temper.

CANDY BARN DOOR.

One Thing and Another

I consider corn fodder better feed for stock than pasture, especially when the pasture is run down, as so many are in the western states. I prefer to cut, for feed, corn that was planted late and that has rather small ears. This makes a splendid feed for all kind of stock, says a Prairie Farmer correspondent.

July is the critical month for corn, and The Kansas Farmer says that a more favorable month than it has been in the Kansas corn belt can scarcely be imagined.

Notice of Sheriff's Sale.

By virtue of an execution issued out of the Superior Court of the State of California in and for the County of Inyo, Nevada, dated the 9th day of November, 1899, in a certain action wherein F. B. Gustafson, Henry Anderson and Oscar Wheeler as plaintiffs recovered judgment against Albert Wibbelt, defendant, on the 3rd day of August 1897, for the sum of twenty five hundred and eighty eight and forty one hundredths ($2,588.40) dollars and costs of suit, I have levied upon the following described property, to wit:

That certain mining claim situate in the Argus Range of Mountains in the County of Inyo State of California, known as the "McKinley" Gold Quartz Mining Claim, together with all the rights, members and appurtenances thereunto belonging.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Albert Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, the 22nd day of November, 1899.

A. M. GIVEN, Sheriff.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.)
GENERAL LAND OFFICE
Independence California.

A protest having been filed in this office by Rafael Rossi, against Lieu Selection, No. 390, by C. W. Clarke, for the NW¼ of SE¼ of Sec. 33, T. 8 S., R. 34 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter said C. W. Clarke and R. Louis Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 60. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

Georges Creek—1st, 2d and 3d Sunday in each month at 2:30 o'clock p. m.

Keeler—The Saturday preceding the 2d Sunday in the month at 7:30 p. m.

Fort Independence—4th Sunday in the month at 3 o'clock p. m.

SUNDAY SCHOOLS.

Lone Pine, 10 a. m.; Georges Creek, 1:30 p.m.; Independence 2 p. m.; each Sunday.

Teachers' meeting for the study of the Sunday-school lesson each Thursday evening at 7 o'clock.

All are cordially invited these services as they are convenient for them.

JOHN JAY PARDEE, Pastor.

DIED.

PALMER—At Lone Pine, December 12, 1899, George H. Palmer, a native of New Hampshire, aged 67 years.

—The deceased lived in Lone Pine for many years and by his death one of the old landmarks of the town's early history is obliterated save in the memory of those to whom he had endeared himself by many acts of kindness.

Col. W. R. Woodard has just arrived.

George Montgomery leaves to-day for Ballarat.

Don't miss having supper at the Independence hotel December 22, 1899. *

Mrs. L. F. J. Wrinkle spent a day in town this week, the guest of Mrs. Montgomery.

Ben. H. Yandell Esq. got back last Saturday from a two weeks visit to Los Angeles.

P. H. Mack Esq. leaves for Los Angeles to-day where he will spend the Holidays with his family.

John Anton spent Wednesday evening at Independence on his way home to Lone Pine from Bishop.

Johnny Underhill has built a brick saloon building at Mojave and will open with a masquerade ball on the 20th.

George Coffee and Charley Kistler have taken a contract to cut and deliver 1,000 cords of wood to the Radcliffe Company at Ballarat.

They are making extra efforts to give the finest turkey and chicken supper at the Independence Hotel December 22nd Don't miss it.

E. Robinson has returned from his recent visit to Los Angeles. His son Arthur has gone to San Jose where he will remain for some time.

Peter McGann claims that about two weeks ago a party stole six head of his best mules from the Peregrine ranch near Laws. After an exciting chase his son Richard overtook the marauder at the Collins ranch and recaptured the animals

The Cooper mine at Stone Corral has made a run of ten tons of ore which yielded a bar of bullion valued at $1,000 and there are twenty-five tons yet to be run through. Mr. Cooper has the little four-stamp Ward mill that was formerly in Kearsarge canyon.

A fine lot of fresh fish were received at the Independence Market on Wednesday from San Francisco. They were a great treat and went like hot cakes. Mr. Roeper has made arrangements to have an assortment of fish and oysters shipped regularly during the winter months.

If you attend the dance December 22d take your lady to the Independence Hotel for supper. *

T. N. Stebbins, Superintendent of the World Beater mine in Pleasant Canyon, is doing a lot of development work. The Bryan mill is equal to a ten-stamp mill and is crushing twenty five tons per day. At present they are makins a clean-up of the dump, after which they will run on first class ore.

J. S. Phyler, one of the parties who have a bond on the Barnes & Anderson mine, arrived at Independence last Friday evening and remained until Tuesday morning. Mr. Phyler expressed himself as being very well pleased with the property so far as development work has gone and there is enough ore already developed to warrant the purchase of the mine. The new steel whim is now being put in place and active work will be continued on the main shaft. A new shaft has been started during the past week.

AFTERNOON, 1 O'CLOCK.

Music.
Unfinished Business.
Miscellaneous Business.
Reports of Committees.
"Auld Lang Syne."
Adjournment.

It has been storming heavily in the mountains all the week. Two men who came down from the Kearsarge mine on Wednesday report that three feet of snow fell there Tuesday. It began snowing in town at daylight this morning and after covering up the ground enough to furnish snowballing amusement turned to rain which still continues.

Soon Be Commenced.

It may be taken for granted that work on the extension of the railroad from Johannesburg to the Ballarat mining district will soon be commenced. What direction the road will take from Ballarat is something that those with whom the matter rests do not themselves know. The matter stands pretty much this way. The Randsburg railroad, which goes from Kramer on the line of the Santa Fe-Pacific to Johannesburg, is a good piece of road, but it is not good enough, nor is there enough of it to make it a profitable investment to those who own its stock. The rood wants more business and to get it it must reach out for it. That is what its managers are now seeking. While doing that it is more than probable that they also see something beyond the new business they will get from the extended road. They see something in the form of an overland connection which will make the present Randsburg road an important link in a new trans-continental road. The Randsburg railway people are keeping mighty mum but they are doing a terrible pile of thinking these days. Their thoughts are going to assume material form pretty soon.—*L. A. Mining Review.*

Real Estate Transfers.

The following deeds have been recorded since November 30, 1899:

United States to Luke E. Smith—Aug. 13, 1899. 160 acres at Blackrock; patent

George P. Brady to William S. Goff—Oct. 14, 1899. Norval mines, Slate Range

Estate of Josiah G. Dodge, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Josiah G. Dodge, deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said administrator at his place of residence at Lone Pine, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

NORMAN M. DODGE.
Administrator of the estate of Josiah G. Dodge, deceased.
Dated at Lone Pine, November 23rd, 1899.

HOMESTEAD, FINAL PROOF.

U. S. LAND OFFICE, Independence, Cal., Oct. 21, 1899.

Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim and that said proof will be made before the Register and Receiver at Independence, Cal., on December 18, 1899, viz.:

JAMES DRURY,
for the NE ¼ of Sec 15, T 13 S, R 35 E, M D M

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz.: William J. Lake, Frank Lawrence, Arlington F. Mairs, William H. Huff, all of Independence, Cal.

S. W. AUSTIN, Register.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles dated the 9th day of November, 1899, in a certain action wherein P. B. Mathason, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Theodor Wibbelt, defendant, on the 31st day of July, 1899, for the sum of two thousand and forty-five ($2,045.00) dollars and costs of suit taxed at twenty-two and sixty-five hundredths ($22.65) dollars, I have levied upon the following described property, to wit: Those three certain mining claims situated in the Argus Range of Mountains, in the County of Inyo, State of California, known as the "Westphalia," the "McKinley," and the "Iron Queen" Gold Quartz Mining claims and also those two mining claims situated in the Slate Range of Mountains in said County of Inyo known as the "Matura" and the "Los Angeles" Gold Quartz Mining claims, together with all the rights, members and appurtenances thereunto belonging; also fourteen thousand (14,000) feet of iron pipe running from the spring in Big Canyon to the Ballarat stage road in said County of Inyo; also the right to take and use the waters of said spring.

Notice is hereby given that on Wednesday the 3rd day of January, 1900 at the hour of twelve o'clock, noon, in front of the Court house at Independence, in the County of Inyo I will sell all the right, title and interest of the said Theodore Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, November 22nd, 1899.

A. M. GIVEN, Sheriff.

Commissioner's Sale.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

George Collins, Administrator of the estate of Catherine Motz, deceased, Plaintiff, vs. George A Free, Defendant.

Under and by virtue of an order of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 3d day of November, 1899, in the above entitled action, wherein George Collins, Administrator of the estate of Catherine Motz, deceased, the above named plaintiff, obtained a judgment and decree against, defendant, George A. Free, on the 3rd day of November, 1899, which said decree was on the 3rd day of November, 1899 recorded in Judgment Book No. 2 of said Court at page 124. I am commanded to sell, and by said decree the same is directed to be sold, all those certain lands and premises situate, lying and being in the County of Inyo, State of California, and bounded and particularly described as follows, to wit:

The south-west quarter of the north-west quarter, the north half of the south-west quarter, and the south-east quarter of the south-west quarter of Section No 25, in Township No. 7 South, of Range No. 33 East, Mount Diablo Meridian.

Together with all and singular the tenements hereditaments and appurtenances thereunto belonging, or in any wise appertaining.

Notice is hereby given that on Saturday, December 16th, 1899, at the hour of 10 o'clock a.m of that day, in front of the Court House of said County of Inyo, at Independence, in said county, I will in obedience to said order of sale and decree of foreclosure, sell the above-described property, or so much thereof as may be necessary, to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in lawful money of the United States. BEN H. YANDELL,
Commissioner.

Dated November 13th, 1899.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING SEPTEMBER 30TH, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending September 30th, 1899.

Respectfully submitted,
W. T. BUNNEY, County Treasurer.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist., Inyo County, California, and from J. H Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE.

TO ALL WHOM IT MAY CONCERN: Notice is hereby given that the undersigned, owners of those certain mines or mining claims situate, lying and being in the Union Mining District, County of Inyo, State of California, commonly known and designated as the "Alhambra" and "Black Eagle" mines, have made and entered into an agreement to sell said mines to Peter Kimberly; that said agreement is now of record in Book "A" of Bonds, page 294, records of said Inyo County; that under the terms and conditions of said agreement the said Kimberly has the right to work said mines at his sole cost and expense; that from the date hereof the said mines, nor the ores produced therefrom, nor the undersigned will be liable or responsible for any labor or improvements done or made upon the said mines, or for any material furnished therefor by any person without a written order from said undersigned.

Dated November 25, 1899.

Thorite, the New Explosive.

Distinguished itself by passing through a 4½ inch steel plate. If its success continues, it will make a great record in the military world as Hostetter's Stomach Bitters in the medical world. Nothing has appeared which can equal this wonderful medicine for all diseases of the stomach, liver or kidneys.

Consistency is a jewel, but most young women prefer diamonds.

SHAKE INTO YOUR SHOES

Cheap politicians are like cheap shoes, that is, machine made.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address,

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.
Hall's Family Pills are the best.

I know that my life was saved by Piso's Cure for Consumption.—John A. Miller, Au Sable, Michigan, April 21, 1895.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd. 930 Arch St, Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

An Insect Tragedy.

There is something really pathetic in the way a mother butterfly builds a nest for her children. In the first place, the little home where the eggs are deposited represents a great deal of sacrifice, for it is lined with several layers of down plucked from the mother's own soft body. The eggs having been laid carefully upon this luxurious, pretty couch are protected by an equally pretty coverlet made of the same material.

These butterfly bedclothes are often arranged with an intricacy that is quite curious and perplexing. Sometimes a bed is made so that each separate delicate hair stands upright, thus giving the entire nest the appearance of a little brush of downy fur. Then again, the eggs are laid spirally round a tiny branch, and, as the covering follows their course, the effect resembles the busy tail of a fox, only the nest is more beautiful than the "brush" of the finest fox that ever roamed over country.

The building of this downy nest is the latest earthly labor of the mother butterfly, for by the time it is completed her own delicate body is denuded of its natural covering, and there is nothing left for her to do but die, a sacrifice which she promptly and heroically makes in the interest of the coming butterfly generation.

An Intelligent Censor.

No play may be publicly performed in England until it has been passed upon and agreed to by the stage censor. A certificate must be secured from the lord chamberlain. The lord chamberlain himself does not, of course, read all the plays submitted to him, but the work is passed on to the examiner of plays, who is not always a man of education or discretion and who in many cases has been suspected of letting things pass because managers have made it profitable to him to close his eyes to supposed faults.

The story is told of one of these examiners who was moved to strike out "drunk as a lord" in one of the plays submitted to him. There used to be an old rule that the word "heaven" should be substituted in stage lines wherever the name of any of the persons of the Trinity came up. So this clever examiner changed the line to read "as drunk as a heaven."

The penalty for disobeying the examiner is a fine of $250, which may be levied on any person connected with the forbidden performance—callboy as well as star.

Up to the New Standard.

"I understand you are looking for a servant," said the girl.

"Oh, dear, no," answered the lady of the house. "When I was first married I was foolish enough to occasionally look for a servant, but I got over that. I'm looking for a general supervisor of the household now."—Chicago Post.

Safely Stowed Away.

Mamma—Willie, did you eat that jam?

Willie—Why, mamma, I heard the rats in the closet, an I jest thought I'd move it out of their reach.—Philadelphia American.

"The Best is the Cheapest."

Experience teaches that good clothes wear longest, good food gives best nutrition, and a good medicine that cures disease is naturally the best and cheapest. Hood's Sarsaparilla is the best medicine money can buy, because it cures when all others fail.

Poor Health—*"Had poor health for years, pains in shoulders, back and hips, with constant headache, nervousness and no appetite. Used Hood's Sarsaparilla, gained strength and can work hard all day; eat heartily and sleep well. I took it because it helped my husband to whom it gave strength." Mrs. E. J. Giffels, Moose Lake, Minn.*

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; the non-irritating and only cathartic to take with Hood's Sarsaparilla.

GOING ABOUT INCOG.

MONARCHS SOMETIMES HAVE STRANGE ADVENTURES.

Amusing Stories of Royal Personages Who Have Divested Themselves of All Signs of Their Rank and Traveled as Common People.

Many amusing stories are told of the adventures of royal personages when they have divested themselves of what may be called their official dress and assumed the guise of ordinary mortals. And noone loves more to tell these tales of misadventure than the royalties themselves.

The Czar still recounts the story of an experience he had some years ago in Scotland. It was in the early days of his cycling enthusiasm, and he was riding in company with Princess Maud. When the royal cyclists were walking with their machines up one of the steep hills near Balmoral they overtook an old Scotchman, who wished them "good day" and seemed disposed for gossip.

The young pair entered into the spirit of the adventure and chatted merrily about their cycling until they reached the top of the hill. Before they remounted the garrulous old man looked wonderingly at the machines and said: "Weel, weel, they're grand things for you toon lasses and laddies." When they had got out of hearing the royal pair literally laughed until they cried, and the Czar even yet answers to the name of "the toon laddie" among his cousins.

Not many months ago the German Emperor sustained a shock. Like King Leopold of Belgium, the Kaiser loves occasionally to take a solitary ramble in the country. One day last summer while at Potsdam he had wandered farther than usual, and at dusk found himself, dusty and weary, still a dozen miles from the palace. When at this stage a country woman driving a cart overtook him he greeted her politely and asked her to allow him to take a seat in the cart. The woman looked down critically at the dusty and disheveled man, and whipping up her horse said: "Not me; I don't like the looks of you." Some distance ahead a mounted patrol stopped the woman and asked what the Emperor had said to her. "The Kaiser?" she queried in amazement. "What Kaiser?" Then, as the truth gradually dawned on her she turned pale, gave a frightened look at the dusty figure coming nearer and drove rapidly away.

Ex-Queen Emma of the Netherlands and her daughter, the Queen of to-day, had many amusing experiences in their wanderings incognito. Last summer, when they were staying at one of the hotels in the Tyrol, the young queen won all hearts by her sweetness of disposition and vivacity. There was one young Englishman who was so overcome by her charms that he followed her everywhere in spite of a frowning mamma, and, it must be said, with some mischievous encouragement from the daughter. His attention at last became so marked that one day the young girl and her mother disappeared without warning, and it was only some days after the young Englishman learned through the newspapers that the young lady he had wooed so persistently was the Queen of Holland.

Many good stories are told of the curious adventures of Queen Margaret of Italy on her mountaineering excursions. The story of how she entertained a party of tourist climbers in one of the mountain huts is well known, but few who have heard of another little adventure which befell her last summer. The Queen, whose energy is always the envy and despair of her suite, had wandered away from her attendants, and had not only lost her way but was both hungry and fatigued, when she saw a peasant's cottage in the distance.

Making her way to it, her knock was answered by an old peasant woman, whom she asked for rest and refreshment. "Come in, my dear, and welcome," the kindly old peasant said. The Queen entered and insisted on helping her hostess prepare the simple meal of milk and bread. When the belated attendants reached the cottage they found the Queen and the old woman gossiping and eating with all the freedom of old friends, and it was not until some days later, when a handsome present arrived at the cottage, that the woman learned how she had entertained her Queen.

BANGOR'S DEAL TRADE.

Once Prosperous Industry in the Old Maine Town Gets New Life.

Bangor's deal trade, after many years, has come back again, and to-day there are scenes along the river that recall the times when millions of Penobscot logs, sawed into thick planks, were shipped away every year to the ports of the United States and all over continental Europe—the times when prices of lumber and everything else were high, and when the Yankee wooden sailing ship was still a queen in the fleet and a winner in the race for the world's deep-water commerce. As Annie Pixley used to sing with tender regret of "the days of '49," so the Bangor sailorman and lumberman sings in his heart of the days just before or those after the war, when ships were many here and business brisk.

Away back before the war Bangor did a smashing business in lumber with many ports in four continents, and after the war the business was revived to some extent. Countless millions of feet of deals were sent to the United Kingdom, and vast quantities of "3-by-9 stuff" to South Africa, while the wealth of Penobscot's clear and wide white pine was scattered all over the West Indies. Prices were for the most part good, wages high for stevedores, freights also high, and sailors' pockets were seldom empty. Times were flush in the port of Bangor in those days.

The vessels that used to come to Bangor in that time for foreign loading were among the best specimens of wooden construction ever turned out anywhere, and the fleets that used to gather at High Head docks were a delight to the sailor's eye and a satisfaction to the heart of all patriotic Americans. In recent years there have been some notable sea congresses at these same docks, but there is a vast difference between the old fleets and the new. Nowadays the foreign trade is done almost entirely in foreign bottoms, and even the foreign sailing vessels are being crowded out by British and Norwegian tramp steamships that carry so much at a load and go quickly and cheaply.

But Bangor is shipping deals again, with a lot of other stuff, to foreign ports, and is glad of it, even if the business is done in foreign steamers. Last year 20,000,000 feet of deals were shipped, and this year the exportation will be as much or more. Some of the steamers take as much as 2,000,000 feet; others from 1,000,000 to 1,500,000. One of last year's fleet carried away 3,000,000 feet.

The tramp steamers load quickly, carry a big cargo, and cross the water in about fourteen days. They carry few men, have no repairs that can be made on this side, and leave little money in the port, which is one reason why they are not liked. Sometimes as many as four or five of the deal steamers are in Bangor at a time, loading or waiting for cargo, and strangers are surprised to see such big ships so far up a freshwater river. Some of the steamers are of 3,000 tons gross, and draw twenty-three and twenty-four feet of water, loaded. But the Penobscot is a deep river, and with the expenditure of a moderate sum for dredging could be made safe for almost any vessel of the navy, at a distance of twenty-five miles from the head of the bay.

Old Laces.

It was linen, embroidered and cut-work, sometimes combined with what is now known as drawn-thread work, from which the laces of to-day evolved. The cut-work was made by the nuns when practically all industries were carried on within the walls of the convent. "Nuns' work" it was called, and an old manuscript is extant which sets forth that a certain great lady was "as well skilled in needlework as if she had been brought up in a convent."

From the darned netting to the lace with light ground, such as are used now, is an easy transition; then the beautiful "stitches in the air," as distinct from stitches worked on a firm ground, was made, and the evolution of lace was complete.

It is delightful to think that the finest stitches which were employed at Venice, Alencon and Argentan, when these places were at the height of their glory in the sixteenth and seventeenth centuries, are not a forgotten art. By means of microscopes and patient toil on the part of the workers, the method of making the delicate effects has been rediscovered and is used in the factories of to-day.

Should one go into a lace shop now and ask for "a pretty winter lace," "a nice length of spring lace" or a "useful autumn variety," the seller would doubtless think the designing purchaser was a lunatic. In the reign of Louis XV., however, no such idea would have entered his head, for so popular was lace that the fabric was specialized in this manner. Argentan and Alencon—rather thick and massive laces, for those days the designers were still under the Venetian influence—were called "winter" laces; the fabrics of England and Mechlin, on the other hand, were "summer" laces.

How They Earn Pin Money.

The English society woman does not hesitate to turn an honest penny in many ways which women of equal standing in other nations might consider infra dig., says a writer in Harper's Bazar. It is a recognized fact that many a well-born dame has traded upon that station of life in which Providence was pleased to place her by selling the entree to the most select drawing-rooms to such of her newly rich countrywomen as desired to purchase the privilege; also, the noble lady of limited purse will lend her name to the invitations and her presence at the entertainments of the socially ambitious woman who is able to pay for the benefit to be derived therefrom. Latterly many stories have been afloat of some American women who have thus gained a foothold upon the social ladder of the English metropolis. Only this season it has been rumored that Miss Astor was being chaperoned by an impecunious countess of Scotch extraction, who was to be reimbursed for her time and trouble by the tidy sum of $15,000. An easy way to pay one's tailor's bills has been devised by another member of the British aristocracy, who has allowed the aforementioned tailor to print the following advertisement in a number of fashion journals: Lady Mary Sackville writes, saying —— of —— street is the only tailor who has ever given her a long waisted effect."

Propagating Cuttings in Sand.

There are many plants purchased which could be easily produced from cuttings, and such work should be done early in the year. The Kansas Experiment Station has given this matter its attention, and has made the work of propagation by cuttings much better understood, especially on the part of women, who have heretofore relied mostly on outside sources for new plants. It is not too soon to begin rooting the cuttings of plants in February or March, and it may be also done later. Geraniums that are from cuttings early in the season should be covered with blossoms in summer. Among the plants that may be propagated by cuttings are the coleus, iresine and alternantheria. They may be started in a box in a window, the box to be of any size desired and five inches deep, filled with clean sand. When the cuttings are first made they should be shaded during the heat of the day, and sprinkled several times a day until the cuttings become thoroughly established, the sand to be kept always moist and wet. Cuttings are also sometimes rooted in a deep plate filled with sand that is kept moist. It is not difficult to secure plants from cuttings with care in the work.

Visitor to Shakspeare's House.

The annual meeting of the trustees of Shakspeare's birthplace was held the other day at Stratford-on-Avon. The committee reported that during the year more than 34,000 persons had paid for admission to Shakspeare's house, representing thirty-five different nationalities, and more than 100,000 had visited Anne Hathaway's cottage at Shottery.

Worms

CASCARETS are a sure cure for tape worms and those other pests of worms that make the lives of children and their mothers miserable. Any variety of parasites that live in the human stomach or bowels, and feed on the substance which should properly nourish the body, are dislodged by Cascarets Candy Cathartic, and expelled. One or two tablets usually drive them out, and persistent use is sure to do away with the unwelcome intruders. Many children and older people suffer from worms without knowing it, and get thin and weak, although their appetite is good. The best way to find out is to take Cascarets. **Never accept a substitute!**

—Brooklyn Citizen.

"A tape worm eighteen feet long at least came on the scene after my taking two CASCARETS. This I am sure has caused my bad health for the past three years. I am still taking Cascarets, the only cathartic worthy of notice by sensible people."
GEO. W. BOWLES, Baird, Miss.

The judge began to understand, and

Cascarets

Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK. 379

A Modest Hero.

Not long ago a French chroniqueur—Montmirail of the Paris Gaulois—encountered in a little village of the south of France a gardener who wore, pinned on his clean Sunday blouse, the ribbon of the Legion of Honor. Naturally, the newspaper man desired to know how he got it. The gardener, who, like many of his trade, seemed to be a silent man, was averse to meeting an old and wearisome demand, but finally he began:

"Oh, I don't know how I did get it! I was at Bazeilles with the rest of the battery. All the officers were killed, then down went all the noncommissioned officers. Bang! bang! bang! By and by all the soldiers were down but me. I had fired the last shot and naturally was doing what I could to stand off the Bavarians.

"Well, a general came, and says he, 'Where's your officers?'

"'All down,' says I.

"'Where's your gunners?' says he.

"'All down but me,' says I.

"'And you've been fighting here all alone?' says he.

"'I couldn't let 'em come and get the guns, could I?' I says. And then he up and put this ribbon on me, probably because there was nobody else there to put it on."

Chesterfield's Wit.

Lord Chesterfield was never at a loss for a polite retort. Once he proposed a person as proper to fill a place of great trust, but which the king himself was determined should be filled by another. The council, however, resolved not to indulge the king, for fear of a dangerous precedent, and it was Lord Chesterfield's business to present the grant of office for the king's signature. Not to incense his majesty by asking him abruptly, he, with accents of great humility, begged to know with whose name his majesty would be pleased to have the blanks filled up.

"With the devil's!" replied the king in a paroxysm of rage.

"And shall the instrument," said the earl coolly, "run as usual, 'Our trusty and well beloved cousin and counselor?'" At this repartee the king laughed and with great good humor signed the grant.

BROOM CORN SEED.

Tradition Says Franklin Planted the First One in This Country.

Every housewife is supposed to know how to handle a broom, but it is safe to say that not one in ten has any clear idea of what her sweeping utensil is made of or how it is made or where the material came from. Brooms are made from the heads or brushes of the broom corn, a first cousin to our common field corn. And in this connection is told a very pleasant little fairy story concerning Benjamin Franklin. "Poor Richard," by the way, seems to have been about the biggest jack of all trades that ever helped the United States to become the richest and most powerful nation of the world. If this story is true, he is the patron saint of the housewife and the broommaker, as well as a kite-flier, lightning catcher, printer, publisher, editor, author, philosopher, statesman and other things "too numerous to mention."

Broom corn first grew in India. From there it was carried to Europe. The story goes that Dr. Franklin was examining a whisk broom that had been brought over from England in the days before we had any broom corn of our own. He found a single seed on the broom, picked it off, planted it and raised a stalk of corn from which is descended, so to speak, all of the broom corn of the United States.

However this may be, broom corn grows much like its first cousin, our maize, which originated here. The head is larger, however, and the seeds grow on the head instead of in ears. The heads are cut off, leaving about six inches of stalk, and the seeds are scraped off by a machine, which does a clean job and does not injure the panicles. The seeds are valuable in a way. They are fed to horses and poultry and ground into meal for cattle. In the making of the brooms, the corn is put around a handle of basswood or soft maple turned in a lathe. Each layer is wound tight with twine or wire until the desired size is attained. The broom is then pressed out flat and sewed to keep it in that shape. Whisk brooms are made in the same way.—Buffalo Express.

A Famous Distillery.

The poor receive all the profits of one of the most famous distilleries in the world, that which is connected with the monastery of St. Bruno, in the department of Dauphine, which is better known as La Grande Chartreuse. The distillery itself is a considerable distance from the monastery, but it stands on land belonging to the order, although the French government has a claim over it.

The monks of St. Bruno, although they are sworn to poverty, have control of an industry which produces about $150,000 a year profit. Of this one-third goes as a contribution to the fund known as Peter's pence. Another portion is devoted to the maintenance of hospitals, and the remainder is devoted to subsidizing poor churches throughout France and to the personal relief of poor applicants, without distinction of church or creed. It is interesting to note that those who have control of this lucrative business are expressly forbidden by their vows to carry on a trade which could result in a profit to themselves.

Many attempts have been made to purchase the business, one notably by the Rothschilds, but all have failed, because the heads of the order consider that they are not justified in selling the business to a firm that would make a personal profit by it.—Cincinnati Enquirer.

Too Hard For Him.

A Frenchman at a certain hotel the other evening, who was boasting that he had thoroughly mastered the English language, was asked to write the following dictation:

"As Hugh Hughes was hewing a Yule log from a yew tree, a man, dressed in clothes of a dark hue, came up to Hugh and said, 'Have you seen my ewes?' 'If you will wait until I hew this I will go anywhere in Europe with you to look for your ewes.'"

Money has been and always can be made more easily out of simple patented inventions than out of any investment or occupation.

To salute with the left hand is a deadly insult to Mohammedans in the east.

A Shrew That Was Tamed.

"I HAVEN'T the least fear," said Maj. Delaford.

"Then you're a man of unbounded courage," retorted his friend, Ulysses Crinklethorpe. "For—may I venture to be frank?"

"Oh, certainly, certainly! By all means."

"Well, then, they do say that Mrs. Flashington drove her first husband into his grave by her ungovernable temper."

"I've heard that before," said Maj. Delaford, puffing complacently away at his cigar.

"But, of course," with a little sarcastic laugh, "you don't believe it?"

"Excuse me," said Maj. Delaford, severely, "I do believe it. I have seen, now and then, an expression in Justina's eyes which fully carries out any theory of that nature."

"And yet you are going to marry her?"

"And yet I am going to marry her."

"Felix Delaford, are you crazy?"

"Not that I am aware of."

"Will you be honest with me?"

"To be sure," nodded the Major.

"Then, why do you marry Mrs. Flashington?"

"Well, from a variety of reasons. One

"YES, A BRUTE, AND I'M SORRY I EVER MARRIED YOU."

is that I like her. She's a pretty little gypsy, with a skin like white velvet, and delicious long lashes to her eyes."

"Proceed."

"A second is—mind, now, I never did pretend to be one of the disinterested lovers one reads about in dime novels—that the dear, departed Flashington left her remarkably well off. And I have more merit than money."

"I think you will repent it," said Mr. Crinklethorpe, "for, by all accounts, the black-eyed divinity is neither more nor less than a virago."

"There are very few actions in this world that one doesn't repent, in a greater or less degree," said Maj. Delaford, sententiously, "but, averaging things, I'm willing to risk it."

And Maj. Delaford was married the next week to Mrs. Flashington.

It was not long, as Mr. Crinklethorpe had foretold, before the claw began to peep from under Mrs. Flashington Delaford's velvet sheath.

"Felix," she said one day, "I don't like this location."

"Don't you, my dear?" said Maj. Delaford. "I've lived here two-and-thirty years and always found it very pleasant."

"I don't like it," said Mrs. Delaford. "I prefer a house nearer the park."

Maj. Delaford went on reading.

"Felix, I say?" The bride's voice was raised a degree or so higher—the dangerous sparkle had come into her eyes.

"Yes, Justy."

"I mean to move uptown."

"Do you?"

"And at once."

"Very well," said the Major, "then you will move alone. I shall remain where I am."

"Maj. Delaford, you are a brute!"

The Major bowed. Justina burst into tears.

"Yes, a brute, and I'm sorry I ever married you!"

And after that Mrs. Delaford did not speak to her husband for two days. But as the Major appeared in no wise affected by this taciturnity she adopted another plan, and scolded steadily for three days.

"Look here, Justy, this won't do," said the Major, at the week's end. "I don't fancy either a dumb woman or a fury!"

"That I should live to be so spoken to," whimpered Mrs. Delaford.

"So," went on the Major, "I have written to my cousin Rosamond Bly, to come and spend the summer here."

"I won't have her in my house!" shrieked the bride.

"But I will have her in mine," composedly retorted the husband.

"Let me see her presume to enter this house!" cried Justina.

"Let me see you presume to be uncivil to her," said the Major, knitting his brows in a way that Mrs. Delaford had never seen in her late husband's countenance. For, to tell the truth, the late Mr. Flashington had been but a chicken-hearted individual at best.

Mrs. Delaford flounced out of the room and banged the door viciously behind her.

Miss Bly arrived the next day—a cherry-cheeked, bright-eyed girl, with lips wreathed in smiles, and a brand-new traveling suit cut after a deal prettier pattern than the bride's own. Mrs. Delaford refused to speak to her.

"Justina," said her husband, in a warning voice, "this is my cousin, Rosamond. I hope you will make her welcome to our home."

But Mrs. Delaford only threw a slipper at her husband, burst into tears, and ran hysterically upstairs.

"Oh, Felix! what's the matter?" asked Rosamond, half-frightened out of her senses. "Had I better go home?"

"By no means, my dear Rosamond," said the Major. "You see, I have married a woman with a temper. But she'll be all the more charming when that fault is rooted out of her character."

The Major went upstairs and tried to open the door. It was locked.

"Justina," he said, gently, "it is I. Let me in."

"I won't!" snapped the bride.

"Will you come downstairs, then?"

"I will not come out of my room until that woman is out of the house!" sputtered forth Mrs. Delaford.

"Very well, my dear," said the Major, and he returned to the drawing-room with unruffled philosophy.

Mrs. Delaford adhered to her resolution, although it was much tried by sundry peculiar sounds she heard on the outside of her door.

"Maj. Delaford has carpenters at work altering the house," thought she. "It makes but little difference to me in any case. I shan't stay here."

At the end of the third day, however, she concluded to go downstairs. But when she opened the door, lo and behold! her egress was barred by a grated iron door.

"Mercy upon us!" cried Mrs. Delaford. "What is this?"

"Please, ma'am," said the little maid, who had brought up her meals three times a day, "it's master as had it done."

"What for?" cried Justina.

"Please, ma'am," said Hetty, trembling all over, "don't you know you're crazy?"

"Insolent minion!" said Mrs. Delaford, "call your master at once."

Maj. Delaford came immediately upstairs, with Rosamond Bly clinging in a frightened sort of way to his arm.

"How do you feel now, my dear?" he asked, solicitously.

"I'm well enough," snarled Mrs. Delaford. "Open that door, quick!"

"Mad! Very mad, indeed!" said Maj. Delaford, in a sotto voce, turning to Rosamond.

"Ruffian!" cried the bride, "how dare you speak so?"

"Getting violent!" added the Major, shaking his head.

"Let me out, I say!" persisted Mrs. Delaford, rattling at the bars. "What does this absurd mummery mean?"

"Perhaps a strait waistcoat would be advisable," said the Major. "But as long as she remains tolerably manageable I shall not send her an asylum."

Mrs. Delaford began to cry.

"Oh, Felix, how can you talk so?" sobbed she. "I am as sane as you are!"

"Poor thing!" murmured the Major, compassionately. "The hardest part of

"MAD! VERY MAD, INDEED!"

insanity must be when one becomes partially conscious of its deadly doom."

Mrs. Delaford shut the door rather vehemently and began to cry hysterically.

"I'm not mad!" said she. "I won't be made a mad woman of!"

But how to help herself—that was the question. The door was barred effectually—the windows opened upon the dead wall of a neighboring Institute of the Fine Arts, and were three stories above ground. She might have shrieked herself hoarse in that direction before any one could hear her. She sat down to think. What should she do? What was to become of her? Did that dreadful hint of Felix concerning the asylum mean anything? For once in her life the late Mrs. Flashington was actually frightened.

"Has my temper really been so terrible," she asked herself, "that people mistake it for—I can hardly breathe the word—insanity?"

It was a new idea; she pondered it carefully and cried bitterly over it.

When Hetty came, as usual, with the napkin-covered tray, Mrs. Delaford's face was pale and tear-swollen.

"Hetty," said she, "will you ask your master to step up here for a few minutes?"

Maj. Delaford obeyed the summons at once.

"Well, my love," said he, "what is it?"

"Felix," said Mrs. Delaford, bursting into fresh tears, "I have acted very foolishly. I beg your pardon. And I beg Rosamond's pardon, too."

Maj. Delaford opened the grated door at once—Justina flew into his arms—and then there was a reconciliation after the most approved style.

Mrs. Delaford was as sweet as a June morning after that—and if ever she manifested symptoms of a relapse all that Maj. Delaford found necessary was to allude, in a general way, to lunatics and asylums.

And Ulysses Crinklethorpe never could imagine by what means this modern Petruchio tamed his dark-eyed shrew.—New York News.

A FILIPINO UNIFORM.

It Is Childish in Size and Very Gaudy in Color.

Among the interesting trophies soldiers in the Philippines have sent to Des Moines is a uniform which Frank Merrill of company H, son of Jeremiah Merrill, of No. 1204 East Ninth street, took from a captured Filipino and sent to his parents in this city. The uniform is patterned somewhat after the Spanish uniform, and is quite fantastic for use in war times. The red and yellow combinations so popular with the Spaniards appear on the blouse of the uniform.

Some idea of the inferiority of the Filipinos and their insignificance as compared with Americans can be had from the size of the uniform. It would be a good fit for a 12-year-old American boy, and it is easy to believe all that has been said concerning the diminutive Filipinos after examining this uniform.

The trousers to the uniform are of red calico and are made regular pajama style, being tied at the top with a drawn string. Along the outer seam of the legs are stripes of black velvet. The blouse is made of heavy cotton material, which is woven with alternate pin stripes of white and black. The collar of the blouse is of red calico and is adorned in front with two stripes of yellow calico. The cuffs of the blouse are also of red calico and bear three stripes of yellow. The front of the jacket bears six stripes of red and yellow calico combined.

Altogether the costume looks as if it might have been designed by some child who had a fondness for bright colors. The sewing on the garments has been done with a sewing machine, and the blouse has been fastened with hooks and eyes and buttons similar to those in common use in this country.—Des Moines (Iowa) Capital.

LAW AS INTERPRETED.

Public parks, maintained at public expense and the buildings and appliances of a fire department also, are held, in Owensboro vs. Cem. ex rel. Stone (Ky.) 44, L. R. A. 202, to be public property used for public purposes, within the meaning of an exemption from taxation.

A fair contract by which a parent gives the custody of a child to another person, although not binding upon the minor, is held, in Anderson vs. Young (S. C.) 44, L. R. A. 277, not to be unlawful or against public policy, if it is not prejudicial to the minor's welfare, which is the principal consideration in determining his custody.

A life-insurance policy taken out by a person on his own life for the purpose of assigning it to another having no insurable interest therein is held, in Steinback vs. Diepenbrock (N. Y.) 44, L. R. A. 417, to be invalid. But, if the policy was not taken out with that intention, the insured may sell his policy and give a valid title to the assignee.

The cost to the purchaser in possession, and not to the seller, who attempted to retain a secret lien, is held, in Post Printing and Publishing Company vs. Insurance Company of North America (Pa.) 44, L. R. A. 272, to be the value of property insured under a policy stating that the loss is payable to vendor and vendee as their interests may appear, when the seller asserts no claim under its lien.

Camel Races.

Camel races are held regularly in the south of Algeria, where valuable prizes are offered for the encouragement of the breed of racers, and as much interest is taken in their preparation and performances as in that of race horses at Latonia. The racing camels are the result of very careful breeding through many generations, and in size, temper and appearance they are so different from the ordinary beast of burden that they might almost be considered a different race of animals. Perhaps the most conspicuous characteristic of the ordinary camel is its extreme slowness. Nothing on earth will ever induce it to hurry. A $20 note will buy a very fair specimen, but for a mehari, or racing camel, five or ten times that sum is required to effect a purchase. The racer, however, can be depended on for nine or ten miles an hour, and kept up for sixteen or seventeen hours almost without a stop. The pace in a camel race is generally fast and furious at the beginning, when all the animals are together and seem to realize that a contest is in progress.—Cincinnati Enquirer.

Roman Camp.

A well-preserved Roman camp has been discovered on the right bank of the Narenta, in Herzegovina. A section 330 feet long by 270 feet wide has been traced. Part of the walls, gates and towers are still standing, and many utensils and weapons have been dug up. It is believed that the camp was erected in the time of Nero.

A Millionaire "Pauper."

An old man named Anton Kain, who died recently in an Austrian almshouse, was found to be worth $5,000,000.

ALONE ON THE OCEAN.

HORRORS OF THE WIDE, BLANK LONELINESS.

Crossing the Atlantic Without a Soul to Speak To—Overcome by a Feeling of Awe—Relief Only to Be Found in Hard Work.

In his narrative of his solitary voyage around the world in the sloop Spray, Capt. Joshua Slocum describes his attempts to overcome the sense of loneliness that beset him on the way from Boston to Gibraltar.

On the evening of July 5 the Spray, after having steered all day over a lumpy sea, took it into her head to go without the helmsman's aid. I had been steering southeast by south, but the wind hauling forward a bit she dropped into a smooth lane, heading southeast, and making about eight knots, her very best work. I crowded on sail to cross the track of the liners without loss of time, and to reach as soon as possible the friendly gulf stream. The fog lifting before night, I was afforded a look at the sun just as it was touching the sea. I watched it go down and out of sight. Then I turned my face eastward, and there, apparently at the very end of the bowsprit, was the smiling full moon rising out of the sea. Neptune himself coming over the bows could not have startled me more. "Good evening, sir," I cried; "I'm glad to see you." Many a long talk since then I have had with the man in the moon; he had my confidence on the voyage.

About midnight the fog shut down again denser than ever before. One could almost "stand on it." It continued so for a number of days, the wind increasing to a gale. The waves rose high, but I had a good ship. Still, in the dismal fog I felt myself drifting into loneliness, an insect on a straw in the midst of the elements. I lashed the helm, and my vessel held her course, and while she sailed I slept.

During these days a feeling of awe crept over me. My memory worked with startling power. The ominous, the insignificant, the great, the small, the wonderful, the commonplace all appeared before my mental vision in magical succession. Pages of my history were recalled which had been so long forgotten that they seemed to belong to a previous existence. I heard all the voices of the past laughing, crying, telling what I had heard them tell in many corners of the earth.

The loneliness of my state wore off when the gale was high and I found much work to do. When the fine weather returned, then came the sense of solitude, which I could not shake off. I used my voice often at first, giving some order about the affairs of a ship, for I had been told that otherwise I should lose my speech. At the meridian altitude of the sun I called aloud, "Eight bells," after the custom on a ship at sea. Again from my cabin I cried to an imaginary man at the helm, "How does she head, there?" and again, "Is she on her course?" But getting no reply, I was reminded the more palpably of my condition. My voice sounded hollow on the empty air, and I dropped the practice.

However, it was not long before the thought came to me that when I was a lad I used to sing; why not try that now, where it would disturb no one? My musical talent had never bred envy in others, but out on the Atlantic, to realize what it meant, you should have heard me sing. You should have seen the porpoises leap when I pitched my voice for the waves and the sea and all that was in it. Old turtles, with large eyes, poked their heads up out of the sea as I sang "Johnny Boker," and "We'll Pay Darby Doyl for His Boots," and the like. But the porpoises were, on the whole, vastly more appreciative than the turtles; they jumped a deal higher. One day when I was humming a favorite chant, I think it was "Babylon's a-Fallin'," a porpoise jumped higher than the bowsprit. Had the Spray been going a little faster she would have scooped him in. The sea birds sailed around rather shy.—Century.

LARGEST OF ALL OCEAN PIERS.

Built by a Railroad and Extends a Mile Into the Sea.

The cut shows the largest ocean pier in the country. It was built by the Southern Pacific Railroad at Port Los Angeles, Cal., in 1893. It is a regular

A PACIFIC OCEAN PIER.

port for passenger and freight coast steamers, and is also a United States port of entry. It is twenty miles distant from Los Angeles and two miles from Santa Monica, Cal. The chief commercial use of the wharf is in the transshipment of cargoes of coal and construction material from the steamships of the Southern Pacific Company to the same company's cars for use on its southern California, Arizona and New Mexico lines.

The length of the wharf proper is 4,282 feet. It is fifteen feet high above extreme high water. In the alignment of the pier there are two curves; on the shore approach there is a ten-degree curve extending 200 feet onto the pier, and 2,000 feet from the shore end there is a seven-degree curve to the right, both curves being tapered or spiraled. The trains run to the extreme end of the wharf.

HERO OF WATERLOO.

Driver of Ammunition Wagon Shows Unexampled Bravery.

The Duke of Wellington was once asked who, in his opinion, was the bravest man at Waterloo.

"I can't tell you that," he said, "but I can tell you of one than whom I am sure there was no braver."

The following is the story put in the words of the writer:

"There was a private in the artillery. A farm-house with an orchard, surrounded by a thick hedge, formed a most important point in the British position, and was ordered to be held against the enemy at any sacrifice. The hottest of the battle raged around the point, but the English behaved well, and beat back the French again and again.

"At last the powder and ball were found to be running short; at the same time the hedges surrounding the orchard took fire. In the meantime a messenger had been sent to the rear for more powder and ball, and in a short time two loaded wagons came galloping down to the farm-house, the gallant defenders of which were keeping up a scanty fire through the flames which surrounded the post. The driver of the first wagon spurred his horses towards the burning heap, but the flames rose fiercely round and caught the powder, which exploded, sending rider, horses and wagon in fragments into the open air. For one instant the driver of the second wagon paused appalled by his comarde's fate; the next, observing that the flames, beaten back for a moment by the explosion, afforded him one desperate chance, he sent his horses at the smoldering breach, and, amid the cheers of the garrison, landed his cargo safely within. Behind him the flames closed up and raged more fiercely than ever. This private never lived to receive the reward which his act merited, but later in the engagement he was killed, dying with the consciousness that he had saved the day."

AUSTRIA-HUNGARY.

Because of Bitter Race Quarrels Germany May Absorb the Two.

Bitter race quarrels raging in Austria-Hungary have led European politicians to predict the ultimate absorption of the two parts by Germany and Russia. There are many people who believe that the Kaiser and the Czar have an understanding on the subject. At present the Germans and Slavs hate each other so cordially that they are held together only by their common affection for Emperor Franz Josef. He

AUSTRIA-HUNGARY.

is old, and when he dies the differences will become more keen. In Austria itself the Czechs and Germans are at daggers' points all the time. The Austrians are Germans and in sympathy with the German empire. On the other hand the Czechs and the Magyars have more in common with the great Slavonic nation to their north and east. At present the situation is not ripe for a dissolution, but when it comes, as is likely after the death of the Emperor, the general belief of European statesmen is that independence of the parts would be short.

Cost of Living.

An investigation into the comparative cost of living at the various European capitals resulted in the following facts: At Vienna the prices of most articles of food are lowest; at Madrid they are dearer than in any other capital, and such things as bread, meat, sugar and coal are very expensive indeed. At St. Petersburg also the price of bread is still considered a luxury above the means of the working classes. Next to Vienna Brussels is an inexpensive city; Paris is a little higher in the scale, while London is still more expensive. An American spends on an average $50 a year for food, a Frenchman $48, a German $45, a Spaniard $33, an Italian $24 and a Russian $40. Of meat the American eats 109 pounds a year, the Frenchman 87 pounds, the German 64 pounds, the Italian 28 pounds and the Russian 51 pounds. Of bread the American consumes 380 pounds, the Frenchman 540 pounds, the German 560 pounds, the Spaniard 480 pounds, the Italian 400 pounds and the Russian 655 pounds. Outside of Europe, in times of peace, Manila is cheaper to live in than any other city in the world.

A Cure for Dyspepsia.

A young Austrian physician has discovered that hypnotism may be used with success in cases of dyspepsia. He had a dyspeptic woman patient who could not retain any sort of nourishment. When she had been hypnotized he ordered her to eat and keep down a hearty meal. This worked all right while the hypnotic state lasted, but when it ended the patient had the same pain and sickness as usual. Then the doctor tried ordering her to forget she had eaten, and after a few experiments the woman was entirely cured.

A guest believes that her hostess "acted cool" unless she accompanied her to the gate, and screamed after her until she reached the corner.

A woman thinks she is mighty "independent" if she wears a rainy day skirt in dry weather.

GREAT TRAILERS THESE DOGS.

Nick and Dock Who Worked on Union Pacific Train Robbery.

Although only four-footed animals, the work of Nick and Dock in trailing men has made them famous west of the Mississippi. The services of these celebrated bloodhounds have been required in scores of well-known cases, the most prominent being the great Union Pacific train robbery last winter at Green River, Wyo.

The two hounds came from famous stock, owing their origin to the great Winchell kennels of Vermont. They were purchased by the Lincoln, Neb., Bloodhound Company when very young and placed in immediate training for trailing criminals. They were used in scores of minor cases about Nebraska's capital city, their work being astonishing. They trailed a party of burglars forty-five miles, but lost them amid the confusion of the city. Two escaped prisoners from a Fillmore County jail were followed forty-five miles before the trail was broken by the escape of the men on a railroad train.

When the Union Pacific robbery occurred last winter Nick and Dock were sent to Green River. They took up the trail of the train robbers readily, but the next day were incapacitated by a driving snowstorm. The change proved too much for them, but the officers who saw the hounds follow the trail had no hesitancy in expressing their belief that the dogs would have been successful had not the fearful storm intervened.

The latest experience of the dogs was in following two York County horse thieves. The men had "worked" the vicinity of their homes so successfully that the farmers became incensed and promises of a lynching were made if they were caught. One night two fine horses disappeared. Nick and Dock were brought from Lincoln. The trail was fresh and the dogs in good trim. Over a beautiful country for fifty miles the hounds sped after their quarry with a posse of angry farmers at their heels. About dusk one evening the thieves were sighted. A chase of several more miles resulted in their capture. A conviction followed quickly and the thieves were on their way to the State prison in less than two weeks after the last theft occurred.

DEWEY'S WASHINGTON HOME.

House Presented to the Admiral by the American People.

The home purchased for Admiral Dewey, with money raised by public subscription, is one of the handsomest and most desirable sites in Washington and it is a matter of note that the house selected finally was that which Admiral Dewey indicated as his choice, before the committee began its work of examining more than sixty sites. The house was built by James E. Fitch for his own use, and has a frontage of

ADMIRAL DEWEY'S NEW HOUSE.

twenty-seven feet, with a depth of seventy-two feet. There is no rear building and the first floor is divided into three apartments of equal size. The two upper floors are arranged for sleeping rooms. The parlor is finished in white and gold, the library in old oak and sliding doors separate the rooms, giving an effect of spaciousness difficult to find in a house of similar size. The house contains seventeen rooms and four bath rooms. The house is built of brick, with brown stone trimmings. There is quite a wide plaza in front of the house.

Time and the Philosopher.

Sir William Robinson, at one time Governor of Trinidad, recently read a paper before the Royal Colonial Institute of London in which he has incorporated many of the quaint sayings of the natives, one, which follows, being peculiarly rich in negro philosophy:

The late Bishop Rawle, passing a negro sitting in idleness by the roadside, asked him how he managed to pass the time.

"I sit in de sun, massa, an' let de time pass me!" was the smiling reply.

Shoes for a Lifetime.

A shoemaker says we wear away quite two inches of shoe leather in a year. A pair of boots that would "last a lifetime" would consequently have to be provided with soles from eight to nine feet thick.

A Musical King.

King Oscar of Sweden in his young days was regarded as the most accomplished tenor in Europe, and could have made a fortune out of his voice on the stage.

When a woman is entertaining an out of town guest, she looks very grateful when some one asks her "company" how long she is going to stay.

Some people insist on a feast or a famine. Why not adopt a middle course?

SOLID WALLS OF WHEAT.

Five Thousand Acres of Golden Grain on One Ranch in Oklahoma.

Oklahoma's large wheat field lies a few miles west of the small railway station of Bliss, in Kay County. It contains five thousand acres and belongs to the noted Ranch "101," which controls fifteen thousand acres of land leased from the Ponca Indians. Two hundred men, more than three hundred mules and horses and twenty-four big twine binders were employed in cutting and shocking the grain grown on this magnificent field this year.

Every principle of good farming was observed in cultivating this big field with the result that the total output will not be less than 100,000 bushels of as good wheat as can be found in Oklahoma. It is estimated that the average acre yield will be from twenty to twenty-five bushels. There are many acres that will run from forty to fifty bushels. Buyers have already offered 60 cents a bushel for the entire crop. It is probable that the owners will get from 60 to 70 cents, a gross sum of $65,000 or $70,000. The cost of producing this wheat and putting it on board cars will be 25 cents a bushel, leaving a net profit of about $35,000.

Numerically, a five thousand-acre wheat field is not very impressive. To ride over it, however, in blazing sunshine is to give rise to the feeling that it covers the face of the earth. The five thousand acres of wheat on Ranch "101" are divided into two fields of almost equal size by the Salt Fork River. Great yellow undulations of grain swept alongside the river and then away toward the distant hills, until they seemed to reach the sky. It was so far across the fields that the shocks look like a solid wall of wheat. In the field on the south side of the river the first circuit with a binder was made by Superintendent Miller.

"There was not a man who could guess how long it would take me to make the round," said he. "I piled a supply of twine on my binder and started. I was gone four hours and traveled six miles."

The distances are so great on the ranch that it is impossible for the men to turn in at one place for their meals. The loss of time would amount to hundreds of dollars in a season. Accordingly camps are established at different places, generally close to a stream, where the men live in tents and the meals are prepared by ranch cooks.—Kansas City Star.

GROWTH OF ENGLISH.

May Soon Be the Language Universally Recognized Among Nations.

The International Academy of Sciences adjourned without solving the language problem, and recognized English, German, and French as equal mediums of communication. If the growth of the English language continues at its present rate for fifty years, however, it will not need the mandate of any academy to make it the universally recognized medium among civilized nations. In 1801 English was spoken by 20,500,000 people, being

surpassed at that time in numbers by the French, German, Spanish, and Russian languages. In 1899, on the other hand, English was the mother tongue of 111,100,000 people, more by nearly 40,000,000 than spoke any other European language. Next to English stands the German language, with 75,200,000 people to whom it is the mother tongue. All over Europe travelers find that when the residents of any country speak any language but their own it is usually English.

A Naval Solomon.

Captain McB., a credit to his race, says London Spare Moments, was once in command of a troop-ship returning from India. On board he had as passengers three ladies, all wives of officers in her majesty's service.

Now it fell out that the cabin allotted to them was fitted up to accommodate four, and consequently it contained four wash-basins, one of which was far larger than the other three.

For the right to use this particular basin each lady put forth her claim, citing her husband's position in the army. But the husbands, unfortunately, all proved to be of equal rank, so to settle the matter the trio bearded the captain in his cabin.

"We will leave it entirely, to you captain," they said, "and abide by your decision."

Captain McB. cogitated, and then declared solemnly, with the faintest twinkle in his gray eyes:

"Leddies, as it is no' a matter o' rank, I think it would be that the oldest amang ye suld have the beegest bowl."

With murmured thanks the ladies filed out again, but that basin was never used during the voyage.

Children's Care of Magazines.

Le the children learn to take care of the numbers of their own magazines and to file them themselves for preservation. Cut two thin strips of wood the length of the magazine and about an inch wide; bore three holes, one at each end and one in the middle. With a sharp awl pierce holes to correspond in the magazines, lay the sticks on them, pas a cord through the holes and tie it.—Ladies' Home Journal.

Among the many things this country needs is a new set of molds to be used in shaping the opinions of the public.

INYO INDEPENDENT.

INDEPENDENCE, CAL.,

FRIDAY, DECEMBER 23 1899

LEGAL.

NOTICE TO CREDITORS.

Estate of Josiah G. Dodge, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Josiah G. Dodge, deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said administrator at his place of residence at Lone Pine, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

NORMAN M. DODGE.

Administrator of the estate of Josiah G. Dodge, deceased.

Dated at Lone Pine, November 23rd, 1899.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles dated the 9th day of November, 1899, in a certain action wherein P. B. Mathiason, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Theodor Wibbelt, defendant, on the 31st day of July, 1899, for the sum of two thousand and forty-five ($2,045.00) dollars and costs of suit taxed at twenty-two and sixty-five hundredths ($22.65) dollars, I have levied upon the following described property, to wit: Those three certain mining claims situated in the Argus Range of Mountains, in the County of Inyo, State of California, known as the "Westphalia," the "McKinley," and the "Iron Queen" Gold Quartz Mining Claims and also those two mining claims situated in the Slate Range of Mountains in said County of Inyo known as the "Matura" and the "Los Angeles" Gold Quartz Mining Claims, together with all the rights, members and appurtenances thereunto belonging; also fourteen thousand (14,000) feet of iron pipe running from the spring in Big Canyon to the Ballarat stage road in said County of Inyo; also the right to take and use the waters of said spring.

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Theodore Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Daled at Independence, California, November 22nd, 1899.

A. M. GIVEN, Sheriff.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.)
GENERAL LAND OFFICE
Independence California.)

A protest having been filed in this office by Rafael Rossi, against Lieu Selection No. 390, by C. W. Clarke, for the NW¼ of SE¼ of Sec. 33, T 8 S., R. 34 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter said C. W. Clarke and R. Louis Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

Merry Christmas.

Who said chicken?

Billy Grant is authority on raising chickens.

Mrs. Gifford, of Bishop, is visiting Mr. and Mrs. Judge Lamar.

Special Christman music at the Methodist Church on Sunday evening.

Harry Cook calls for the hop to-night, and he says he is going to keep us moving.

Upton Tracy, of Fish Springs, is with us doing business with the U. S. Land Office.

Inyo county will serve Xmas dinner to only two guests both sons of the Flowery Kingdom.

Mrs Pete Laberge, accompanied by Earnest Stewart, came up from Lone Pine yesterday.

John L. Bourland passed through town with a bunch of horses en route to Los Angeles last Wednesday.

Mr. H. Levy tells us that he is sparing no money or means to give the best ball supper Independence has ever had.

G P. Bourland, of Bishop, returned from Los Angeles last week having met with a ready sale for his horses and at good prices.

Remember that the Supper at the Independence Hotel to-night is only Fifty cents. We understand that the turkeys have been fatted for this occasion.

Have you noticed the number of high collars and boiled shirts worn by the numerous bachelors in our burg since County Institute has commenced.

Mrs. A. Church and three children, of Hawthorne, Nev., came in on Monday nights' train and will spend the Holidays with her parents and sister.

Out of the twenty-two teachers employed in Inyo County only four come from the outside world. What other County in our State can show such a percentage of home talent?

George Thorpe and Harry Cook are down from Mazourka. They informed us that they are merely down to spend the Holidays. That may be all right; but there are slathers of schoolmarms in town.

Olive Rebekah Lodge, of Independence, expected a visit from Mrs. Carpenter, Grand President, this week, but owing to illness she has telegraphed that she will have to postpone her visit until some future date.

The Annual Christmas Tree will be held at the M. E. Church on Saturday evening, December 23rd, at 7 o'clock. The Church will be open all day, and a committee will be in attendance to receive presents to be placed on the tree.

Supervisor Stewart has had men at work on the road between Lone Pine and Olancha removing rocks, filling up chuck-holes and grading. This work along with the storms of last week has wonderfully improved that formerly bad piece of road.

Our County Tax Collector informs us there was paid in during the first installment of taxes $25,862 14, this does not include bonded school tax, and that the State's proportion is $6,999 96, but that we will receive in exchange over $7,000, State school money.

Messrs Hoskins, Quinn and Holland returned from a tour of inspection of the Gold Mountain section of country on Monday last. They report have encountered fifteen inches of snow on their return trip on the divide between Big Pine and Deep Spring valley.

To-night we trip the light fantastic and owing to the array of beauty in our midst, no doubt to-night's dance will be the event of the season. The Independence String Band will furnish the music, and it will be good. Arrangements have all been made to make it a howling success.

S. E. Vermilyea, Esq., of Bishop, and Ben H. Yandell, Esq., of Independence, have formed a co-partnership of their law business. Mr. Vermilyea will continue his office at Bishop, while Mr. Yandell will attend to business of the firm in Independence. The firm name will be Vermilyea & Yandell.

I. H. Mulholland left Tuesday morning with about thirty head of mules which he will drive to Visalia, understanding that a good market may be had there. Mrs. Mulholland accompanied him. Mr. S. C. C. Lunt will accompany Irv. Mulholland as far as Walkers Pass and will take the stage from there to nearest railroad station and from there will go to the city to spend the Holidays.

INSTITUTE WEEK.

The 7th Institute held in Inyo County was commenced Tuesday at 9 a. m., at the Independence school house, Mr. J. H. Shannon, Vice-President in the chair.

After prayer by Rev. Pardee, the proceedings the week's work commenced, and was taken up according to the programme as apveared in our last issue.

The following Honorary Membere were proposed and accepted as teachers: A. E. Janvier, Miss Effie Roeper, Mrs. I. H. Mulholland, Mrs. Bigelow, Mr. Dixon, Mr. Austin, Rev. Pardee, Mrs. Wilson, Mr. Willis and J. Sub Johnson. We understand that the above parties are all teachers and have all had some experience in the line of teaching.

Space will not permit us to take the work up as we would like to, but we must mention the fact that the numerous papers read on the different subjects were not only good, but some of them were excellent and we only wish we had the time and space to speak of them as we would like to. Two or three of our townsmen contributed, Messrs. Willis, Austin and McLean, which were well received.

Monday night a general reception was held at the Pavilion. The citizens of our town arranged a musical programme.

Mr. Hampton, our congenial County Superintendent, called the gathering to order with a few appropriate remarks, and announced the first piece of the evening would be a vocal solo with flute obligato by Mr. and Mrs. McLean, which was received with cheers, followed by an idstrumental solo by Mrs. Densmore, was excellent. Mr. S. C. C. Lunt made his debut as a vocalist. Well, ye scribe is afraid to say much about Sam's song. Miss Etta Wood recited and did herself credit, and the audience were well pleased with the rendition. Then we listened to a quartette by Messrs. Eibeshutz Yandell, Carson and Lunt, which was excellent. A piano duet by Miss Gorman and Mrs. Densmore finished the programme, and the audience was dismissed with a general hand-shaking introductions, etc.

TUESDAY EVENING.

The audience was called to order by Supt. Hampton, who announced that the first thing we would listen to would be an overture by the Independence String Band, which consists of Mr. and Mrs. Mathack and Messrs. Yandell and Church, and their music was listened to with pleasure. The second number was a vocal solo by Mrs. McLean. The lady has a sweet voice and her song was greatly appreciated by the large audience. Miss Loundsbury favored us with a piano solo, which was splendid. The lady showing great skill on the instrument. The event of the evening was the rendition of "Old Ace," by Miss L. Shirley. Miss Shirley is undoubtedly a talented elocutionist, and her pieces were received with prolonged cheers. Mr. Lunt sang "She Was Bred in Old Kentucky," and he seemed less nervous than on the previous night. The instrumental solo by Mr. Church was well received and highly appreciated. Miss Birdie Levy, supported by five pink-hatred tots, in an Irish sketch brought down the house. Birdie has missed her vocation, she should be on the comedy stage. Next was an instrumental duet by Mrs. Densmore and Miss Gorman. The lecture by Elizabeth Sargent Wilson on "Humane Education," was well received. Mrs. Wilson is a teacher of many years experience and is one of our noted educators. The evening programme was concluded by a male trio, who impersonated tramps, and they did it true to life. Eibeshutz's make-up was undoubtedly picked too soon. Carson was rigged out in the typical Dusty Roads style, and Lunt was in it strong with a make-up of male and female cast-off wearing apparel. Their trio was received with thundering applause.

WEDNESDAY EVENING.

Programme was opened with an instrumental solo on the piano by Mrs. Densmore, and her rendition of El Trovatore was grand. Mrs. Densmore is a talented pianist, in fact, she is an artist. This was followed by a solo by Miss Gunter, of Bishop, which was well received. The lecture by Mrs. Wilson on the "Influence on Environments," seemed to greatly please her audience. This was followed by a vocal duet Misses. Cook and Thompson. These young ladies are talented vocalists and their song was cheered to the echo. Miss Allen of Bishop recited, and her conception of Brutus the Roman was grand. The evening's programme was closed by a quartette of Messrs. Hanby, Eibeshutz, Carson and Yandell, entitled, "Come Rise with the Lark."

THURSDAY EVENING.

A selection by the Independence Band filled the hall with sweet strains. Miss Irma Webb sang "Sweet Alice, Ben Bolt." Irma has a sweet voice and we are proud of her, realizing that in Miss Webb we have a vocalist that we will hear from. Miss Robinson impersonated an Irish domestic, who seemed to be in great trouble on account of a heathen Chinese. The young lady did herself credit and greatly pleased the audience. Miss Gunter's guitar solo was well rendered and duly appreciated. The vocal solo of Mrs. McLean was very pleasing. "Temperance, and How to Teach It," was listened to with wrapped attention. Mrs. Densmore and Miss Gorman favored us with an instrumental duet. Miss Shirley recited Portia in her polished manner. The piano solo by Miss Truscott of Bishop, proves that she is an accomplished pianist. J. Sub Johnson sang a coon song, after which was a pleasing selection by the String Band.

Mr. Hampton announced that this would finish the week's literary and musical programme. The vast throng disbanded feeling that they had indeed more than enjoyed the numerous selections that had been presentgd for their entertainment.

Great credit and praise must be given Mrs. Webb for her assistance in making the various musical programmes a success. She being the accompaniest in nearly every instance.

UNIVERSITY OF CALIFORNIA.

UNIVERSITY OF CALIFORNIA, December 20.—Many rare and valuable trees and plants will be distributed throughout the State by the University of California during the coming year. The annual Seed Bulletin of the College of Commerce, which has just been completed by E. J. Wickson, Professor of Agricultural Practice describes many plants whose seeds will be sent for a nominal charge to those who wish to co-operate with the University in experiments whose aim is to naturalize new plants and test their fitness to Pacific Coast conditions.

On the Flood estate at Menlo Park, recently presented to the University of California by Miss Cora Jane Flood of San Francisco, together with other lands, buildings and stocks, as a permanent endowment for the College of Commerce, are many strange and beautiful exotic shrubs and trees. By the distribution of their seed the University will introduce elsewhere in the State the New Zealand oil-tree, a lofty evergreen from whose seed the Maories make a vegetable oil, the arancaria, an elegant Brazilian conifer; the Australian turpentine-tree, a native of New South Wales; the English holly, the famous old Christmas token; the tagasaste, a shrub valuable for bees, and other rare growths.

From the Santa Monica Forestry Station will be distributed seeds of eucalypts valuable for timber, for tan-bark, for bee-pastures, for cider-making, and for ornamental purposes.

Seeds will also be offered of new species of strawberries, brought from France by J. Burt Davy, assistant botanist of the Berkeley Experiment Station; of French resistant grapevines, of a number of new cereals from Europe, of Turkestan wheat, of Russian millets, of Australian saltbushes, and of a number of new plants for green manuring or forage. One curious plant whose seed will be distributed is the Khamra melon, from the Kalihari desert in South Africa, which, when grown for the first time at the Pomona sub-station, without water, on sandy soil yielded twenty-two tons to the acre. The Seed Bulletin can be secured by application to Professor E. J. Wickson, Agricultural Experiment Station, Cal. Applications for seeds and plants should also be made to Professor Wickson. Only a single package of any one kind of seed will be sent to the same applicant.

It is the constant endeavor of the University of California to bring the latest discoveries of scientific agriculture to the knowledge of the farmers of the State. Sixteen farmers' institutes will be conducted by professors of the University during December and January. The schedule of farmers' institutes, with the names of the professors who will lecture at each, is as follows:

Professor A. B. Hayne and Douglas T. Fowler—Dos Palos, December 20; Los Banos, December 22; Woodlany, January 12 and 13; Lodi, January 17 and 18; Elk Grove, January 19 and 20; Reedley, January 23 and 24 Dinuba, January 27 and 28.

Professor R. H. Loughridge and Professor A. J. Cook—East Highlands, December 22; Bloomington, December 23; East Riverside, December 26 and 27; Ontario, December 28 and 29.

Douglas T. Fowler and either Professor C. S. Woodworth or Professor R. H. Loughridge—Lompoc, January 3; Arroyo Grande, January 4; San Luis Obispo, January 5; Paso Robles, January 6.

At the convention of delegates from farmers' clubs and farmers institutes which will be held in Pasadena January 1 to 4, the University of California will be represented by Professor E. J. Wickson and A. J. Cook, Conductor of University Farmers' Institutes in Southern California.

Professor A. P. Hayne is still at work on the investigation of the California olive industry which has occupied all his time for the past two months. Early in January a bulletin will be issued embodying his conclusions. After having visited all the principal olive-growing districts of the State he says that his confidence in the olive industry has not been in the least impaired. Everywhere the greatest interest was shewn in his work and he was extended every facility and every courtesy. His report will anaize causes of failure on the part of some farmers and in some localities, and will discuss the best-approved scientific methods of olive-culture.

The use of Paris green for the codling-moth is the subject of a new bulletin by Professor C. S. Woodworth and Instructor George E. Colby. The opinion is expressed that wormy fruit will soon be absolutely unsalable, and it costs no more to grow, pick, pack, and ship sound fruit than worm infested, and that with proper methods, care, and persistence the injury from codling-moth can be reduced to a very small percentage. Complete directions are given for the use of Paris green and tests are described by which it can be ascertained whether or not the commercial article can be used with benefit to the trees.

The University's experiments with the Australian salt-bush, the new fodder plant, have proved its value for California. It is said that no other fodder plant yet tested at the Paso Robles Experiment Station has made such early winter growth or furnished so much and such valuable food for live stock. Horses and sheep, when fed half hay and half salt bush, become very fond of the combination.

Harmless Fusilads

At about 7 o'clock Wednesday morning our citizens were aroused from their peaceful slumbers by the discharge of fire arms, which took place on our main thoroughfare. Four shots were fired in rather quick succession, but no damage seemed to have been done to either of the principals, but a broken window in Mrs. Jenkins residence, which is 100 yards south of the scene of the shooting, proves that blank cartridges were not used. Troubles: Domestic infelicity.

Quarterly Meeting.

The first quarterly meeting of the M. E. Church will be held by Rev. E. W. Van Deventer, D. D., Superintendent of the Nevada Mission, Sunday, December 24th, 1899. Preaching services will be as follows: Lone Pine at 11 a. m.; Georges Creek, 2:30 p. m., and Independence 7 p. m., followed at Lone Pine and Independence by the administration of the Sacrament of the Lord's Supper. The business meeting (Quarterly Conference) of the Church will be held at 4 p. m, on December 25th.

All are cordially invited to attend these meetings.

Belgian Hares.

Dr. L. W. Allingham has received from Los Angeles five Belgian hares, one buck and four does. All arrived here in prime condition and are doing well. The Dr. informs us that they are of a high grade, and that the flesh of a Belgian hare is a great luxury. These rabbits are very prolific producing as many as twelve litters a year, one doe often producing as many as 250 rabbits in twelve months.

Through the carelessness probably of some campers, Horace Bellows, of Haiwai, had his large barn at Rose Springs destroyed by fire on Wednesday a week ago. The stagedriver of the Keeler-Mojave stage discovered fire in the manure on his trip on Wednesday, and notified Mr. Bellows, but by the time he had reached the scene of the disaster from his home, the barn was partially destroyed, and, as nothing could be done to save it, the whole structure was soon destroyed. In this season of high winds campers cannot be too careful with their fires. The lumber in this barn cost $125 per thousand. Its destruction will prove quite a loss to Mr. Bellows as he did his shearing here.

Mr. Wells Barnes our congenial townsman has returned from his mine on the Inyo Range where he has been doing assessment work. Mr. Barnes tells us that he has finished his assessment work, but when we notice the hight of his collar and the peculiar smile he's wearing this Institute week. Oh! I DON'T KNOW.

We omitted in our last issue to note the Grand Display of Holiday Goods, at the Opening at Nathan Rhine's. We looked in and the store was packed, viewing the display. Mrs Rhine acted as a Reception Committee, but surely she had her hands full welcoming the great number that called.

The regular annual meeting of the Inyo county Bee Keeper's Association will be held in the parlors of the Valley View Hotel at Bishop on Wednesday, December 27, 1899, at 10 o'clock a. m.

WM. MUTH-RASMUSSEN,
Secretary.

Miss Minnie Collins her brother John Collins and Miss Minnie Allen are visiting Mr. and Mrs. B. Rhine and will remain until after the Holidays.

We understand that Johnson and party have received good news in regard to the old Kearsarge property, and we hope soon to see it re opened.

George Montgomery returned from Ballarat yesterday. He reports that section in a flourishing condition.

Real Estate Transfers.

The following deeds have been recorded since December 14, 1899:

Marvin McFadden to W. F. Goff—Interest in mining property in Slate range—$75.

Dean Harrison to W. W. Godsmark and Robt. F. Harrison—Water right, South Park Min'g Dist—$100.

James Wingfield to Dean Harrison—Water right, South Park Min'g Dist—$50.

Trustees of Bishop Creek M. E. Church of Bishop to Inyo Academic Asso.—Lots in Academy addition to town of Bishop—$50.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmever and situated in the Mameva Mining Dist., Inyo County, California, and from J. H Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE.

TO ALL WHOM IT MAY CONCERN: Notice is hereby given that the undersigned, owners of those certain mines or mining claims situate, lying and being in the Union Mining District, County of Inyo, State of California, commonly known and designated as the "Alhambra" and and "Black Eagle" mines, have made and entered into an agreement to sell said mines to Peter Kimberly; that said agreement is now of record in Book "A" of Bonds, page 294, records of said Inyo County; that under the terms and conditions of said agreement the said Kimberly has the right to work said mines at his sole cost and expense; that from the date hereof the said mines, nor the ores produced therefrom, nor the undersigned will be liable or responsible for any labor or improvements done or made upon the said mines, or for any material furnished therefor by any person without a written order from said undersigned.

Dated November 25, 1899.

PARKE BARNES.
E. T. ANDERSON.

PROPOSALS FOR BUILDING A BRANCH JAIL AT BALLARAT.

NOTICE IS HEREBY GIVEN, that pursuant to an order of the Board of Supervisors of the County of Inyo, State of California, made October 6, 1899, sealed proposals will be received for the construction of a Branch Jail in the town of Ballarat, County of Inyo, State of California, to comply with the following specifications:

The Building to be 14x16 feet, walls 10 feet hihg, with two cells, 7x10 feet; one ventilator 12x12 inches on top of each cell; all walls to be double, of 1x12 surfaced lumber, inside diagonal; 4-inch battens on joints outside; wall of cells partition to be diagonal double; building to stand on rocks 4 feet apart; sills, 4x4, floor joists, 2x6; ceiling joists, rafters and plates, 2x4; double floor and ceiling 1x 12 surfaced; sheeting, 1x6; roof, redwood shingles, 4½ in. to weather; three double doors, 2x4x6 ft. hung with iron hook hinges ⅝x1½ in., with bolts ⅝ in.; hasp and staple bolted on; door to be built of 1x12, 3 in thick; 3 jail locks.

All bids must be sealed and indorsed "Proposal for Building a Branch Jail at Ballarat," and addressed to the Clerk of the Board of Supervisors, the same to be received not later than 10 o'clock a. m. on THURSDAY, the FOURTH day of JANUARY 1900, and will be opened by the Board at 2 o'clock p. m. of said day. The Board hereby reserves the right to reject any or all bids.

A. C. FREEMAN, Chairman.
Attest: D. J. HESSION, Clerk.

Lodge 221, F. & A. M.

The obtaining of United States mineral patents a specialty.

All kinds of surveying given the most careful and accurate attention.

Royal Baking Powder

Imparts Healthfulness to the Food

Royal Baking Powder possesses peculiar qualities not found in other leavening agents, which arise from the superior fitness, purity and healthfulness of its ingredients.

Royal Baking Powder leavens the food perfectly by its own inherent power without changing or impairing any of the elements of the flour.

Thus the hot-breads, hot-rolls and muffins, and the delicious hot griddle-cakes raised by the Royal Baking Powder are wholesome and digestible, and may be eaten without distress, even by persons of delicate digestion.

Alum baking powders are low priced, as alum costs but two cents a pound; but alum is a corrosive poison and it renders the baking powder dangerous to use in food.

ROYAL BAKING POWDER CO., NEW YORK.

AN ENGLISH "TREAT."

The Difference Between the British and American Methods.

I was constantly struck, says Colonel T. W. Higginson in The Atlantic, with the genuine spirit of hospitality among Englishmen toward Americans, as such, even those with whose pursuits they might have almost nothing in common, and for whom they had not the slightest reason to put themselves out. I liked this none the less for its having its definite limitations as to pecuniary obligations, and the like, including everything in the nature of "treating," all this being in my opinion a weak point in our more gushing or more self conscious habit.

I remember to have once been taken by a gentleman, on whom I had but the slightest claim, to the country house of another, on whom I had no claim whatever. The latter was not at all literary, and had not even the usual vague English interest in American affairs. Yet he gave up his whole afternoon to drive me to Kenilworth, which he had seen a thousand times. But that for which I liked him best, and which afforded me a wholly new experience, was that as we entered the outer doorway, he, going first, looked back over his shoulder and said simply, "They make you pay threepence for admission here," and then added, speaking to the attendant, "here is my threepence."

After all the time and trouble he had given to his stranger guest he left him to pay his own threepence, a thing which most Americans would not have dreamed of doing. It would have been the American notion of good breeding to save a guest from expense, as it was the English impulse to save him from the sense of obligation. I confess that I prefer the latter method.

King Solomon an Egotist.

And yet this king (Solomon) with his magnificence and unrivaled power, this shrewd judge, this skillful statesman, this scholar with his wide culture, became a pessimist, and stands forth one of the saddest figures in all the history of melancholy. But if we analyze his misery we find that he was a pessimist not because men are disciplined by conflict and trouble, but because he was a confirmed egotist.

Had men used printing presses in those faroff days the first letter to be exhausted in setting up Solomon's copy would have been the capital letter "I." "I" builded me houses, "I" got me soldiers, "I" wrote proverbs, "I" had manservants, "I" had maidservants. Through insatiable egotism Solomon lifted up this "I" as a columnar hitching post, and asked all creation to stand around and admire him. But simplicity is to a great man what sweetness is to a rose. A bloated and overwrought egotism makes happiness impossible.—Rev. Newell Dwight Hillis, D. D., in Ladies' Home Journal.

How to Get Rid of a Crowd.

The late Prince George generally dined on his balcony, during which time his Cossacks played delightful airs from the Russian operas. Crowds of people came to stare most rudely, so one evening there was a very disagreeable smoke which swept over them and drove them away. I had the curiosity to find out the meaning. A stove had been filled with bark and leaves and placed in such a position that the smoke was driven right into the faces of the people, and I could imagine the quiet laugh that went around the imperial dinner table as the people dispersed as sheep having no shepherd.—Review of Reviews.

A Very Fine Mule.

My neighbor, Morris, has a very fine mule, and about six months ago this mule tried to pick his teeth with his hind foot and got the shoe fastened in his mouth on a broken tooth. Mr. Morris worked an hour to unloose it, and then called in the neighbors, and they worked with ropes and levers, but couldn't. All of a sudden, while Morris was standing by, thinking what to do next, the tooth broke with a report like a pistol, and the mule's foot flew back against Morris' shin bone and broke it all to pieces.—Raleigh News and Observer.

A Rascally Valet.

Von Bunsen told me that Humboldt in his latter days was completely under the influence of a rascally valet named Seiffert, and, to the disgust of his friends, bequeathed to him all his effects, of little value, it is true, for the old man left no property of any account. Even his private letters and papers went to the wretch.

The king and the queen, said Von Bunsen, were for years in the habit of sending Humboldt a present on his birthday. At length it became difficult to know what would be acceptable to the old man, whose wants were so few and tastes so simple. It was their habit to send an aid-de-camp to him a few weeks before his birthday to ascertain, if he could, the sort of gift likely to be most acceptable to him, and whatever that might be, of course, it was sent.

Shortly previous to one of these anniversaries, and in reply to a similar inquiry, the royal couple got word that the philosopher would be pleased to receive a double bed. They wondered what in the world could have put it into Humboldt's head to ask for a double bed, having probably never slept in one in all his life and having been habituated from childhood to the least luxurious sleeping arrangements imaginable.

The old man died, however, before the expected birthday anniversary arrived. It then transpired that the provident valet had concluded it would be a nice thing for him and his wife to have a spick and span new bed with the royal arms upon it, and had taken advantage of the king's regard for Humboldt to try getting one at their majesties' expense.—John Bigelow in Century.

Beefy Beauties.

"In Turkey the most beautiful and desirable woman is the one who weighs the most," writes an American who has been sojourning in the sultan's domain. "A thin and willowy creature would have no social standing in Turkey and would be a total failure on the stage in Constantinople. Unless a woman is fat she cannot secure an engagement in a musical hall, and the fatter she is the more enthusiasm she arouses and the larger is her salary.

"On the evening after my arrival in Constantinople I went to the Concordia Music hall, and there I saw more feminine breadth, depth, thickness, heft and circumference than I had ever before seen under one roof. The first woman who sang was fat; the second was fatter; the third was no, not fattest, although she was much heavier than No. 2. She was merely the promise of what was yet to come. They were holding back the really big artists for the finale.

"At last these two came on. They were 'sisters' and they made a large family by themselves. The house arose in joy as the two vast, egg shaped objects appeared on the stage. The Turks, who had been sitting stolidly in the boxes looking with dull unconcern at the frail vocalists who weighed less than 300, now straightened up and clapped their hands."

An Unsought Pardon.

Among the stories of that former governor of Texas familiarly known as Sam Houston is more than one amusing tale.

There was a financial agent of the penitentiary who had warmly opposed the election of Governor Houston, but was particularly anxious to retain his own pleasantly lucrative position. Consequently the governor was soon in receipt of a petition in which the man's years of faithful service and special qualifications for the place were set forth in glowing terms by himself.

The governor sent for him and said gravely, "It appears from this petition that you have been in the penitentiary eight years."

"I have," was the reply.

"And during that time you have performed faithfully every duty that has come in your way to the best of your ability?"

"I have," answered the agent, his courage swiftly rising.

"Then, sir," said the governor, with the air of one conferring a priceless favor, "I pardon you out!"—Youth's Companion.

DIAMOND DOLLARS OF 1804.

Only Four of the Original Coinage of 19,570 In Existence.

"Every now and then one reads about the discovery of another of the famous 'diamond dollars' of 1804," said a gentleman of this city who owns one of the finest private collections of coins and medals in the south. "The dollars of that date are popularly supposed to be worth from $1,500 to $2,000 apiece, and if a few originals could be produced I dare say they would bring that figure easily enough. But it happens, unluckily, that there are only four on earth, and they are locked up in the vaults of the treasury building at Washington and couldn't be bought at any price. They are what are known as the 'test pieces,' which are always laid aside whenever a new coin is struck, and the rest of the issue is at this moment quietly reposing under several miles of deep blue sea. The true story is rather interesting. In 1804 the mint at Philadelphia is known to have turned out 19,570 silver dollars. That was the entire issue, barring the test pieces I have just spoken of, and it was never put into circulation. The whole lot, just as it came from the stamping presses, was dumped into an iron chest and put on board a merchantman bound for China. It was directed to the captain of a United States frigate then in oriental waters, and was intended to be used in paying certain expenses connected with the service. The merchantman ran into a Chinese typhoon and went to the bottom, where to the best of my information she still remains, iron chest and all, and that is the reason your Uncle Sam is the only collector in the world who has a complete set of American dollars. Every other collection, including my own, is short one issue, and the gap will never be filled until the sea gives up its own."

"Do you mean to tell us, then," said a listener to the foregoing, "that all the 'diamond dollars' now in private cabinets are counterfeits?" "By no means," replied the collector. "I own an 1804 dollar myself, and there are at least three others, to my knowledge, in the south. They were issued by the government and are perfectly good and legal coins, but they are not originals. They are what are known technically as 'restrikes.' In the early days, when the mints had a few coins left over from one year to another, they would change the date by striking them with a special die, an operation that can always be detected by an expert. For some reason or other, nobody knows just why, a few dollars of the 1800 issue were restruck in 1804 and put in circulation. It is probable that the total number was not over 40 or 50, and a good many have been lost. The ones in existence are worth $150 apiece, and you may rest assured that all the 'diamond dollars' not mere imitations belong to this little lot of restrikes.

"Of course, some of them have been sold to green collectors as originals, and I was myself the innocent cause of such a transaction only a few years ago. A friend of mine, who lives in an adjoining state, and who owns a great many rare and beautiful coins, telegraphed me one day asking whether $500 was too much for a genuine 1804 dollar. I took it for granted that he knew the facts about the issue, and after puzzling over the message for a considerable time concluded that it was an obscure joke of some kind and that I was simply too stupid to see the point. So I wired back advising him to buy a bushel at that figure, and he promptly closed the deal. It turned out afterward that the coin was a restrike, and my friend has never quite forgiven me. What deceived him was the fact that the piece was known positively to have been locked up in an old chest at Savannah since 1812. That did away with the counterfeit theory, and the only thing he was doubtful about was the price."—New Orleans Times-Democrat.

The Festal Hour.

"How happy the Dabney-Joneses look this evening. It must be their wedding anniversary."

"No; they've got their old cook back."—Detroit Free Press.

SOCIETY KLEPTOMANIACS.

They Purloin Articles of Virtu From the Homes of Officials.

One of the leading jewelers of the capital was somewhat taken aback one day, says a Washington paper, by receiving from the wife of a high official an order for half a dozen gold nails with a jewel in the head of each and a dozen small gold chains. He inquired the uses to which the nails were to be put, when his patron said:

"You see, I have a number of very valuable objects of art, which, although they are very expensive, are very small and easily handled. As the wife of an official of the government, I am obliged to open my house during the season to the constituents of my husband and the Washington curiosity seeking public in general. On my reception day, therefore, my house is crowded with all sorts of people, and last winter I suffered the loss of several of my most valuable treasures.

"I have long been trying to devise some plan by which I can keep my objects of art outside of my cabinets and yet not have them stolen, for that is the only word I can use in regard to the loss of my treasures. I have concluded that I must either nail down some of the bric-a-brac or chain it securely to the table, and hence I am going to try this remedy. That is why I want these nails and chains."

This woman's predicament is not an unusual one in Washington official circles. The kleptomaniacs who commit the most aggravated depredations are for the most part well known leaders in society.

One winter social circles in Washington were greatly bewildered and shocked by the doings of one of the best known women in official circles. A number of hostesses began to miss valuable doilies from their dinner tables after they had given luncheons or dinners, and finally several of them got together and compared notes, and suspicion fell upon one of the women who had been the guest at luncheons given by those gathered at the conference.

Finally the wife of a prominent diplomat determined to stop the raid upon the doilies, and at the next luncheon she seated the suspected kleptomaniac next to her. When the doilies were brought on, she watched her guest and discovered that the latter laid her doily on the table and, carelessly dropping her handkerchief over it, picked up both.

The hostess, in a most charming manner, turned to her guest and said: "Pardon me, my dear Mrs. ——, but I am afraid you have my most exquisite doily in your handkerchief. It is so fine I am afraid it will be crushed and therefore call your attention to your inadvertence in taking it up with your handkerchief."

The guest was not in the least abashed, and with a laugh she shook out her handkerchief, and the doily fell back on the table, whereupon she exclaimed: "Why, dear me, so I have! How very careless of me!"

There were significant glances all around the table, but no more doilies were lost during that season.

THE OPEN MOUTH.

Said to Be a Survival of Babyhood Tendencies.

Hiram M. Stanley advances a new explanation of the tendency to open the mouth in surprise and astonishment. Darwin ascribed this tendency to the intuitive desire for quietness and effectiveness of breathing and to mere relaxation of the muscles. Mr. Stanley finds a deeper organic reason—namely, that the open mouth is the attention sign, and is a primitive and constant reaction with the young of many animals for the reception of food—for example, with birds.

Any sound or other stimulus immediately causes the young bird to extend its mouth. With young infants the same influence has often the same effect. The mouth of the infant under such stimulation usually assumes the sucking form, and its smile when the finger is pointed at it may be either nascent or degraded sucking.

Mr. Stanley maintains that the common and highly useful tendency of the very young to open the mouth to all stimuli, visual, aural, etc., continues as a survival in after life, being especially brought out with stimuli of high intensity and unusual quality and thus becomes a mark of surprise and astonishment. It is a habit very common among boys and girls to open the mouth under any attention. The rise of smiling and laughter as connected with wit and humor—at the basis of which lies surprise—thus declares itself as a kind of attention expression.

Assuming that the primary expression of the mouth is a feeding expression and that this probably has been modified and evolved in connection with a variety of attention phenomena, Mr. Stanley suggests that it would be worth while to make a detailed study of expression in infants and young animals with this point in view.—St. Louis Globe-Democrat.

"Honest Labor Bears a Lovely Face."

There is nothing more pleasing to look upon than a hearty, ruddy face, gained by honest toil. They are the saving of the nation, these toilers of both sexes, struggling for daily bread.

Pure blood makes them able to keep up the daily round of duty at home, shop or store. If the blood has a taint or impurity, or a run down feeling comes on, the one remedy is Hood's Sarsaparilla, America's Greatest Medicine for the blood.

Poor Blood—*"My blood was so poor that in hottest weather I felt cold. Hood's Sarsaparilla made me warm. It is the right thing in the right place." Hattie J. Taylor, Woodstown, N. J.*

25 CTS. PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS.

Tea Poisoning.

Victims of tea poisoning are becoming alarmingly prevalent. Women demand the life and variety of Health, and instead of doing it naturally by building up their system they resort to tea. They should take Hostetter's Stomach Bitters. It tones up the nerves, regulates the bowels and cures dyspepsia.

A St. Louis dentist has just married his assistant. Probably he thought they could pull together.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

No man lives without working. Some men pretend to, but they are constantly working their friends.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address,

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

In Illinois' Early Days.

Teaming to Chicago is a favorite topic of the early settlers, and many pleasing anecdotes are told of those long and weary, though oftimes hilarious, trips. It always required a week, and sometimes longer, to make the journey. Twenty or thirty hungry teamsters stopping at a rude country tavern overnight sometimes made it interesting for the landlord. Fifty cents for supper, breakfast and lodging, with all the whisky one could drink and free hay for the horses, was the uniform price for entertainment in the early days, and the average teamster usually intended to get the worth of his money before he settled his hotel bill.—Stillwater Valley (Ills.) Graphic.

Mr. Kimberley's Nimble Wit.

James G. Blaine was nonplused once while he was secretary of state. One of the applicants for a consulate in Japan was the late Samuel Kimberley of Baltimore, who died in the service in Central America. After he had presented his credentials Mr. Blaine said:

"I should like to appoint you, Mr. Kimberley, but I have made it a rule to recommend no one who does not speak the language of the country to which he is sent. Do you speak Japanese?"

"Cert-t-tainly, Mr. B-Blaine," stammered Mr. Kimberley. "A-a-ask me s-s-something in J-J-Japanese and I'll answer you."

Mr. Blaine hadn't a word to say, but the Japanese post went to another man, all the same, and Kimberley went to Central America.

Another story is told of Kimberley equally creditable to his nimble wit. One day he met a young woman who threw her arms impulsively around his neck and kissed him. Seeing her mistake, she drew back and angrily asked:

"Aren't you Mr. Jones?"

"N-n-no, madam," replied Kimberley, bowing; "I'm n-n-not, but I w-w-wish to thunder I w-w-was."—Saturday Evening Post.

The Pronunciation Explained.

"There is a family in Virginia," says Collier's Weekly, "the name of which is spelled 'Enroughty,' but it is pronounced 'Darby.' This fact, familiar to many Americans, happened to be told by Miss Hayward at a dinner in London at which Mr. Kipling was present, when he broke in: 'You have saved my reputation by telling that. You are the first man, woman or child who could back me up in it.'

"The explanation of the peculiarity is that the Derbys were an English family who settled in Virginia in the colonial days. One of the sons, the traditional black sheep of the family, was left a share in his father's will on condition that he changed his name. He changed his written name to Enroughty, but continued to call himself Derby.

"On hearing this explanation Mr. Kipling said, 'I think I will change my name to Smith.' 'You can spell it Smith if you like,' was the reply, 'but it will always be pronounced Kipling.' a remark which caused him to look 'as unfeignedly pleased as a boy.'"

Best Prescription for Malaria, Chills and Fever,
Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form.... Sold by every druggist in the malarial sections of the United States..... No cure, no pay.... Price, 50c.

They All Recommend Grove's.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

WHOLESALER.
ST. LOUIS, MO., Feb. 6, 1899.
PARIS MEDICINE CO., City.
Gentlemen:—We wish to congratulate you on the increased sales we are having on your Grove's Tasteless Chill Tonic. On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898, 2860 dozen Grove's Tonic. We also find that our sales on your Laxative Bromo-Quinine Tablets have been something enormous; having sold during the late Cold and Grip season 4,200 dozen.
Please rush down order enclosed herewith, and oblige, Yours truly,
MEYER BROS. DRUG CO.
Per Schall.

RETAILER.
KEDRON, ILLS.
PARIS MEDICINE CO.,
Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of Grove's to where I sell one of the others. I sold 36 bottles of Grove's Chill Tonic in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.
Respectfully,
JOHN T. VINYARD.

CONSUMER.
WHITESBORO, TEX., Sep. 13, 1898.
PARIS MEDICINE CO., St. Louis, Mo.
Gentlemen:—I write you a few lines of gratitude. I think your Grove's Tasteless Chill Tonic is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of Grove's Tonic. My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.
Yours truly,
JAMES D. ROBERTS.

SEEN UNDER A GLASS

A MICROSCOPE REVEALS BEAUTIES OF ANIMAL LIFE.

Marvelous Arrangement of a Spider's Eyes—Daddy Longlegs Can See in Any Direction—Revelations About Mosquitoes, Flies and Other Things.

Dr. B. L. Riese is a Chicago scientist who devotes his leisure time to bug-hunting. His forte is microscopy and the use of this delicate instrument in connection with insect anatomy has resulted in some extremely interesting discoveries of late. He disposes of one or two theories which have been held for years, notably the one which provides insects with cup-shaped feet, the suction of which enables them to walk on polished surfaces in seeming defiance of all the laws of gravity. His microscope shows that the insects always have hooks of great relative power on the ends of their legs, which are used to grasp inequalities invisible to human eyes.

FEELER OF A MAY FLY.

Under the microscope the polished surface of plate glass is shown to be really a mass of inequalities. The naked eye, the touch, will not reveal them to man. Under this same instrument the feet of the common house fly is shown to be re-enforced by hooks small enough to find lodgment in the inequalities of the glass surface. The foot of the mosquito has a wonderful double hook which gives it the power of holding to almost any smooth surface. In fact, the foot is frequently entangled in some meshes which to the eye appear to present no inequality. When the mosquito struggles—as can frequently be noticed—these hooks have clasped something which is clasped the tighter as the insect tries vainly to fly away.

But it is in the visual apparatus that nature shows the most marvelous adaptability to the lives of the bugs. Some of the eyes Dr. Riese has placed on microscopic slides are marvels of intricacy. The fact that they are stationary, without lateral or vertical power—they can not alter the focus or direction of gaze—makes it necessary for the insect to be provided with lenses so cut up with facets that they will capture and retain pictures in almost every degree of the lateral and vertical planes. Insects can see as well between what in man would be called the shoulder blades as they can directly in front. In many cases they see to much better advantage behind than before.

Dr. Riese adjusted his microscope at this time and placed a slide in position whereon was pasted the body of a "daddy long legs," or common garden spider. This specimen is an exceptionally fine one and is so mounted as to bring the eyes directly under the searching power of the instrument. The eyes are wonders in themselves, but their position is even more wonderful. They are perched on top of a watch tower in the middle of the back. They project into the air to what seems a full inch under the glass; seen by the naked eye this tower in indistinguishable until the mind has been attracted to its existence by the microscope. The eyes are on each side of the tower, very near the top. "That insect can see as well over its shoulder as it can in almost a direct line in front," said Dr. Riese. "Possibly that is the reason—in fact, it may be said to be certainly the reason—that a spider can run backward as well as forward. The only spot where it does not seem to see well is right in front. You can capture one from that side much easier than from any other. This spider is not fitted with the additional eyes which other insects have. Usually the compound eyes are supplemented by simple eyes set in front and low down on or near the proboscis which enable it to see at short range in front. But the spider lacks these supplemental eyes.

WATCHTOWER OF A SPIDER.

"Here is the head of a grasshopper which shows the more ordinary style of eye with which insects are fitted," continued the doctor, placing another slide under the glass. "You will see that this insect has a huge eye on each side of the head. They resemble the eyes of a horse in a measure, but are immensely larger in proportion. Now they are fixed in the head immovably so that the bug can not turn them in the slightest degree. They have none of the delicate appliances of the human eye to reduce focus or change direction, so nature has compensated.

"You will see that the eye is enclosed in a transparent sack and that it has the appearance of hundreds of glassy fish eggs. These enable the insect to catch pictures in all directions. But just in front the lines are rather obscure, so nature has bestowed some extra eyes on the grasshopper. Look closely to the base of the antennae and you will see one of these extras. Some insects have them in the tips of their noses, as it were. These are for short range seeing and give the insect an advantage not possessed by spiders. This is an excellent type of the compound eye."

The slide was moved slightly that the leg of the insect might be examined under the powerful lens. The joint work of the limb is like a ruby rush, the delicate blood vessels imparting a brilliant hue thereto. The structure is extremely powerful, the joints fitting into each other so as to impart the greatest elasticity and power. On the end of the leg are strong hooks which can close on any object with great force. They also give the insect the power to grasp any inequality forcibly, to use the enormous muscular power which results in a leap of hundreds of times the length of the insect.

"The theory," said Dr. Riese, "that insects have cup-shaped terminations to their legs, which enable them to travel up a wall or up a glass is not correct. They have nothing of the kind—at least none I examined has. Suction, the supposed force which keeps them in their seemingly unscientific position, is not used at all. Those hooks are used as a monkey uses the long fingers and as a bird uses its claws, to grasp any roughness on the surface. If the smoothest piece of glass known were examined under a powerful microscope it would be seen to be a mass of inequalities. Now, the hook or hooks—some have several on one leg—are so small that they can be inserted in these inequalities. Thus what seems to be a violation of natural laws is seen to be merely an accommodation thereto.

"Look at this set of hooks on the end of the leg of the mosquito. A close glance will reveal the fact that this insect has powerful double hooks working from opposite sides of the leg. These can close up on anything too small to be seen and hold on with great power. The spider you will also see has a set of hooks which he uses with legs several times as long as the diameter of his body. He must have tremendous muscular power to use those legs at all, yet he handles each in succession at will."

One of the wonders of nature was shown on another slide. It was the head, and particularly the proboscis, of the common house fly. Projecting out from between the feelers is a broad net hooked up to the head by extension ropes. This net or web can be thrown out to a distance several times as far as the diameter of the head. It is used to suck up fluids and convey them to the greedy mouth. The net is a marvelous exemplification of nature's artistic power. The web is traced with beautiful lace work, the cords are twined in regular strands, as if they really are ropes, and the tackle is as intricate, yet simple in use, as anything used on a ship.

Seen under the most powerful glass—some 300 diameters were used—the tracery of the net is very clearly worth the study of engineers, for Dame Nature exceeds in skill any of her imitators. The study of this peculiar proboscis, with the beady eyes lying near to throw a brilliant light over the object assailed, is a work of art unsurpassed. In its mechanical purposes it is another evidence of the skill of the Creator in fashioning appliances to fit all needs.

One thing noticed in all the specimens displayed was that insects are usually covered with feathery hairs all over their parts. A glistening fly which to the human vision seems to be superlatively smooth is shown to be covered with a full suit of hairy feathers. The mosquito is literally ingulfed in feathers, with here and there spirals entwined among them. The wing of the mosquito shows the same courses of feathers running along with each strand of the structure, while the web or sails are covered with delicate hairs.

One of the most interesting wings seen was taken from a May fly, the mothlike insect which lives but one day, flutters about an electric or gas light and falls dead by the million. The lace work of this wing would furnish a pattern for the most delicate and filmy laces produced in Belgium, France or Austria. Under a powerful glass its intricacies are so clearly revealed that an accurate copy could be easily made.

REVELATIONS OF INSECT ANATOMY AS SHOWN UNDER THE MICROSCOPE.
Wing and bill of a Mosquito. Ankle of a Cockroach. Foot of Spider. Foot of Cockroach. Foot and leg of the Mosquito. Proboscis of a House Fly. Eye of a Grasshopper.

Consumption.

Nearly one-fourth of the deaths among the animals at the British Zoological Gardens last winter were due to tuberculosis. This is nearly double the human average, and confirms the rapidly growing belief that the disease is emphatically one of confinement and overcrowding, for this society's superb menagerie is very much cramped for room. The difference in the distribution of the disease between the various classes of animals at the Zoo is marked. Reptiles of all sorts are almost exempt, probably because the tubercle bacillus cannot live at the low temperature of their bodies, although two or three suspicious cases were found in tortoises and pythons. Animals suffer nearly 50 per cent. more severely than birds. But the most striking difference is that between the meat-eaters and vegetable feeders. Among vegetarians (monkeys, antelopes, deer and kangaroos) it causes 26 per cent of all deaths; among meat eaters (lions, wolves, small cats, civets) barely 3 per cent. Among grain-eating birds (pheasants, pea-fowl, grouse, ostriches) tubercle is responsible for 30 per cent. of all deaths. Among flesh eaters (eagles, vultures, owls, crows) 11 per cent. Comment is superfluous. An open-air life and a meat diet are clearly the best protection against consumption.

Costly Fruit in England.

At a farmers' club in Devonshire, England, not long since, an experienced gardener in the employ of one of the nobility made the statement that the income from ten acres covered with glass beneath which early vegetables and fruits were grown would exceed that from 10,000 acres of the best farm land as ordinarily tilled. No doubt that assertion was extravagant, but it can be said within the lines of conservatism that the Britisher wasn't off in his figures more than 50 per cent. One man, to our knowledge, a German gardener, sold early cucumbers, melons, and celery, from one acre under glass—cold frames—to Leadville and Aspen (Colo.) miners to the amount of from $3,000 to $4,000 a season.

In England, where, on account of the damp, chilly climate, even peach trees must be trained flat against a brick or stone wall like vines in order to insure fruit, and where corn cannot be grown, extremely fancy prices are paid for extra early fresh fruits and vegetables. A dollar a pound for strawberries and 75 cents apiece for cucumbers are only ordinary prices for these products, when put upon the markets early. Early fruits and vegetables bring handsome returns in large cities in any country.—California Vineyardist.

Sleep Mistakes.

To get up at 7 o'clock, or 8 o'clock, or any other fixed hour every morning, no matter at what time you went to bed the night before is the most effectual way of making a bad workman of yourself. And as for saying that eight hours' sleep is what suits everybody is as nonsensical as to say that one ounce of tobacco—no more, no less—is the quantity every one ought to smoke in a day.

No doubt it is difficult for most people to sleep as long in the morning as the body requires to repair itself. Business having fixed hours, the people who do it must accommodate themselves to them. Still, as long as people use alarms or have themselves called they will continue to feel more or less out of sorts on most days of their life.

For most of us there is only one way of solving the question—that is by going to bed nine or ten hours before the time when our business requires us to get up, and sleeping until we naturally awake. This would mean getting up at various hours, instead of the usual fixed hours. But any one who carried out the plan would feel so vigorous on arising that he could turn the interval before breakfast to good account.

Tall Men Scarce in England.

The directors of the Great Northern railway of England have issued a circular letter to the station agents stating that in future the standard height for porters in the passenger department shall be 5 feet 6 inches and in the goods department 5 feet 4 inches. This is a considerable reduction, forced by a scarcity of taller men.

Electric Thief-Catching.

A thief had for weeks been stealing incandescent lamps in one of the Parisian theaters. An electrician caught him by arranging the wires so that when a lamp was removed an electric signal informed a man on the watch. When caught the rogue had two burners in his pockets.

Newfoundland Tobacco.

The jacotars, or French-Canadian half-breeds of Newfoundland, smoke the inner bark of the red willow when they cannot procure tobacco. White settlers often use this for scenting tobacco. It is called Kil'kinick in the Indian language.

After a man has been sick six weeks people quit worrying about him, and begin to wonder why he hangs on so long.

CARTER IN JAIL LIFE

CONVICTED ARMY OFFICER'S FUTURE IN PRISON.

Five Years of Hard Work—Hard Discipline and Frugal Fare Will Be His Portion—A Number Is Branded on His Clothes—The Daily Routine.

Capt. Oberlin M. Carter, the United States army officer recently convicted of immense frauds in connection with the improvement of Savannah harbor, Georgia, a work of which he had charge as the Government engineer, was sentenced to the Fort Leavenworth (Kansas) penitentiary for five years' imprisonment at hard labor, deprivation of his rank in the army, and dismissal, and $5,000 fine.

The contrast between Carter's life for the next five years and his life for the preceding ones could not be more dissimilar. Carter's rooms were always models of luxury. No society girl, nurtured in the lap of wealth, ever excelled this luxury-loving officer in the costly, artistic elegance of boudoir and bedroom. Priceless tapestries, rare old furniture, toilet trappings in solid gold and silver, fine linens, dainty perfumes—all these and a thousand other elegancies are as much a part of Oberlin M. Carter's life as the air he breathes.

WHERE CAPT. CARTER WILL WORK.

At the Fort Leavenworth penitentiary he must manage to survive for five long years without his wine suppers, his rapid friends, and his perfumed baths. Five changes of toilet a day are not recognized as essential at the Fort Leavenworth prison. One suit is quite sufficient, according to the prison code—a stout suit of coarse gray, with a big straw hat in summer and a small blue denim cap in winter.

The man who has played the high-roller for years, who has been courted by pleasure-loving fashionables, admired by women, and envied by men, will for the next five years be kept under lock and key as a mere thing, duly ticketed and numbered. His number will be marked in glaring red, stenciled on his prison garments in four places—right across the broad of his back, over the right thigh, and on the calf of each leg. A more degrading thing this branding of the criminal more prominently than the government mule is marked—could not be devised.

Fort Leavenworth is not a place where the tastes of prisoners are consulted. Discipline of the handcuff-shotgun variety is promptly applied as the occasion demands. The prison is a collection of old buildings, entered through a sallyport, guarded night and day by heavily armed men. Inside the sallyport a gloomy archway leads under the offices of the warden and his subordinates, the printing shop, and photograph gallery, to the prison buildings where the convicts are housed, fed, and bathed.

CARTER IN CONVICT GARB.

At Fort Leavenworth hard labor means just what the term implies. Carter, with hands unused to labor harder than uncorking champagne bottles and throwing away money, will find the conditions far from enjoyable. He will sleep in a regulation prison cell behind a steel-barred door, watched by a guard armed with a shotgun. It is needless to say that the rare carpets and priceless tapestries which have heretofore contributed to his comfort will not figure in his Fort Leavenworth cell.

The bill of fare is not an appetizing outlook for Carter, for this luxurious officer has fattened for years upon the choicest foods prepared by artist chefs. Nothing in the eating and drinking line has been quite good enough for the epicurean captain. Think what five years of Fort Leavenworth prison fare will mean to him—an eternity of gastronomic misery.

The work which falls to the share of almost all new arrivals is with the pick and blasting drill in the quarries two miles from the prison. The stone is for use in the construction of the new penitentiary. Carter comes in for this back-breaking, hand-blistering experience. Fort Leavenworth prison has a set of very severe rules, all rigidly enforced. Should Carter grow disobedient his prison allowance of tobacco will be shut off, he will be denied the privilege of writing or receiving letters, his diet may be restricted to bread and water, and in the event of persistent misconduct he would be handcuffed day and night to the bars of his cell. They stand no nonsense at Fort Leavenworth. Still they work no cruelties and the prisoner who behaves well, takes his medicine, as it were, unflinchingly, is treated as well as he could rightly expect. He can write to his friends and receive their letters; he may subscribe for any reputable newspaper or magazine, and may have books from the prison library.

Every Saturday afternoon Carter will be compelled not only to give himself a cold-water bath with common brown soap accompaniment, but he will be forced to wash and scrub his cell, depressing work for the man who for years has been living in perfumed baths, and relying upon the services of a skilled valet for the simplest tasks of the toilet.

Attends the Quaker Wedding.

A recent Chicago visitor to the East writes thus descriptively of a Quaker nuptial ceremony he had the privilege of attending:

"At a Quaker wedding last week, where there were no display, decorations, maids or groomsmen, the air seemed charged with joy. After a silence of several minutes the guests arose and the bridegroom taking the hand of the bride said: 'In the divine presence and before this assembly I take Patience B—— to be my wife, promising to be to her a faithful and affectionate husband until death shall separate us.' The bride responded: 'I take thee, John J——, to be my husband, promising to be a faithful and affectionate wife until death shall separate us.' A prayer was made, the bridegroom kissed the bride and after congratulations had been said all repaired to the dining-room, where the breakfast was spread. The table was set with the family silver and china, which had come from England with the great-grandfather of the bride, and there was a single rose at each corner. After the breakfast the entire party accompanied the happy pair across the meadow to their new home and were shown the gifts of loving friends. One of the guests was heard to say as she started homeward: 'What is the use of all the fuss and worry attendant upon a moderately elaborate wedding, when one can have such a sweet time as that was without them?'"

The Ruling Passion.

The clergyman had finished and the organ was pealing forth the sonorous rapture of the Mendelssohn march.

"One moment, George," said the radiant bride, and facing the audience she raised her exquisitely bound though somewhat bulky prayer book in her daintily gloved hands and pointed it directly at the brilliant audience. There was a sharp click.

"All right, George,' said the bride, "come along."

And as they marched down the aisle she showed him that the supposed prayer book wasn't a prayer book at all. It was a camera!

"It's my own idea, George," she whispered. "Clever, isn't it?"—Cleveland Plain Dealer.

Water Cheap in Glasgow.

In Glasgow a £15 householder obtains for 7½d per annum a continuous, never-failing, unrestricted stream of the purest water in the world, delivered right into his kitchen, washhouse and bathroom. It is calculated that 380 gallons of pure water are delivered to the citizens of Glasgow for every penny paid. And it is water of such peculiar softness that the householders of Glasgow can pay their water rate out of what they save on soap.

A Disappearing River.

One of the strangest streams in the world is in East Africa. It flows in the direction of the sea, but never reaches it. Just north of the equator, and when only a few miles from the Indian Ocean, it flows into a desert, when it suddenly and completely disappears.

Electric Street Sweepers.

Electric automobile street-sweeping machines are being prepared to clean the streets of Paris. The old clumsy dirt machines now in use are to be done away with.

Sensible Legislation.

Western Australia has an act in force prohibiting the landing of any one who cannot write out a given passage in English.

When you think a man is talking nonsense, possibly he is talking sense, and you are unable to comprehend him.

Clara—And are you still searching for your ideal man? Maude—No; I have quit reading novels.

COINS THAT ARE RARE

SOME OLD ONES ARE VALUABLE, OTHERS ARE COMMON.

One Billion of Cents Now in Use—Philadelphia Mint Turns Out About 4,000,000 of Them a Month to Supply the Great Demand.

The demand for 1-cent pieces is so great that the Philadelphia mint is compelled to turn out nearly 4,000,000 a month to keep up the supply. There are at present something like 1,000,000,000 cents in circulation.

If you want to exchange a hundred-dollar bill for cents you would get ten good, large bags full of coppers. Nickel and copper coins have no mint marks, neither have coins issued at the Philadelphia mint. Collectors often pay high prices for coins bearing certain mint marks which otherwise would not have been worth more than their face value.

The first United States cents struck for circulation bear the date 1793. They are of six varieties, and are valued at $2.50 to $6.25.

Very rare are the New York doubloon, coined in 1787, of which only five are known to exist. On one side of this rare and curious coin is a picture of the sun rising over a mountain, surrounded by the legend, "Nova Eboraca Columbia Excelsior." Below is the name of the designer, "Brasher." The other side has the original form of the national motto, "Unum E Pluribus." There is a heraldic eagle, on one wing of which are the letters "E. B.," the designer's initials. These coins are worth about $500. The last one sold brought $527. It had belonged to an old Maryland family ever since it was coined.

The five-dollar gold piece of 1822 is a rare coin. At one time only two were said to be in existence, one in the Philadelphia mint, the other in Boston, but a third was picked up in a New York money changer's shop a few years ago.

"I was afraid at first that it might be a counterfeit," said the collector of coins who happened to spy it. The man was so delighted to secure it that before leaving the shop he brought several other coins which he didn't want. He paid only $6 for it. The same day he received an offer of $250; later $450 was offered by another gentleman; $600 by another one, but the gentleman, at last accounts, was holding it for $1,000. One of the most sought after colonial coins is the Highly copper. It was struck in 1737 by Samuel Highly, who was a physician and a blacksmith at Granby, Conn. He got the copper from a mine near by and shaped the coin at his forge.

About nine years ago a silver shekel was found in Texas which dates back to 142 B. C. Its intrinsic value is about 50 cents; its value to collectors $5,000.

One of the erliest known coins is a drachm of ancient Aegina, coined about 700 B. C. Its intrinsic value is 30 cents; its market value $7.

STRANGE LAKES IN PERU.

Instead of Surface Outlets They Have Maelstroms that Swallow Boats.

From Crucero Alto, the highest town in the world, the Southern Railroad of Peru drops down into the Lagunillas, or lake region of the Cordilleras, where, 14,250 feet above the sea, is a group of large lakes of very cold, pure water, without inlet or outlet. They receive the drainage of the surrounding hills and conceal it somewhere, but there is no visible means of its escape. A fringe of ice forms around the edges of the lakes every night the year round, yet they contain an excellent variety of fish, called the pejerray, which is caught near the shore, and sold at Puna and in other neighboring towns. The two largest lakes, Saracocha and Cachipascana, with several smaller ones in the same neighborhood, are owned by the family of Mr. Romana of Arequipa, who has just been elected President of Peru. He owns immense tracts of land in this locality, with thousands of sheep, cattle, llamas, alpacas and vicunas, which are herded upon it.

A curious phenomenon about the lakes is that they keep at the same level all the time, regardless of the dry and rainy seasons. No amount of rain will make any difference with their depth, which, however, in the center is unknown. And this adds to the awe and mystery with which they are regarded by the Indians. There are no boats upon the lakes, except a few small balsas, or rafts, made of bundles of straw, which keep very close to the shore, for fear of being drawn into whirlpools that are said to exist in the center. There is some foundation for this fear, for only two or three years ago a balsa containing five men disappeared in the darkness, and was never heard of again. Of course, it may have tipped over and its occupants have been paralyzed by the cold water in an ordinary way. But their bodies never were discovered, nor did the balsa ever float to shore. Therefore the people think the whole party was lured into a maelstrom and swallowed up by the mysterious waters.

The whirlpool near the center of Lake Popo which receives the waters of Lake Titicaca, is well known, and hundreds of men have lost their lives by venturing too near it. Boats that are drawn into the current are whirled swiftly around a few times and then disappear. For the protection of navigators the government of Bolivia has anchored a lot of buoys in Lake Popo, and boatmen who observe them are in no danger. There is supposed to be an underground outflow from all of these lakes. It is claimed that articles which have been thrown into their waters have afterward been picked up on the seacoast near Africa, and careful observers say that on the beach in that locality are frequently found cornstalks, reeds and other debris which do not grow on the coast, but are found in great abundance among the interior lakes.

Young America.

In one of the large cities of the middle West a man who occupies an important and responsible position in the councils of the Standard Oil Company happens to reside not far from the home of a labor agitator. The two men naturally have not much in common, but their two boys, upon whom the artificial distinctions of society exercise less restraint, are great friends.

"Papa," said the son of the rich man, coming in one day from a romp with his playmate, "are you going to vote for Higginson?"—by which name may be designated one of the candidates for mayor in a pending city election.

"To be sure," answered his father.

"Well, I wouldn't!" said the boy, with great positiveness.

"Why not, Freddy?" asked the magnate, considerably amused. "Would you vote for the other man? No? What's your politics, anyhow?"

"I don't know yet," rejoined Freddy, "but"—and he stuck his hands in his pockets and stood with his feet wide apart—"I'm down on trusts!"

TOPICS OF TIMES

America has 208 female lawyers.

The use of the fan originated in China.

Persia first grew the cherry, the peach and the plum.

Our clocks and sun dials were invented in the Orient.

One-fourth of the inhabitants of the Argentine Republic are Italians.

Sixteen ounces of gold are sufficient to gild a wire that would encircle the earth.

Denver, Colo., has more bicycles in proportion than any other city in the country.

Although her husband is worth $25,000,000, Mrs. Paul Kruger does the family cooking.

Russia is making a vigorous effort to supplant the United States as the butcher for England.

One thousand vessels cross the Atlantic Ocean regularly each month and some of them twice a month.

The value of hogs is $166,272,770, more than the total amount deposited in all the saving banks in the country.

The Baltimore and Ohio Southwestern Railway Company will try a plan of a co-operative grocery for its employes.

The average life of a car wheel is ten years. It requires 1,200,000 new wheels each year to replace those worn out in the service.

The woman who invented satchel-bottom paper bags was offered $20,000 for the patent before she could get away from Washington.

Eggs as an article of diet were first used by the Malaccans, and when we speak of Shanghai chickens we but mention an Asiatic name.

Japan has to rely entirely upon foreign countries for her supplies of leather, there being only two tanneries worthy of the name in the country.

In America the ministry is being more used as a profession by women than the law. There are about 300 women ministers in the United States.

Six hundred and fifty thousand pounds of tea are consumed in Britain every day, which gives 5,200 gallons a minute, night and day, throughout the year.

Sprinkling railroad tracks with crude petroleum to keep down the dust has been abandoned. Live sparks from locomotives set fire to the oil and caused much damage.

During the exposition in Paris next year there will be ninety-two omnibus lines and 1,500 vehicles, performing 25,000 journeys a day and capable of transporting 1,028,000 passengers.

Tacoma proposes to use salt water for sprinkling the streets. Sea water does not dry so quickly as fresh water, with the result that one load of it is equal to three loads of fresh water.

Investigations made officially in Illinois show that a pound includes 2,185,000 seeds of blue grass, 1,421,000 of timothy, 863,000 of white clover, 153,000 of red clover and 243,000 of alfalfa.

Austrian women can be seen in the best restaurants with a huge glass of beer standing a foot high on the table in front of them, and they consume the liquor with ease and evident enjoyment.

Over 70,000,000 pounds of poultry and nearly 36,000,000 dozen of eggs, produced in Missouri, were handled by transportation companies last year, the aggregate cash returns for which were $8,298,232.

London capitalists are interested in the proposal to lay a cable from Vancouver, B. C., to Skaguay, Alaska, to connect with the telegraph line to Dawson City.

The area of the Transvaal is 120,000 square miles, or about the same size as the combined areas of the States of Pennsylvania, New York, Massachusetts, New Jersey, Connecticut and Vermont.

Though Russia is one of the greatest lumber-producing countries in the world, considerable quantities of finer wood, such as cabinet work woods, rosewood, mahogany, etc., are imported every year.

Maine Sardines.

The output of sardines on the Maine coast is likely to be increased from 900,000 cans in 1898 to 2,000,000 cans this year, in consequence of the introduction of a new canning machine.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, DECEMBER 29 1899

The Yosemite National Park Road Commission has finished its investigation into the subject matter of free public highways into the Yosemite National Park. The Legislature has passed an act appropriating $25,000 to build the road but it has peen estimated that it will take at least $30,000 to build any one of the roads proprosed.

We here publish an extract from the Examiner:

Under the provisions of the Act, the commission investigated the various routes possible to connect with the Tioga road at Tioga, and extending to some wagon road in Mono or Inyo county. The Mill Creek canyon road, one of these, extending from Tioga to a road in Mono county, would be 12 miles long. Its grades would be about 10 per cent and the cost of construction would be about $64,000 It is considerdered a feasible route by the commission. The Levinin Creek road connecting the Tioga road in Mono county, would be 10.01 miles long with a grade not ro exceed 8 per cent. It would cost about $26,650, exclusive of engineering superintendence. This is evidenly regarded as the most feasible route by the commission. The Bloody Canyon road connecting in Mono county near Farringtons would require a road 17.7 miles in length with grades varying to 10 per cent, and would cost $35,199.

The Call issued a 52 bage Christmas edition last Sunday, fully illustrated, its illustrations being of great artistic merit.

NOTICE TO CREDITORS.

Estate of Josiah G. Dodge, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Josiah G. Dodge, deceased to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Four Months after the first publication of this notice to the said administrator at his place of residence at Lone Pine, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

NORMAN M. DODGE.

Administrator of the estate of Josiah G. Dodge, deceased.

Dated at Lone Pine, November 22rd, 1899.

Notice of Sheriff's Sale.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court of the State of California in and for the County of Los Angeles dated the 9th day of November, 1899, in a certain action wherein P. B. Mathiason, Henry Anderson and Cyrus Wheeler, as plaintiffs, recovered judgment against Theodor Wibbelt, defendant, on the 31st day of July, 1899, for the sum of two thousand and forty five ($2,045.00) dollars and costs of suit taxed at twenty-two and sixty-five hundredths ($22.65) dollars, I have levied upon the following described property, to wit: Those three certain mining claims situated in the Argus Range of Mountains, in the County of Inyo, State of California, known as the "Westphalia," the "McKinley," and the "Iron Queen" Gold Quartz Mining Claims and also those two mining claims situated in the Slate Range of Mountains in said County of Inyo known as the "Matora" and the "Los Angeles" Gold Quartz Mining Claims, together with all the rights, members and appurtenances thereunto belonging; also fourteen thousand (14,000) feet of iron pipe running from the spring in Big Canyon to the Ballarat stage road in said County of Inyo; also the right to take and use the waters of said spring,

Notice is hereby given that on Wednesday, the 3rd day of January, 1900, at the hour of twelve o'clock, noon, in front of the Court House at Independence, in the County of Inyo I will sell all the right, title and interest of the said Theodore Wibbelt, the defendant, in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Independence, California, November 22nd, 1899.

A. M. GIVEN, Sheriff.

CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR.)
GENETAL LAND OFFICE
Independence California.

A protest having been filed in this office by Rafael Rossi, against Lieu Selection No. 396, by C. W. Clarke, for the NW¼ of SE¼ of Sec. 33, T. 8 S., R. 33 East, M. D. M., and by this office transmitted to the Hon. Commissioner of the General Land Office, in which said protest it is alleged that the land in question is mineral in character; that it is more valuable for mineral than it is for agricultural or other purposes; that said Rafael Rossi has a mineral location thereon, and has had since 1896, and has ever since and now works said mining location.

The Hon. Commissioner having ordered a hearing upon said matter said C. W. Clarke and R. Louis Rossi are hereby notified to appear, respond and offer testimony touching said allegations at 10 o'clock a. m. on December 21, 1899, before the Register and Receiver at the United States Land Office in Independence, Inyo County, California.

S. W. AUSTIN,

STUART—DECKER—At residence of Mrs F. Rhine, Independence, December 23, 1899, by the Rev. J. E. Pardee, Claude A. Stuart and Miss Emma Decker, both of Salt Lake City.

DIED.

WALTER—At Fort Independence, December 26, 1899, Miss Agnes Walter, a native of Kiel, Germany, aged 80 years, 8 months and 1 day.

Happy New Year.

Turn over a new leaf.

A railroad into the Ballarat country is a sure thing.

Mr. J. R. Turner of Lone Pine was in town Wednesday and paid us a visit.

Harry Jiggens is the happiest "kid" in town. Santa Claus gave him a burro and it is a cuckoo.

E. T. Anderson writes from Los Angeles that his wife is very low and not expected to live.

The mill at Chico canyon is running on gold ore and we understand is shipping considerable bullion.

A rare good time is in store for those who are fortunate enough to attend the New Year Hop, Monday night.

The Tuber canyon mill will start up the 1st of the year. This is a 40 ton plant and will be lighted by electricity.

The subscription price of the INDEPENDENT is only $4 per annum. Will take chickens but don't want all of them dead, SEE.

To-night at the Pavilion, the Original Two, Billy Meyers and Dot Lynch, in their Black Face Act "Rehearsal" introducing the latest songs and dances.

Without a doubt the railroad will soon be built into our southern mining country. Two gangs of surveyors, consisting of sixteen men, are now in the field.

Mat McDonald, an old resident of this county, has been in a San Francisco hospital for some time with a broken leg. We understand that he is improving.

Two large bodies of antimony have been discovered west of Ballarat, and as soon as railroad transportation can be had these mines will be worked on a large scale.

We experienced the finest weather during Christmas and the few days following that the oldest inhabitant of this section remembers. It was warm and pleasant as the days of May.

Mr. Harrison has added ten stamps to the Radcliff mill and has completed a tramway from the mine to the mill. Seventy-five men are now on the pay roll and more will be added immediately.

Thorpe and Cook have returned to their gravel mine in Mazourka canyon after spending a week in town. Both gentlemen speak in the highest terms of their prospect and expect to soon reach bedrock.

J. Harry Cole and Bill Miller, who were brought to Independence from Ballarat on a commitment from Justice Decker of that place, for contempt of court, had a hearing in Superior Court yesterday and were discharged.

Institute Ball.

Institute week was closed Friday night by a Grand Ball, given by the Independence String Band, at the Pavilion. To say that it was a howling success is putting it very mildly, for it was indeed a grand affair. Inyo County's fair daughters were here from its four corners, and their toilets were not only grand and expensive, but beautiful, and ye scribe would like to describe each lady's toilet, but space and ignorance of such things forbids such an attempt. At about nine o'clock the vast throng formed for the Grand March, and when the sweet strains of the familiar air of Manhattan Beach was played by the Band, there were some sixty-five couple on the floor, and the Grand March commenced, lead by one of Bishop's fairest daughters, Miss Lillian Shirley, and our congenial townsman, Mr. David Holland, assisted by Mrs. Wilson, of the State Normal, and Mr. Quinn of the Reward mine.

Miss Shirley's toilet was a black silk cardigan skirt with light waist covered with black lace, decollette.

Mrs. Wilson was robed in a tan colored silk and looked charming.

The two gentlemen who escorted these ladies wore a set smile through the march and seemed to be the envy of all the gentlemen present—but such is life.

After many beautiful figures had been formed and the hall had been circled several times, the enticing strains of a waltz was heard and each couple floated away as on wings. Many round dances and quadrills were danced until about 12 o'clock. The happy dancers retired to the hotels where supper had been prepared, which consisted of a fine menu at both places.

After supper dancing was resumed and continued until the small hours of the morning, when all sought their respective homes feeling that they had indeed enjoyed one of the pleasantest dances they ever attended.

Great credit is due the Independence String Band, which is composed of Mr. and Mrs. Matlack, Mr. Church and Mr Yandell, for making it the event of the season. The music was surely all one could wish and the arrangements were good and well looked after.

The Rev. E. W. Van Deventer, D. D., of Reno, Nevada, the Superintendent of the Nevada Mission preached on Sunday evening to a large audience, his text was taken from John V: 6, "Wilt thou be made whole," and the sermon was both interesting and instructive. Dr. Van Deventer is a very strong and forceful speaker. The music for the occasion was appropriate to the season. Special Christmas choruses, rendered by a choir consisting of Mrs. McLean, Misses Cook and Thompson, Messrs. Hampton, Carson and Yandell, with Mrs. Webb as organist, Mrs. McLean also rendered very effectively the vocal sacred solo, "The Holy City." At the conclusion of the sermon the Sacrament of the Lord's Supper was administered.

News comes from Wild Rose canyon that Jim McDonald has bought his partner's, Frank Kennedy, interest in their lead properties. It is reported that large bodies of galena ore have been opened up that run 300 ounces in silver to the ton. John La Moyne has also uncovered a large body of high grade lead ore and that he will be in a position to ship large quantities at a good profit on the completion of the railroad.

Mr. Day, of Ballarat, has bought a 6-stamp mill, and each stamp has a seperate mortar and three discharges. We are informed that this mill will have a capacity of 60 tons a day. Steam will be the power used. This plant will cost $22,000 including the tramway. This machinery will be placed on the Mineral Hill mine some four miles south of Ballarat.

Mr. C. G. Clugston, of Darwin, is here receiving medical aid, having become leaded in the mines of that district. He informs us that considerable activity is going on in the way of prospecting and development work in and around Darwin. That the coming of the new railroad is looked for yard to with great interest, as it will make it possible to ship much ore that cannot be handled now at a profit.

Justice Davidson was occupied for a couple of days during the past week hearing the argument and testimony in the case of the People vs. Ed. Rose, charged with assault with a deadly weapon with intent to commit murder. Defendant was discharged as the evidence was conflicting as to who fired the first shot.

Mr. Taylor, Pres. of the South Riverside Bank, has placed the Gold Hill mine, known as the Death Valley mining property, in the Panamint mountains with New York people for $207,000. They will expend $100,000 more in erecting a 40-stamp mill and other necessary machinery and improvements.

Messrs. Holland and Fletcher have moved their cyanide plant to the old Maxim mill site. The apparatus will be placed in position as soon as possible and work commenced. We understand that there is something like 500 or 600 tons of tailings on the ground that will assay from $8 to $12 per ton.

Judge Decker, of Ballarat, fined Bill Miller $50 for contempt of court, and J. Harry Cole, Deputy Sheriff, $20 for allowing a prisoner to escape. This occurred about two weeks ago in our southern burg. The dignity of our southern Court must be upheld at any cost.

Mr. H. Levy wishes to thank the public for their liberal patronage at his Ball supper given at the close of the Institute. Friday night. He announces that he will serve the Ball supper New Year's night, and that the menu will be all that one could wish for.

Miss Clara Reynolds, who is teaching in Ventura county, is home spending the holidays with her family.

Don't forget to come and bring your lady to the New Year Hop, Monday night, at the Pavilion.

Vaudeville and Vitascope Company.

Mr. J. P. Davis representing the Thatcher Vaudeville and Vitascope Co. was here last Wednesday and billed our town for a performance to take place to-night. We understand that the members of this company are all artists in their line and that we can expect to be entertained royally. The Elko *Independent* says the following: The Thatcher Vaudeville and Vitascope company gave a very good entertainment last evening. Bert Thatcher is a whole show in himself. His negro specialties were good and brought many broad smiles to the faces of his audience. The dancing of "Baby" Bertie, three years old, and the ladies of the troupe was good. The moving pictures were true to life. The repulse of the Spaniards, the charge at Las Guasimus, the battle of San Juan and the raising of the American flag at Cavite were alone worth the price of admission.

Christmas Tree.

The annual Christmas Tree of the town at the Methodist Church on Saturday evening last called out an audience that crowded the church to the doors, the children of course predominating, but the number of adults present indicated how much interested they were in the enjoyment of the children, and they certainly all seemed to have a good time. The only program consisted of some Christmas choruses rendered by the choir, and the reading of a scripture lesson and leading in prayer by the pastor. The Christmas tree was procured by Messrs. Clark and Brown on Friday and to them the thanks of the community are due. The tree was laden down with presents, many of which were beautiful and also of a useful character, as well as books, toys and games for the children. Mr. J. Sub Johnson acted as the representative from the Court of St. Nicholas, and carried out his part well to the delight of the little ones in the audience.

How Its Done In Tulare.

Some persons here are using the following recipe for chicken stew and are said to highly recommend it for economy:

Steal your chicken. It takes less time than to earn it and is far easier. Then again you can steal it at night and not interfere with your sitting by the fire all day or talking about nothing on the street.

Use good judgment. Call at the houses. Get the lay of things—the disposition of the dog and where he sleeps; the hen house, the size of the chickens. Whether there is ashes near the hen houses that will leave tracks. Don't attempt to make a steal too often and use different flocks to draw on. It is safer. While catching chickens so as not to let them squawk, a little practice does wonders.

Throw people off their guard—mix with them: wonder what is becoming of the missing fowls and display anger and sorrow over such acts.

This recipe has been used here very successfully for a year or more as the missing fowls and large increase in padlocks will testify.—[Tulare Times.

A Sad Death

The announcement of the death of Miss Mae Levy, daughter of P. L. Levy, on Friday morning caused great surprise and sorrow among the young girl's friends. Few knew that she was even ailing. As a matter of fact she had been sick less than twenty-four hours. She was taken violently ill on Thursday and a physician was called in. In the evening it was judged advisable to call in other medical assistance and a consultation of Doctors Beukers, Taylor and Waraer was held. It was decided that the patient was suffering from paralysis of the brain. Everything possible was done to relieve the little sufferer, but she passed away in a few hours.

Mae Louisa Levy was born in Livermore and was 14 years, 9 months and 2 days old at the time of her death. She was a bright girl and was popular with her schoolmates and idolized by her family. She was a musician of rare ability and would undoubtedly have attained distinction in that line had she lived.—[Herald.

Deceased was a niece of our fellow townsmen Mr. Henry Levy.

Nature Not Changed By The Franchise

It is not right to assume that the moment women are enfranchised they will rush into politics and neglect the home. In most women the domestic instinct is so strong that they ask no greater privilege than to have a home, and some one to go out into the world and earn the means to maintain it. It is this instinct which makes a woman give up a hundred-dollar position to marry a man who is getting less than that; which makes her struggle at the wash tub or the needle to keep her children together and a roof over their heads; which makes single women club together to rent a modern flat or apartments where they can "keep house." But if a woman have not this instinct, shutting her out from political privileges will not put it into her.

The great mistake that opponents make is in thinking that the conferring of the franchise is going to change a woman's nature. There is no such devotion on earth as that of the woman to the family and home, and it is both inconsistent and injust to say that if women were given a larger freedom, a voice in the affairs of government which affect the welfare of those they love, they would take advantage of it to loosen or sever the domestic ties.

IDA HUSTED HARPER.

J. W. Smith, Bill Miller and J. Harry Cole arrived from Ballarat yesterday morning. They report flourishing times in that growing desert village, and predict that before 1901 it will have a larger population than any town in the county. The mines of that section are proving to be veritable bonanzas. Capital is being invested; new plants for the working of ores are being erected, and an immense amount of development work is being prosecuted on the various properties.

Liberty and Independence.

Return the flag to its home,
To the Land of Liberty,
In God we trust, in justice we must
Let all the world be free.

Return the flag to its home,
Let it wave o'er you and me,
We want no slaves, but a nation of braves,
Who love their liberty.

Return the flag to its home,
It is our Nation's pride;
A determined band, for freedom we stand,
For this our fathers died.

Return the flag to its home,
For freedom our hearts are strong,
We'll welcome the free, whoe'r they may be,
Our country must do no wrong.

Return the flag to its home,
To the land of the blest and free,
And we'll ring the bell that rang so well
On the Natal day of liberty.

W. H. RAMSEY.

Independence, Calif.

Christmas at the Reward Mine

The children at the Reward Mine and of the immediate vicinity were made happy with a Christmas tree, and the same was loaded with many presents and good things that Santa manufactures for good little boys and girls in his northern home. Owing to the fact that Old Santa was so very busy attending the numerous Xmas trees throughout the country, he secured Mr. Quinn, of the Reward cyanide plant, to impersonate his royal highness, and thereby hangs a tale to the effect that during the distribution of the presents, Kris Kringle's furry robes were ignited and the fire department was called out to extinguish the flames. We are glad to report that Mr. Quinn is O. K.

We are credibly informed that twenty men are on the pay roll at the Barnes & Anderson mine. The shaft is down over 100 feet, the whim in place and ready to operate, and they have a 3-foot ledge of good ore at the bottom of the shaft. The prospects are indeed flattering. The drift being advanced over 200 feet. A drift on the 100-feet level will be started as soon as possible.

Our Rev. Pardee is papering, painting and repairing the parsonage. He informs us that he is strong in this line, and that he intends to renovate the whole structure. We wonder what this means?

Mrs. Nathan Rhine, assisted by Mesdames Gunn, Irwin and Webb, will receive New Year's from 2 to 7:30 p. m., at her residence on Center street.

R. W. Correll, Supt. of the work now in progress at the Barnes & Anderson mine, was in town on Thursday.

Real Estate Transfers.

The following deeds have been recorded since December 22, 1899:

R. A. Hoskins to A. M. Strong—Mining claims near Reward mine—$40.

John A. Banfield to J. V. Dover—Mining property, Ballarat—$25.

James McDonald to Patrick Reddy—Mining property, Wild Rose—$5.

Harry Cramer to Jeannette Goodman lat. Brown Monster mining property—$1.

At Luning, 125 miles from Mound House with Gilmer, Salisbury & Co's tri-weekly stages leaving Tuesday's Thursdays and Saturdays, at 8.00 a. m., for Downieville, Grantsville, etc.

At Candelaria, with U. S. Stage Company's stages from Columbus, Silver Peak, Montezuma, Alida Valley, Gold Mountain, etc.

At Keeler, with stages from Cerro Gordo, miles, Darwin, 22 miles, and Panamint.

This road has a first-class equipment, is opening up new and most promising mining districts, farming and grazing valleys. West of Owens River Valley the Sierra Nevadas rise rapidly to an imposing height and are easy of access. A trip to Mt. Whitney, the "Nose" of the Sierras, and to the cataracts and great canyons of the south fork of Kings river, offer the tourist a new and unsurpassed region—one soon to become famous.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above. Round Trip Tickets for sale at Ticket Office Reno.

NOTICE.

TO ALL WHOM IT MAY CONCERN:

I, the undersigned, hereby caution all persons against buying any interest in the following-named mines:

"Lookout Mine," "Copper Mine," "Contact Mine," "Chief Mine," "Little Mamie Mine," "Esmeralda Mine," and "Excelsior Mine," supposed to be owned by J. H. Lohmeyer and situated in the Mameva Mining Dist, Inyo County, California, and from J. H. Lohmeyer, owing to failure to fulfill contract.

JOHN BAXTER.

Dated at Manse, Nye Co., Nevada, September 30, 1899.

NOTICE.

TO ALL WHOM IT MAY CONCERN: Notice is hereby given that the undersigned, owners of those certain mines or mining claims situate, lying and being in the Union Mining District, County of Inyo, State of California, commonly known and designated as the "Alhambra" and and "Black Eagle" mines, have made and entered into an agreement to sell said mines to Peter Kimberly; that said agreement is now of record in Book "A" of Bonds, page 294, records of said Inyo County; that under the terms and conditions of said agreement the said Kimberly has the right to work said mines at his sole cost and expense; that from the date hereof the said mines, nor the ores produced therefrom, nor the undersigned will be liable or responsible for any labor or improvements done or made upon the said mines, or for any material furnished therefor by any person without a written order from said undersigned.

Dated November 25, 1899.

PARKE BARNES.
E. T. ANDERSON.

PROPOSALS FOR BUILDING A BRANCH JAIL AT BALLARAT.

NOTICE IS HEREBY GIVEN, that pursuant to an order of the Board of Supervisors of the County of Inyo, State of California, made October 6, 1899, sealed proposals will be received for the construction of a Branch Jail in the town of Ballarat, County of Inyo, State of California, to comply with the following specifications:

The Building to be 14x16 feet, walls 10 feet hihg, with two cells, 7x10 feet; one ventilator 12x12 inches on top of each cell; all walls to be double, of 1x12 surfaced lumber, inside diagonal; 4-inch battens on joints outside; wall of cells partition to be diagonal double; building to stand on rocks 1 feet apart; sills, 4x4, floor joists, 2x8; ceiling joists rafters and plates, 2x4; double floor and ceiling 1x12 surfaced; sheeting, 1x6; roof, redwood shingles, 4½ in. to weather; three double doors, 2x4x6 ft. hung with iron hook hinges ¾x1½ in., with bolts ¾ in. hasp and staple bolted on; door to be built of 1x12, 3 in thick; 3 pad locks.

All bids must be sealed and indorsed "Proposal for Building a Branch Jail at Ballarat," and addressed to the Clerk of the Board of Supervisors, the same to be received not later than 10 o'clock a. m. on THURSDAY, the FOURTH day of JANUARY 1900, and will be opened by the Board at 2 o'clock p. m. of said day. The Board hereby reserves the right to reject any or all bids.

A. C. FREEMAN, Chairman.
Attest: D. J. HESSION, Clerk.

Lodge 221, F. & A. M.

SURVEYOR

—AND—

U. S. Deputy Mineral Surveyor

For California and Nevada.

—BISHOP CREEK, INYO CO., CAL.—

The obtaining of United States mineral patents a specialty.

All kinds of surveying [illegible]

Still More Counterfeiting.

The Secret Service has just unearthed another band of counterfeiters and secured a quantity of bogus bills, which are cleverly executed. Things of great value are always selected for imitation, notably Hostetter's Stomach Bitters, which has many imitators but no equals for disorders like indigestion, dyspepsia and constipation.

No, Maudie, dear, the husking bee is not a kissing bug.

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight or new shoes feel easy. It is a certain cure for Ingrowing Nails, sweating, callous and hot, tired, aching feet. We have over 30,000 testimonials. Try it *to-day*. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

Few men would like their wives to know what they really think of themselves.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address,

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.
Hall's Family Pills are the best.

I shall recommend Piso's cure for Consumption far and wide.—Mrs. Mulligan Plumstead, Kent, England, Nov. 8, 1895.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd., 931 Arch st, Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Not Allowed to Read the Bible.

But few people know that in the sixteenth century an Englishman was not allowed to read the Bible, yet it is perfectly true. Henry VIII issued a decree prohibiting the common people from reading the Bible. Officers of state were exempt from this law. Probably the king thought these officials would be none the worse for perusing the sacred work, and noble ladies or gentlewomen might read the proscribed volume if they did so in their gardens or orchard, but no one was allowed even to read it to the lower classes.

During the reign of Catholic Queen Mary even more rigorous restrictions were enforced. Dr. Franklin, in his own "Life," preserves an anecdote which admirably illustrates this. His family had early adhered to the reformation, and they possessed an English Bible, which they concealed by fastening it beneath the lid of a close stool. When the doctor's great-grandfather desired to read to the family, he reversed the lid of the stool upon his knees and passed the leaves from one side to the other, each portion being fastened down with pack threads. One of the children was stationed at the door on the watch to see if an officer of the spiritual court came in sight. When such an individual hove in sight, the lid, with the Bible beneath it, was quickly replaced. This was in "Merry England."—Scottish Nights.

The Bet Won the Case.

"In one of the remote counties of the Panhandle of Texas," says Law Notes, "two lawyers were trying a case before a justice of the peace. It was 60 miles as the crow flies to the nearest law book, and the attorneys differed, of course, as to the law upon the main issue in the case. They were trying the case without the intervention of a jury, and his honor, who conducted a gambling house in connection with his hotel, saloon, livery stable, stud horse and jackass, was in doubts as to what his decision ought to be.

"Finally Miller, the plaintiff's counsel, offered to bet Hoover, the defendant's attorney, $10 that he was right. Hoover did not happen to have that much of the circulating medium concealed about his person, and was naturally at a loss how to parry this forcible argument.

"The court waited a few moments on Hoover, and finally said: 'Well, Mr. Hoover, the court has waited long enough. Miller's proposition seems to be a fair one, and, since you don't put up, I will decide this case in favor of the plaintiff.'"

Tea Drinking.

Tea drinking was regarded as one of the feminine vices of a hundred years ago. The Female Spectator of that period observes: "The tea table costs more to support than would maintain two children at nurse. It is the utter destruction of all economy, the bane of good housewif'ry and the source of idleness."

Rather be sweet in spirit than strong in muscle.

"Necessity is the Mother of Invention."

It was the necessity for an honest, reliable blood purifier and tonic that brought into existence Hood's Sarsaparilla. It is a highly concentrated extract prepared by a combination, proportion and process peculiar to itself and giving to Hood's Sarsaparilla unequalled curative power.

Its wonderful record of cures has made it America's Greatest Medicine.

Rosy Cheeks — *"I have good health and rosy cheeks, thanks to Hood's Sarsaparilla. It builds me up and saves doctor bills." Mary A. Burke, East Clair St., Indianapolis, Ind.*

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; the non-irritating and only cathartic to take with Hood's Sarsaparilla.

LET US ALL LAUGH.

JOKES FROM THE PENS OF VARIOUS HUMORISTS.

Pleasant Incidents Occurring the World Over—Sayings that Are Cheerful to Old or Young—Funny Selections that You Will Enjoy.

Confirmed Plaster.

"Marry you?" the young woman scornfully exclaimed. "I wouldn't marry you if you were——"

"Jupiter Olympus, the Czar of Russia, or the Count of Monte Cristo?" sarcastically interrupted the young man.

"No!" she rejoined, with increasing scorn. "Not even if you were the man who sent Dewey to the Philippines!"—Chicago Tribune.

On the Briny Deep.

"There is one good thing about an ocean voyage," remarked the globe trotter.

"What is that?" queried his companion.

"Why, a man can get as tight as he pleases every day and everybody will think he is only seasick," answered the traveler.—Chicago News.

Power of the Free Pass.

"Did old Skinflint object to his daughter marrying an actor?"

"No. It was shown to him that he could get free seats every time his son-in-law comes to town."—Philadelphia North American.

Absent-minded professor (mistaking hair brush for a mirror)—Really, I do need a shave.

Wonderful Development.

Watts—The development of the sense of touch in the blind is something always a wonder to me.

Gotrox—I have it pretty well developed myself. I have got it so I can tell a borrower two blocks away.—Indianapolis Journal.

A Dangerous Man.

Halfback—We ought to get that young freshman from Oklahoma on the football team.

Center Rush—Why?

Halfback—The boys tried to haze him last night, and six of them are in the hospital to-day.—New York Journal.

Objected to the "Coon Song."

"What's dat you wah singin'?" asked the old man.

"Dat's de lates' coon song," answered Mr. Erastus Pinkley.

"Well, you oughter go on 'bout yoh work, 'stid o' makin' yohself laughable tryin' to imitate white folks' ways."—Washington Star.

Unavoidable.

Reporter—Was that accident unavoidable?

Railroad President—Certainly, sir, certainly. No one to blame. You see the watchman had two crossings to look after, half a mile apart. You can't expect a man to be in two places at once, can you?—New York Weekly.

Knew What to Expect.

"Is you on duty, policeman?"
"Yes, miss. Why?"
"'Cause I'm lost!"—Punch.

Coffee for Breakfast.

Doctor—Dyspepsia, eh. You want to drink a cup of hot water first thing every morning.

Patient—I always do. My boarding mistress invariably serves coffee for breakfast.—Philadelphia Record.

Always "Out" Up to 1 A. M.

Wife (pathetically)—Are you going to be out until after midnight again to-night?

Husband—Oh, I suppose so! I never seem to have any luck until about 1 o'clock.—Detroit Journal.

Speaking of the Muse.

Tommy—Pop, are there nine Muses?

Tommy's Pop—Yes, my son; according to mythology.

Tommy—Is that why a cat has nine lives?—Philadelphia Record.

Almost a Suicide.

Biggs—I nearly killed my barber this morning.

Boggs—Judging from the appearance of your face I shou'd say he nearly killed you.

Biggs—It amounts to the same thing. I shave myself.—New York Journal.

There's Many a Slip.

Toffer—Have a cigar, old boy. I'm afraid, though, they are not very good. In fact, they may be worse than those I gave you last.

Friend (in a burst of politeness)—Impossible, my dear boy, impossible.—New York Weekly.

Such Is Life.

Jimmie—Gee! De paper says dat dey ain't room fer all de kids ter go ter school. Mebbe we won't hafter go dis year.

Tommy—Betcher life we will! De kids wot likes ter go ter school is de only ones wot gits ter stay away.—San Francisco Examiner.

Amateur Theatricals.

Mabel (the heroine)—Oh, dear! The curtain will rise in five minutes. Are you sure you will know your lines?

Jack (the hero)—All except the part where I kiss you. I think we'd better rehearse that once more.—New York Journal.

The Ways of Women.

Alfred, dear, I've one favor to beg of you—if we meet the Strebels be as attentive and affectionate toward me as you can! You see, Frau Strebel is always hateful to me, and her husband is as selfish and inconsiderate in his treatment of her as you are ordinarily with me.—Heitere Welt.

Two Gossips.

Mrs. Podd—I'd tell you something if I thought it wouldn't go any further.

Mrs. Pepper—You needn't be afraid. I guess I'll never see the day I can make a piece of news go farther than you can.—Philadelphia Bulletin.

Needs More Practice.

Mrs. Nexdore—Our minister evidently doesn't believe in practicing what he preaches.

Mrs. Nabor—How do you mean?

Mrs. Nexdore—Well, he seems to have so much difficulty delivering his sermons.

When to Be in Dead Earnest.

"We want a clergyman who can see a joke."

"I can see a joke all right, but I don't want any humorous arrangements about my salary."—Chicago Record.

Sociability.

Wimper—Spunger is a very sociable sort of fellow, isn't he?

Sharpe—Yes, he's always trying to borrow money.

Pos-Mortem Improvements.

"O, things will go better in this world when the fools are all dead, but we sha'n't be here to see it!"—Polichinelle.

Crushed Him.

The Shoe Clerk—Beg your pardon, madam, but it is a number five shoe you want, instead of a number three.

She—Number five! You must be thinking of the size of your hat.—Indianapolis Journal.

The Duet.

"Did Madge Simpson enjoy her trip to the Dewey celebration?"

"I don't know; she talked about it all the time I was there, but I was busy talking to her about my trip to the mountains."—Detroit Free Press.

At the Amateur Performance.

First Gentleman in the Lobby—Has the curtain fallen on the first act?

Second Gentleman in the Lobby—Better than that! It has fallen on the head of the leading man and knocked him senseless.—Somerville Journal.

A Strong Defense.

Mother—Why did you let him kiss you?

Daughter—How could I help it? He was holding both my hands, and I couldn't kick him, could I?—New York Journal.

Winning Argument.

The Invalid—But I am already gaining great benefit from Bogger's Onion Ointment.

The Agent—Yes, and if it should cure you, all you would get would be a single column wood cut; whereas, if you use our remedies you will surely find relief, and the two-column art etching we will print in all the principal papers of the country will be something to gaze on with pride.—Indianapolis Journal.

Cecil Rhodes' Ambition.

Sixteen years ago Cecil J. Rhodes, then a man of small means and no political record, stood in a small Kimberley shop and looked for a long time at a map of Africa which hung on the wall. An acquaintance who had watched him for several minutes stepped up to Rhodes and asked him whether he was attempting to find the location of Kimberley. Mr. Rhodes made no reply for several seconds, then placed his right hand over the map and covered a large part of south and central Africa, from the Atlantic to the Indian Ocean. "All that British!" he said. "That is my dream." "I will give you ten years to realize it," said the friend. "Give me ten more," said Rhodes, "and then we'll have a new map." Three-fourths of the required time has passed and the full realization of Rhodes' dream must take place within the next four years.

Peas and Beans Nutritious.

Peas and beans are the most nutritious of vegetables, containing as much carbon as wheat and double the amount of muscle-forming food.

Insomnia

Did you ever have that feeling of oppression, like a weight on your chest, or a load of cobble-stones in your stomach, keeping you awake nights with a horrible sensation of anxiety, or tossing restlessly in terrible dreams, that make the cold perspiration break out all over you? That's insomnia, or sleeplessness, and some unfortunates suffer with it night after night, until their reason is in danger and they are on the edge of going mad. The cause of this fearful ailment is in the stomach and bowels, and a Cascaret taken at night will soon bring relief and give the sufferer sweet, refreshing sleep. **Always insist on getting CASCARETS!**

"I have been using CASCARETS for Insomnia, with which I have been afflicted for over twenty years, and I can say that Cascarets have given me more relief than any other remedy I have ever tried. I shall certainly recommend them to my friends as being all they are represented."
THOS. GILLARD, Elgin, Ill.

The Coldest.

Cascarets

THEY WORK WHILE YOU SLEEP

10c. 25c. 50c.
DRUGGISTS

CASCARETS are absolutely harmless, a purely vegetable compound. No mercurial or other mineral pill-poison in Cascarets. Cascarets promptly, effectively and permanently cure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhœa and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Be sure you get the genuine! Beware of imitations and substitutes! Buy a box of CASCARETS to-day, and if not pleased in every respect, get your money back! Write us for booklet and free sample! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK. 280

Ebony.

Ebony was known and highly esteemed by the ancients as an article of luxury and was used by them for a variety of purposes.

In India it is said that it was employed by kings for scepters and also for images. On account of its supposed antagonism to poisons, it was used largely for drinking cups.

The name ebony is given to the wood of several varieties of trees. All kinds of ebony are distinguished for their great density and dark color. The wood in all varieties is heavier than water. The heaviest varieties are the darkest. The other grades require a considerable amount of staining to make them black.

Ebony is of a uniform color throughout and will not show any deterioration even from long continued use.

There are three varieties of ebony well known in commerce. The ebony from the Gaboon coast of Africa is the darkest. The Madagascar ebony is the densest. The Macassar ebony furnishes the largest pieces. It is sold by weight.

Imitations of ebony can always be distinguished by their lighter weight, and the cheaper imitations can be detected by merely scratching the surface.—Jewelers' Weekly.

A Mexican Gambler.

Don Felipe Martel, the famous gambling house proprietor of the City of Mexico, had made a fortune in the business before the government decided to abolish gambling houses by levying on them a license tax of $1,000 a day. One by one the gambling houses closed, and when the field was clear Don Felipe Martel approached the authorities with $1,000 in cash and demanded a day's license. In a few hours his place was thronged. At a single stroke he had won the patronage of Mexico, and his doors have never been closed since. The daily outlay of $1,000 is not missed from the daily revenue of thousands. His strong religious tendencies are so well known that nobody was surprised when he built in the village of San Angel a church that cost more than $50,000. The poor people of the vicinity, and many of the rich as well, have come to regard him as a sort of fairy prince. His own style of living encourages this belief. The Martel mansion in the City of Mexico is a magnificent affair, constantly filled with guests. A curious feature is that it contains 40 windows—the number of cards in the Mexican deck.

Enormous Pendulums.

The only structures in Japan which seem to be earthquake proof are the pagodas, which are erected before the temples. There are many which are 700 or 800 years old and as solid as when first built.

There is a reason for this and it lies in their construction. A pagoda is practically a framework of heavy timbers, which starts from a wide base, and is in itself a substantial structure, but is rendered still more stable by a peculiar device. Inside the framework and suspended from the apex is a long, heavy beam of timber two feet thick or more. This hangs from one end of the four sides; four more heavy timbers, and if the pagoda be very lofty still more timbers, are added to these. The whole forms an enormous pendulum, which reaches within six inches of the ground.

When the shock of an earthquake rocks the pagoda, the pendulum swings in unison and keeps the center of gravity always at the base of the framework. Consequently the equilibrium of the pagoda is never disturbed, and this is the explanation of the great age of many of them, when from their height one would suppose them to be peculiarly susceptible to the effects of the earthquake.

Origin of the Dolly.

From the name of Robert D'Oyley originated the word dolly. A grant of land was given to him in the reign of William of Normandy on condition that he should give yearly a tablecloth of at least 3 shillings' value at the feast of St. Michael.

According to the custom of the times, the women of his family were skillful with the needle and felt great pride in embroidering their "quit rent tablecloths." In time these cloths came to be valuable and were used as napkins at the royal table. They were called "D'Oyleys."

He Couldn't Help It.

The funniest interview I ever had or heard of, relates Julian Ralph in his reminiscences, was when I was on the staff of the New York Sun. I had been sent to look up some one in a suburb of the city. The address was a number on Fourth street, but, to my amazement, I found three such streets in the place. The house I sought was not in any of them. Tired and almost discouraged I turned into a cobbler's shop, and seeing a bearded German bending over a last in the glare of a swinging lamp, I cleared my throat and said:

"I beg your pardon, but I am a reporter of The Sun"—

"Well, well," he said soothingly, before I could finish the sentence, "you cannot help dot."

I could not continue for a full minute, so struck was I by the unexpected philosophy and wisdom of his reply. I could not help being a reporter, and I knew it. When I explained that I wanted an address on Fourth street, and had already been to three Fourth streets, and would like to know if there were any more, he lifted his hammer and poised it in the air for half a minute.

"You vant to know if dere is some more of dose Fourt' streets?" he asked. "Vell, I vill tell you. I haf lived here dwenty years, trying to find somedings owt, and I didn't find anydings owt yet."

The Elder Booth's Beautiful Reading.

I never heard any one read just like the elder Booth. It was beautiful. He made the figure stand before you! It was infinitely tender. Some of the passages of "Lear" were touching in the extreme, though he used Cibber's frightfully bad edition of that sublime tragedy.

He had some very odd ways at times. We were playing "Hamlet" one night in Natchez, and during Ophelia's mad scene a cock began to crow lustily. When the curtain fell upon that fourth act, this crowing became more constant. And when the manager could not find Mr. Booth to commence the next act he looked up and saw him perched on the top of the ladder, which was the only way to reach the "flies" in that primitive theater.

The manager ascended the ladder and had quite a lengthy discussion with Mr. Booth, who at last consented to come down on condition that he should resume his high position after the play and remain there until Jackson was re-elected president.—"Autobiographical Sketches of Mrs. John Drew," in Scribner's.

Took the Tip.

The good advice of the laird of Waterton, in Aberdeenshire, to a sheep stealer reads like a very practical joke. He had himself sent the man to jail, and in those days sheep stealing was a capital offense. Visiting the prisoner the night before the trial, he asked him what he meant to do. To which the prisoner replied that he intended to confess and to pray for mercy.

"Confess!" said Waterton. "What, man, will ye confess and be hanged? Nae, nae! Deny it to my face."

He did so and was acquitted.

It is not what we have, but what we can do without, that makes us rich. Socrates, seeing a large load of valuables pass one day, exclaimed, "I am most happy, for there are so many things that I do not want!"

FREE
200 PAGE DICTIONARY.

Send us the wrapper of a 25c box of Adams' Sarsaparilla Pills and we will send, delivery paid, elegant 200 page dictionary, last edition. Remember only one to each address.

5 DROPS

The World's Greatest Robber

But All for the Good of Suffering Humanity, for It Robs Them of Diseases.

RHEUMATISM, HAY FEVER, ETC.

[TRADE MARK.]

By the never failing merit and efficacy of "5 DROPS," many diseases have been robbed of their terror, and the grave of many of its victims. Through the prompt and decisive action of "5 DROPS," thousands have been snatched from the jaws of death and restored to health, happiness and friends. Many a person has been told by the attending physician that they were beyond the reach of medical science. Yet today, they live and are a walking advertisement for this remedy, and are likely to reach a ripe old age. This may sound a little skeptical to some, yet **it is true, most positively true.** We make no exaggerated statements in behalf of this remedy; we hold out no false promises to the sick and afflicted. But we say to all of them, it does not matter how many doctors have treated you, how many remedies you have tried, how long you have suffered, if you have any of the following diseases, you can positively be cured by the use of "5 DROPS," for it never fails: **RHEUMATISM, NEURALGIA, SCIATICA, BACKACHE, ASTHMA, HAY-FEVER, CATARRH, TOOTHACHE, NERVOUSNESS, SLEEPLESSNESS, NERVOUS and NEURALGIC HEADACHES HEART WEAKNESS, EARACHE, CROUPE, MALARIA, DROPSY, CREEPING NUMBNESS, BRONCHITIS, LA GRIPPE,** and kindred diseases. So proof positive are we of the effectiveness and highly curative properties of "5 DROPS," backed up by the many thousands of testimonials received from grateful persons from every part of the country, that we are fully warranted in saying "5 DROPS" is daily curing more people than all the remedies on the market combined, and in cases of Rheumatism, it is curing more than all the doctors combined for they cannot cure chronic Rheumatism. "5 DROPS" can and does cure it, regardless of how severe, or how long standing. "5 DROPS" is not alone the best remedy on earth, but is also the cheapest, for a dollar bottle contains 300 doses. Price per bottle, $1.00, prepaid by mail or express, or six bottles for $5.00. Sample bottles, 25c., but for the next thirty (30) days will send sample bottle for 10c. 5 Drops is the name and the dose. Agents wanted.

SWANSON RHEUMATIC CURE COMPANY, 160-164 E. Lake Street, Chicago, Ill.

Would Be a Willing Apprentice.

The head of the Frankfurt house of the Rothschilds recently received a modest request from a young man who stated that the cooper's trade, to which he had been apprenticed, was distasteful to him and asked to be accepted as "an apprentice millionaire," promising diligence and all application in learning "the business."

Too Timid.

Mrs. Plump (trying in vain to squeeze a No. 5 foot into a No. 3 shoe)—This seems a trifle tight, but I'm afraid a No. 4 is too large.

Mr. Plump—You are too easily frightened, my dear.—Ohio State Journal.
